While the utmost care is taken to insure accuracy in the publications of the International Bureau of the American Republics, no responsibility is assumed on account of errors or inaccuracies which may occur therein.

Por más que la Oficina Internacional de las Repúblicas Americanas pone escrupuloso cuidado para obtener el mayor grado de corrección en sus publicaciones, no asume responsabilidad alguna por los errores ó inexactitudes que pudieran deslizarse.

Apezar de se tomar o maior cuidado para se assegurar correcção nas publicações da Secretaria Internacional das Republicas Americanas, esta não se responsabeliza pelos erros ou inexactidões que nellas occorrerem.

Bien que le Bureau International des Républiques Américaines exerce le plus grand soin pour assurer l'exactitude de ses publications, il n'assumera aucune responsabilité des erreurs ou inexactitudes qui pourraient s'y glisser.

FRONT VIEW OF ARCHITECTS' DRAWINGS OF NEW BUILDING OF THE INTERNATIONAL BUREAU OF AMERICAN REPUBLICS.

MONTHLY BULLETIN

OF THE

INTERNATIONAL BUREAU OF THE AMERICAN REPUBLICS,

International Union of American Republics.

VOL. XXV. AUGUST, 1907. No. 2.

The particular attention of the readers of the BULLETIN and of all those interested in the International Bureau of the American Republics is invited to the description, in this issue, of its new building, for which Mr. Andrew Carnegie gave $750,000, and to the photographs of the architects' drawings. While the exterior views are very correct representations of the probable appearance of this noble structure when completed, some changes may yet be made, but they will not be of material importance. The plans of the first and second floors and of the longitudinal section have been modified to some extent since the originals were photographed, but the alterations have added to their dignity and usefulness. These designs were accepted in a competition of the leading architects of the United States and received the unanimous award of a board of judges composed of three of the most eminent experts in the country, acting with the Chairman of the Governing Board and the Director of the Bureau. They approach nearest to the conditions outlined in the official architectural programme which was published in the April issue. The architects are now hard at work in the preparation of specifications on which contractors will make their bids for construction. It is hoped that ground will be broken late in September, and the corner stone laid in the latter part of October or early in November. The growing interest throughout the world in the Bureau and its work is shown by the requests that have reached this office from newspapers and magazines, not only in the United States and Latin America, but in Europe and even in Japan, to be provided with photographs of the architects' drawings for reproduction in their pages.

THE ADVANCING TREND OF PAN-AMERICAN COMMERCE.

There could be no better evidence of the increasing widespread desire for information about Latin America than the demand from all parts of the world for copies of the July, 1907, issue of the

MONTHLY BULLETIN, containing an exhaustive review of the commerce and trade of the twenty Republics south of the United States. Although several thousand extra copies were struck off to meet such calls for the BULLETIN, the supply will soon be exhausted. It is therefore suggested that persons who are particularly anxious to secure this review should make application to the Bureau without delay. It is given complete in both English and Spanish with résumés in Portuguese and French. As there might appear at first considerable discrepancies in the figures quoted as compared with others that appear in this issue, it must be borne in mind that the July review represents the calendar year of 1906, while the brief statement this month covers the commerce between the Latin American Republics and the United States for the fiscal year extending from July 1, 1906, to June 30, 1907. The statement appearing in this issue is based on an excellent bulletin issued August 9 by the efficient Chief of the Bureau of Statistics of the Department of Commerce and Labor of the United States, Hon. O. P. AUSTIN. The totals he gives should convince the most skeptical that the United States has a wonderful field for the expansion of its foreign trade in the Latin American Republics. At the same time they prove that all the nations of Central and South America have great opportunities for the development of their foreign trade in the United States. No countries in any other part of the world are now experiencing greater material prosperity and more real progress than those of the Western Hemisphere. This situation justifies beyond question the value of the work being done by this Bureau.

THE APPROACHING VISIT OF SECRETARY ROOT TO MEXICO.

The visit to Mexico, in the latter part of September, of Hon. ELIHU ROOT, Secretary of State of the United States, and Chairman of the Governing Board of the Bureau, in response to the invitation of President DIAZ, will be an important and logical complement to his tour of South America in 1906. The preparations being made by the Mexican Government and people to make his stay among them notable, show that there is great interest in this event of international significance. It will be another step in the broad policy initiated by the present Administration of the United States Government to get into closer sympathetic touch with the governments and peoples of the other American nations. Although Mexico is geographically nearer to the United States than any other Latin-American nation, the people at large of the United States have not yet fully awakened to the remarkable material development of that Republic and to its general progress along many different lines of political, economic, educational, and social development. Just as Secretary ROOT'S

journey to South America turned the eyes of North America to that part of the world and provided a clearer vision of its mighty potentialities, so now there will be a corresponding direction of attention to Mexico and Central America.

ELABORATE PROGRAMME OF RAILWAY CONSTRUCTION IN LATIN AMERICA.

All indications based on reports which the Bureau is constantly receiving from every part of Latin America point to an extraordinary era of railroad construction during the next few years. There is hardly a country from Mexico to the Argentine Republic that is not planning to increase its mileage in a large measure. It is not improbable that the trackage will be doubled during the coming ten years. So many links in the chain of the proposed Intercontinental or Pan-American Route will be joined together or constructed that the dream of this line bids fair to be realized earlier than its advocates have expected. While it may seem difficult to perfect a scheme by which one through road can be built on which trains could run from New York to Rio de Janeiro, Buenos Aires, and Santiago, the present and prospective plans for construction will so lessen the gaps in the distance that the time is not far away when they will be all connected. It is not an idle prophecy that such distinguished friends of the Intercontinental road as Ex-Senator HENRY G. DAVIS and ANDREW CARNEGIE may live to see its actual completion. Perhaps the most ambitious programme of construction in the near future is outlined for Brazil, with Bolivia a close second in the race. An interesting feature of the plan for new work is that it is to be done in a considerable degree by capital raised in the United States and Canada. Heretofore nearly all the money for South American railways has come from England and Europe.

EVIDENCES AND CONDITIONS OF THE BUREAU'S PRACTICAL WORK.

The practical value of the work being done every day by the Bureau is demonstrated by an inspection of its large correspondence. The number of manufacturers, exporters, merchants, as well as writers, scholars, and travelers, who are seeking information from it has increased so rapidly that the present staff of the Bureau working overtime is barely able to cope with the demand for useful and specific data. These inquiries are not by any means confined to the United States. They are coming from every Latin-American country, and to some extent from Europe, Canada, Japan, Australia, and even India and China. As the Bureau is strictly an international institution, and is working to help the prosperity of each Latin-

American republic as well as that of the United States, it endeavors to answer all questions with impartiality, fairness, and accuracy. It must be borne in mind, however, that there are certain limitations to its scope. It is not in any sense a private institution which can indorse any particular person, company, scheme, or project. It is always glad to furnish information and take such steps as are reasonable and consistent with its responsibility to each of the governments maintaining it, but it can not go further except by authorization from its Governing Board, made up of the diplomatic representatives of the American Republics. This point is emphasized because it seems difficult for some of the correspondents of the Bureau to realize why it can not give them special cooperation or assistance in their plans.

FORMER DIRECTOR FOX, NOW UNITED STATES MINISTER TO ECUADOR.

The International Bureau is pleased to note the good work that is being done in Ecuador by its former Director, Hon. WILLIAMS C. FOX, now United States Minister in that country. Mr. Fox has just been designated arbitrator on behalf of the United States for the settlement of differences that have arisen between the Government of Ecuador and the Quito and Guayaquil Railway Company. Incidentally it can be stated that this road has now reached Latacunga, an important city on the main plateau of Ecuador, and it should be completed to Quito in the near future.

NORTH AMERICAN EDUCATORS IN SOUTH AMERICA.

Numerous press clippings received from the principal Latin American newspapers report the progress that is being made in their travels through different parts of South America by Prof. L. S. ROWE of the University of Pennsylvania, of Prof. WILLIAM R. SHEPHERD of Columbia University, and of Professor TODD, the astronomer of Amherst College. All these men have been well received in the different sections they have visited and have made good impressions. Mr. LEE MCCLUNG, the well-known Treasurer of Yale University, has recently visited the Argentine Republic and Chile, while numerous other eminent American scholars and travelers are planning to become better acquainted with Latin America so that they will be qualified to lecture about this part of the world in their respective institutions.

THE OPINION OF A DISTINGUISHED AMERICAN ENGINEER.

The Bureau received recently a call from Mr. E. L. CORTHELL, the eminent engineer who is connected with the construction of important harbors and waterways in South America. He is enthusiastic over the

future of that part of the world, and prophesies for it a material development that will rival what has been done in North America, Europe, and Asia.

FEATURES OF ARGENTINE COMMERCE AND FINANCE.

The regular quarterly statement of Argentine commerce shows that for the first three months of 1907 there was a reported increase in imports of $3,281,509 over the first quarter of 1906, while exports advanced $10,803,113. A continuation of this ratio throughout the year will effect a readjustment of the trade balance of the Republic more in accordance with economic prosperity than is indicated by the statistics for 1906, when exports declined and imports increased.

A feature of the Argentine budget recently approved by Congress, covering the estimated revenues and expenditures for 1908, is the reduction in governmental disbursements, a policy which has governed the financial administration of the country for the past few years. It is also worthy of note that the public-debt service commands the largest outlay of the gold appropriation, while public works form the principal single item under expenditures of national currency.

BRAZILIAN FLOUR TRADE AND COFFEE MOVEMENTS.

The tariff concessions made to United States flour imports by the Brazilian Government add interest to the comparative data published in this issue as to the status of foreign flour in that country. It is shown that the Argentine product is far in the lead, having grown from 37,235 tons in 1902 to 122,282 tons in 1906, whereas imports from the United States have declined from 46,840 tons to 24,526 tons in the same period. A development of the coffee trade growing out of the operation of the "valorization" project is the issuance of warrants against the coffee stocks to be held in storage at Santos. The Commercial Association of Rio de Janeiro and a highly capitalized company, with headquarters at Sao Paulo, are interested in the enterprise, which will, it is believed, be beneficial to the trade of those commercial centers.

APPROPRIATIONS FOR PUBLIC WORKS IN CHILE.

The sum of $30,000,000 (approximately) has been appropriated by the Chilean Government in its budget for 1908 to be applied to public works throughout the Republic. Railroad construction on an extensive scale is planned, while the rebuilding of Valparaiso, an extended sewerage system for Santiago, port improvements and hydraulic works

in various cities, bridge construction, and the erection of new governmental and school buildings are included in the projected developments. The increase in customs receipts reported for the current year and the satisfactory status of public banks are guaranties for the availability of the funds required for the purpose.

FOREIGN COMPANIES AND CORPORATIONS IN COLOMBIA.

The regulations governing foreign companies or corporations establishing permanent business enterprises in the Colombian Republic provide that the charters and by-laws of said companies shall be filed in the office of the notary of the municipality where the enterprise is located within six months of inaugurating the same. This term is extended to one year for companies having a previously established business in the country. It is further required that, at the headquarters of the company, an agent be retained whose special function shall be to represent the company before the national authorities. It is the desire of President REYES to attract moneyed enterprises to the Republic, and Government aid and protection are promised and guaranteed to the fullest extent.

IMMIGRATION PROPAGANDA IN COSTA RICA.

The purpose of the Costa Rican Government to increase the population of the country is evidenced by a recent enactment whereby the President is authorized to expend annually, during a period of eight years, the sum of $20,000 for the encouragement of immigration. To white agriculturists, speaking Spanish preferably, as their native language, free passage to the country is offered. The fertility of the soil and its adaptability to the cultivation of various articles of value in the world's markets are amply set forth in the annual report of the Minister of Finance and Commerce, extracts of which have been translated for this Bulletin.

CUBAN REAL ESTATE AND LIVE STOCK BUSINESS.

Real estate in Cuba has an estimated valuation of $342,758,133, the annual rental of which is given as $32,469,043. From August 1 a very important law comes into effect in Cuba, having for its purpose the development of improved live stock throughout the island. Female sheep and cattle of specified breeds under six years of age are to be admitted free of duty. The live stock of the country has been replenished during recent years by large shipments received from

Venezuela, Mexico, and other adjacent districts, and it is now designed to foster, in every way possible, the establishment of extensive cattle ranges, with their attendant industries.

IMMIGRATION AND COLONIZATION IN ECUADOR.

Ecuadorian development is being furthered through the granting of concessions to colonizing companies endowed with special privileges by the Government. One recently contracted provides for the settlement of 5,000 white families, Dutch or German preferred, within ten years, on public lands covering 500,000 hectares. The concession carries with it the obligation to erect churches, schools, shops, and dwellings, to construct a permanent railroad, and to deposit a guarantee fund with the Ecuadorian Government for the fulfillment of the contract.

GOVERNMENT OWNERSHIP OF RAILWAYS IN MEXICO.

No more important legislative measure has been effected in recent years in Mexico than that covered by the decree of July 6, 1907, whereby President DIAZ approved the formation of a stock company of limited liability between the Mexican Government and seven or more stockholders of the National and Central Railway Companies. In the operations of the consolidated company the payment of certain bonds is guaranteed unconditionally by the Mexican Government. The latter also participates equally with other stockholders in all dividends accruing from the working of the lines.

OTHER BULLETIN ITEMS.

The regulations governing Dominican port dues, in view of the great interest taken in the commercial status of the Republic, are of present value and have been summarized for this issue. In Nicaragua the imposition of a surcharge on certain specified classes of merchandise was found too onerous, and has consequently been remitted for the present. The issuance of a new nickel coinage for Panama will greatly facilitate business transactions within the Republic, and the establishment of weekly communication between Bocas del Toro and Puerto Limon will enlarge its external commercial range. The published budget law of Salvador for 1907–8 makes ample provision for the needs of the Government for the period covered, while the ratification of the numerous international conventions cited in this BULLETIN indicate the desire of the Republic to keep in touch with other lands for their mutual benefit. Interesting data is published covering Uru-

guay's foreign trade for the first half of 1906—the latest authentic statistics—and Venezuelan commercial transactions with the port of New York, as reported by her own consular representative, are brought up to the end of May, 1907.

MAGAZINE ARTICLES ON LATIN AMERICA.

Noteworthy as a sign of the times is the added space given to Latin-American affairs and their attendant interests in various publications, both popular and scientific. Among the August magazines of the United States dealing with the subject may be mentioned the following: The "Review of Reviews," publishes a paper on South American railroad building, by LEWIS R. FREEMAN; the "National Geographic Magazine" makes its initial article "Mexico, the World's Treasure House," by NELSON H. DARTON; the "Outlook" has a consideration of school and college life in Brazil and the Argentine Republic by SYLVESTER BAXTER; in the "World's Work" EUGENE P. LYLE describes "Mexico at High Tide," while special editions of newspaper supplements are devoted to a practical consideration of the aspects of Latin-American life and development.

THE NEW BUILDING OF THE INTERNATIONAL BUREAU OF THE AMERICAN REPUBLICS.

In this issue are reproduced for the first time the architects' drawings for the new building of the International Bureau of the American Republics. These include 5 photographs: A perspective of the front and side views, a perspective of the rear and side views, the longitudinal section, the plan of the first floor, and the plan of the second floor. There will be a number of important changes in these designs and plans, but the pictures published will give a fair idea of the character of the new structure. Over 70 architects, out of 130 who registered in the competition, submitted drawings, and the Jury of Award, made up of the Secretary of State, Hon. ELIHU ROOT, the Director of the Bureau, Mr. JOHN BARRETT, and three of the leading architects of the country chosen by a vote of the competitors, Mr. CHARLES F. MCKIM, Mr. HENRY HORNBOSTEL, and Mr. AUSTIN W. LORD, of New York, rendered a unanimous decision in favor of ALBERT KELSEY and PAUL P. CRET, associated architects, of Philadelphia.

While many of the other designs were more elaborate, and while a few of them may have possessed equal architectural merit, they entailed greater expenditure, and the winning plans were easily first among those that could be carried out for the sum at the disposal of

REAR VIEW OF ARCHITECTS' DRAWINGS OF NEW BUILDING OF THE INTERNATIONAL BUREAU OF AMERICAN REPUBLIC .

the Bureau. It will be remembered that Mr. ANDREW CARNEGIE, through the Secretary of State of the United States, Mr. ELIHU ROOT, generously gave $750,000 for the building. This was apart from $250,000 appropriated by the United States and the other American Republics for the same purpose. The money contributed by the Governments has been used in the purchase of a beautiful site and in preliminary work. Of the total amount given by Mr. Carnegie $600,000 will be devoted to the construction of the building proper and $150,000 will be assigned to furnishings and decorations.

The architects are now busily engaged preparing the specifications and it is hoped that the construction contract will be placed by the 1st of October, 1907. The laying of the corner stone should occur early in November, and will be made a notable international event. If all goes well, the structure should be completed within a year and a half, so that the date is not far distant when every Republic of the western hemisphere will feel that it has a home or headquarters of its own in the United States. Inasmuch as the International Bureau is supported by all of the 21 American nations, this new "Temple of Commerce and Comity" will be strictly the home of an international institution, belonging to the smallest, as well as to the largest, of the American Governments and peoples.

It will be located on one of the most commanding sites in the city of Washington. The block which it will occupy has often been described as Van Ness Park, and was intended to be used by the George Washington University until the latter institution changed its plans and sold the property to the International Bureau. The ground area covers about 5 acres, or 2 hectares, and is bounded by Seventeenth street on the east, B street on the south, Virginia avenue on the southwest, Eighteenth street on the west, and C street on the north. The building will face to the east, or on the broad expanse of the Executive Grounds in front of the White House, the residence of the President of the United States. The southern exposure will be toward the Potomac Park and the Potomac River, while on the southwesterly side it will look out toward the Speedway and across the Potomac to the hills of Virginia. The ample grounds surrounding the building will permit of handsome garden and landscape effects.

The dimensions of the structure will approximate 160 feet by 160 feet, or about 50 meters by 50 meters. The exterior will be notable for its attempt to epitomize in a modern way the best elements of that architecture borrowed from Spain and Portugal which adorns so many of the beautiful cities of Latin America. It will be suggestive of the style of construction which characterizes the principal buildings in the Latin American Republics, including such classical and monumental effect as will bring it into harmony with the general plan of the improve-

ment of the city of Washington which was drawn up several years ago by DANIEL BURNHAM and CHARLES F. MCKIM, two of the foremost architects of the United States. Only a short distance away stands the splendid shaft of the Washington Monument. Just to the north is the new building of the Society of the Daughters of the American Revolution. Only two blocks farther to the north is the stately edifice of the Corcoran Art Gallery. Not far away is the State, War, and Navy building, the White House, and the Treasury Department. On the opposite side of the Executive Grounds will probably be erected in a few years the new building of the State Department. It will therefore be seen that it would be difficult to select a more appropriate location.

The building will be approached by a broad and dignified driveway and entered through three monumental doors of the Spanish grill type. On either side of the main entrance will be two heroic female figures in marble, symbolizing North and South America, respectively. Broad marble steps will lead up to the bronze gates that will open upon a high-studded, dignified vestibule, approximately 25 feet wide.

This in turn will open upon one of the principal Latin American features of the building—a large patio, occupying some 2,500 square feet, in the center of which will be a fountain, and which will be ornamented with flora characteristic of South American countries. Over this will be a sliding glass roof, which will remain open in the summer and be closed in the winter. On each side of the patio and separate from it will be monumental stairways leading to the upper floor. Two long corridors reach down the side of the first floor, the one on the left leading to the offices of the general staff of the Bureau, while on the right will be the stack room of the Columbus Memorial Library and the offices of the Librarian and his assistants. From the patio there will extend a foyer about 22 feet wide, opening into a large reading room nearly 100 feet long and 60 feet wide. This will be partially subdivided into sections for exhibits, books of reference, periodicals, maps, etc. At the left and right, respectively, of the entrance to the building will be cloak and dressing rooms for men and women, to be used when receptions or general functions are given in the main assembly hall on the second floor.

Although elevators will be provided, the principal approach to the second floor will be by the staircase already described. These will terminate in a broad foyer, which will, on the one hand, overlook the patio and, on the other, open into the beautiful assembly room, which may be termed the "Hall of American Ambassadors." This hall will occupy a space 101 feet long by 65 feet wide, and be finished in such a dignified, handsome style as to make it suited for international conferences, receptions in honor of distinguished visitors to Washington, diplomatic functions, balls, and kindred gatherings. On the left of

the "Hall of American Ambassadors" will be the room of the Governing Board of the Bureau, where the diplomatic representatives of the American Republics, presided over by the Secretary of State of the United States, will meet regularly to consider the work of the Bureau. On the right will be three large committee rooms. Both the room of the Governing Board and those for committees will so connect with the main hall that all can be thrown together and make the largest and most elegant assembly room of its kind not only in the national capital, but in the United States. The rear of the hall will look out upon a terrace and garden that will be approached by grand staircases. It is the intention that this "Hall of American Ambassadors" shall be appropriately decorated by representative American artists, so that it will typify Pan-American history and progress. The paintings upon its walls will trace the history of the Western Hemisphere, while statues and portraits of eminent Pan-American statesmen will add to its attractions.

The arrangement of space for the remainder of the second floor includes capacious rooms on the southern side for the Director of the Bureau, with his private secretary and stenographers, and for the Secretary of the Bureau, with his assistants. On the northern side will be the second story of the stack room and another large committee room. There will also be provision for service and caterer, so that the assembly hall or committee rooms can be used for banquets.

In the basement will be ample provision for boilers, fuel, storage of documents and books, for receiving and distributing rooms, and accommodations for janitors and other employees. The offices on the first and second floors for the staff of the Bureau will be fitted with vaults and various efficient devices calculated to expedite and facilitate the business of developing Pan-American commerce and comity. The building will be thoroughly fireproof in every respect. The only wood used will be that for the furnishings and decoration. Included in the latter will probably be specimens from the rarest and most beautiful growths of the various South American republics. The trimmings of the exterior will be in marble. The main portion of the building will be constructed of concrete with a Latin-American stucco finish, having the interior cornices and trimmings finished in polychrome terra cotta. The patio, which forms the heart of the building, surrounded by monumental staircases, arcades, and corridors, upon which all the offices, as well as the Columbus Memorial Library and the assembly hall above open, will be the point where visitors will gather the strongest impression of the interior. From the point where the vestibule joins the patio an impressive view will be had looking through the library and across its broad terrace out upon the parterre beyond, while above will be seen the noble foyer and lofty hall of ambassadors, and above that the sloping tiled roof of its dome.

The architects have so far considered the purpose of the new building for the International Bureau of American Republics, that, unlike most other governmental buildings, this one will be devoted to signifying and perpetuating the "*entente cordiale*" among all the American nations. It will be businesslike throughout, but it will provide for orderly and elegant entertainment of distinguished bodies. On occasions of ceremony, the entire structure, opening upon an ample and inspiring patio, will become a fitting meeting place for foreign Ambassadors and delegates to international conferences, while its peculiar architecture, its beautiful rooms, its excellent library of Americana, and its working facilities for providing all kinds of information concerning the commercial, economic, intellectual, historical, scientific, and social features of the American nations will attract daily a considerable portion of the visitors to Washington.

DELEGATES OF THE AMERICAN REPUBLICS TO THE SECOND PEACE CONFERENCE, THE HAGUE, 1907.

In view of the importance attached to the consideration of Latin-American affairs at the Second Peace Conference and the prominent place the Drago doctrine has occupied in the minds of the conferees, the BULLETIN publishes, in full, the list of delegates charged with American representation at The Hague in 1907.

Argentine Republic.—Señor Don ROQUE SAENZ PEÑA, Señor Don LUIS M. DRAGO, Señor Don CARLOS RODRIGUEZ LARRETA, delegates plenipotentiary; Gen. FRANCISCO REYNOLDS, Commander JUAN A. MARTIN, technical delegates; Señor Don ROMULO S. NAON, secretary-general to the delegation; Señor Don JUAN CARLOS CRUZ, Señor Don CARLOS A. BECÚ, secretaries to the delegation.

Bolivia.—Señor Don CLAUDIO PINILLA and Señor Don FERNANDO E. GUACHALLA, delegates.

Brazil.—Senhor Dom RUY BARBOSA and Senhor Dom EDUARDO F. S. DOS SANTOS, delegates; Col. ROBERTO TROMKOWSKY LEITAO DE ALMEIDA and Capt. TANCREDO BURLAMAQUI DE MOURA, technical delegates; and Senhores ARTHUR DE CARVALHO MOREIRA, CARLOS LEMGRUBER KROPF, RODRIGO OCTAVIO DE LANGGAARD MENEZES, ABELARDO ROCAS, JOSÉ R. ALVES, A. BAPTISTA PEREIRA, LEOPOLDO DE MAGALHAES CASTRO, and FERNANDO DOBBERT, secretaries.

Chile.—Señor Don DOMINGO GANA, Señor Don AUGUSTO MATTE, and Señor Don CARLOS CONCHA, delegates plenipotentiary; Señor Don L. ALDUNATE, attaché to the delegation; Señor Don FELIPE ANINAT, second secretary to the delegation.

Colombia.—Gen. JORGE HOLGUÍN, Señor Don SANTIAGO PEREZ TRIANA, and Gen. M. VARGAS, delegates plenipotentiary; Señor Don EDUARDO PEREZ TRIANA, secretary.

Cuba.—Señor Don ANTONIO SANCHEZ DE BUSTAMANTE, Señor Don GONZALO DE QUESADA Y AROSTÉGUI, and Señor DON MANUEL SANGUILY, delegates plenipotentiary; Señor Don ORESTES FERRARA, secretary; Señor DON FERNANDO SANCHEZ DE FUENTES, second secretary.

Dominican Republic.—Señor Don FRANCISCO HENRIQUEZ Y CARVAJAL, and Señor Don APOLINAR TEJERA, delegates; Señor Don TULIO M. CESTERO, and Señor Don EMILIO TEJERA, secretaries.

Ecuador.—Señor Don VICTOR RENDÓN, delegate plenipotentiary, and Señor Don ENRIQUE DORN Y DE ALSÚA, delegate.

Guatemala.—Señor Don JOSÉ TIBLE MACHADO and Señor Don ENRIQUE GOMEZ CARRILLO, delegates plenipotentiary; Señor Don V. A. PELAES, secretary.

Haiti.—M. JEAN JOSEPH DALBÉMAR, M. J. N. LÉGER, and M. PIERRE HUDICOURT, delegates; M. AUGUSTE JEAN JOSEPH and M. ABEL LÉGER, secretaries.

Mexico.—Señor Don GONZALO A. ESTEVA, Señor Don SEBASTIÁN R. DE MIER, Señor Don FRANCISCO R. DE LA BARRA, delegates plenipotentiary; Señor Don L. S. CARMONA, secretary.

Nicaragua.—Señor Don CRISANTO MEDINA, delegate.

Panama.—Señor Don BELISARIO PORRAS, delegate.

Paraguay.—Señor Don EUSEBIO MACHAIN, delegate.

Peru.—Señor Don CARLOS G. CANDAMO, delegate plenipotentiary; Señor Don GUSTAVO DE LA PUENTE, assistant delegate.

Salvador.—Señor Don PEDRO J. MATHEU and Señor Don SANTIAGO PEREZ TRIANA, delegates; Señor Don R. M. MERINO, secretary.

United States.—Hon. JOSEPH H. CHOATE, Hon. HORACE PORTER, Hon. URIAH M. ROSE, Hon. DAVID JAYNE HILL, Brig. Gen. GEORGE B. DAVIS, Hon. CHARLES S. SPERRY, and Hon. WILLIAM I. BUCHANAN, delegates plenipotentiary; Mr. JAMES BROWN SCOTT, technical delegate; Mr. CHANDLER HALE, first secretary; Mr. A. BAILLY-BLANCHARD, second secretary; Mr. CHARLES HENRY BUTLER, technical expert, and Mr. M. MALLOY, assistant secretary.

Uruguay.—Señor Don JOSÉ BATLLE Y ORDOÑEZ, Señor Don JUAN P. CASTRO, delegates; Colonel SEBASTIAN BUQUET, technical delegate; Señor Don SAMUEL BLIXEN and Señor Don PEDRO MANINI RIOS, secretaries.

Venezuela.—Señor Don JORGE GIL FORTUL, delegate; Señor Don LAUREANO VALLENILLA LANZ, secretary.

ARGENTINE REPUBLIC.

FOREIGN COMMERCE, FIRST QUARTER OF 1907.

Figures issued by the National Statistical Bureau showing the foreign trade of the Argentine Republic during the first three months of 1907 fix import values at $54,660,885 and exports at $96,956,217. As compared with the corresponding period of 1906, an increase is indicated in imports of $3,281,509 and in exports of $10,803,113.

The values taken and furnished by the leading countries participating in this trade were as follows:

Countries.	Imports.	Exports.
Africa	$1,060	$603,253
Germany	8,205,565	13,638,950
Belgium	2,719,671	8,281,247
Bolivia	27,742	200,425
Brazil	1,453,899	2,587,785
Cuba	101,049	38,623
Chile	73,108	455,731
Spain	1,412,883	376,516
United States	7,976,602	3,919,765
France	5,193,532	16,336,193
Italy	3,704,609	1,102,347
Holland	399,730	926,135
Paraguay	210,777	43,746
United Kingdom	19,497,070	10,422,425
Uruguay	624,075	1,416,796
Various	3,059,513	467,858
Orders	.....	36,128,422

A comparison of the trade values with those reported for the first quarter of 1906 shows the following results as regards destination and origin: Imports from Germany advanced $442,866 and exports thither, $82,137; Belgian imports increased $450,172 and exports $819,321; Brazilian imports increased $503,327 and exports $112,777; imports from Spain advanced $68,364, but exports thither declined $440,986; an increase of $484,702 is noted in imports from the United States, but shipments to that country fell off $206,727; imports from France declined $390,527, while exports thither advanced $3,732,337; Italian imports decreased $633,874 and exports $1,035,916; imports from the United Kingdom increased $2,810,726, while exports thither decreased $901,188, and under the general term "orders" an increase in exports is noted, amounting to $10,803,118.

The import item showing the greatest increase is under the head of "traction machinery," $9,709,755, representing the 1907 imports as compared with $6,185,004 in the first quarter of 1906. In this class are included 107 locomotives, as against 41 in 1906; tram coaches, 91, as compared with 20; wagons, 1,104, as against 489, though automobiles number but 123, being 51 less than the recorded number for the first three months of 1906.

Other imports, with the respective increase (+) or decrease (−) in value, were as follows:

Articles.	1907.	
Wines, spirits, liquors	$2,084,362	+ $442,[illegible]
Silk goods	726,398	+ 83,622
Woolen goods	2,965,187	+ 339,[illegible]
Cotton goods	5,961,324	+ 608,443
Other textiles	1,203,495	+ [illegible]
Wood and manufactures	1,018,275	+ 9,470
Paper and manufactures	1,039,612	+ 76,[illegible]
Iron and steel and manufactures	5,723,684	− 85,[illegible]
Other metals and manufactures	1,339,191	− 337,[illegible]
Agricultural implements and utensils	3,013,721	−1,[illegible]
Electrical machinery	673,761	+ [illegible]

EXPORTS, FIRST FIVE MONTHS OF 1907.

The leading exports from the Argentine Republic during the first five months of 1907, as compared with the same period of 1906, were as follows:

	1907.	1906.
Dry ox hides.....number..	809,218	988,610
Salt ox hides.....do....	693,369	616,118
Dry horse hides.....do....	31,261	44,226
Salt horse hides.....do....	11,326	5,177
Sheepskins.....bales..	21,329	20,969
Hair.....do....	1,650	1,748
Tallow.....pipes..	9,615	8,421
Do.....casks..	28,399	34,158
Do.....hogsheads..	4,680	1,712
Goatskins.....bales..	1,303	5,861
Wool.....do....	237,452	251,797
Wheat.....tons..	1,966,440	1,599,534
Maize.....do....	186,461	589,277
Linseed.....do....	585,590	300,039
Flour.....do....	47,304	48,855
Bran.....do....	66,588	63,122
Pollards.....bags..	23,448	25,456
Oilseed.....do....	51,268	77,296
Hay.....bales..	249,478	682,159
Quebracho.....tons..	129,561	139,062
Quebracho extract.....do....	17,510	26,156
Butter.....cases..	43,649	87,412
Mutton carcasses.....number..	1,188,420	1,242,426
Beef quarters.....do....	709,395	913,001
Oats.....tons..	106,697	41,037

BUDGET FOR 1908.

On June 26, 1907, the Minister of Finance laid before the Argentine Congress the budget for 1908, in which the expenditures are estimated at 24,265,666.52 *pesos* gold, 164,868,735.37 *pesos* paper, and 5,000,000 *pesos* paper, in bonds. The revenue is set down at 59,870,105.86 *pesos* gold, 84,704,318.75 *pesos* paper, and 5,000,000 *pesos* paper, in bonds. In a message accompanying the budget the Minister calls the attention of Congress to the fact that the expenditures for 1906 were fixed at 234,649,143.69 *pesos* paper, while those for 1907 were reduced to 228,914,835.82 *pesos* and those for 1908 still further reduced, being estimated at a total, in paper money, of 225,017,977.46 *pesos*.

The expenditures are distributed among the different departments as follows:

Departments.	In cash.		In bonds, paper.
	Gold.	Paper.	
	Pesos.	*Pesos.*	*Pesos.*
Congress		4,122,720.00	
Interior		25,804,150.00	
Foreign Affairs	784,581.20	1,230,579.96	
Finance		11,836,716.20	
Public Debt	22,968,485.32	17,339,247.89	
Justice and Public Instruction		28,463,097.92	
War		19,978,665.04	
Navy	12,600.00	13,750,876.00	
Agriculture		5,469,245.72	
Public Works	500,000.00	28,854,520.00	5,000,000
Pensions		8,018,916.64	
Total	24,265,666.52	164,868,735.37	5,000,000

The amounts estimated for the different sources of revenue are as follows:

Sources of revenue.	In cash.		In bonds, paper.
	Gold.	Paper.	
	Pesos.	*Pesos.*	*Pesos.*
Import duties	49,500,000.00		
Import 2 per cent surtax	3,000,000.00		
Storage and hoisting dues	2,300,000.00		
Light-houses and beacons	350,000.00		
Health inspections	55,000.00		
Port dues	1,900,000.00		
Hydraulic hoists	300,000.00		
Consular fees	400,000.00		
Statistics and stamps	500,000.00		
Fines and incidentals	30,000.00		
Repayments on account of debt of Buenos Aires Province	986,873.44		
National Bank	348,292.42		
Tax on alcohol		16,100,000.00	
Tax on tobacco		16,100,000.00	
Tax on matches		2,500,000.00	
Tax on beer		3,100,000.00	
Tax on playing cards		100,000.00	
Tax on artificial beverages		5,000.00	
Tax on insurance		450,000.00	
Sanitation works		7,500,000.00	
Land tax		4,500,000.00	
Maritime and territorial taxes		400,000.00	
Stamped paper		9,200,000.00	
Cartage		700,000.00	
Postal service		6,900,000.00	
Telegraph service		2,100,000.00	
Forest concessions		100,000.00	
Public land sales and leases		2,500,000.00	
Fines and incidentals		800,000.00	
Railroads		9,500,000.00	
Health tax (act No. 3967)		600,000.00	
Tuition and examination fees		130,000.00	
Fees for registration of real estate, attachments, official and judicial bulletins, etc		600,000.00	
National transports		103,300.00	
Military tax		150,000.00	
Repayments on account of loans:			
Entre Rios Province		100,000.00	
Santa Fe Province		150,000.00	
Mendoza Province		50,000.00	
Cordoba Province		153,000.00	
Tucuman Province		59,318.75	
Authorized issue of bonds			5,000,000
Total	59,870,105.86	84,704,318.75	5,000,000

THE INCREASE OF POPULATION IN 1906.

According to statistics contained in No. 14 of the "*Boletín Demográfico Argentino*," a publication of the Department of the Interior of the Argentine Republic, the increase of population during 1906, both from immigration and excess of births over deaths, was as follows:

East	235,283
Center	25,993
West	17,525
North	9,439
Territories	8,334
Total	296,574

Of this total, 202,164 were from immigration and 94,410 from natural growth.

As the population of the Republic on December 31, 1905, was

5,678,197, with the increase recorded for 1906 it amounted to 5,974,771 inhabitants, or 6,000,000, in round numbers, on December 31, 1906.

ARGENTINE CORN IN SWEDEN.

According to an official communication received in the Department of Foreign Affairs of the Argentine Republic, the Swedish Government has decided to reduce to 1 crown and 50 cents, or 91 cents Argentine paper money, the import duty on 100 kilograms of corn, which was formerly 3 crowns and 70 cents (2.30 *pesos*). The object of this reduction is to encourage the importation of Argentine corn, which is considered both on account of its price and quality to occupy a high grade.

BOLIVIA.

PUBLIC HEALTH LAW.

The proposed public health law, an extract of which was published in the BULLETIN for November, 1906, was passed by the National Congress of Bolivia on November 28, 1906, and promulgated by President MONTES on December 5, 1906.

TELEGRAPH SERVICE IN 1905–6.

The Bolivian Legation in Washington has kindly furnished the following data, taken from the Bureau of Telegraphs, corresponding to the year 1905–6:

The figures given below show that the receipts from the service for the fiscal year 1905–6 were greater than those of any previous year:

	Bolivianos.
1900	44,624.24
1901	52,866.01
1902	69,011.02
1903	68,750.41
1904	82,358.85
1905	108,246.99
Special receipts from fines in 1905	1,952.90
1906 (first 4 months)	39,639.38
Special receipts in first 4 months of 1906	496.90

This increase in the receipts is due to the better management of the administration and to an increase in the number of telegrams sent over the Federal telegraph lines, as will be seen from the following table:

	Number of words sent.
1900	2,584,244
1901	2,960,585
1902	3,828,789
1903	4,233,934
1904	5,189,045
1905	7,159,753
1906 (first 4 months)	2,495,908

The number of words sent in 1905, compared with those forwarded in 1904, show an increase of 1,970,708, or 37.97 per cent. The number of telegrams of all kinds sent in 1904 was 248,341, as compared with 329,542 in 1905, which shows an increase of 81,201 telegrams, or 32.69 per cent in 1905.

AUTOMOBILES ON FREE LIST.

President MONTES, on December 7, 1906, promulgated the following act of the National Congress of Bolivia, passed November 29, 1906, placing automobiles on the free list:

"Sole article No. 266 (second) of the Customs Tariff in force, which is assessed under No. 738, is modified from the 1st of January, 1907, to the following: 'Valuation according to appraisement; per cent, free.'"

(See Customs Tariff of Bolivia published in June, 1906, number of the MONTHLY BULLETIN.)

BRAZIL.

FOREIGN COMMERCE, FIRST QUARTER OF 1907.

The foreign trade of Brazil for the first quarter of 1907 shows import valuations of $45,000,000 as compared with $30,000,000 for the corresponding period of the preceding year, and exports valued at $75,000,000 against $60,000,000 reported for the first three months of 1906.

FOREIGN COMMERCE, FIRST FOUR MONTHS, 1907.

Figures for the foreign commerce of Brazil during the first four months of 1907 show import valuations of £12,515,836 ($62,000,000) and exports valued at £20,877,091 ($104,000,000), a balance of trade being thus shown in favor of the Republic amounting to £8,361,255 ($42,000,000). For the same period of 1906, exports were valued at £16,159,176 ($80,000,000) and imports at £9,524,909 ($47,000,000), the trade balance in favor of the Republic being £6,634,267 ($33,000,000).

A comparison of trade values for the two periods shows an expansion in the value of imports of 31.4 per cent and of exports, 29.2 per cent.

Export increase is noted for every item, except sugar, in which a short crop is reported. Rubber and coffee, as usual, form the bulk of shipments.

COFFEE SHIPMENTS IN 1906-7.

The record of coffee shipped from Brazil during the year commencing with July, 1906, and ending July, 1907, shows a total of 19,654,000 bags.

This abnormal crop of almost 20,000,000 bags increases the world's visible supply almost 7,000,000 bags, the largest ever reported for a single year.

THE FLOUR MARKET.

The following data regarding the flour market in Brazil has been taken from a report recently published by the Minister of Finance of the Republic. The share of the different countries from which Brazil has imported flour during the last five years was as follows:

Year.	Argentine Republic.	United States.	Austria-Hungary.	Other countries.
	Tons.	*Tons.*	*Tons.*	*Tons.*
1902	37,235	46,840	7,669	13,847
1903	68,372	38,715	7,622	2,421
1904	86,807	30,241	9,213	4,788
1905	108,578	20,000	6,741	5,145
1906	122,282	24,526	6,335	803

The imports of wheat have also increased considerably, as will be seen in the following comparative table:

Year.	Flour.	Wheat.	Wheat reduced to flour, at 70 per cent.
	Tons.	*Tons.*	*Tons.*
1902	105,591	149,719	104,803
1903	117,134	168,745	118,122
1904	131,049	193,571	135,492
1905	140,464	214,282	149,997
1906	153,946	231,639	162,147

As practically all the wheat used in the Brazilian mills is imported, the above figures represent approximately the consumption of flour in Brazil, of which nearly 90 per cent is manufactured from Argentine wheat. During the last five years Brazil imported from the Argentine Republic the following quantities of wheat: 1902, 129,867 tons, or 87 per cent of the total imports; 1903, 155,730 tons, or 92 per cent; 1904, 168,747 tons, or 89 per cent; 1905, 181,647 tons, or 85 per cent; 1906, 209,927 tons, or 90 per cent.

NEW IMMIGRATION REGULATIONS.

An Executive decree issued by President MOREIRA PENNA on April 19, 1907, approves the regulations signed by the Ministry of Industry, Railways, and Public Works, having for their purpose the peopling of the soil of the Brazilian Republic.

These regulations provide that the Central Government shall cooperate with State governments, railway and river navigation companies and other companies or associations and with private individuals, provided that the proper guaranties are observed in the measures taken to attract immigrants to the country.

All persons shall be considered as immigrants who are foreigners of less than 60 years of age, not suffering from contagious diseases nor engaged in illicit trades and who are not criminals, rogues, beggars, vagabonds, lunatics, or invalids, who arrive at Brazilian ports traveling third class at the cost of the Union, States, or third parties, as well as those who have paid their own passage and desire to enjoy the same privileges as other new arrivals. Persons over 60 years of age or unfitted for work will only be admitted when accompanied by their families or when coming to join them, provided that there is in the family at least one able-bodied member against the invalid and one or two to offset the aged member of the family.

To immigrants who establish themselves in any part of the country and devote themselves to any branch of agriculture, industry, or trade, or to any useful craft or profession, complete liberty of action and freedom to engage in any trade, provided that the same does not endanger public safety, health, or morals, will be granted. Also complete religious liberty and, finally, civic rights as enjoyed under the Constitution and laws by Brazilians themselves.

Government aid in placing and aiding the colonists is guaranteed and special provisions are made for the formation of so-called "nucleus" colonies.

IMPORT REGULATIONS FOR BREED ANIMALS.

Regulations issued by the Brazilian Government covering the importation of animals for breeding purposes were made public on April 18, 1907, and provide for such Government aid in the matter as is rendered possible by the budget resources.

To agriculturists and cattle breeders, who import sound healthy animals for breeding purposes, the expenses incident to their transport from the country of origin shall be refunded, in accordance with a schedule previously drawn up by the Government. The privileges of these regulations extend to horses, cattle, swine, sheep, goats, sheep dogs, poultry, etc.

The pedigree of the animals is to be kept in a register by the Ministry of Industry, Railways, and Public Works, and so soon as the stock farm authorized by the Government has been established and the sanitary police for the inspection of domestic animals been equipped, a list of ports will be published from which breed animals shall be imported, such diseases as are considered infectious noted, and the necessary precautionary measures prescribed.

Transport is made at the expense of the Government only when the animals have been purchased either directly or through syndicates and agricultural societies or by their legal representatives for the improvement of the stock of the district or when they are imported for agricultural and pastoral exhibitions which receive aid from the Federal, State, or municipal governments.

Animals coming from sections where epizootic diseases are prevalent will not receive free transport, and such animals as have infectious diseases will be slaughtered immediately on their arrival.

ADDITIONAL IMPORT DUES AT CERTAIN PORTS.

A recent supplement to the Brazilian tariff decrees that during the present financial year there shall be levied an additional duty of 2 per cent gold (upon official import valuations) on goods imported through the custom-houses of Para, Pernambuco, and Bahia, exception being made in the case of cereals which are subject to the 2 per cent (gold) surtax.

POPULATION OF RIO DE JANEIRO.

According to the "*Boletim Hebdomadario de Estadistica Demografo-sanitario*" the population of Rio de Janeiro on September 20, 1906, numbered 628,041 inhabitants, 361,544 being men and 266,497 women. For the rest of the Federal district the population is placed at 183,265, making the total for the district 811,265.

DEVELOPMENT OF BRAZILIAN-JAPANESE TRADE.

A society under the name of "The South American Trading Association" has been organized in Osaka, Japan. Its scope is to develop the import and export trade between Brazil and Japan, and the Association will send to each country of South America representatives for studying the conditions of the country.

The Secretary of the Board of Commerce of Osaka has addressed to the South American consulates a circular asking them to help the Trading Association in securing from their Government samples and prices of products for the use of that society.

COFFEE STORAGE AND WARRANTS.

A new enterprise under the name of "International Stores Company," having the initial capital of 500:000$000, has been established in Sao Paulo by many wealthy bankers and incorporators of Santos and Sao Paulo. The Commercial Association of Rio de Janeiro has also incorporated a company of public stores.

The purpose of those improvements is to issue warrants to be applied to the trade of those commercial centers.

The "Financial Times" says in reference to the use of warrants in the coffee trade:

"A great improvement has been introduced into the Santos market. It consists in the establishment of public stores (Magazins Généraux) and the issue of warrants. Hitherto capital has been little employed in loans against coffee in Santos, but the introduction of

warrants will probably lead to a large increase in this class of business by the foreign banks, who, now that the Caisse has established a certain stability of exchange, will find a profitable employment for money in advances against warrants. Should this come about, the resisting powers of Brazilian markets would be largely increased, with a consequent benefit to the country at large. It has hitherto an article of faith among Brazilians that to hold large stocks of coffee in Brazil is a crime, but it is interesting to note that the opposite opinion is held by many persons who believe that the more coffee Brazil can carry the better for Brazil. Certainly there is no better place in the world in which to carry stocks of coffee than Santos, for not only does the quality improve in the damp, warm atmosphere, but it is available for dispatch at a moment's notice to the market which most urgently requires it. If carriers of coffee in Europe and the States could be induced to keep their stocks in Santos instead of at home, it would give a great employment for local capital in stores, rent, labor, etc., and very largely help in the improvement of local conditions of business."

CHILE.

MESSAGE OF PRESIDENT MONTT.

At the opening of the regular sessions of the Chilian National Congress, on June 1, 1907, President MONTT submitted his message to the legislative bodies giving an account of the governmental administration of the Republic during the year 1906. In this message is evidenced the prosperous condition of the country.

In making reference to the foreign relations of the country, the President says:

"Being convinced that cordial relations with all States, strengthened by the similarity of economical interests, are one of the best means of accomplishing the interior prosperity and the exterior prestige of the Republic, it shall be the constant aim of my Government to lay its international policy upon that foundation."

Diplomatic representation between Chile and Peru was reestablished during the year and conventions were signed with the Bolivian Government, which have settled satisfactorily the difficulties originated from the vagueness of certain protocols that were added to the Treaty of Peace of 1904. The relations with the Argentine Republic have been strengthened since the settlement of the boundary question, and in February, 1907, two conventions were signed with that nation; one of them is for the exchange of official and literary publications, and the other for the prevention of counterfeiting of legal money and bonds and certificates of indebtedness of either country in the

territory of the other; both Governments are also considering the best means of giving ample facilities to the commercial intercourse with each other.

The Republic participated in the Third Pan-American Congress that was held in Rio Janiero, and appointed representatives to take part in the Peace Congress held at The Hague. President MONTT makes special mention of Secretary ROOT's visit to Chile.

In reference to the earthquake of August 16, 1906, the disastrous effects of which are still affecting the country, the message says: "The Government did all that was possible for the relief of sufferers, being efficiently assisted in this task by the cooperation of friendly nations and the foreign colonies in the country." The Chilean Congress appropriated during the year the amount of 10,200,000 *pesos* for the relief of sufferers and to remedy damages caused by the catastrophe. Foreign nations contributed with the total sum of 2,741,000 *pesos*. On December 13, 1906, a law was passed providing for the reconstruction of the city of Valparaiso.

The postal service was improved in accordance with the necessities of the Republic; 863 offices were in operation on December 31, 1906, 9 new ones having been created during the year; the revenues derived from this service in 1906 amounted to 2,648,845 *pesos*, the expenses reaching the sum of 2,168,529 *pesos*, thus leaving a surplus of 480,316 *pesos*; 77,087,665 pieces of mail matter were handled in 1906, an increase of 12,970,497 pieces over the preceding year. The number of pieces of mail matter received from and sent to foreign countries increased considerably also during the year in reference, having reached the amount of 13,533,850, an increase of 1,318,942 over 1905. A treaty providing for the exchange of postal money orders has been signed with Great Britain, and another with Japan in regard to parcels post.

The telegraph lines of the Republic have an extent of 14,000 kilometers, with 27,000 kilometers of wire; the number of telegraphic messages sent during 1906 was 2,033,466, and the revenues derived from the service amounted to 1,439,062 *pesos*, an increase of 432,294 *pesos*, over 1905; 329 offices were in operation during the year.

The construction of public works received a great impulse during the year under review. The Government contributed with £15,000 to the continuation of the works of construction of the water and sewer system in Punta Arenas, Magellan Territory. There is under consideration the construction of a telegraph line to establish communication between that territory and the center of the country; a steamship company has been subsidized for the establishment of a service with Punta Arenas. Twenty-four permits were granted during the year for the installation of electric power, light, and heating in various cities of the Republic.

The colonization of settlers has had a very satisfactory development, and a special bureau for the surveying of lands and colonization of natives and settlers has been created. The immigration of foreigners had a notable increase in 1906, the number of immigrants amounting to 1,221, as against 293 in 1905; during the first five months of 1907 more than 4,000 foreigners have settled in the country.

The consular service has improved and its personnel has been completed. The revenues derived therefrom amounted in 1906 to 457,428.88 *pesos*, expenses amounting to 208,242.94 *pesos* only.

Public instruction received special attention from the Government and has improved considerably.

The fiscal revenues amounted to 161,089,725 *pesos*, which, added to 2,445,666 *pesos*, surplus from the preceding year, and to 20,000,000 *pesos* derived from the fiscal issue authorized by the law of May 23, 1906, makes a total of 183,535,392 *pesos*; as the expenditures amounted to 169,951,601 *pesos*, there is a surplus left for 1907 of 13,583,790 *pesos*. The public revenues in 1907 are estimated at 177,000,000 *pesos*, with which sum and the surplus from 1906 the expenditures will be met, and there will be still a surplus of 6,000,000 *pesos* for 1908. The revenues for 1908 are estimated at 188,000,000 *pesos*, and the expenditures at the same amount; in the budget of 1908, 25,000,000 *pesos* will be appropriated for public works, 57,000,000 *pesos* for construction and improvement of railroads.

The foreign trade of Chile in 1906 reached a total of 525,554,513 *pesos*, an increase of 51,856,000 over the previous year. Of that total, 289,513,522 *pesos* were for exports and 236,040,991 *pesos* for imports, the balance of trade being therefore in favor of the Republic to the amount of 53,472,531 *pesos;* in 1905 the excess of exports over imports was 79,903,000 *pesos*. The increase of imports in 1906 amounted to more than 39,000,000 *pesos*, while the value of exports increased only to the amount of 12,713,000 *pesos*.

The increase of customs revenues during the year in reference was unexpected, the total collections amounting to 103,965,318 *pesos*, an increase of 12,643,757 *pesos* over the preceding year. Of the total amount 60,164,050 *pesos* were for export duties on nitrate and iodide, 41,540,403 *pesos* for import duties, and 2,260,865 *pesos* for miscellaneous revenues.

The conversion funds accumulated up to May 31, 1907, reach the sum of 77,282,257 *pesos*, or £5,785,339.

There are at present in the Republic eight savings banks which, on December 31, 1906, had deposits amounting to 14,799,728 *pesos*.

The Chilean merchant marine reports in 1906 an increase of 34 vessels with a tonnage of 30,000 tons. It has at present 85 steamers and 20 sailing vessels, with a total tonnage of over 110,000 registered tons.

During the year 151 kilometers of railroad were completed in the lines of Pitrufquen to Antilhue, Temuco to Nueva Imperial and Tunel del Arbol. There are at present under construction 958 kilometers, the cost of which will be 50,000,000 *pesos*, in the railroad from Arica to Alto de la Paz. The Government is giving this line its special attention to comply with the treaties with Bolivia.

BUDGET FOR 1908.

The proposed budget for 1908 was submitted to the Chilean Congress by the Executive on June 17, 1907. The expenditures are therein estimated at 223,464,416.50 *pesos* national currency, distributed among the different branches of the Government as follows:

	Pesos.
Interior	38,564,890.00
Foreign Relations, Worship, and Colonization	3,341,506.19
Justice	6,866,775.00
Public Instruction	17,356,521.21
Finance	43,748,690.82
War	18,240,072.97
Navy	17,566,709.90
Industry	77,779,250.41
Total	223,464,416.50

PUBLIC WORKS.

Of this total 58,492,000 *pesos* are for the construction of important public works, distributed as follows:

	Pesos.
Construction and improvement of railroads	16,500,000
Arica-Alto de La Paz Railroad	16,000,000
Reconstruction of Valparaiso	8,000,000
Sewer system of the city of Santiago	5,000,000
Hydraulic works in the ports of Talcahuano, Valparaiso, Constitucion, Valdivia, and other ports and cities	3,524,000
Water systems and sanitation of cities	3,000,000
School buildings	1,276,000
Palace of the Government and other Government buildings	1,015,000
Construction of bridges	1,000,000
Palace of Justice, penitentiaries, and jails	907,000
Churches and barracks	835,000
Agricultural, mineral, and professional schools	450,000
Other public works	985,000
Total	58,492,000

REVENUES.

The amounts estimated for the regular sources of revenue are given in the budget as follows:

	Pesos.
Export duties on nitrate	65,300,000
Export duties on iodine	700,000
Import duties	48,000,000
Frontier custom-houses	1,000,000
Duties on parcels post	2,000,000
Light-houses and beacons	650,000
Posts and telegraphs	3,000,000
Interests on bonds	1,550,000
Stamped paper and stamps	1,000,000
Tax on alcohol	2,000,000
Debtors' lands purchases	1,000,000
Sale of Government property	500,000
Other revenues from subtreasuries	2,500,000
Railroads	36,000,000
Gold premium on 76,000,000 pesos (13¼)	22,800,000
Total	188,000,000

Adding to this total the amount of 32,000,000 *pesos* to be derived from loans that have been negotiated, and that of 4,000,000 *pesos*, the estimated surplus for 1907, the general total of revenues will be 224,000,000, thus leaving a surplus of 535,583.50 *pesos* over expenditures.

CUSTOMS REVENUES, FIRST FIVE MONTHS OF 1907.

During the first five months of 1907, the custom-houses of the Chilean Republic collected a total revenue of 44,659,881.35 *pesos*, as compared with 39,055,389 *pesos* collected during the same period of 1906, an increase of 5,604,492.24 *pesos* in 1907.

BANK STATEMENT, 1906.

The "*Diario Oficial*" of Chile, in one of its issues for the month of May, 1907, publishes a statement of the annual settlement of accounts of the 27 banks of the Republic for the year 1906, according to which the capital, accumulated funds, deposits, and other accounts of those institutions, on December 31, 1906, amounted to 765,071,105.66 *pesos*, and their cash on hand 3,883,042.88 *pesos*, in coin, and 34,439,066 *pesos* in paper money.

PROPOSALS FOR BRIDGES.

The Government of Chile proposes the building of several bridges and has advertised in the United States for bids from bridge contractors. Specifications may be examined at the Legation of Chile in Washington, D. C., and at the office of Wessel, Duval & Co., 26 Broad Street, New York. Bids will be received up to September 30 next, at the Ministry of Industries and Public Works, Santiago, Chile.

COLOMBIA.

RATIFICATION OF THE BOUNDARY TREATY WITH BRAZIL.

The "*Diario Oficial*" of Colombia, in its issue for May 25, 1907, publishes a law of the National Assembly, passed on May 17, and signed by President REYES on the same day, ratifying a treaty signed with Brazil on April 24, 1907, by the terms of which the boundaries of a part of the frontier between Colombia and Brazil are definitively fixed and the free navigation of the Amazons and other Colombian-Brazilian rivers is stipulated.

GOVERNMENT MONOPOLY ON THE EXPORTATION AND SALE OF VARIOUS METALS.

A law of the Colombian National Assembly, passed on May 14, 1907, and published in the "*Diario Oficial*" of the 20th of the same month, authorizes the Government to establish a monopoly on the exportation and sale abroad of the following metals: Platinum, paladium, iridium, rhodium, osmium, ruthenium, and all radioactive metals. The Government may exploit the mines and deposits where said metals are found and which are not exploited at present. It may also make arrangements with the persons exploiting said mines and deposits for the purpose of carrying out and regulating the exploitation authorized by the law in the most advantageous manner to the interest of the Government, and without impairing the rights acquired by the owners.

FREE ENTRY FOR MAIZE IMPORTS.

Mr. ISAAC A. MANNING, United States Consul at Cartagena, Colombia, under date of June 26, 1907, writes to the Director of the International Bureau of the American Republics that, owing to the great destruction wrought by the locust (*Œdipoda migratoria*) in the provinces of El Sinse and Cartagena, where great quantities of corn are ordinarily produced, and which crop has been almost completely destroyed, the President of Colombia, General REYES, has issued a decree, bearing date June 22, providing that foreign corn, either shelled or unshelled, shall be admitted to the ports of Colombia free of duty until November 1 next proximo.

The locust has also destroyed great pasture areas in Savanna, with the result that cattle are suffering want of range there. In the province of Cartagena the rice fields and cocoanut groves have been greatly damaged by the locust. So far, efforts to eradicate the pest have proven unsuccessful.

PAYMENT OF EXPORT DUTIES ON PRECIOUS METALS.

In order to facilitate the exportation of precious metals, the President of the Colombian Republic, in a decree dated April 15, 1907, and published in the "*Diario Oficial*" of April 24, 1907, has authorized the department collectors of Reorganized Revenues to receive payment of export duties on precious metals, the certificates issued by them for such payments to be retained by the respective customs collectors

FOREIGN COMPANIES AND CORPORATIONS IN THE REPUBLIC.

On January 19, 1906, President REYES issued legislative decree No. 2, which reads as follows:

"ARTICLE 1. Corporations or companies abroad, which now have or may hereafter have permanent business within the territory of the Republic, shall, within six months after beginning business, file their charter and by-laws in the notarial office of the place where they have their principal place of business or industry. Joint stock companies shall likewise file in the aforesaid notarial office the certificate of authorization issued by the State when said authorization is required for the legal existence of the company.

"Paragraph. The time granted for filing shall be one year if said companies already have an established business in the country.

"ART. 2. Said companies shall have in Colombia, in the place where they have established their principal business office, an agent having the powers of an attorney and with the same representation as that of the manager, in such judicial controversies as may arise and concerning their established business in the country.

"Paragraph. The powers of attorney of the agents of these companies shall be filed in the same notarial office referred to in article 1.

"ART. 3. In order that the documents referred to in the foregoing articles may be effective in Colombia, they shall be drawn up in accordance with all of the formalities required in the place where they are issued, and shall also be attested by the diplomatic or consular agent of Colombia residing in said place, and in the absence of such officials by the Consul or Minister of a friendly nation.

"ART. 4. Besides the extract of the charters and by-laws of the joint stock companies, which must be registered in accordance with law 42 of 1898, there shall also be registered at the proper circuit court or courts in the jurisdiction where the company has established its principal place of business the extract of the powers of attorney of the representatives of the foreign companies, certified to by the notary before whom they have been executed.

"Paragraph. After being recorded in the court, the extracts shall be published at least three times in the official newspaper of the respective Department.

"ART. 5. It shall be the duty of the Executive Power to declare that the foreign companies have complied with the requisites referred to in this decree.

"ART. 6. Acts done or contracts made without complying with the requisites prescribed in this decree shall be void.

"ART. 7. Each page of the books mentioned in the first three sections of article 27 of the Commercial Code shall be rubricated, in towns where there are Boards of Trade, by the Secretary of said Board, and on the first of said pages a note shall be written, dated, and signed by the President and Secretary of the Board, specifying the total number of pages and the person to whom the books belong.

"ART. 8. Circuit or district judges, in civil matters, and their respective secretaries, shall receive, by halves, a fee of one-half cent gold for each page of such merchant books as they rubricate.

"Paragraph. In case of Boards of Trade, the Secretary shall be entitled to a fee of one-half cent.

"ART. 9. The rubrication of commercial books made by the Secretaries of the Boards of Trade before this decree became effective shall be valid for all legal purposes.

"ART. 10. The present decree shall become effective thirty days after its publication in the Official Gazette."

On July 10, 1906, President REYES issued legislative decree No. 37, which reads as follows:

"ARTICLE 1. Foreign corporations and companies having permanent business in the Republic shall establish and maintain an agent in the place where they have their principal business office, so that he may represent said companies before the national courts and administrative and police authorities in such matters and suits as may be brought against them.

"Paragraph. These agents or attorneys shall represent said companies when sued, as well as in all kinds of judicial or administrative proceedings, and, consequently, such notices as may be served on them as shall be valid as well as the proceedings in which they may take part.

"ART. 2. In the absence of such agent or attorney, the action shall be continued with the representative who conducts the usual business of the company.

"ART. 3. Whenever, owing to any cause, there are none of the aforesaid representatives present, the proceedings prescribed in articles 25 and 27 of law 105 of 1890 concerning absent defendants shall be adopted, without prejudicing the provisions respecting this matter contained in public treaties. In the case of the latter article, the edict shall be published in the newspaper of the Department, if there is such paper, and in the Official Gazette of the nation."

BOUNDARY TREATY WITH PERU.

The National Constituent Assembly on April 24, 1907, approved the boundary treaty with Peru, which was signed in Bogota on September 12, 1905, between plenipotentiaries of Colombia and Peru.

By the terms of the treaty the question of boundary lines between the two countries is submitted to the arbitration of His Holiness the Pope, or of some dignitary designated by the Pope.

The treaty is expressly subordinated to the treaty between Peru and Ecuador of August 1, 1887, now in process of hearing by His Majesty the King of Spain, and is to be effective only in case the award of the King of Spain, as between Peru and Ecuador, adjudges the territory claimed by Colombia as belonging to Peru.

In the treaty between Colombia and Peru the Government of Colombia states that it will at the proper time declare that the stipulations of the treaty do not affect the like treaty entered into between Colombia and Ecuador on November 5, 1904, which will go into operation upon the rendition of the award on the above-mentioned boundary treaty between Peru and Ecuador.

PRODUCTION OF VEGETABLE IVORY IN CARTAGENA, 1906.

According to statistics published by Messrs. LOUIS DELIUS & CO., of Hamburg, under date of April 22, 1907, the production of vegetable ivory in Cartagena, Colombia, during the year 1906 amounted to 1,875,000 kilograms, as compared with 1,992,500 kilograms produced during the preceding year.

COSTA RICA.

COMMERCIAL AND FINANCIAL STATISTICS, 1906–7.

"*La Gaceta*", the official publication of the Costa Rican Government, in its issue of June 9, 1907, publishes the annual report of the Minister of Finance and Commerce for the fiscal year 1906–7, submitted to the Constitutional Congress on May 28, 1907. The Costa Rican fiscal year commences on April 1 and ends on March 31 of the next year. The report contains very complete commercial and financial statistics for the year to which it refers, the following data having been taken therefrom:

The total value of the exports in 1906, not including coined money, amounted to 18,914,028 *colones*, and the value of the imports during the same year amounted to 14,807,785 *colones*, leaving a balance of trade in favor of the country of 4,106,243 *colones*.

EXPORTS.

The exports of coffee from the 1st of October, 1905, to the 30th of December, 1906, amounted to 13,774,258 kilograms, 13,035,780 of

which passed through Port Limon and 738,478 through Puntarenas. A little over 76 per cent was sent to London, 11 per cent to Germany, 9 per cent to the United States, nearly 3 per cent to France, and small quantities were sent to other nations.

There was a decrease of 4,273,281 kilograms in the exports of coffee in 1906 as compared with 1905. The net average price was $11.21 for each 46 kilograms, the total exports of this product being valued at $3,356,876.

The exports of bananas show constant increase. In 1906, 8,872,729 bunches were exported, valued at $4,436,364, each bunch representing a value of 50 cents American gold.

The exports of cocoa also increase annually. In 1904, 119,918 kilograms were exported; in 1905, 148,918 kilograms, and in 1906, 176,243 kilograms. The following table shows the exports, by countries, in 1906:

	Kilos.		Kilos.
United States	63,068	Hispaño America	22,551
England	55,566	Germany	2,738
France	30,916	Spain	1,404

The exports of lumber in 1906 increased as compared with 1905. The kinds of wood exported in 1906 and their estimated value are as follows:

Cedar, 446,940 cubic feet	$134,082
Mahogany, 27,942 cubic feet	8,383
Cocobolo, 232,758 kilos	2,094
Dyewood, 2,263,800 kilos	20,374
Total	164,933

In 1906 the exports of hides were to 286,415 kilograms as compared with 313,682 kilograms in 1905. Recently, the Government approved the organization of a stock company, with a capital of 50,000 *colones*, to engage in the buying and selling of hides both at home and abroad. The company is authorized to tan all kinds of hides and manufacture shoes and saddlery. This company has already installed its machinery and commenced work. In 1906 the exports of deerskins amounted to 24,021 kilograms.

The total value of exports in 1906 was as follows:

Coffee	$3,356,876	Silver in bars	$239,861
Bananas	4,436,364	Tortoise shells	7,975
Cocoa	70,497	Mother-of-pearl	1,013
Lumber	164,933	Other articles	43,389
Hides	100,336		
Caoutchouc	78,057	Total	8,797,227
Gold in bars	297,926		

which, at the legal rate of exchange, are equal to 18,914,028.05 *colones*.

The value of coined money exported is not included in the foregoing table.

IMPORTS.

The verified annual report of the National Bureau of Statistics shows the total value of the imports in 1906 to have been $7,511,955. Deducting therefrom $624,613, the value of coined money imported, makes the net imports $6,887,342, which, at the legal rate of exchange, are equal to 14,807,785 *colones*, which represents the general trade in merchandise, and the imports of cattle and baggage.

Comparing the figures of 1905 with those of 1906 a large increase is noted in the imports. In 1905 the total value of the imports, not including coined money, amounted to $4,737,896, which, at the legal rate of exchange, are equal to 10,186,476 *colones*, and when compared with 14,807,785 *colones*, value of the imports in 1906, show an increase of 4,621,309 *colones* in favor of 1906.

The following table shows the percentage of the different nations which supplied the imports in 1906 as compared with 1905:

	1905.	1906.	Increase.	Decrease.
	Per cent.	*Per cent.*	*Per cent.*	*Per cent.*
United States	46.88	48.49	1.61	
Great Britain	19.73	21.71	1.98	
Germany	12.90	11.20		1.70
France	5.24	4.99		.25
Spain	2.58	2.66	.08	
Italy	3.24	2.32		.92
Belgium	.47	.74	.27	
Spanish America	5.51	4.95		.56
Other countries	3.45	2.94		.51

Statistics show that 41,919 head of cattle were consumed in 1904, and that 14,639 head of cattle were imported; in 1905, 40,303 head of cattle were slaughtered for home consumption, and 10,543 were imported, while in 1906, 39,505 were slaughtered for home consumption and 11,439 were imported, not including those for breeding purposes. The data for the three years referred to show a gradual decrease in the home consumption, and that there is little change in the imports of cattle. In 1906 Costa Rica imported 28.93 per cent of the cattle slaughtered in the Republic.

In 1906 the value of the imports of rice was almost equal to that of 1905, in which year the value was $111,036, as compared with $109,661 in 1906.

The imports of corn in 1905 amounted to 368,478 kilograms, and in 1906 to 113,695 kilograms. In 1906 the imports of beans were 204,057 kilograms, as compared with 363,782 kilograms in 1905. The Government believes that neither corn nor beans should pay import duties. In 1905 the imports of sugar amounted to 5,870 kilograms, as compared with 36,479 kilograms in 1906. In 1904 the importation of salt rose to 806,592 kilograms, as compared with 549,754 kilograms in 1905, and 404,506 kilograms in 1906. In 1906 there was a considerable decrease in the imports of lard as com-

pared with 1905, the imports of this article in the latter year amounting to 493,203 kilograms, while in 1906 they only amounted to 122,480 kilograms.

The following table shows the customs receipts during the fiscal year 1905–6, as compared with 1906–7:

	1905–6.	1906–7.
	Colones.	*Colones.*
Main custom-house	2,399,921.27	2,535,681.43
Limon	1,176,989.64	1,392,968.45
Punta Arenas	398,374.83	418,327.61
Total	3,975,285.74	4,346,977.49

The receipts in 1906–7 were as follows:

	Colones.		Colones.
Custom-houses	4,346,977.49	Civil registry	575.00
Liquors	1,747,798.56	Government Printing Office	12,005.25
Tobacco	158,115.65	Mercedes ranch	1,833.85
Stamped paper	63,364.51	Fines	1,102.80
Stamps	47,013.20	Balance of loan for the Pacific Railroad	703,664.28
Uncultivated lands	28,409.79	Unforeseen	43,858.32
Bills of health	2,985.00		
Pacific Railway	228,012.54		
Posts and Telegraphs	237,635.64	Total	7,654,874.20
Public registry	31,522.32		

A comparison of the budget for 1906–7 (7,332,164.28 *colones*) with the actual receipts, or 7,654,874.20 *colones*, shows an increase in the latter of 222,709.92 *colones*.

On March 31, 1906, the end of the fiscal year, the Department of the Treasury estimated that the money in circulation in the Republic on that date amounted to 8,090,559 *colones*.

IMMIGRATION PROPAGANDA.

"*La Gaceta*" of July 10, 1907, publishes the text of the act of the Constitutional Congress of July 8, 1907, authorizing the President to expend for eight years 40,000 *colones* yearly for the encouragement of immigration, of which amount one-half is to be devoted to paying the passage money of agricultural laborers and their families.

The immigrants must be white agriculturists, and preferably such as speak Spanish as their native tongue.

CUBA.

VALUATION OF THE REAL ESTATE OF THE REPUBLIC.

According to recent official statistics, the real estate of Cuba is at present composed of 111,840 urban and 52,301 rural properties, the total selling value of which is estimated at $342,758,133.21, with an

an annual rental of $32,469,043.99, distributed as follows among the different provinces:

Pinar del Rio: 5,608 urban and 6,158 rural properties, valued at $23,037,454.28, producing a rental of $2,360,560.89 per year.

Havana: 38,352 urban and 10,632 rural properties, valued at $144,893,708.10, with an annual rental of $13,906,802.27.

Matanzas: 18,682 urban and 25,623 rural properties, the value of which is $42,359,306.66, with an annual rental of $3,865,340.21.

Santa Clara: 25,442 urban and 14,075 rural properties, with a value of $69,087,051.76, yielding an income of $5,068,157.32 annually.

Camaguey: 6,761 urban and 4,268 rural properties, valued at $18,114,814.65, with an annual rental of $814,112.64.

Oriente: 16,995 urban and 11,145 rural properties, valued at $45,264,797.73, with an annual rental of $6,454,070.66.

The city of Havana has about 22,000 houses, valued at $109,000,000 and producing a rental of $11,500,000 per annum.

CUSTOMS REGULATIONS FOR CATTLE IMPORTS.

The Provisional Governor of Cuba on June 20, 1907, issued the following decree, numbered 746:

"On the recommendation of the Acting Secretary of the Treasury I hereby resolve:

"SECTION 1. That article one of the act of September 15, 1902, be amended to read as follows:

"'ARTICLE 1. In the collection of customs duties upon cattle, horses, and sheep imported into this island through any of the ports of entry now established, or others which the Chief Executive may deem advisable to establish, the following tariffs shall be applied:

"'There shall be admitted free of duty:

"'1. Female sheep.

"'2. Cattle under six years of age imported for breeding purposes belonging to the breeds of Shorthorn (Durham), Hereford, Aberdeen-Angus, Red-Polled, Galloway, Devon, Brown-Swiss, Holstein-Friesian, Jersey, Guernesey, Ayreshire, Zebu, Mysore, Brahmin; and cattle under said age imported for breeding purposes from Porto Rico or the Argentine Republic, provided that the importer shall duly prove their origin.'

"SEC. 2. That article two of said act be amended to read as follows:

"'ART. 2. In collecting said customs duties the following tariffs shall be applied, excepting in each case the classes mentioned in paragraphs numbered two, three, and four of article one, which are admitted free:

"'1. Yearlings shall pay a duty of one dollar each.

"'2. Fat cattle from Florida, under which heading shall be com-

prised animals weighing over 500 pounds (226 kilograms), shall pay a duty of five dollars each.

"'3. Fat cattle from Honduras, under which heading shall be comprised animals weighing over 600 pounds (272 kilograms), shall pay a duty of six dollars each.

"'4. Fat cattle from Mexico, under which heading shall be comprised animals weighing over 700 pounds (317 kilograms), shall pay a duty of seven dollars each.

"'5. Fat cattle from Venezuela and Colombia, or from any other country not herein specified, under which heading shall be comprised cattle over 800 pounds (362 kilograms), shall pay a duty of eight dollars each.

"'6. Lean cattle, under which heading shall be comprised cattle under the weights above mentioned, according to origin, shall pay a duty of two dollars each.

"'*Provided, however*, That the rates herein named shall be subject to the changes applied to said article by law or treaty since September 15, 1902.'

"SEC. 3. That article four of said act is hereby repealed.

"SEC. 4. Section 8 of the Regulations of October 23, 1902, relating to the slaughter of cows and heifers, is hereby repealed, and the other sections of said Regulations shall be renumbered accordingly.

"SEC. 5. Section 18, paragraph 184, of said Regulations is hereby amended to read as follows:

"'Section 17.

* * * * * * *

"'Paragraph 184.

"'A. Cattle under six years of age imported for breeding purposes belonging to the breeds of Shorthorn (Durham), Hereford, Aberdeen-Angus, Red-Polled, Galloway, Devon, Brown-Swiss, Holstein-Friesian, Jersey, Guernsey, Ayreshire, Zebu, Mysore, Brahmin and cattle under said age imported for breeding purposes from Porto Rico or the Argentine Republic, provided that the importer shall duly prove their origin, duty free.

"'B. Yearlings, except those mentioned in A, one dollar each.

"'C. Cattle from Florida, except those mentioned in A, weighing over 500 pounds, five dollars each.

"'D. Cattle from Honduras, except those mentioned in A, weighing over 600 pounds, six dollars each.

"'E. Cattle from Mexico, except those mentioned in A, weighing over 700 pounds, seven dollars each.

"'F. Cattle from Venezuela and Colombia, or from other countries not specified, except those mentioned in A, weighing over 800 pounds, eight dollars each.

"'G. Lean cattle except those mentioned in A and B, which do not reach the weights above mentioned, according to origin, two dollars each.'

"SEC. 8. This decree shall take effect from and including August 1, 1907."

NOTE.—Section 8 of the Regulations of October 23, 1902, which is repealed by section 4 of the above decree, is as follows:

"In no case will the slaughter of female cattle be permitted except of those pronounced useless for breeding, meaning such as are above ten years of age; this fact being certified under oath by a veterinary or by a practical stockman where there is no veterinary."

CUSTOMS REVENUES OF HAVANA, FIRST HALF OF 1907.

The custom-house of Havana, Cuba, collected during the first six months of 1907 a total revenue of $9,831,697.88, as compared with $9,668,008.69 in the same period of 1906, an increase of $163,689.19 for 1907.

COFFEE IMPORTS IN 1906.

According to statistics published by the Department of Commerce and Labor of the United States, the Cuban Republic imported during the year 1906 the following quantities of coffee: Porto Rico, 11,739,124 pounds, valued at $1,376,175; United States, 7,240,102 pounds, valued at $678,337; Brazil, 2,657,747 pounds, valued at $239,022; Venezuela, 5,625,121 pounds, valued at $496,580.

RATIFICATION OF THE POSTAL CONVENTION OF ROME.

On May 31, 1907, the Provisional Governor of Cuba by decree ratified the principal convention, the final protocol, and the regulations for the execution of the same concerning the Universal Postal Union, signed at Rome on May 26, 1906.

DOMINICAN REPUBLIC.

EXTRACT FROM THE CUSTOMS AND PORT LAWS.

The custom-houses of the Republic are the offices established by the State for the collection of the duties imposed by law on merchandise imported into the country, and on products exported therefrom.

The commercial transactions which come under the customs laws are classified as follows:

1. Imports, which consist in introducing foreign merchandise for consumption in the Republic.

2. Exports, which consist in exporting products from the Republic to foreign countries.

3. Transit, which consists in transporting foreign merchandise introduced into the Republic, consigned to another nation, or to ports of entry of the Republic.

4. Coastwise trade, which consists of traffic by sea in national vessels among the ports of the Republic.

5. Storage or deposit, which is the introduction of foreign merchandise in custom-house warehouses, to be imported or reexported within such date and in such cases as the law may expressly provide.

Imports and exports can be made through the following ports: Santo Domingo, San Pedro de Macoris, Tortuguero de Azua, Santa Barbara de Samana, Puerto Plata, San Fernando de Montecristi, and Villa Sanchez.

There shall be a custom-house at each of the ports of entry.

Whenever foreign vessels are permitted, upon compliance with the legal requisites, to take freight at ports of the Republic which are not entry ports, with the exception of the port of Barahona, they shall not be cleared for foreign ports except at the port of entry where the permit was obtained.

IMPORTS AND EXPORTS.

All natural products, as well as the products of the arts and industries, may be imported into the Dominican Republic, except the following:

Apparatus for coining money, unless for the use of the Nation, worn silver coin, in accordance with decree of April 5, 1884; counterfeit money; obscene engravings and pictures; provisions of war which are not consigned to the Nation, as well as revolvers and cartridges and other articles prohibited by the tariff.

The exportation of cattle is hereby absolutely prohibited.

REQUISITES WHICH THE CAPTAINS OF VESSELS MUST COMPLY WITH.

Every vessel, with or without a deck, of whatever nationality, kind, and tonnage, sailing from foreign ports to ports of entry of the Republic with cargo or in ballast, shall be provided with a bill of navigation and dispatched by the Dominican Consul with the documents specified in this section.

Every captain or purser of a vessel receiving cargo at foreign ports and bound to ports of entry of the Republic, engaged in foreign trade, shall furnish the Dominican Consul or his representative a manifest signed in quadruplicate, stating the following:

1. Kind and name of vessel, its tonnage, flag, license, and crew, the name of the captain, that of the consignee of the vessel, as well as the ports whence it comes.

2. The name of the port or ports of destination.

3. The number of packages, their gross weight, and the number and corresponding mark of each package carried by the vessel.

REQUISITES WHICH THE SHIPPERS SHALL COMPLY WITH.

All goods shipped from foreign ports to ports of entry of the Republic shall be cleared and provided with the documents required by this section.

Shippers of merchandise in foreign ports consigned to ports of this Republic shall deliver in quadruplicate in Spanish to the Consul or his representative a signed invoice in which shall be stated the following:

1. The name of the shipper and that of the owner of the merchandise; the name of the person or consignee to whom the merchandise is sent; the place of shipment and the port of destination; the kind, nationality, and name of the vessel and of its captain;

2. The mark, number, and gross weight of each package;

3. The net weight, measure, and quality of the contents of each package, specifying the amount of the pieces or packages of each kind contained therein;

4. The actual value of the merchandise in general, in accordance with the current market price at the time of delivering the invoices; and

5. That the invoices do not include goods belonging to more than one importer.

REQUISITES WHICH THE CONSULS SHALL COMPLY WITH.

Consuls shall not clear vessels, of whatever kind, nationality, and tonnage, bound to ports of the Republic, unless they are ports of entry for foreign trade.

Consuls must show to all persons who may so request the custom-house laws of the Republic, the forms of invoices, bills of lading, manifests, etc., and to give such explanations as may be necessary and pertinent so that they may properly fill out such documents.

Consuls shall not certify invoices and bills of lading presented to them in the following cases:

1. When not written in black ink and very legible;

2. When they do not contain all the data required by article 18 of this law;

3. When the four copies required are not delivered;

4. When said documents contain corrections, blurs, or erasures, or interlineations without the proper footnote at the bottom of the document before the date and signature; and

5. When the bills of lading of the shipment are wanting.

ENTRANCE OF VESSELS.

No vessel shall be allowed to enter any port of the Republic unless a committee of the board of health visit the same beforehand and decide in accordance with the rules and regulations in force concerning the matter as to whether the vessel shall be admitted or not.

If the vessel is admitted and should be a merchant vessel, the captain or purser shall be required at the time of making the visit of inspection to furnish (1) the consular papers delivered him at the port or ports of clearance; (2) the certified manifest or manifests; (3) the lists of the articles for supplies of the vessel and of the victuals, in conformity with the provisions of article 13, and everything included in the personal belongings of the captain and of the crew; (4) the list of passengers and of their baggage, and (5) the bill of health certified to or issued by the Consul.

UNLOADING OF VESSELS.

The custom-houses shall prepare from the manifest two alphabetical indexes of the packages consigned thereto, commencing with the first letter with which each mark is written, giving their numbers and classifying them by boxes, bags, packages, crates, etc., according to the class to which they belong. One of the two indexes shall be delivered to the officer who inspects the unloading of the vessel and the other copy to the custom-house officer who receives the cargo at the warehouses where the same is to be deposited.

IRRIGATION OF THE MONTE CRISTI DISTRICT.

The "*Gaceta Oficial*" of March 27, 1907, publishes the text of the following act of the National Congress, making an appropriation for irrigating the Monte Cristi District, passed on March 18 and signed by President CACERES on March 23, 1907:

"Be it resolved:

"ARTICLE 1. To vote, as a charge upon the Public Treasury, and for the period of two years, the sum of $75,000 annually, which shall be appropriated to the costs occasioned in irrigating the Monte Cristy District, by the system of submersion according to the plans prepared for this purpose and on file in the Ministry of Promotion and Public Works.

"Paragraph. The above sum shall be included in the General Budget Law annually voted by the National Congress under the heading of 'Promotion and Public Works.'

"ART. 2. The above-mentioned work shall be under the charge of the Executive Power, which shall use all means within its reach and exercise the necessary dilligence, with a view of satisfactorily completing in the shortest time the realization of this important work."

TIMBER LANDS OF THE REPUBLIC.

Mr. M. L. MURRAY, of San Juan, Porto Rico, who has been for three years engaged in the lumber business in the Dominican Republic, writes to the International Bureau of the American Republics that on the high plateaus of the central mountain range of the Republic

there are fully 3,000,000 acres of first-class long-leaf yellow pine that will cut 12,000 to 15,000 feet to the acre. Between the pine forests and the sea there is a belt of hardwoods—mahogany, lignum vitæ, satin wood, walnut, bayahondo, gri gri, quebra hacha, nisparillo, sabino, and Spanish cedar. Of this timber there is about 6,000,000 acres.

The low lands where the hardwoods grow are very rich, and after the timber is removed they will make the most productive plantations for the cultivation of sugar cane, cocoa, tobacco, coffee, oranges, pineapples, fiber plants, etc. These lands can now be bought for from 50 cents to $5 gold per acre. The same class of land in cultivation in Porto Rico sells for from $25 to $500 per acre.

ECUADOR.

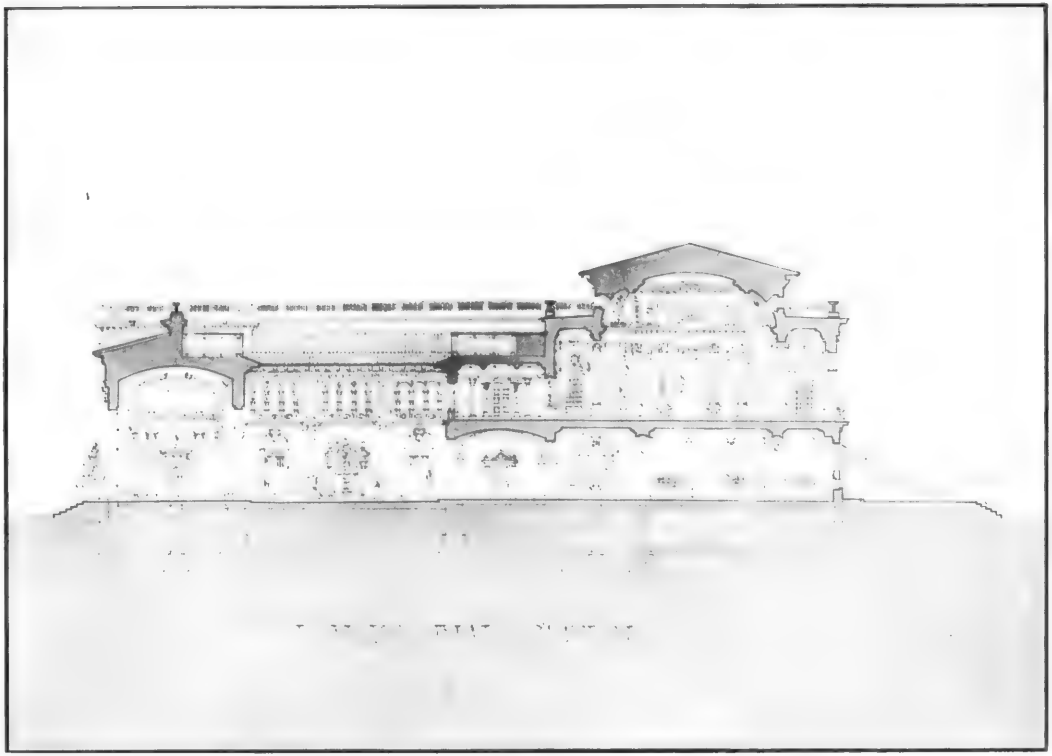
IMMIGRATION AND COLONIZATION OF THE ORIENTAL REGION.

In a decree dated February 7, 1907, and published in the "*Registro Oficial*" of the 19th of the same month, the National Assembly ratified the contract entered into between the Government and Messrs. O. ALEXANDER and SIMON GOTTLIEB, on June 6, 1906, for the introduction of foreigners into, and the colonization of the Oriental Region. The concessionaires shall bring into Ecuador 5,000 white families, Dutch and German preferably, all of whom must be farmers and able to do agricultural work. The principal conditions imposed upon the concessionaires are the following: To provide the immigrants during the period of one year with all that may be necessary for their subsistence; to furnish each family with a house, seeds, tools, and two draft animals; to construct, within the zone where the colony is to be established, towns provided with churches, schools, drug stores, physicians, warehouses, and stores; to construct a permanent railroad, and to guarantee the fulfillment of the terms of the contract with a deposit amounting to £10,000.

The Government, in turn, agrees to: Grant the concessionaires public lands to the extension of 500,000 hectares, in the Oriental Region; authorize the company to sell 50 hectares of land to each family; permit, for the period of ten years, the free importation of baggage and other belongings of immigrants, and also of the machinery and materials for the railroad to be constructed; exempt the settlers from the payment of direct taxes for the period of ten years.

The 5,000 families referred to in the contract should be residing in Ecuador at the expiration of ten years from the date of the signing of the contract.

The concessionaires shall organize a company under the name of "The Ecuatorian Immigration Land Company."



LONGITUDINAL VIEW OF ARCHITECTS' DRAWINGS OF NEW BUILDING OF THE INTERNATIONAL BUREAU OF AMERICAN REPUBLICS.

PRODUCTION OF VEGETABLE IVORY IN 1906.

According to statistics published by Messrs. Louis Delius & Co., of Hamburg, under date of April 22, 1907, the production of vegetable ivory in Ecuador during 1906 amounted to 11,715,000 kilograms, as compared with 9,914,250 kilograms produced in 1905.

MEXICO.

FOREIGN COMMERCE IN APRIL, 1907.

According to figures issued by the Statistical Division of the Treasury Department of the Republic of Mexico, the foreign commerce of the Republic for April, 1907, and for the first ten months of the fiscal year 1906–7, was represented by the following valuations, the figures for the corresponding periods of the preceding year being also given for the purposes of comparison:

The total value of importations during the ten months under review was $189,136,067.56 in Mexican currency, as declared in the custom-houses, an increase of $15,002,494.18 as compared with the preceding year.

The exports for the ten months were valued at $206,816,240.70, showing a decrease of $12,658,508.12 as compared with the same period of 1905–6. Imports and their valuation were as follows:

RAILWAY CONSOLIDATION ACT.

President Diaz on July 6, 1907, signed the following decree, which was published in the "*Diario Oficial*" of the same date:

"Porfirio Diaz, Constitutional President of the United Mexican States, to the people thereof, be it known:

"That, by virtue of the powers granted to the Executive of the Union by the law of December 26, 1906, I have seen fit to issue the following decree regarding the formation of the National Railways Company of Mexico:

"Article 1. There shall be formed a Mexican stock company of limited liability between the Mexican Government of the one part, and seven or more stockholders of the National Railway Company of Mexico and of the Central Mexican Railway Company, Limited, of the other part, who may agree to exchange their stock for stock of the new company. This company shall be known as the National Railways Company of Mexico, and shall have its domicile in the capital of the Republic.

"Art. 2. The object of the company shall be to consolidate the properties of the National Railway Company of Mexico and of the Central Mexican Railway Company, with power to acquire, construct,

and operate any other railway lines within the national territory, and to perform all acts or operations, and to enter into all contracts conformable with the purpose of the law of December 26, 1906; enjoying in consequence, in order to accomplish the purposes of its formation, the following powers and authorizations:

"I. To acquire, own, and operate, in whole or in part, and by any legal title whatever, the concessions, rights, and properties of the National Railway Company of Mexico and of the Central Mexican Railway Company, and of any other company or enterprise which may own or operate lines of railway or of transports by land or by water, or any service connected with said lines;

"II. To acquire and possess by any legal title whatever, stock, whether preferred, ordinary, common or deferred, bonds or obligations, and in general certificates of any kind whatever of the National Railway Company of Mexico and of the Central Mexican Railway Company or of the other companies or enterprises alluded to in the preceding section and whose properties may be situated in whole or in part within the national territory; with power to exercise all the rights appurtenant to these stocks, bonds or obligations, and certificates;

"III. To take charge of all kinds of transports by land or by water with the industries or services connected or united therewith, which it may deem desirable or lucrative; and to this end, to acquire and possess goods, chattels, and real property of all kinds, to construct railway lines within the national territory and to execute works of all kinds;

"IV. To promote the establishment or development of companies or enterprises which may have for their object one or more of the purposes set out in the preceding section; the production or trade in materials or goods proper for the consumption of the company or the development of any of its properties; having authority to acquire or possess stocks, bonds or obligations, and certificates of the said companies or enterprises and to take part in the said companies or enterprises in any manner, with authority to exercise all the rights appertaining to said stocks, bonds or obligations, and certificates;

"V. To issue, in conformity with the by-laws requirements and without the necessity of previous subscription therefor, its own stock, to preserve the same in its treasury so long as it is not agreed to issue it, and to hypothecate or assign the said stock;

"VI. To perform all acts and to enter into civil and mercantile contracts which may be proper in order to attain the purposes of the company, including the giving of guaranties and, in general, to do whatever may be germane to the objects set out in the preceding sections, with full legal capacity for all things allowed by the law

to companies of this kind, or authorized by this decree, or by others which may hereafter be issued by the Federal Executive in pursuance of the powers granted by the law of December 26, 1906.

"ART. 3. The capital of the company at the beginning shall be four hundred and sixty million *pesos*, and shall be represented to the amount of sixty million *pesos* by first preferred stock, to the amount of two hundred and fifty million *pesos* by second preferred stock, and to the amount of one hundred and fifty million *pesos* by common stock. All of which stock upon being issued, and for whatever purpose issued, shall be wholly exempt from taxation.

"The initial capital may be increased or diminished as provided by this decree and by the by-laws, but while the Mexican Government shall hold the majority of the stock of the company, no increase or reduction of the capital shall be effected which may result in the Government ceasing to hold the said majority, unless with the consent of the Federal Executive with prior authority from the Congress of the Union.

"ART. 4. First preferred stock shall confer upon its holders the right to receive each year from the net profits, and before any dividend is paid, for the same year, upon stock of any other class, dividends up to four per cent upon its face value. It being understood that any deficiency which may occur in the said four per cent in any year shall not be chargeable to the net profits of the following years.

"In case of liquidation of the company the holders of first preferred stock shall have the right to be reimbursed for said stock at par before any payment is made to the holders of any other class of stock. The sixty millions of *pesos* represented in the capital of the company by first preferred stock shall not be increased, nor shall mortgages or other charges, except as provided in articles 9, 10, and 11 of this decree, be created upon the properties subject to the mortgages mentioned in said articles, unless in a general stockholders' meeting, properly convoked, the majority of the stock of the company which may be in circulation so agree and unless the holders of the majority of the first preferred stock in circulation, voting separately, so approve.

"The said first preferred stock may not be diminished except by cancellation of such as the company may own or buy in the market; but the company may redeem at par and in cash the whole amount of said stock in circulation.

"ART. 5. Second preferred stock shall confer upon its holders the right to receive each year from the net profits dividends up to five per cent upon its face value, after setting aside or separating the dividend of four per cent upon the first preferred stock and before any dividend is paid for the same year upon the common stock, it being understood that any deficiency occurring in the said five per

cent in any year shall not be chargeable to the net profit of the following years. After payment of the said five per cent, all excess of distributable net profits in a year shall be distributed between the holders of second preferred and common stock forming part of the initial capital of the company in proportion to the number of shares owned and without distinction between them on account of class.

"In case of liquidation of the company, second preferred stock shall have the right to be reimbursed at par after the reimbursement, also at par, of first preferred stock and before any payment is made to holders of common stock.

"The capital represented by second preferred stock may be increased or diminished if in the general stockholders' meeting, properly convoked the majority of the stock of the company in circulation so determine and a majority of the second preferred stock which may be present and voting at the meeting, voting separately, so approve. Any diminution, unless effectuated by cancellation of stock which the company may own or buy in the market, shall be accomplished by means of a cash distribution pro rata among the stockholders and a correspondent joint reduction in number or in face value of the stock.

"ART. 6. Common stock forming part of the initial capital of the company shall confer upon its holders the right to participate each year in the distributable net profits after payment for the same year of the dividends of four and of five per cent due, respectively, upon first and second preferred stock. The surplus of said distributable new profits shall be distributed between the holders of the second preferred and the said common stock, forming part of the initial capital of the company, in proportion to the number of shares each may own and without distinction between them on account of class.

"In case of liquidation of the company, holders of common stock shall have the right to receive, proportionally to their holdings, all the net assets remaining after the first and second preferred stock has been reimbursed at par.

"The capital represented by common stock may be increased or diminished if in the general stockholders' meeting, properly convoked, the majority of the stock of the company in circulation so determine and the holders of a majority of the common stock who may be present and voting at the meeting, voting separately, so approve.

"Common stock by which the initial capital of the company is increased shall not give the right to participate in the dividends which the company may distribute, but will confer upon the holders thereof the other rights appertaining to stock of the same class forming part of the said initial capital.

"The diminution of common stock shall be accomplished solely by means of the reduction, without any compensation on the part of the

company, of the number or of the par value of the said common stock, the company being empowered to make the said reduction either in the common stock, which has no right to participate in dividends without reducing the common stock forming part of the initial capital of the company, or in stock of both classes at its election.

"ART. 7. All stock of the company shall confer equal right to vote in the general stockholders' meeting, except as set out in articles 4, 5, and 6 of this decree and as provided by the by-laws regarding election of the board of directors for the purpose of giving to the holders of first and second preferred stock the right to elect separately one and four directors, respectively.

"Taxes of all kinds imposed, or which may be imposed, in the Republic, whether by the Federal Government or by any State or municipality, upon the dividends or the reimbursement of the stock, and which conformably to the law must be paid directly by the company, or deducted by it from the distributable amounts, shall be charged by the said company to the general expense account, the stockholders receiving, without any reduction, the amounts which for the specified purposes are distributable among them.

"ART. 8. Stock constituting the initial capital of the company shall be preferentially applied to the acquisition of the properties of the National Railway of Mexico and of the Central Mexican Railway and the stock and certificates which the said companies have in circulation, and to be set apart for the Government as set out in the second section of article 18 of this decree.

"Stock intended for the said purposes, as well as the remainder of the initial capital, shall be issued as the Board of Directors may agree, which board is empowered to determine the denomination of the issues and the price in cash or other compensation which the company may receive therefor.

"ART. 9. In order to accomplish the purposes of its creation, the company may make and issue two kinds of obligations designated in this decree 'Preferred Mortgage Bonds' and 'Ordinary Mortgage Bonds.' It may likewise secure the same by pledge or mortgage on all or on a part of the concessions, properties, and other possessions which the company may at the time own or acquire subsequently. The guaranties so constituted for both kinds of obligations shall provide, in the provisions set out in the respective instruments, a mortgage lien upon the railway lines and real property embraced therein according as the company may acquire the same, and the debt represented by the preferred mortgage bonds shall have preference over that represented by the ordinary mortgage bonds.

"In the public instruments and contracts by which the company constitutes the said guaranties, covenants may be set out, proceedings to make the same effective may be stipulated, and the requisites

necessary and usual in foreign markets, on whose exchanges it may be agreed to list the said obligations, may be inserted.

"The said public instruments and contracts when legally executed shall be inscribed in the Public Registry of the City of Mexico, upon prior certificate of the Treasury Department that they have been celebrated conformably to the mandates and special authorizations of this decree; and they shall be legally effective for all purposes; and likewise so the corresponding bonds which may be issued, even when in the one or in the other may not be fulfilled some of the requisites demanded by the railway law of April 22, 1899, or by other law of general character.

"ART. 10. The preferred mortgage bonds shall pay interest at the rate of four and a half per cent per annum, and it shall be stipulated that payment of the capital sum represented thereby shall begin in 1917 through a sinking fund, which for this purpose will be established and which should secure the full payment of all the bonds and interest not later than the year 1957, without prejudice to the right reserved by the company to extinguish the debt by other means prior to the indicated time.

"The total amount of the bonds of this class shall not exceed four hundred and sixty-two million *pesos*, but the company may stipulate that payment thereof may be made with a premium not exceeding five per cent of their face value.

"ART. 11. The ordinary mortgage bonds shall pay interest at the rate of four per cent per annum, and it shall be stipulated that payment of the capital sum represented thereby shall begin in the year 1937 through a sinking fund which for this purpose will be established and which should secure the full payment of all the bonds and interest not later than the year 1977, without prejudice to the right reserved by the company to extinguish the debt by other means prior to the indicated time.

"The total amount of these bonds shall not exceed three hundred and seventy-two million *pesos*, and the company shall not stipulate for their payment with any premium upon their face value.

"In addition to the guaranties constituted by the company in favor of these bonds conformably to article 9 preceding, the Government of the United Mexican States will guarantee unconditionally their payment in principal and interest, including the amounts set apart for the sinking fund, and this guaranty shall be stated in each bond.

"ART. 12. If, on account of the guaranty spoken of in article 11 preceding, the Government should make any disbursement, it shall be considered as a creditor of the company for the amount it may have paid, with the right to have the said amount reimbursed from the proper revenues at the rate of four per cent a year. Except in

case of liquidation, the said reimbursement shall be made solely from the distributable net profits before any dividend shall be paid to any class of stock except as is guaranteed in the foundation deed of the company. The Government shall have no right to enforce payment of its debt by means of sequestration, intervention, liquidation, or other judicial proceedings; yet, in regard to preference over other creditors, it shall occupy the first place after mortgagees, unless it shall relinquish this preference in favor of one or more other creditors.

"ART. 13. The issue of mortgage bonds of both classes shall be made as circumstances require and in such amounts as the company may deem necessary to accomplish the purposes of its creation.

"In every case in which bonds must be issued the consent of the Treasury Department shall be indispensable, except when the issue is made in order to meet obligations which the company may have entered into through contracts in which the said Department may have joined.

"ART. 14. In addition to the two kinds of bonds mentioned in the preceding articles, the company may make and issue other obligations, whether secured or not by mortgage upon its property; but in regard to the property subject to the lien of the said two classes of bonds, these obligations will occupy, as to preference, a deferred position thereto.

"ART. 15. The company shall be managed by a board of directors in the city of Mexico, composed of twenty-one members of whom nine, at the most, may reside in foreign countries, to constitute in the city of New York, United States of America, a local board which may hold its meetings separately.

"The Board of Directors shall have full power to direct and administer the affairs of the company as may be provided by the by-laws. It shall not be necessary that the directors be stockholders, nor that they deposit stock to guarantee their conduct. The directors shall be responsible solely for misrepresentation and fraud in the exercise of their functions, and they shall be held to this responsibility solely by resolution of the general stockholders' meeting and by the person appointed for this purpose; without any stockholder having the right individually to institute any action or claim against them on account of their official acts.

"In order to facilitate the financial organization of the company it may be covenanted in the foundation deed that the first board of directors be composed of seven directors, at the least, to be increased subsequently to twenty-one in manner and form as therein set out.

"ART. 16. The net profits of the company shown in the annual balance approved by the general stockholders' meeting shall be distributed among the stockholders in the order and according to the rule

provided in articles 4, 5, and 6 of this decree, and to the rules established in the by-laws, with a prior deduction of five per cent of the amount, which will be allotted to form a reserve fund until it amounts to the sum of five million *pesos*, and from then on, the segregation of the said five per cent being discretionary as the general stockholders' meeting may agree.

"The reserve fund will be destined for such purposes as the said stockholders' meeting may determine, including that of continuing to make the payments among the stockholders which have been necessary in order not to reduce the rate of dividends that have been preferentially distributed. In all cases where the said fund is reduced to less than five million *pesos* the segregation of the five per cent of the net profits shall become again obligatory until this amount is reached.

"ART. 17. The duration of the company shall be ninety-nine years counting from date of this decree, save in case of extension or of prior dissolution foreseen in the foundation deed or in the by-laws.

"ART. 18. The company shall be established in the city of Mexico through the execution of the corresponding public indenture, in which the Federal Executive shall be represented by the Secretary of the Treasury and Public Credit.

"This indenture to which it shall not be necessary to attach the attestation set out in article 175 of the present Commercial Code, shall contain:

"I. The declaration of constituting the company conformably and subject to the provisions of the law of December 26, 1906, and of this decree;

"II. The adjudgment to the Government of a part of the stock and certificates of the company as compensation for its contributions, of its guaranty given according to article 11, and of its help and cooperation in organizing the company. The said adjudgment shall secure to the Government representation in its own right of a number of shares sufficient to give a majority of votes in the general stockholders' meetings;

"III. The designation of the first board of directors, its special powers, the time of its duration, and the manner in which it may be renewed;

"IV. The naming of the first commissioners;

"V. The by-laws of the company in which shall be prescribed special rules for form, transfer and registry of stock, and of the manner of reissuing lost or destroyed certificates;

"VI. Other agreements and stipulations which the parties may consider desirable.

"With the execution of the said public indenture the company will become legally constituted with full legal capacity, and will enter

into the enjoyment of the franchises and rights belonging to it in conformity with this decree, the foundation deed, and the by-laws.

"ART. 19. The company in its interior government and in its rights and obligations with respect to third parties shall be subject:

"I. To the rules and mandates contained in this decree and in others which hereafter the Federal Executive, in use of the powers granted by the law of December 26, 1906, may issue.

"II. To the regulations and rules established in the foundation deed and in the by-laws in accordance with the said decrees.

"On points not comprehended in the said decrees, deed, and by-laws, the company shall be governed by the general laws of the Republic.

"The by-laws of the company shall be published in the "*Diario Oficial*" of the United Mexican States. A like requirement shall be observed with respect to modifications which the general stockholders' meeting may choose to make in the same; but these modifications shall not have legal effect until after having been approved by the Treasury Department.

"ART. 21. Values represented by the stock or certificates of the company may be expressed in dollars, pounds sterling, or in other foreign money, or in Mexican gold *pesos* of weight and fineness established by the monetary law now in force; if on behalf of the company it is believed to be convenient in this particular to observe the rules and customs of the markets in which the said certificates and stock may have to be listed.

"Likewise the dividends, interest, and redemption of the stock and certificates of the company may be paid, at the election of the holders, in Mexico, or any foreign city or cities, at a fixed rate of exchange established in said stock or certificates.

"ART. 22. The public indenture of foundation of the company, contracts of purchase, of subscription and other papers executed in the Republic in order to consummate the transfer of the properties of the National Railway Company of Mexico and the Central Mexican Railway, or of other enterprises of companies of transport, such as are executed in order to carry into effect the issue of bonds authorized by this decree, as also the registration of the said papers when executed in foreign countries, shall bear only the stamp tax corresponding to the sheets of the judicial record containing them. Attestations of the said papers and contracts of whatever nature having relation to the ends above set out shall bear a tax of fifty *centavos* per sheet. Regarding the certificates of stock, bonds, or other securities of the said company issued in Mexico or which, issued in foreign countries, come into circulation in the Republic shall bear only a tax at the rate of one-half *centavo* per certificate whatever may be the face value represented thereby.

"Therefore, I decree that this act be printed, published, circulated, and given full force and effect.

"Given in the palace of the Executive of the Union in the City of Mexico, June 6, 1907.

"PORFIRIO DÍAZ."

THE LAW OF DECEMBER 26, 1906.

The Congress of the United Mexican States resolves:

"ARTICLE 1. That the Federal Executive be authorized to constitute, by means of one or more decrees a Mexican stock company or society of limited responsibility and domiciled in the Capital of the Republic, which shall have for its object to incorporate the properties of the National Railway of Mexico and the Central Mexican Railway, with power to acquire, construct, and operate any other railway lines within the national territory, and to perform all acts or operations and to enter into all contracts conformable with the purpose of the present authorization.

"In the decree or decrees which are issued the Federal Executive shall fix the constructive bases, which in his judgment may be most fitting, and the special requirements, both in essence and in form, requisite in order that the society may have legal capacity and may accomplish the purposes of its institution.

"ART. 2. The Federal Executive is also empowered to celebrate the agreements and arrangements which he may deem conducive to the end of bringing about the incorporation set out in the above article, subject to the following restrictions:

"I. The Federal Government shall represent, in its own right, in the company or society to be constituted, an amount of stock sufficient to give a majority of votes in the general stockholders' meeting.

"II. The equivalent, by means of which the amount of stock giving a majority of votes referred to in the preceding section is obtained, shall not consist of any disbursement of money at the charge of the Federal Treasury, nor in the emission of public-debt certificates; but the Executive is authorized to exchange for stock of the new company that of the National Railway of Mexico belonging to the nation, and also to execute the subsidiary guaranty of the Federal Government in favor of one of the classes of mortgage bonds which the new company or society may issue, provided that the bonds guaranteed do not bear interest greater than four per cent yearly.

"III. The issue of bonds guaranteed by the Government shall be limited to an amount necessary to convert only a part of the certificates which the companies whose properties are to be taken over may have in circulation and to provide the funds required by the new company for expenses of incorporation, construction, or pur-

chase of new railway lines, or the certificates of transport enterprises or companies, and, lastly, the betterment and equipment of the said lines and of those already existing.

"IV. The stock or certificates, which secure to the Federal Government the majority of votes referred to in the first section of this article, shall not be alienated, nor in any way hypothecated, without express authority from the Congress of the Union.

"V. In the agreements or arrangements which the Federal Executive may enter into by virtue of the present authorization, there shall not be modified in any manner the concessions of the companies whose properties may be incorporated or acquired.

"ART. 3. The Federal Executive shall, at an opportune time, give an account of the use he has made of the powers granted by this law."

CUSTOMS REVENUES, FISCAL YEAR 1906–7.

Statistics recently published by the Mexican Department of Finance show that the revenues collected by the custom-houses of the Republic during the fiscal year 1906–7 were as follows:

	Pesos.
Import duties	52,282,673.14
Export duties	1,061,393.98
Port dues	1,143,586.70
Total	54,487,653.82

Comparing this total with that of the preceding fiscal year, which amounted to 47,748,515.81 *pesos*, an increase of 6,739,138.01 *pesos* is shown in favor of 1906–7.

MINING TITLES ISSUED.

The official report recently published by the Mexican Government shows the number of titles to mines issued during the first six months of the fiscal year 1906–7 to have been 2,000, covering an area of 30,438 hectares—about 75,213 acres.

In the preceding six months a total of 1,801 titles were issued, covering an extent of 32,459 hectares, or 80,207 acres. Thus for the calendar year 1906 a total of 3,801 titles were granted, embracing 155,420 superficial acres of land.

STAMP TAX ON GOLD COINS.

According to a decree of the Mexican Government, issued on April 27, 1907, the internal stamp tax of the Republic is to be levied on all Mexican gold coins except those of current issue, when presented at the assay offices of the Republic for liquidation or at the custom-houses for export.

By article 5 of the law of March 25, 1905, gold and silver coins of the current issue were specially exempted from the workings of the

stamp tax. This exemption has now been withdrawn from all Mexican gold coins of issues prior to that now current, on the ground that such coins can henceforth only be regarded as tokens and not as current coin.

The assay fees chargeable on gold plates or bars when presented at assay offices or custom-houses for the purpose of ascertaining the degree of purity of the metal, in accordance with which the amount of the stamp tax is assessable, will be dispensed with as the standard of fineness appears stamped on all gold coins issued from the mints of the Republic, and this guarantee will be accepted as sufficient for the purposes of the assessment of the stamp tax, unless the interested persons should prefer that the coins thus presented by them for liquidation should be treated as ordinary gold bars.

CUSTOMS RECEIPTS, JUNE, 1907.

Total customs receipts at Mexican ports for the month of June, 1907, figure $4,943,863.63 (silver) for imports and $74,701.50 (silver) for exports; a total for the month of $5,018,565.13.

REGULATION OF BANK RETENTION OF SILVER COINS.

In order to obviate the inconvenience resulting from the scarcity of subsidiary coinage in the Republic, the Treasury Department of Mexico, on June 10, 1907, issued a circular to the effect that "those banks which after July 31 have more than 5 per cent subsidiary coin in proportion to their specie holdings will not have the same accounted for by the Government Bank "interventors" in the regulation of bank-note issues. A monthly statement of the subsidiary coin held by each bank will in future be rendered to the Treasury Department.

The restriction will not apply to the National Bank of Mexico, which, in conjunction with the Exchange and Currency Commission, has frequently large amounts of subsidiary coin on deposit for eventual distribution throughout the Republic.

SILVER BASIS OF THE STAMP AND CUSTOMS TAXES, JULY AND AUGUST, 1907.

The usual monthly circular issued by the Department of Finance of Mexico announces that the legal price per kilogram of pure silver during the month of July, 1907, shall be $43.72, and for August $43.97, according to calculations provided in the decree of March 25, 1905. This price will be the basis for the payment of the stamp and customs duties when silver is used throughout the Republic.

INTERNATIONAL LAW COMMISSION.

The "*Diario Oficial*" of June 25, 1907, publishes the decree of President Díaz of June 10, proclaiming the Convention for the Creation of an International Law Commission, which was signed at Rio de

Janeiro on August 23, 1906, by the representatives of all the American Republics represented at the Third International American Conference, nineteen in all, and which convention was approved by the Senate of the United Mexican States and ratified by President Díaz on April 21, 1907.

POSTAL CONVENTION WITH SALVADOR.

The "*Boletín Postal*" of the General Bureau of Posts of the Mexican Republic, in its issue of May, 1907, publishes the text of a convention signed with Salvador for the exchange of parcels post. This convention was signed at Mexico City on October 12, 1906, and promulgated by President Díaz on May 17, 1907.

INTERNATIONAL TRAFFIC ON THE ISTHMUS OF TEHUANTEPEC.

During the first week of June 30,000 tons of sugar coming from Hawaii crossed the isthmus of Tehuantepec to be shipped from Puerto Mexico to Philadelphia.

This cargo was carried by the steamers *Mexican*, *Nebraskan*, and *Arizonian*, of the American-Hawaiian Line. In view of the increased demands on the service, this line will soon add another vessel to its fleet, the *Isthmian*, which will have a capacity of 10,000 tons, make 17 knots an hour, and be equipped to carry 500 cabin passengers.

FREE ENTRY FOR FOREIGN MERCHANDISE IN QUINTANA ROO.

An executive decree of June 1, 1907, provides that such foreign merchandise as the President has specified or shall hereafter specify, and which is imported through the custom-houses of the Territory of Quintana Roo for consumption in that section of the Republic, shall be exempt from import duties and port dues from July 1, 1907, to July 1, 1908.

SILVER EQUIVALENTS OF THE MEXICAN PESO.

The President of the Mexican Republic has established, for the second half of 1907 and for use in statistical calculations only, the following table of equivalents between the Mexican *peso* and the coins of the countries where the silver standard obtains:

Country.	Coin.	Value of the Mexican peso in the respective coin.
Bolivia	Boliviano	0.99
Guatemala	Peso	.99
Salvador	do	.99
Honduras	do	.99
Nicaragua	do	.99
Persia	Kran	5.38
China	Tael	.5688

NICARAGUA.

REMOVAL OF SURCHARGE ON MERCHANDISE.

The "*Gaceta Oficial*," of Nicaragua, of June 18, 1907, publishes the following decree of President ZELAYA, dated June 10:

"Whereas the peculiar conditions in which the inhabitants of the Atlantic littoral find themselves make the surcharge of 100 per cent, imposed by the decree of January 7 of the present year, result onerously for the people of this region, relating, as it does in the most part, to articles of prime necessity, whose transport from the interior is more difficult than import from abroad, it is decreed:

"Sole article. From the present publication the decree of January 7 of the present year shall be without effect for the custom-houses of the littoral."

PANAMA.

LAW RELATING TO NICKEL COIN.

On April 25, 1907, President AMADOR GUERRERO promulgated the following decree:

"The National Assembly of Panama decrees:

"ARTICLE 1. The weight and diameter of nickel coins of the nominal value of 2½ hundredths of a balboa shall be the same as the nickel coin of the United States of America of the value of five cents. The alloy shall be 75 per cent copper and 25 per cent nickel, and the coin shall have the following inscription:

"On the obverse, in the center, the coat of arms of the Republic; in the upper part of the border near the edge of the coin, the phrase, 'República de Panamá,' and in the lower part, in Arabic numerals, the year of coinage.

"On the reverse, in the center, in large figures, '2½;' in the upper part of the border the value of the coin written in letters, 'Dos y medio centésimo de balboa,' and in the lower part seven small stars.

"ART. 2. The coin of half of a hundredth of a balboa shall contain the proportion of alloy prescribed in the foregoing article, shall be of a diameter of 16 millimeters, and shall bear the following inscription:

"On the obverse, the bust of Vasco Núñez de Balboa, with the phrase, 'República de Panamá,' and in the border below, in Arabic numerals, the year of coinage.

"On the reverse, in the center, the value in writing, 'Medio centésimo de balboa.'"

EXTRADITION TREATY WITH GREAT BRITAIN.

The "*Gaceta Oficial*," of April 18, 1907, contains the text of the extradition treaty signed by the representatives of Panama and Great Britain on August 25, 1906, and promulgated by President AMADOR GUERRERO on April 17, 1907.

WEEKLY COMMUNICATION BETWEEN BOCAS DEL TORO AND PUERTO LIMON.

The "*Gaceta Oficial*" of the Republic of Panama in its issue of February 17, 1907, publishes a contract between the Government of Panama and E. UHLMANN, successors, for the establishment of steam communication between Bocas del Toro and Puerto Limon. Under this contract the aforesaid firm binds itself, for a period of one year from February 14, 1907, to establish weekly communication by steamers between Bocas del Toro and Puerto Limon, and to carry the mails from the former to the latter port.

SALVADOR.

THE BUDGET LAW FOR 1907–8.

The "*Diario Oficial*," of El Salvador, in its issue for June 7, 1907, publishes the text of the budget law for 1907–8, passed by the National Assembly on May 15, 1907. The revenues are estimated as follows:

	Pesos.
Import duties	4,765,900
Export duties	786,000
Tax on liquors	2,350,000
Stamped paper and stamps	250,000
Miscellaneous receipts	582,250
Total	8,734,150

The total amount appropriated for expenditures is $10,610,846.12, distributed as follows:

	Pesos.
National Assembly	41,830.00
President of the Republic	41,340.00
Interior	1,419,552.00
Promotion (*Fomento*)	774,848.00
Public instruction	889,749.00
Foreign relations	157,210.00
Justice	504,996.00
Treasury	571,429.75
Public credit	3,165,005.37
War and Navy	2,525,670.00
Total	10,610,846.12

A comparison of these totals shows a deficit of 1,876,696.12 *pesos*.

RATIFICATION OF INTERNATIONAL CONVENTIONS.

The Government of Salvador, on May 11, 1907, ratified in all their parts the eighteen conventions signed by the delegates of the Third International Conference of American States, which met in Rio de Janeiro in July, 1906.

UNITED STATES.

TRADE WITH LATIN AMERICA, FISCAL YEAR 1906-7.[a]

In the trade report issued by the Bureau of Statistics of the United States covering intertrade relations for the fiscal year ending June 30, 1907, the value of commerce between the United States and Latin America is placed at approximately $600,000,000 (imports, $350,000,000, and exports, $255,000,000), as compared with $230,000,000 (imports, $155,000,000, and exports, $80,000,000) a decade previously. In this estimate is included the trade with Porto Rico in order to establish uniform comparative data, Porto Rico at that time not being included in the Government of the United States.

Eliminating Porto Rico, the Guianas, and the West Indies other than Santo Domingo and Haiti from the consideration of trade with Latin America, the result shows an equally gratifying outcome, the volume of trade for 1907 showing a total of over $560,000,000 (exports, $227,304,976, and imports, $332,633,460), as compared with $498,738,804 (imports, $292,287,170, and exports, $206,451,634) in the preceding year, and indicating an immense advance over 1897, when other countries were included in the estimate.

For South America alone, imports and exports to and from the United States figure for more than $238,000,000, as compared with $212,000,000 in 1906, while Central American trade advanced from $36,021,148 to $41,916,042; Mexican, from $109,147,455 to $123,481,514; Cuban, from $132,743,509 to $146,746,964; Dominican trade showing a small increase from $5,104,589 to $5,880,716, and that of Haiti a slight decline from $4,493,317 to $4,190,782.

The increase in exports to South America is especially marked in regard to Brazil, a gain of over $4,000,000 being noted out of a total increase of more than $20,000,000, manufactured articles forming the chief item of shipment. These also form 60 per cent of the exports to Cuba, about 70 per cent of those to Mexico, and about 85 per cent of those to Central and South America.

Under the head of imports, Brazil again figures for a large share of the increase, an advance of $17,000,000, chiefly in coffee and rubber, being scheduled out of a total increase of over $40,000,000. From

---

[a] Latin American trade values as published in the MONTHLY BULLETIN for July, 1907, have reference to the calendar year 1906.

Cuba the increase of $12,500,000 occurs chiefly in sugar, and from the remaining countries the imports are principally confined to foodstuffs and manufacturers' materials.

By countries, imports and exports are reported as follows, for the two years under comparison:

Countries.	Imports.		Exports.	
	1906.	1907.	1906.	1907.
Central American States:				
Costa Rica	$4,622,426	$4,965,034	$2,338,188	$2,470,986
Guatemala	3,386,317	3,872,538	2,908,655	2,848,864
Honduras	1,724,865	2,296,556	1,632,251	1,833,056
Nicaragua	1,478,408	1,028,166	1,870,852	1,923,111
Panama	1,065,887	1,752,314	12,460,289	16,150,953
Salvador	1,131,734	1,171,298	1,401,276	1,603,166
Total Central American States	13,409,637	15,085,906	22,611,511	26,830,136
Mexico	50,965,177	57,233,416	58,182,278	66,248,098
Cuba	84,979,821	97,441,690	47,763,688	49,305,274
Haiti	1,185,477	1,274,678	3,307,840	2,916,104
Santo Domingo	3,096,338	3,370,899	2,018,251	2,500,817
South America:				
Argentine Republic	18,379,063	16,715,325	32,673,359	32,163,336
Bolivia			146,798	941,287
Brazil	80,416,524	97,881,158	14,530,471	18,697,547
Chile	16,945,476	18,287,029	8,667,227	10,195,657
Colombia	7,084,487	6,308,680	3,491,420	3,084,718
Ecuador	2,632,206	3,059,573	2,009,861	1,726,289
Paraguay	750	3,819	51,917	173,560
Peru	2,454,943	4,958,202	4,833,307	6,075,739
Uruguay	2,711,570	3,160,891	2,905,573	3,412,785
Venezuela	8,034,701	7,852,214	3,258,133	3,024,629
Total South America	138,659,720	158,226,891	72,568,066	79,495,547

Trade statistics show that imports from Latin America in 1906–7 were 132 per cent greater than those of a decade ago, while from all other countries an increase of but 78 per cent is indicated in trade returns. Exports to Latin America in 1907 are 212 per cent more than in 1897, while the export increase to other countries is but 68 per cent greater.

The principal countries with which this growth in trade occurs are the Argentine Republic, Brazil, and Chile, in South America, Central America as a whole, and Cuba.

Imports from the Argentine Republic have increased from $10,750,000 in 1897 to approximately $17,000,000 in 1907, a growth of about 60 per cent, while exports thither have increased from $6,333,000 in 1897 to over $32,000,000 in 1907, a gain of more than 400 per cent.

From Brazil imports have grown from $69,000,000 ten years ago to $98,000,000, approximately, in 1907, an increase of about 50 per cent, while exports thither have grown from $12,500,000 to over $18,000,000, an increase of a little over 44 per cent.

From Chile imports have increased from $3,750,000 in 1897 to over $18,000,000 in 1907, while exports to that country have increased from about $2,500,000 to over $10,000,000.

From Mexico imports have grown from $19,000,000 ten years ago to more than $57,000,000 in 1907, an increase of about 200 per cent, and exports thither from $23,500,000 to more than $66,000,000, an increase of 175 per cent.

Cuban imports have advanced in value from $18,500,000 in 1897 to over $97,000,000, an increase of about 400 per cent, and exports from the United States to that country have grown from $8,250,000 to over $49,000,000, an increase of nearly 500 per cent.

From Central America, as a whole, the imports have grown from $8,500,000 in 1897 to over $15,000,000 in 1907, an increase of 80 per cent, and exports thither from under $8,000,000 to over $26,000,000. The including of Panama among the States of Central America rather than as part of Colombia accounts for a large portion of this increase of about 225 per cent.

Trade with Mexico, Brazil, and Cuba establish new records in 1907, and while Argentine imports show a slight decline as compared with 1906 they are greater than the reported receipts for 1905.

The increase in importations from Latin American countries occurs chiefly in a few great articles, while the increase in exports is distributed among a large number, chiefly manufactures. From Mexico the most important items are sisal, pig copper, hides, and skins; sisal showing an advance of $10,000,000 in a decade, copper in pigs and bars an increase of over $13,000,000, copper ore nearly $4,000,000 and hides and skins over $3,000,000. From Brazil coffee shows an advance of $7,000,000 in ten years, and india rubber an increase in value of over $33,000,000. From Cuba sugar shows a growth in import value of $42,000,000; leaf tobacco, over $10,000,000, and cigars, $2,000,000, in the decade 1897–1907.

The following tables show the items of import from the various countries of Latin America and the exports thither for the twelve months ending June, 1907, as compared with the previous fiscal year, also the valuations for the month of June, the latest for which statistics have been issued:

FOREIGN COMMERCE, FISCAL YEAR 1906–7.

The foreign commerce of the United States during the fiscal year 1906–7, aggregating $3,315,114,122, has for its most striking characteristic the large increase in imports. This branch of trade, which figures for $1,434,421,425, shows an increase of more than $200,000,000 over 1906, and is more than double the total for 1898 or 1899. Exports, which amounted to $1,880,692,697, show an increase of $137,000,000 over the preceding year, and an increase of 53 per cent over 1899.

The Grand Divisions furnishing and receiving these imports and exports were as follows:

	Imports.		Exports.	
	1906.	1907.	1906.	1907.
Europe	$633,292,184	$747,291,255	$1,200,166,036	$1,298,293,999
North America	235,353,322	263,576,349	308,382,972	349,840,641
South America	140,422,876	160,165,537	75,159,781	82,157,174
Asia	180,095,671	212,475,427	105,451,610	92,703,664
Oceania	24,709,658	29,785,393	35,141,751	41,186,193
Africa	12,628,735	21,127,464	19,562,350	16,511,026

The principal participating countries were:

	Imports.		Exports.	
	1906.	1907.	1906.	1907.
United Kingdom	$210,029,437	$246,112,047	$583,090,123	$607,592,682
Germany	135,142,996	161,544,552	234,742,102	256,653,060
France	108,415,350	127,803,445	97,892,480	113,604,692
Netherlands	27,007,107	32,454,616	95,471,593	104,450,319
Canada	68,237,653	73,334,615	156,736,685	183,206,067
Mexico	50,965,177	57,233,416	58,182,278	66,248,088
Cuba	84,979,821	97,441,690	47,763,688	49,305,274
Brazil	80,416,524	97,881,158	14,530,471	18,687,547
Chinese Empire	28,531,207	33,436,542	43,774,375	25,704,532
Japan	52,551,520	68,910,594	38,464,952	38,770,060

The following valuations are given for the six classified groups of merchandise imported and exported:

IMPORTS.

	1906.	1907.
Foodstuffs in crude condition, and food animals	$134,315,448	$150,074,765
Foodstuffs partly or wholly manufactured	140,358,114	158,340,736
Crude materials for use in manufacturing	414,687,999	477,505,154
Manufactures for further use in manufacturing	220,298,751	274,249,005
Manufactures ready for consumption	307,681,622	363,660,915
Miscellaneous	9,220,512	10,590,850
Total imports of merchandise	1,226,562,446	1,434,421,425

EXPORTS.

Domestic:		
Foodstuffs in crude condition, and food animals	$177,216,467	$167,323,674
Foodstuffs partly or wholly manufactured	347,385,462	345,676,856
Crude materials for use in manufacturing	500,536,700	593,907,939
Manufactures for further use in manufacturing	226,210,513	240,613,878
Manufactures ready for consumption	459,812,656	479,700,679
Miscellaneous	6,791,584	7,330,930
Total exports of domestic merchandise	1,717,953,382	1,854,553,956
Total foreign	25,911,118	26,138,741
Total exports	1,743,864,500	1,880,692,697

BUSINESS AND FIRE INSURANCE IN THE CANAL ZONE.

An Executive Order issued by the Secretary of War of the United States with the authority of the President, under date of March 12, 1907, effective on and after July 1, 1907, provides that no life, fire, accident, industrial, or indemnity assurance company shall be permitted to do business within the Canal Zone until it shall have complied with the following requirements:

1. The company shall file with the Collector of Revenues:

(a) A certified copy of its articles of incorporation;

(b) A certificate of the Insurance Commissioner of the State of its incorporation showing that it is authorized to do business in the home jurisdiction;

(c) A resolution of its Board of Directors designating an agent within the Canal Zone upon whom legal process may be served;

(d) A certified copy of its last annual statement to the Insurance Commissioner of the State or country in which it may be incorporated; and from time to time thereafter copies of such additional reports as it shall make to the home commissioner;

(e) A sworn statement showing the amount of its capital stock paid in, its surplus, the amount of insurance it has outstanding, and the number of unsettled or uncontested claims pending against it.

2. The company shall deposit with the Collector of Revenues $10,000 in cash or current securities, which shall be available to satisfy any judgment that may be rendered against it under any insurance policy that it may issue.

3. Upon complying with these conditions and the payment of the annual fee of $50, the Collector of Revenues will issue to such company a certificate authorizing it to do business within the Canal Zone. Such certificate, however, shall be terminable by the direction of the chief civil authorities of the Canal Zone; but if terminated without fault on the part of the insurance company, a proportionate rebate of the license fee will be made to the insurance company.

4. Each company, as a condition of continuing to do business within the Canal Zone, shall file with the Collector of Revenues, between the 1st of January and March 1, each year, a sworn statement showing the business done by it within the Canal Zone during the previous calendar year, and shall pay, on or before March 1, to the Collector of Revenues, in lieu of other taxes, save taxes upon real estate and the annual fee provided for in section 3, a license tax equal to one and one-half per cent of its premium receipts for the calendar year preceding.

5. The agent of any unlicensed insurance company doing business within the Canal Zone shall be subject to a fine not exceeding $25 for the first offense and note exceeding $100 for the second.

URUGUAY.

FOREIGN COMMERCE, FIRST HALF OF 1906.

The Minister of Uruguay in Washington, Señor Don Luis Melian Lafinur, has furnished the Monthly Bulletin some interesting statistics, compiled from a publication just issued by the General Customs Bureau of the Republic, concerning the foreign commerce of the country during the first six months of 1906. According to

these statistics, the total foreign commerce of Uruguay during the period referred to aggregated $37,230,981, and consisted of imports and exports valued at $17,052,581 and $20,178,400, respectively. The following tables show in detail the imports and exports by countries:

IMPORTS.

From—	Value.	From—	Value.
Germany	$2,749,229	France	$2,087,957
Argentine Republic	1,502,115	Holland	133,178
Belgium	907,490	England	4,627,629
Brazil	858,774	Italy	1,451,262
Cuba	84,522	Paraguay	52,573
Chile	48,122	Portugal	18,104
Spain	868,617		
United States	1,662,939	Total	17,052,581

EXPORTS.

To—	Value.	To—	Value.
Germany	$3,077,368	Falkland Islands	$3,673
Argentine Republic	2,864,761	Canary Islands	270
Belgium	3,116,529	Italy	512,264
Brazil	1,847,837	Paraguay	4,762
Cuba	706,469	Portugal	50,142
Chile	309,034	Russia	60,148
Spain	321,681	Provisions for ships	136,009
United States	841,419		
France	5,052,985	Total	20,178,400
England	1,273,049		

The imports and exports referred to are classified and valued, respectively, as follows:

IMPORTS.

Live animals, $458,882; foodstuffs, $3,340,637; tobacco and manufactures thereof, $300,525; beverages, $944,183; textile materials and manufactures thereof, $4,450,784; oils, other than for table use, $331,098; chemical and pharmaceutical substances and products, $498,933; paints and dyes, $123,672; wood and other woody substances and manufactures thereof, $966,583; paper and manufactures thereof, $317,444; leather and manufactures thereof, $113,932; iron and manufactures thereof, $1,765,154; other metals and manufactures thereof, $235,177; ores, earth, glassware, and ceramic products, $1,333,749; articles and miscellaneous manufactures, $885,074; other articles, $986,754, or a total of $17,052,581.

EXPORTS.

Cattle products, $19,212,069; agricultural products, $376,144; mining products, $368,078; game and fishery products, $69,822; other products and articles, $16,278; provisions, through the port of Montevideo, $136,009, or a total of $20,178,400.

TRADE WITH GREAT BRITAIN IN 1906.

The report of the Uruguayan Consul-General in Great Britain for the year 1906 fixes the value of trade between the two countries, during that year, at £3,296,456 as compared with £2,917,900 in 1905, an increase for the later period of £378,556, or 13 per cent. British exports to Uruguay figure for £2,721,893 and imports by Great Britain for £574,563. As compared with 1905, British shipments to Uruguay show an advance of £623,361, or 29.7 per cent, while receipts of merchandise from Uruguay decreased by £307,844.

Exports of meats in various forms form the bulk of shipments to Great Britain and were valued in 1906 at £235,297 as against £184,795 in the preceding year, the figures for frozen beef and mutton being £97,457 and £80,200 in the two years, respectively. These returns indicate the advanced position that Uruguay is taking as a competitor with the Argentine Republic as a supplier of fresh meat for European markets. Tongues and preserved meats of various sorts were shipped to the value of £96,285 and £41,555, the former showing an increase of £20,688 and the latter £19,602 over the preceding year.

Sheep wool is the next item of value of the export list, 6,052 bales valued at £181,560 being sent to Great Britain, while caoutchouc exports are third on the list with 332 tons, valued at £120,578. Wool exports declined as compared with 1905, when the full figures were 6,534 bales, worth £196,020.

Hides in the aggregate were exported to the value of £10,901 in 1906, showing a decided increase over the preceding year, when total British receipts from Uruguayan sources were valued at only £1,304.

Imports of Uruguayan flour are reported as valued at £5,335, but returns for wheat and maize imports are not yet available for the whole year, as in many cases shipment is made via other countries, thus delaying accurate import classification.

Exports of merchandise from Great Britain to Uruguay show a decided increase in all items for 1906 with the exception of textiles, which declined to the extent of £94,224, the reported valuations being £889,164 as compared with £983,388 in 1905. The decrease was confined principally to cotton fabrics.

Coal and coke shipments increased from £236,583 to £439,773, while machinery exports advanced from £73,808 to £278,313, a gain of £204,504, or over 277 per cent. Agricultural machinery forms the bulk of this class of shipments.

CUSTOMS REVENUES, APRIL, 1907.

The revenues collected by the custom-houses of Uruguay during the month of April, 1907, according to data recently published by the Collector-General of Customs, amounted to $1,246,316.75, as

compared with $1,286,636.76 in the same month of 1906. During the first ten months of the fiscal year 1906–7 the total of customs revenues was $11,004,440.45, as against $10,989,289.51 in the same period of the previous fiscal year.

VENEZUELA.

TRADE WITH THE PORT OF NEW YORK.

The Consul-General of Venezuela at New York advises that the merchandise exported from that port to La Guaira, Puerto Cabello, Maracaibo, Cumana, Guanta, Carúpano, Pampatar, Caño Colorado, La Vela de Coro, and Ciudad Bolivar, in October, 1906, to May, 1907, inclusive, consisted of 24,545,586 kilograms, valued at 11,945,832 *bolivares*, as compared with 24,140,197 kilograms, valued at 10,448,803 *bolivares* during the same period of 1905–6. The quantities and values of this merchandise, by months, during the periods referred to is shown in the following table:

Months.	October, 1905, to May, 1906, inclusive.		October, 1906, to May, 1907, inclusive.	
	Kilos.	*Bolivares.*	Kilos.	*Bolivares.*
October	2,626,695	1,320,064	4,267,107	1,468,345
November	2,519,748	1,426,772	2,468,736	1,307,770
December	3,184,565	1,518,790	4,179,421	1,614,455
January	2,491,324	1,239,327	2,330,020	1,310,600
February	2,552,293	998,610	2,921,774	1,845,597
March	4,729,487	1,729,909	3,701,644	1,912,070

May	2,979,312	1,591,340	2,905,724	1,367,125
Total	24,140,197	10,448,803	24,545,586	11,945,832

RATIFICATION OF THE SANITARY CONVENTION.

The Government of Venezuela on June 22, 1907, ratified the sanitary convention signed at Washington on October 14, 1905.

BOUNTY FOR THE CULTIVATION OF RICE.

On May 15, 1907, the Governor of the State of Zulia decreed a bounty of 4,000 *bolivares* ($772) appropriated by the legislature to encourage the cultivation of rice in said State. This amount will be distributed in sums ranging from 2,000 to 300 *bolivares*.

BOOK NOTES.

Books and pamphlets sent to the International Bureau of the American Republics and containing subject-matter bearing upon the countries of the International Union of American Republics will be treated under this caption in the Monthly Bulletin.

Fourth of the South American series, written by Mrs. MARIE ROBINSON WRIGHT, is "Bolivia," described as the central highway of South America, a land of rich resources and varied interest. Its picturesque past, stirring present, and brilliant future are fascinatingly narrated from its pre-Colombian period, through the vice-regal status, until its independence was achieved under General BOLIVAR, the first President of the new Republic, and then onward through the various vicissitudes attending the establishment of a popular government, until the inauguration of its present Executive, General ISMAEL MONTES. Of greater general interest than the valuable historical sketch is the storyof the daily life of the present day, in which the social life, with its attendant festivities and obligations, is detailed, prominent personalities visited, and public institutions investigated. The incidents of a thousand-mile trip on muleback into the interior afford absorbing glimpses of native life and surroundings, the primitive customs of the inhabitants, and the legendary setting of many of the modern enterprises which are steadily developing in all parts of the Republic. The numerous and beautiful illustrations with which the volume abounds add greatly to its interest and value. It is a class of work that everyone desirous of familiarizing himself with the wonderful resources and remarkable progress of this South American country should read with care. Bolivia is awakening to an unprecedented industrial and material activity as has been already portrayed in the addresses of the able Minister of that country in the United States, as reproduced in the BULLETIN issues. Mrs. WRIGHT'S comprehensive work supplies the detailed data and information for which the appetite is created by Mr. CALDERÓN'S lectures.

Mr. SYLVESTER BAXTER, the special representative of the "Outlook" at the Rio Conference, records his impressions of scholastic life in Brazil and the Argentine Republic in the issue of that magazine for August 10, 1907. A festival of public school children in the Jardim de Luz of Rio de Janeiro he regards as perhaps the loveliest and most significant of the many delightful experiences of his stay in Brazil. The educational movement in the Republic is immensely indebted to United States influence centered in São Paulo, that city being the seat of one of the foremost institutions in Brazil—Mackensie College—and every State in the Republic is represented in its student body. The popular educational movement in Brazil is of comparatively

recent date, whereas the Argentine Republic was the first country of South America to give systematic attention to the scheme of public education. This effort was inaugurated under President SARMIENTO, who became deeply impressed by the benefits of popular education while Minister in the United States, about the time of the civil war. At present the National Government is in charge of public instruction and the school buildings of Buenos Aires are among the most impressive in the city. Medical, legal, and other professional institutions are numerous and of high grade, while in Cordova is the oldest university in the New World, having been founded in 1613, seven years before the landing of the pilgrims at Plymouth Rock. Plans have recently been perfected for the establishment of a great national university at La Plata, realization of the project being assured by the action of the National Congress in 1906. In the famous La Plata Museum is one of the finest paleontological collections in the world, which, through a recent transfer to Government ownership, has been made an integral feature of the university.

What is practically a handbook of São Paulo, the great coffee State of Brazil, has been issued as a supplement to the New York "Commercial," setting forth the opportunities offered for industrial investment in that part of the world. One-half of the world's supply of coffee originates in the State, the industry employing 420,000 workmen and representing $315,000,000. Immense tracts are available for rubber plantations and for hemp fields, both of which products grow wild, while sugar production, rice growing, and cacao cultivation are receiving profitable attention. To the intending immigrant the Government offers inducements in the way of transport and land privileges, the laws for the protection of foreigners being among the best in existence. Immense water power is at hand for the conduct of manufacturing or similar enterprises, the largest electric plant in the whole of South America being situated at Parnahyba. The entire equipment of the plant is of the most modern character and practically all of the machinery is of United States origin. The principal city, São Paulo, has a population of 300,000 inhabitants and boasts many beautiful buildings, spacious gardens, public libraries, and other institutions for the advancement of the people. Factories for the manufacture of native cotton and other fibers are springing up and doing a profitable business, and cattle breeding is protected and furthered by Government aid. The State is prouder of nothing else than that its vast wealth has enabled it to take first rank in the Republic as a public educator through its excellent school system.

Rubber as a world product is the subject of a valuable article in the "Review of Reviews" for July, 1907, by WILLIAM M. IVINS, who describes the wonderment excited by the payment of a guinea an ounce for a little ball of pure elastic to be exhibited as a curio in

the sixteenth century. The history of this product is followed from that time to the present day, when rubber has become one of the necessaries of life, the annual consumption of which is more than 125,000,000 pounds, at a cost of $1.50 per pound. Its use on syringe-like bottles accounts for its Brazilian name of "seringa," and its adaptability for erasing or rubbing out pencil marks led to the application of its generally accepted name. Since the days when LA CONDAMINE wrote his account of botanic discoveries in the New World, between 300 and 400 shrubs, herbs, and trees have been found whose milky latex has the resinous qualities which make rubber so valuable. The general distribution of such plants places the heveas principally in the Amazon Valley; the castilloas in the South American upland, in Mexico, and Central America, and the manihots and hancornias in the mountainous and sandy regions of South America. Of the $80,000,000 worth of crude rubber annually produced, the market value of that passing through the port of Para is about $50,000,000, or 75,000,000 pounds out of the total 125,000,000.

Chile is described by J. GILBERT VAN MARTER in the "Outlook" for June 21, 1907, as the "New England of South America," thereby epitomizing the industrial energies which characterize the inhabitants of that country as influenced by its large North American immigration. The writer states that when an American arrives in Chile he rides to Santiago in a Pullman car built in the United States; the modern railway was engineered and constructed by Americans; the asphalt road over which he rides to his hotel was laid by an American; an American elevator takes him upstairs; his telegrams are sent over an American wire by an American company; an American cash register itemizes his bills; American machines print his morning paper, and American furniture is found everywhere. A veritable fury of progress and industrial development seems to have seized upon the Chileans, bankers estimating that within the last three years about $360,000,000 have been invested in new industrial undertakings. This sum is being expended in working new nitrate fields; in resuming copper mining, in developing gold, silver, tin, and coal deposits; in building railways, steamships, canals for irrigation, cold-storage plants, sawmills, etc.; in stocking sheep farms, and in inaugurating a great number of smaller enterprises.

Under the title, "A few figures on the development of Argentine international trade," Mr. RICARDO PILLADO, Director of the Division of Commerce in the Argentine Department of Agriculture, has published another of his useful pamphlets covering the matters under his jurisdiction. The statistics given illustrate the marvelous progress made by the Republic in the last fifty years. For immigration, it is reported that in the last half century 2,713,643 persons have arrived as new citizens of the country; over 20,000 kilometers of railway have been built, and total trade values are over $500,000,000.

SEÑOR DON JOSÉ AUGUSTÍN ARANGO, MINISTER OF PANAMA TO THE UNITED STATES.

Boletín Mensual

DE LA

Oficina Internacional de las Repúblicas Americanas,

Unión Internacional de Repúblicas Americanas.

Vol. XXV. AGOSTO 1907. No. 2.

Se llama especialmente la atención de los lectores del Boletín, y de todos los que se interesan en la Oficina Internacional de las Repúblicas Americanas, hacia la descripción que se publica en este número del nuevo edificio para cuya construcción el Señor Andrew Carnegie dió $750,000, y hacia las fotografías de los diseños hechos por los arquitectos. Por más que las vistas exteriores resultan representaciones exactas de lo que ha de ser la fachada de este noble edificio, una vez que esté terminado, es evidente que aún pueden hacerse algunos cambios, aunque éstos no han de ser de gran importancia. Los planos del primer y segundo pisos de la sección longitudinal han sido modificados, en cierto grado, desde que se fotografiaron los diseños originales, pero las alteraciones que se han efectuado han contribuído á aumentar su majestad y utilidad. Estos diseños fueron aceptados en un concurso de arquitectos prominentes de los Estados Unidos, y fueron unánimemente aprobados por una junta de jueces compuesta de tres de los peritos más eminentes del país, de acuerdo con el Presidente del Consejo Directivo y el Director de esta Oficina. Dichos diseños son los que más se aproximan á las condiciones bosquejadas en el programa arquitectónico oficial que fué publicado en el número del Boletín correspondiente al mes de abril. En la actualidad los arquitectos están preparando las descripciones que han de servir de base á los contratistas para hacer las posturas para la construcción del precitado edificio. Se espera que el terreno será roturado á fines de septiembre, y que la piedra angular se coloque á fines de octubre ó á principios de noviembre. El creciente interés que se advierte en el orbe entero hacia esta Oficina y sus trabajos lo demuestran las peticiones que se han recibido en esta Oficina de periódicos y revistas, no sólo de todos los Estados Unidos y de la América Latina, sino de Europa y aún del Japón, para que se les remitan fotografías de los diseños hechos por los arquitectos, los cuales desean reproducir en sus publicaciones.

LA TENDENCIA PROGRESISTA DEL COMERCIO PANAMERICANO.

No podría presentarse mejor prueba del creciente deseo de obtener informes acerca de la América Latina, que los pedidos que se reciben de todas partes del mundo de ejemplares del número del BOLETÍN MENSUAL correspondiente á julio de 1907, el cual contiene una reseña cabal del comercio y tráfico de las veinte Repúblicas situadas al sur de los Estados Unidos. Por más que se imprimieron varios millares de ejemplares adicionales para satisfacer los pedidos del BOLETÍN, la tirada se agotará pronto. Por consiguiente, se advierte que las personas que deseen especialmente obtener esta reseña, deberán hacer su solicitud á la Oficina sin demora. Dicha reseña aparece completa en inglés y en español, y de una manera compendiada en portugués y en francés. Como quiera que á primera vista podría creerse que existen diferencias de consideración en las cifras que se citan, en comparación con otras que se publican en este número, debe tenerse presente que la reseña de julio representa el año común de 1906, en tanto que la breve relación de este mes comprende el comercio entre las Repúblicas latinoamericanas y los Estados Unidos, correspondiente al año económico que se extiende desde el 1° de julio de 1906 hasta el 30 de junio de 1907. La relación que aparece en este número del BOLETÍN se basa en la excelente edición del BOLETÍN de 9 de agosto por el Hon. O. P. AUSTIN, hábil jefe de la Oficina de Estadística del Departamento de Comercio y Trabajo de los Estados Unidos. Las sumas totales que se citan deben convencer al espíritu más pesimista de que en los Estados Unidos hay un campo maravilloso para el ensanche de su comercio extranjero en las Repúblicas latinoamericanas. Al mismo tiempo, dichas cifras demuestran que todas las naciones de Centro y Sur América tienen grandes oportunidades para desarrollar su comercio extranjero en los Estados Unidos. No hay ningún grupo de países en ninguna otra parte del mundo que disfrute en la actualidad de mayor prosperidad material ni mayor progreso verdadero que los países situados en el Hemisferio Occidental. Este estado de cosas justifica, sin disputa, la importancia del trabajo que esta Oficina está haciendo.

LA PRÓXIMA VISITA DEL SECRETARIO ROOT Á MÉXICO.

La visita que el Hon. ELIHU ROOT, Secretario de Estado de los Estados Unidos, y Presidente del Consejo Directivo de esta Oficina, se propone hacer á México á fines de septiembre, correspondiendo á la invitación del Presidente DÍAZ, ha de constituir un complemento importante y lógico de su excursión por la América del Sur en 1906. Los preparativos que el Gobierno y pueblo mexicanos están haciendo á fin de que la estancia del Señor ROOT entre ellos resulte notable,

demuestran la importancia que se le da á este acontecimiento internacional. En efecto, este ha de constituir otro paso que se da con arreglo á la política liberal iniciada por la actual administración del Gobierno de los Estados Unidos, para ponerse en más íntimo contacto con los gobiernos y pueblos de las demás naciones americanas. Por más que México está geográficamente más cerca de los Estados Unidos que cualquiera otra nación latinoamericana, el pueblo de los Estados Unidos en general no ha llegado aún á convencerse por completo del admirable desarrollo material de aquella República ni de su progreso general en muchos órdenes diferentes de adelantamiento político, económico, educativo y social. Así como el viaje del Secretario ROOT á la América del Sur hizo que la América del Norte volviese los ojos hacia aquella parte del mundo, y además proporcionó un concepto más claro de sus poderosos elementos, así en la actualidad se ha de dirigir la atención correspondiente hacia México y la América Central.

EXTENSO PROGRAMA DE CONSTRUCCIÓN DE FERROCARRILES EN LA AMÉRICA LATINA.

Todos los datos é informes que esta Oficina recibe constantemente de todas las partes de la América Latina, indican que dentro de pocos años habrá una era extraordinaria de construcción de ferrocarriles. Apenas existe un país en la vasta distancia que hay de México á la República Argentina, que no esté proyectando aumentar en gran manera la extensión de sus ferrocarriles. Es probable que la extensión de las líneas ferroviarias se duplique en los próximos diez años. Son tantos los eslabones en la luenga cadena del proyectado Ferrocarril Intercontinental ó Panamericano que aún se han de unir ó construir, que el sueño dorado de esta línea promete convertirse en una realidad más pronto de lo que sus partidarios esperaban. Por más que á primera vista parezca difícil perfeccionar un plan mediante el cual pueda construirse una línea continua por la cual los trenes puedan correr desde Nueva York hasta Río de Janeiro, Buenos Aires y Santiago de Chile, los proyectos actuales y en perspectiva para efectuar la construcción de dicha vía, han de disminuir de tal manera las secciones que aún se han de construir en la distancia que ha de recorrerse, que no dista mucho el día en que todas ellas se conecten debidamente. No es un vano pronóstico aseverar que partidarios tan distinguidos del Ferrocarril Intercontinental como el ex-Senador HENRY G. DAVIS y ANDREW CARNEGIE, han de vivir el tiempo suficiente para verlo enteramente terminado. Acaso el programa de construcción de mayor magnitud en el inmediato porvenir sea el que ha bosquejado el Brasil, y después el que ha concebido Bolivia. Un rasgo interesante de este proyecto de nueva cons-

trucción lo constituye el hecho de que se ha de llevar á cabo en un grado considerable con capital reunido en los Estados Unidos y el Canadá. Hasta ahora casi todo el dinero que se ha invertido en los ferrocarriles sudamericanos ha venido de Inglaterra y de otras naciones europeas.

PRUEBAS DEL TRABAJO PRÁCTICO DE LA OFICINA Y LAS CONDICIONES EN QUE ÉSTE SE HACE.

El valor práctico de los trabajos que la Oficina hace diariamente se demuestra examinando su correspondencia diaria. El número de fabricantes, exportadores, comerciantes, así como escritores, eruditos y viajeros, que piden informes á la Oficina, se ha aumentado con tal rapidez que el actual personal de la Oficina, á pesar de trabajar hasta fuera de las horas reglamentarias, apenas puede dar cumplimiento á la demanda que existe de datos útiles y especiales. Estos pedidos no se limitan de ninguna manera á los Estados Unidos, sino que proceden de todo país latinoamericano, y también de Europa, el Canadá, el Japón, Australia y hasta de la India y de la China. Como quiera que esta Oficina es una institución puramente internacional y que sus trabajos se encaminan á fomentar la prosperidad de todas las Repúblicas latinoamericanas, así como la de los Estados Unidos, hace todo lo posible por contestar con imparcialidad, equidad y exactitud las preguntas que se le hacen. Sin embargo, hay que tener presente que su esfera de acción se reduce á ciertos límites. La Oficina no es en ningún sentido una institución particular que puede abogar en favor de ninguna persona, compañía, plan ó proyecto especial, aunque siempre tendrá el mayor gusto en proporcionar informes y tomar las medidas que sean razonables y compatibles con la responsabilidad que tiene contraída con cada uno de los Gobiernos que la sostienen, pero no puede ir más allá, salvo mediante la debida autorización por parte de su Consejo Directivo compuesto de los representantes diplomáticos de las Repúblicas Americanas. Cumple llamar especialmente la atención hacia este punto, porque á lo que parece, á algunos de los corresponsales de la Oficina se les hace difícil comprender por qué esta última no puede ofrecerles una cooperación ó ayuda especial en sus planes.

EL EX-DIRECTOR FOX, EN LA ACTUALIDAD MINISTRO DE LOS ESTADOS UNIDOS EN EL ECUADOR.

La Oficina Internacional se complace en hacer mención de la buena obra que está llevando á cabo en el Ecuador, su antiguo Director, el Honorable WILLIAMS C. FOX, en la actualidad Ministro de los Estados Unidos en dicha República. El Señor Fox acaba de ser nombrado

árbitro en representación de los Estados Unidos, para el arreglo de las controversias que han surgido entre el Gobierno del Ecuador y la Compañía del Ferrocarril de Quito y Guayaquil. Á propósitio de este incidente, cumple agregar que esta línea en la actualidad ha llegado hasta Latacunga, ciudad importante situada en la meseta principal del Ecuador, y es de desear que antes de mucho tiempo llegue hasta Quito.

LOS EDUCADORES NORTEAMERICANOS EN LA AMÉRICA DEL SUR.

Varios recortes recibidos en esta Oficina de los principales periódicos de la América Latina, anuncian los buenos resultados que los profesores L. S. ROWE, de la Universidad de Pennsylvania, WILLIAM SHEPHERD, de la Universidad de Columbia, y el Señor TODD, astrónomo del Colegio de Amherst, están obteniendo en sus viajes por las diferentes partes de la América del Sur. Los expresados profesores han sido acogidos cordialmente en los diferentes países que han visitado, y han hecho una impresión muy favorable. El Señor LEE MCCLUNG, conocido Tesorero de la Universidad de Yale, visitó recientemente la Argentina y Chile, en tanto que otros eminentes eruditos y viajeros americanos se proponen adquirir un conocimiento más cabal de la América Latina, á fin de hacer el acopio de datos necesario para dar conferencias acerca de esta parte del mundo en sus respectivos establecimientos docentes.

LA OPINIÓN DE UN DISTINGUIDO INGENIERO AMERICANO.

El Señor E. L. CORTHELL, eminente ingeniero americano que está interesado en la construcción de obras de puertos y canales en la América del Sur, honró recientemente á esta Oficina con una visita. El Señor CORTHELL se muestra muy entusiástico acerca del porvenir de aquella parte del mundo, y no vacila en pronosticarle un desarrollo material que ha de rivalizar con el que se ha llevado á cabo en la América del Norte, en Europa y en Asia.

RASGOS DEL COMERCIO Y LOS ASUNTOS FINANCIEROS ARGENTINOS.

La relación trimestral regular del comercio argentino muestra que en el primer trimestre de 1907 hubo un aumento de $3,281,509 en el valor de las importaciones, respecto del primer trimestre de 1906, en tanto que hubo un aumento de $10,803,113 en el valor de las exportaciones. Si esta proporción de aumento continúa durante todo el año, dará por resultado un nuevo saldo á favor de la República, de manera que concuerde más con la prosperidad económica del país que el que indican los datos estadísticos correspondientes á 1906,

época en que hubo una disminución en las exportaciones y un aumento en las importaciones. Un rasgo notable del presupuesto argentino que fué aprobado recientemente por el Congreso, y que comprende los ingresos y egresos calculados correspondientes al año de 1908, es la reducción en los desembolsos del Gobierno, política que ha caracterizado la administración financiera del país en estos últimos años. También es digno de tenerse en cuenta que el servicio de la deuda pública exige el mayor desembolso de la asignación de oro, en tanto que las obras públicas constituyen el único ramo principal en los desembolsos de la moneda nacional.

LA HARINA BRASILEÑA, EL COMERCIO DE CAFÉ Y LOS CERTIFICADOS DE DEPÓSITO DE ESTE PRODUCTO.

Las concesiones arancelarias que el Gobierno brasileño le hizo á las importaciones de harina de los Estados Unidos, aumentan el interés de los datos comparativos que se publican en este número del BOLETÍN en cuanto al estado de la harina extranjera en aquel país. En dicha edición del BOLETÍN se muestra que el producto argentino es, sin disputa, el que tiene más salida, por cuanto de 37,235 toneladas, en 1902, en 1906 subió á 122,282 toneladas, en tanto que las importaciones de harina de los Estados Unidos en el mismo período de 46,840 toneladas bajaron á 24,526 toneladas. El desarrollo del comercio de café, debido á la operación del proyecto de valorización, ha dado por resultado la expedición de certificados de depósito sobre las existencias de café que se han de conservar en calidad de depósito en Santos. La Sociedad Comercial de Río de Janeiro y una compañía que cuenta con un gran capital, y que tiene su oficina principal en São Paulo, están interesadas en la precitada empresa, la cual se espera que ha de redundar en beneficio del comercio de dichos centros comerciales.

ASIGNACIONES PARA OBRAS PÚBLICAS EN CHILE.

El Gobierno chileno, en su presupuesto para 1908, ha asignado $30,000,000, aproximadamente, que han de invertirse en obras públicas en toda la República. Se proyecta la construcción de ferrocarriles en gran escala, y también la reconstrucción de Valparaíso, un extenso sistema de cloacas en Santiago, mejoras en los puertos y en las obras hidráulicas en varias ciudades, construcción de puentes, de nuevos edificios del Gobierno y de escuelas. El aumento en la renta de aduana anunciado en el corriente año, y el estado satisfactorio de los bancos públicos, constituyen una garantía de que podrá contarse con los fondos que se requieren para este fin.

LAS COMPAÑÍAS Y EMPRESAS EXTRANJERAS EN COLOMBIA.

El reglamento sobre compañías ó sociedades extranjeras que se establecen permanentemente en la República de Colombia prescribe que las cartas constitucionales y los estatutos de cada compañía deberán ser presentados dentro de los seis meses de la inauguración de aquéllas, en la oficina del notario de la municipalidad donde esté establecida cada empresa. Á las compañías que antes hayan tenido negocios permanentes en el país, se les concede una prórroga de seis meses. Además, se exige que en el lugar donde cada compañía tenga su oficina principal, resida un agente cuya función principal ha de ser representar la compañía ante las autoridades nacionales. El Presidente REYES desea atraer el capital extranjero á la República, y con tal motivo el Gobierno ofrece á las compañías extranjeras ayuda y protección, á la vez que todas las garantías posibles.

LA PROPAGANDA DE LA INMIGRACIÓN EN COSTA RICA.

El propósito que tiene el Gobierno de Costa Rica de aumentar la población del país lo comprueba un reciente decreto por virtud del cual se autoriza al Presidente para que gaste $20,000 anuales durante un período de ocho años, con el fin de estimular la inmigración. Á los agricultores blancos, cuyo idioma nativo es preferible que sea el castellano, se les ofrece pasaje gratis al país. En el informe anual del Ministro de Hacienda y Comercio, del cual se han traducido varios párrafos para el BOLETÍN MENSUAL de esta Oficina, se exponen detalladamente la fertilidad del suelo y su adaptación al cultivo de varios artículos de reconocido valor en los mercados del mundo.

EL NEGOCIO DE BIENES RAÍCES Y DE GANADO EN CUBA.

El valor de los bienes raíces en Cuba se calcula en $342,558,133, que rinden una renta anual de $32,469,043.

Desde el 1° de agosto empezará á regir en Cuba una ley muy importante cuyo objeto es estimular el mejoramiento de la ganadería en toda la isla. Las ovejas y las vacas de razas especiales, menores de seis años de edad, podrán entrar en el país libres de derechos. La existencia del ganado del país se ha aumentado en estos últimos años mediante las importaciones de ganado de Venezuela, México y otros países adyacentes, y en la actualidad existe el propósito de estimular por todos los medios posibles el establecimiento de grandes fincas de cría de ganado vacuno, así como sus industrias consiguientes.

LA INMIGRACIÓN Y COLONIZACIÓN EN EL ECUADOR.

El desarrollo ecuatoriano se está estimulando mediante la concesión de terrenos á compañías colonizadoras, á las cuales el Gobierno les ha otorgado prerrogativas especiales. Una de las concesiones que se hicieron recientemente prescribe el establecimiento, dentro de diez años, de una colonia de cinco mil familias de raza blanca, que es preferible que sean holandesas ó alemanas, en terrenos baldíos que cubren una superficie de 500,000 hectáreas. La concesión exige que se construyan iglesias, escuelas, talleres y residencias, así como un ferrocarril permanente, y el depósito de un fondo de garantía en el Gobierno Ecuatoriano para el debido cumplimiento del contrato.

LOS FERROCARRILES DE MÉXICO SERÁN PROPIEDAD DEL GOBIERNO.

En estos últimos años en México no se ha tomado ninguna medida legislativa más importante que la que representa el decreto de 6 de julio de 1907, por virtud del cual el Presidente Díaz aprobó la organización de una compañía por acciones de responsabilidad limitada, entre el Gobierno Mexicano y siete ó más accionistas de las compañías de los ferrocarriles Nacional y Central. En las transacciones de la compañía consolidada, el Gobierno Mexicano garantiza incondicionalmente el pago de ciertos bonos. Dicho Gobierno también participa por igual, con otros accionistas, de todos los dividendos derivados de la operación de las líneas.

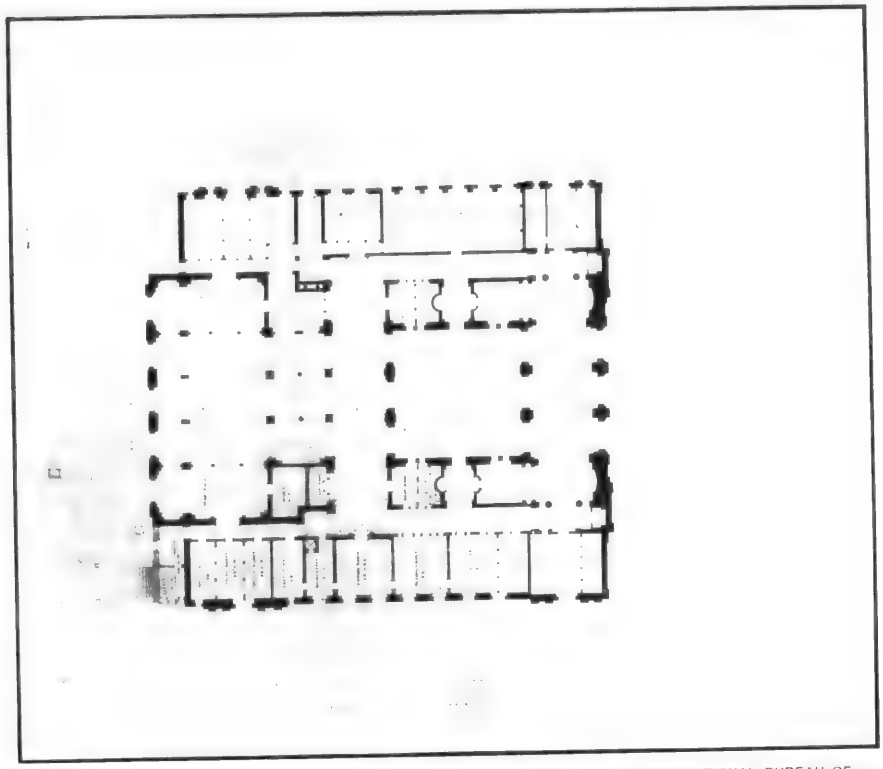
OTROS ARTÍCULOS DEL BOLETÍN.

En vista del gran interés que ha despertado el estado comercial de la República Dominicana, el reglamento sobre los derechos de puertos dominicanos constituye una actualidad interesante, y se ha creído oportuno hacer un resumen de dicho reglamento en este número del BOLETÍN.

El progreso ecuatoriano queda comprobado por los decretos relativos á la colonización que fueron expedidos recientemente y que atañen á la titulada "Región Oriental."

En Nicaragua se ha encontrado onerosa la imposición de un recargo sobre ciertas clases especiales de mercancías, y por consecuencia dicha imposición ha sido suspendida por ahora.

La emisión de una nueva moneda de níquel en Panamá ha de facilitar grandemente las transacciones comerciales en la República, y el establecimiento de una comunicación semanal entre Bocas del Toro y Puerto Limón, ha de ensanchar su comercio extranjero.



VIEW OF ARCHITECTS' DRAWINGS OF FIRST FLOOR OF NEW BUILDING OF THE INTERNATIONAL BUREAU OF AMERICAN REPUBLICS.

El presupuesto del Salvador para 1907–8, asigna la cantidad suficiente para las necesidades del Gobierno durante el período comprendido en aquél, en tanto que la ratificación de las varias convenciones nacionales que se citan en este número del BOLETÍN demuestra el deseo que tiene la República de mantenerse en contacto con otros países en beneficio de todos.

Se publican interesantes datos relativos al comercio extranjero del Uruguay en el primer semestre de 1906, últimos datos estadísticos auténticos que ha sido posible obtener, y finalmente, las transacciones comerciales de Venezuela con el Puerto de Nueva York, tales como las ha anunciado su propio agente consular, alcanzan hasta fines del mes de mayo de 1907.

ARTÍCULOS DE REVISTAS SOBRE LA AMÉRICA LATINA.

Como una de las señales de los tiempos, debe llamarse la atención hacia el espacio cada vez mayor que se concede á los asuntos latinoamericanos, tanto en las revistas populares como en las científicas. Entre las revistas de los Estados Unidos correspondientes al mes de agosto que tratan de este tema, pueden mencionarse las siguientes: "The Review of Reviews," que contiene un artículo sobre la construcción de ferrocarriles sudamericanos, escrito por LUIS R. FREEMAN; "The National Geographic Magazine," cuyo primer artículo se titula "México, el Tesoro del Mundo," por HELEN H. DARTON; "The Outlook," que publica un artículo sobre "La Vida Escolar y Colegial en el Brasil y en la República Argentina," escrito por SYLVESTER BAXTER; el "World's Work," en el cual EUGENE P. LYLE describe á "México en Pleamar," en tanto que se consagran especiales ediciones de suplementos de periódicos á una consideración práctica de los aspectos de la vida y progreso latinoamericanos.

EL NUEVO EDIFICIO DE LA OFICINA INTERNACIONAL DE LAS REPÚBLICAS AMERICANAS.

En este número del BOLETÍN se reproducen por vez primera los diseños hechos por los arquitectos para el nuevo edificio de la Oficina Internacional de las Repúblicas Americanas. Estos diseños comprenden cinco fotografías, á saber: una perspectiva de la fachada, y vistas laterales y posterior; una sección longitudinal, y los planos de los pisos primero y segundo. Han de efectuarse algunos cambios importantes en estos diseños y planos, pero los grabados que ahora se publican han de dar una idea bastante exacta de la índole de este nuevo edificio.

VIEW OF ARCHITECTS' DRAWINGS OF FIRST FLOOR OF [illegible] AMERICAN REPUBLICS.

De los 132 arquitectos que tomaron parte en el concurso, más de 70 presentaron planos, y el Tribunal de Adjudicación, compuesto del Honorable ELIHU ROOT, Secretario de Estado, el Señor JOHN BARRETT, Director de la Oficina, y tres de los arquitectos más eminentes del país, á saber, los Señores CHARLES F. MCKIM, HENRY HORNBOSTEL y AUSTIN W. LORD, de Nueva York, escogidos por el voto de los competidores, fallaron unánimemente á favor de los Señores ALBERT KELSEY y PAUL P. CRET, arquitectos asociados de Filadelfia.

Por más que varios de los otros diseños eran más acabados, y si bien algunos de ellos acaso tenían igual mérito arquitectónico—implicaban mayores gastos—y no cabe duda de que los planos que obtuvieron la preferencia eran evidentemente los primeros entre los que podían ponerse en práctica con la suma de dinero que la Oficina tiene á su disposición. Se recordará que el Señor ANDREW CARNEGIE, por conducto del Señor ELIHU ROOT, Secretario de Estado de los Estados Unidos, dió espontánea y generosamente $750,000 para la construcción de este nuevo edificio, aparte de los $250,000 que los Estados Unidos y otras Repúblicas Americanas asignaron con el mismo fin. El dinero que contribuyeron los Gobiernos se ha empleado en la compra de un hermoso sitio y en los trabajos preliminares. De la cantidad total que dió el Señor CARNEGIE, se consagrarán $600,000 á la construcción del edificio propiamente dicho, habiéndose asignado $150,000 para el mueblaje y el decorado.

En la actualidad los arquitectos se ocupan asiduamente en preparar las descripciones detalladas para los contratistas, y se espera que para el 1° de octubre se celebre un contrato para la construcción de dicho edificio. La piedra angular debe colocarse á principios de noviembre, y dicha colocación ha de revistir la importancia de un notable acontecimiento internacional. Si todo marcha bien, el edificio debe terminarse dentro de año y medio, y por consecuencia, no dista mucho el día en que cada una de las Repúblicas del Hemisferio Occidental ha de experimentar la satisfacción de saber que tiene un punto de reuniónó centro suyo en los Estados Unidos. Como quiera que á la Oficina Internacional la sostienen todas las veintiuna naciones americanas, este nuevo Templo del Comercio y de la Mutua Bienquerencia ha de ser estrictamente el hogar de una institución internacional que ha de pertenecer tanto al más débil como al más poderoso de los Gobiernos y pueblos americanos.

El edificio se ha de erigir en uno de los sitios más dominantes de la ciudad de Wáshington, y la manzana que ha de ocupar á menudo se ha denominado Parque de Van Ness, ó local donde se proyectaba establecer la Universidad de Jorge Wáshington, hasta que esta última institución cambió sus planes y le vendió el terreno á la Oficina Internacional. El terreno comprende un área como de 5 acres, ó 2 hectáreas, que está circundado por las calles Diecisiete or el este,

la calle B por el sur, la avenida de Virginia por el sudoeste, la calle Dieciocho por el oeste, y la calle C por el norte. La fachada del edificio ha de dar al este, ó sea hacia la vasta extensión de la Alameda del Ejecutivo, que queda frente á la Casa Blanca, residencia del Presidente de los Estados Unidos. La vista al sur domina el Parque y río del histórico Potómac, en tanto que el lado sudoeste domina la espléndida avenida denominada "Speedway," y á través del Potómac se divisan las pintorescas colinas de Virginia. Los extensos terrenos que han de circundar el edificio han de hacer posible hermosearlo con primorosos jardines y bellos paisajes.

Este edificio tendrá aproximadamente 160 pies de largo por 160 de ancho, ó sean como 50 metros de largo por 50 de ancho. La parte exterior ha de resultar notable por la tentativa de compendiar de una manera moderna los mejores rasgos del estilo arquitectónico tomado de España y Portugal que adorna á tantas hermosas ciudades de la América Latina. Este hecho ha de traer á la mente el estilo arquitectónico que caracteriza los mejores edificios de las Repúblicas latinoamericanas, y al mismo tiempo su sello clásico y monumental ha de estar en armonía con el plan general de las mejoras arquitectónicas introducidas en la ciudad de Wáshington, el cual fuè trazado hace varios años por los eminentes arquitectos norteamericanos Señores Daniel Burnham y Charles F. McKim. Á poca distancia del sitio donde se ha de erigir dicho edificio se destaca el soberbio Monumento de Wáshington. Precisamente hacia el norte queda el nuevo edificio de la Sociedad de las Hijas de la Revolución Americana, y dos manzanas más allá, también hacia el norte, se destaca el majestuoso edificio de la famosa Galería de Bellas Artes de Córcoran. Á una corta distancia de allí pueden contemplarse el magnífico edificio de los Departamentos de Estado, Guerra y Marina, así como la Casa Blanca y el Palacio del Tesoro. En vista, pues, de lo que queda expuesto, se comprenderá fácilmente que sería difícil escoger un local más apropiado para el palacio de que se trata.

Á dicho nuevo edificio se llega por una ancha y majestuosa avenida, efectuándose la entrada por tres puertas monumentales del modelo de enrejado español. Á ambos lados de la entrada principal se destacarán dos figuras de mujer de mármol, de tamaño colosal, que simbolizan la América del Norte y la del Sur, respectivamente. Anchurosas escaleras de mármol conducen á las puertas de bronce que dan acceso á un vestíbulo de altos pilares é imponente, que tiene 25 pies de ancho, sobre poco más ó menos. Éste á su vez da entrada á uno de los rasgos latinoamericanos principales del edificio, es decir, un extenso patio que ocupa como 2,500 pies cuadrados, en cuyo centro habrá una fuente, y además se embellecerá con la flora característica de los países sudamericanos. Sobre este patio habrá un techo de vidrio corredizo que ha de permanecer abierto en el verano y cerrado

en el invierno. En ambos lados del patio, y separadas del mismo, se extenderán escaleras monumentales que conducen al piso alto. Dos largos corredores se extienden lateralmente hasta el piso principal, uno de los cuales, el de la izquierda, conduce á las oficinas del personal general de la Oficina Internacional, en tanto que á la derecha se hallará el salón donde ha de disponerse la estantería de la Biblioteca de Colón, así como las oficinas del bibliotecario y sus auxiliares. Desde el patio se ha de extender un salón de descanso que tiene como 22 pies de ancho, el cual á su vez conduce á un espacioso salón de lectura que tiene cerca de 100 pies de largo por 60 de ancho. Este último ha de subdividirse en una sección para obras de consulta, revistas, periódicos, mapas, etc. Á derecha é izquierda, respectivamente, de la entrada al edificio, habrá guardarropas y camarines para señoras y caballeros, los cuales se han de usar cuando se den recepciones ó funciones de carácter general en el Salón Principal, de Reuniones situado en el segundo piso.

Por más que el edificio estará provisto de ascensores, el medio principal de acceso al segundo piso ha de ser por las anchurosas escaleras, que ya se han descrito. Estas escaleras terminan en un espacioso salón de descanso que, por una parte da al patio y por la otra conduce al hermoso Salón de Reuniones que puede denominarse "el Salón de los Embajadores Americanos." Este salón ha de tener 101 pies de largo por 65 de ancho, y su estilo ha de ser tan majestuoso, elegante y acabado, que ha de adaptarse admirablemente para celebrar en él conferencias internacionales, recepciones en honor de distinguidos visitantes á Wáshington, funciones diplomáticas y reuniones de diversas clases. Á la izquierda del Salón de Embajadores Americonos está situado el Salón del Consejo Directivo de la Oficina, donde han de celebrar sus sesiones regularmente los representates diplomáticos de las Repúblicas Americanas, bajo la presidencia del Secretario de Estado de los Estados Unidos, para tomar en consideración los trabajos de la Oficina Internacional. Á la derecha habrá tres grandes salones, donde se han de reunir las comisiones, y los dos salones del Consejo Directivo se han de comunicar de tal manera con la Cámara Principal, que todos pueden unirse y constituir así la Cámara de Asambleas más elegante que existe no sólo en la Capital Nacional, sino en todos los Estados Unidos. La parte posterior del Salón de Embajadores Americanos da á un terrado y jardín, á los cuales se va por las grandes escaleras. Este Salón de Embajadores Americanos ha de ser debidamente decorado por eminentes artistas americanos, á fin de que resulte una obra típica de la historia y del progreso panamericanos. Sus paredes han de ser decoradas con cuadros que representen la historia del Hemisferio Occidental, en tanto que las estatuas y retratos de eminentes estadistas de todo el Continente Americano han de contribuir poderosamente á su embellecimento.

La disposición del espacio en el resto del segundo piso comprende salones espaciosos en el lado sur, para el Director de la Oficina, así como para su secretario particular y taquígrafos, y también para el Secretario de la Oficina y sus ayudantes. En el costado del norte estará situado el segundo piso del salón donde están la estantería de la biblioteca y otro gran salón para las comisiones. También habrá un local suficiente para los sirvientes y el despensero, á fin de que tanto el Salón de Reuniones como los salones para Comisiones puedan usarse en los banquetes.

En la planta baja habrá espacio suficiente para los aparatos de calefacción, para depositar documentos y libros, para cuartos de recepción y distribución, así como local para los conserjes y otros empleados. Las oficinas que habrá en los pisos primero y segundo para el personal de la Oficina Internacional, estarán provistas de bóvedas y de otros medios eficaces encaminados á facilitar el desarrollo del comercio y *entente cordiale* panamericanos. El edificio ha de ser enteramente á prueba de fuego en todos sus detalles, y sólo se ha de usar madera para los muebles y el decorado. Este último ha de comprender, probablemente, modelos de los productos forestales más raros y hermosos de las varias Repúblicas sudamericanas, y es probable que las guarniciones exteriores sean de mármol. La parte principal del edificio ha de construirse de concreto con un remate de estuco al estilo latinoamericano, cuya cornisa y el decorado interior han de tener un acabamiento de terracota policroma. El patio, que constituye el centro del edificio, rodeado de escaleras monumentales, galerías y corredores, con los cuales se comunican todas las oficinas, así como la Biblioteca de Colón y el Salón de Reuniones, ha de ser el lugar que más honda impresión ha de producir en el ánimo de los visitantes. Desde el punto donde el vestíbulo se une con el patio, se obtiene una vista muy imponente, mirando por la Biblioteca y á través de su anchuroso terrado hasta el cuadro de jardín que hay más allá, en tanto que más arriba se contemplarán el elegante salón de descanso y el majestuoso Salón de Embajadores, y encima de éste el escarpado techo de teja de su cúpula.

Los arquitectos hasta ahora han tomado en consideración el fin del nuevo edificio de la Oficina Internacional de las Repúblicas Americanas, á tal extremo, que á diferencia de la mayor parte de otros edificios del Gobierno, este edificio especial ha de tener por objeto demostrar y perpetuar el "entente cordiale" entre todas las naciones americanas. El edificio ha de ser de un estilo serio en toda su extensión, pero al mismo tiempo ha de proporcionar amplio espacio para dar elegantes recepciones á personajes y cuerpos distinguidos. Cuando se trate de actos en que ha de usarse el ceremonial de rúbrica, todo el edificio que se comunica con un patio amplio y encantador, ha de ser un punto de reunión admirable para los embajadores extranje-

ros y delegados á las conferencias internacionales, al paso que su modelo arquitectónico especial, sus hermosos salones, su excelente biblioteca donde se encuentra una valiosísima colección de obras sobre asuntos americanos, y los medios con que cuenta para proporcionar toda clase de informes relativos á los rasgos comerciales económicos, intelectuales, históricos, científicos y sociales de las naciones americanas, han de atraer diariamente un gran número de visitantes.

REPÚBLICA ARGENTINA.

COMERCIO EXTRANJERO EN EL PRIMER TRIMESTRE DE 1907.

Las cifras publicadas por la Oficina de Estadística Nacional, demuestran que el valor de las importaciones á la República Argentina en el primer trimestre de 1907 ascendió á $54,660,885, en tanto que el de las exportaciones ascendió á $96,956,217. Las importaciones muestran un aumento de $3,281,509, comparado con el período correspondiente en 1906, en tanto que las exportaciones muestran un aumento de $10,803,113. Las importaciones y exportaciones por países se distribuyen de la manera siguiente:

Países.	Importaciones.	Exportaciones.
África	$1,000	$603,253
Alemania	8,205,556	13,638,950
Bélgica	2,719,671	8,281,247
Bolivia	27,742	200,425
Brasil	1,453,899	2,887,785
Cuba	101,049	38,023
Chile	73,108	455,731
España	1,412,883	376,516
Estados Unidos	7,976,602	3,949,745
Francia	5,193,532	16,346,193
Italia	3,704,609	1,102,547
Países Bajos	399,730	926,135
Paraguay	210,777	43,746
Reino Unido	19,497,070	10,422,425
Uruguay	624,075	1,416,796
Varios países	3,059,513	467,858
Órdenes		36,128,422

Comparado el valor del comercio extranjero correspondiente al primer trimestre de 1906 con el de igual período de 1907, se obtiene el siguiente resultado en cuanto á los países á los cuales las mercancías fueron destinadas y los países de donde procedían: Las importaciones de Alemania muestran un aumento de $442,866, al paso que las exportaciones á dicho país muestran un aumento de $82,127; las importaciones de Bélgica muestran un aumento de $450,172, y las exportaciones un aumento de $819,321. Las importaciones del Brasil muestran un aumento de $503,327, y las exportaciones un aumento de $112,777. Las importaciones de España muestran un aumento de $68,364, pero las exportaciones á dicho país indican una merma de $440,986. Las importaciones de los Estados Unidos muestran un aumento de $484,702, pero las exportaciones á dicho país indican una

merma de $206,727. Las importaciones de Francia muestran una merma de $390,527, en tanto que las exportaciones á ese mismo país muestran un aumento de $3,732,337. Las importaciones de Italia muestran una baja de $633,874, y las exportaciones una baja de $1,035,916. Las importaciones del Reino Unido indican un aumento de $2,810,726, en tanto que las exportaciones á dicho país muestran una merma de $901,188, al paso que bajo la denominación general de órdenes, las exportaciones muestran un aumento de $10,803,118.

El mayor aumento ocurre en las importaciones de maquinaria, el cual ascendió á $9,709,755, debiendo advertirse que dichas importaciones representan las que se hicieron en 1907, comparadas con las que se hicieron en el primer trimestre de 1906, que importaron $6,185,004. En dichas importaciones se incluyen 107 locomotoras contra 41 en 1906; 91 carros de tranvía contra 20, y 1,104 vagones contra 489. Los automóviles ascendieron á 123, ó sean 51 menos que el número anotado en el primer trimestre de 1906.

Otros artículos importados muestran los siguientes aumentos ó disminuciones:

Artículos.	1907.	
Vinos, alcohol y licores	$2,084,362	− $442,368
Géneros de seda	726,398	+ 83,029
Géneros de lana	2,905,187	− 339,437
Géneros de algodón	5,961,324	− 668,443
Otros géneros	1,203,495	+ 90,298
Madera y artículos de madera	1,018,275	+ 9,470
Papel y artículos de papel	1,039,612	+ 70,629
Hierro y acero y artículos de dichos metales	5,723,684	− 85,583
Otros metales y artículos de los mismos	1,330,191	− 337,542
Instrumentos y utensilios agrícolas	3,013,721	−1,675,757
Maquinaria eléctrica	673,761	+ 251,719

LOS PRESUPUESTOS PARA 1908.

El Ministro de Hacienda sometió al Congreso de la República Argentina, con fecha 26 de junio de 1907, el proyecto de la ley de presupuesto general para el ejercicio de 1908, y el cálculo de recursos con que se atenderán los gastos que aquél demandará. El presupuesto proyectado fija los gastos en 24,265,666.52 pesos oro, 164,868,735.35 pesos moneda nacional y 5,000,000 pesos moneda nacional en títulos. El total de recursos se calcula en 59,870,105.86 pesos oro, 84,704,318.75 pesos moneda nacional, y 5,000,000 pesos moneda nacional en títulos. En el extenso mensaje que acompaña este proyecto, el Ministro de Hacienda llama la acención del Congreso al hecho de que el presupuesto de gastos de 1906 fué de 234,649,143.69 pesos moneda nacional; el de 1907 descendió á 228,914,835.82 pesos moneda nacional, y el que se proyecta para 1908 será más bajo que este último en la suma de 3,896,908.36 pesos moneda nacional, alcanzando su total á 225,017,977.46 pesos moneda nacional.

Los gastos se distribuyen en la siguiente forma:

Gastos.	En efectivo.		En títulos, moneda nacional.
	Oro.	Moneda nacional.	
	Pesos.	*Pesos.*	*Pesos.*
Congreso		4,152,720.00	
Interior		25,804,150.00	
Relaciones exteriores	784,581.20	1,230,579.96	
Hacienda		11,836,716.20	
Deuda pública	22,968,485.32	17,339,247.89	
Justicia é Instrucción		28,463,097.92	
Guerra		19,978,665.04	
Marina	12,600.00	13,750,876.00	
Agricultura		5,469,245.72	
Obras públicas	500,000.00	28,854,520.00	5,000,000
Pensiones, retiros, etc		8,018,916.64	
Totales	24,265,666.52	164,868,735.37	5,000,000

Las cantidades que se calculan para los respectivos recursos son como sigue:

Recursos.	En efectivo.		En títulos, moneda nacional.
	Oro.	Moneda nacional.	
	Pesos.	*Pesos.*	*Pesos.*
Derechos de importación	49,500,000.00		
Recargo de 2 por ciento	3,600,000.00		
Almacenaje y eslingaje	2,300,000.00		
Faros y valizas	350,000.00		
Visitas de sanidad	55,000.00		
Puertos, muelles y diques	1,900,000.00		
Peacantes hidráulicos	500,000.00		
Derechos consulares	400,000.00		
Estadísticas y sellos	500,000.00		
Incidentales y multas	30,000.00		
Provincia de Buenos Aires, servicio de su deuda	986,873.44		
Banco Nacional	348,232.42		
Alcohol		16,100,000.00	
Tabaco		16,100,000.00

Provincia de Mendoza		50,000.00	
Provincia de Córdoba		150,000.00	
Provincia de Tucumán		59,318.75	
Emisiones de títulos			5,000,000
Totales	59,870,105.86	84,704,318.75	5,000,000

CRECIMIENTO DE LA POBLACIÓN EN 1906.

Según el número 14 del "Boletín Demográfico Argentino," que publica el Ministerio de lo Interior de la República Argentina, el aumento de la población durante el año 1906, tanto por inmigración como por el excedente en los nacimientos respecto de las defunciones, fué como sigue:

	Habitantes.
Este ó litoral	235,283
Centro	25,993
Oeste ó Andinas	17,525
Norte	9,439
Territorios	8,334
Total	296,574

De este total, corresponden á la inmigración 202,164, y al crecimiento vegetativo, 94,410.

Como la población de la República el 31 de diciembre de 1905 era de 5,678,197, resulta que con el crecimiento producido llegó el 31 de diciembre de 1906 á 5,974,771 habitantes, ó sea, en números redondos, 6,000,000.

EL MAÍZ ARGENTINO EN SUECIA.

Según comunicación oficial recibida en el Ministerio de Relaciones Exteriores de la República Argentina, el Gobierno de Suecia ha resuelto rebajar á 1 corona y 50 centavos, ó sea 0.91 de peso papel, los derechos de importación sobre cada 100 kilogramos de maíz, que antes pagaban 3 coronas y 70 centavos (2.30 pesos). La medida tiene por objeto estimular el envío de maíz argentino, considerado en aquel país europeo como el más ventajoso por su precio y calidad en los mercados consumidores.

EXPORTACIONES EN LOS CINCO PRIMEROS MESES DE 1907.

Las principales exportaciones de la República Argentina en los cinco primeros meses de 1907, en comparación con las que se hicieron en el mismo período de 1906, fueron como sigue:

		1907.	1906.
Cueros vacunos	secos	809,218	988,610
Cueros vacunos	salados	693,369	616,118
Cueros potros	secos	31,261	44,226
Cueros potros	salados	11,326	5,177
Cueros de carneros	pacas	21,329	20,969
Pelo	id.	1,650	1,748
Sebo	pipas	9,615	8,421
Sebo	barriles	28,399	34,158
Sebo	bocoyes	4,680	1,712
Pieles de cabra	pacas	1,303	5,861
Lana	id.	237,452	251,797
Trigo	toneladas	1,966,440	1,599,534
Maíz	id.	186,461	589,277
Linaza	id.	585,590	300,039
Harina	id.	47,304	48,855
Salvado	id.	66,588	63,122

Semillas oleaginosas	id.	51,268	77,296
Heno	pacas	249,478	082,159
Quebracho	toneladas	129,561	139,062
Extracto de quebracho	id.	17,510	26,156
Mantequilla	cajas	43,649	87,412
Carneros congelados		1,188,420	1,242,426
Cuartos de res congelados		709,395	913,001
Avena	toneladas	106,697	41,037

BOLIVIA.

BOLIVIA—LA VÍA CENTRAL DE LA AMÉRICA DEL SUR.

La casa editora de GEORGE BARRIE & SONS, de Filadelfia, ha publicado el cuarto libro de la serie sudamericana, intitulado "Bolivia," escrito por la Señora MARÍA ROBINSON WRIGHT, en el cual á dicha República se le denomina la vía central de la América del Sur, tierra de grandes y variados recursos naturales. En dicha obra se relatan su interesante pasado, su halagador presente y su brillante porvenir, desde el período precolombiano, al través del estado de virreinato, hasta que el General BOLIVAR, que fué el primer Presidente de la nueva República, conquistò, su independencia, y así sucesivamente, por las varias vicisitudes consiguientes al establecimiento de un gobierno popular, hasta la inauguración del actual Ejecutivo, General ISMAEL MONTES. Aun más interesante que la valiosa reseña histórica, resulta el relato de los acontecimientos diarios de la época presente, en que se describen minuciosamente la vida social con sus consiguientes festividades y compromisos, los personajes visitados, así como las instituciones públicas acerca de las cuales se han hecho investigaciones. Los episodios de un viaje de mil millas á lomo de mulo por el interior del país dan una idea interesantísima de la vida nativa y de los alrededores, así como de las antiguas costumbres de los habitantes y el establecimiento legendario de muchas empresas modernas que en la actualidad se desarrollan constantemente en todas partes de la República.

Las numerosas y bellas ilustraciones que tanto abundan en el libro, aumentan grandemente su amenidad y valor.

Todos los que deseen ponerse al corriente de los maravillosos recursos naturales del notable progreso de este país sudamericano deben leer detenidamente esta obra. Bolivia ha iniciado un progreso industrial y material extraordinario, según ya lo ha descrito de mano maestra en sus discursos el entendido Ministro de dicho país en los Estados Unidos, los cuales discursos se han reproducido en el BOLETÍN MENSUAL de esta Oficina. La interesante obra de la Señora WRIGHT suministra los datos é informes detallados á cuya obtención incitan las notables conferencias del Señor CALDERÓN.

SERVICIO TELEGRÁFICO EN 1905-6.

La Legación de Bolivia ha tenido la bondad de proporcionar los siguientes datos tomados de la Dirección General de Telégrafos, y correspondientes al año de 1905-6:

El año económico de 1906 ha sido más próspero que los anteriores, como lo comprueba el siguiente dato de rendimiento annual:

		Bolivianos.
Año 1900		44, 624. 24
Año 1901		52, 866. 01
Año 1902		69, 011. 02
Año 1903		68, 750. 41
Año 1904		82, 358. 85
Año 1905	108, 246. 99	
Ingreso extraordinario de multas	1, 952. 90	
		110, 199. 89
Año 1906 (primer cuatrimestre)	39, 639. 38	
Ingreso extraordinario de multas	496. 90	
		40, 136. 28

Este mayor rendimiento se debe á una administración más severa y el aumento del número de telegramas que se han trasmitido por las líneas del Estado; así lo demuestra el dato estadístico comparativo que anoto:

	Palabras.
En el año 1900 se trasmitieron	2, 584, 244
En el año 1901 se trasmitieron	2, 960, 585
En el año 1902 se trasmitieron	3, 828, 789
En el año 1903 se trasmitieron	4, 233, 934
En el año 1904 se trasmitieron	5, 189, 045
En el año 1905 se trasmitieron	7, 159, 753
En el año 1906 se trasmitieron (primer cuatrimestre)	2, 495, 908

La renta del año 1905, comparada con la de 1904, representa un aumento de 27,841.02 bolivianos, que equivale á un 33.80 por ciento.

Habiendo rendido el primer cuatrimestre de 1906 40,136.28 bolivianos, es indudable que la renta de este año ascenderá, por ser mayor el rendimiento en los meses en que funcionan las Cámaras, á 130,000 bolivianos.

El número de palabras trasmitidas en 1905, comparado con el trasmitido en 1904, representa un exceso de 1,970,708 palabras, que equivale á un aumento de 37.97 por ciento.

El número de telegramas en 1904, en sus tres categorías, ascendió á 248,341 y en 1905 á 329,542, lo que representa un aumento de 81,201 telegramas, ó sea un 32.69 por ciento.

LEY DE SANIDAD PÚBLICA.

El proyecto de ley de sanidad pública del cual publicó el BOLETÍN un extracto en su número correspondiente al mes de noviembre de 1906, fué aprobado por el Congreso Nacional de Bolivia el 28 de noviembre de 1906, y promulgado por el Presidente MONTES el 5 de diciembre de 1906.

ADMISIÓN DE AUTOMÓVILES LIBRE DE DERECHOS.

El 7 de diciembre de 1906, el Presidente MONTES, de la República de Bolivia, promulgó la siguiente ley del Congreso Nacional, aprobada en 29 de noviembre de 1906:

"ARTÍCULO ÚNICO. El No. 266, bis, del arancel vigente, que está gravado con el No. 738, queda modificado desde el 1° de enero de 1907, en la siguiente forma: 'Avalúo vista, por ciento libre.'"

Véase el Arancel de Aduanas de Bolivia, publicado en el BOLETÍN en el número correspondiente á junio de 1906.

BRASIL.

COMERCIO EXTRANJERO EN EL PRIMER TRIMESTRE DE 1907.

El valor de las importaciones al Brasil durante el primer trimestre de 1907 ascendió á $45,000,000, comparado con $30,000,000 en el período correspondiente del año anterior, y el valor de las exportaciones ascendió á $75,000,000 contra $60,000,000 en el primer trimestre de 1906.

COMERCIO EXTRANJERO EN LOS CUATRO PRIMEROS MESES DE 1907.

Las cifras relativas al comercio extranjero del Brasil en los cuatro primeros meses de 1907 muestran que el valor de las importaciones ascendió á £12,515,836 ($62,000,000) y que el de las exportaciones ascendió á £20,877,091 ($104,000,000), mostrándose así un excedente de £8,361,255 ($42,000,000) á favor de las exportaciones de la República. En el mismo período de 1906 las exportaciones se avaluaron en £16,159,176 ($80,000,000), en tanto que las importaciones se avaluaron en £9,524,909 ($47,000,000), mostrándose así un excedente de £6,634,267 ($33,000,000) á favor del comercio de la República.

Al establecerse una comparación del valor del comercio en los dos períodos de referencia, se advierte un aumento de un 31.4 por ciento en el valor de las importaciones, y de un 29.2 por ciento en el de las exportaciones.

Nótase un aumento en todos los productos de exportación, excepción hecha del azúcar, á causa de haber sido muy escasa la zafra de este dulce. Como de costumbre, la goma y el café representan la mayor parte de los embarques al extranjero.

EMBARQUES DE CAFÉ EN 1906-7.

La estadística relativa á los embarques de café del Brasil durante el año que comenzó en julio de 1906 y terminó en julio de 1907, muestra que se embarcaron 19,654,000 de sacos.

Esta cosecha extraordinaria, que ascendió casi á 20,000,000 de sacos, aumenta la producción calculada del mundo casi en 7,000,000 de sacos, ó sea la cosecha más grande que jamás se ha anunciado en un solo año.

DERECHOS DE IMPORTACIÓN ADICIONALES EN ALGUNOS PUERTOS.

Un reciente suplemento al arancel brasileño decreta que durante el actual año económico se imponga un derecho adicional de un 2 por ciento en oro sobre el valor oficial de las mercancías importadas por las aduanas de Pará, Pernambuco y Bahía, excepción hecha de los cereales, que están sujetos al pago de un recargo de un 2 por ciento en oro.

POBLACIÓN DE RÍO DE JANEIRO.

Según el "Boletín Hebdomadario de Estadística Demógrafo-sanitario," el 20 de septiembre de 1906, Río de Janeiro tenía 628,041 habitantes, es decir, 361,544 varones y 266,497 hembras. Se calcula que en el resto del Distrito Federal hay 183,265 habitantes, lo cual demuestra que en el Distrito hay un total de 811,265 habitantes.

EL MERCADO DE HARINA.

Los datos que se dan á continuación relativos al mercado de harina en el Brasil, han sido tomados de un informe recientemente publicado por el Ministro de Hacienda de la mencionada República. La participación que tomaron los diferentes países en las importaciones de harina de los cinco últimos años fué como sigue:

Año.	República Argentina.	Estados Unidos.	Austria-Hungría.	Otros países.
	Toneladas.	*Toneladas.*	*Toneladas.*	*Toneladas.*
1902	37,235	46,840	7,660	13,847
1903	68,372	38,715	7,622	2,424
1904	86,807	30,241	9,213	4,788
1905	108,578	20,000	6,741	5,145
1906	122,282	24,526	6,335	855

Las importaciones de trigo aumentaron al par que las de harina, como se podrá ver en el siguiente cuadro:

Año.	Harina.	Trigo.	Trigo reducido á harina al 70 por ciento.
	Toneladas.	*Toneladas.*	*Toneladas.*
1902	105,591	149,719	104,803
1903	117,134	168,745	118,122
1904	131,049	193,571	135,502
1905	140,464	244,282	140,997
1906	153,946	231,639	162,147

Como los molinos brasileños elaboran casi exclusivamente trigo importado, las cifras que anteceden representan aproximadamente el consumo de harina en el aquel país. El 90 por ciento del trigo elaborado en Brasil procede de la Argentina. Durante los últimos cinco años, aquél importó de ésta las siguientes cantidades de trigo: 1902, 129,867 toneladas, ó un 87 por ciento del total importado; 1903, 155,730 toneladas, ó 92 por ciento; 1904, 168,747 toneladas, ó un 89 por ciento; 1905, 181,647 toneladas, ó un 85 por ciento; 1906, 209,927 toneladas, ó 90 por ciento.

NUEVO REGLAMENTO DE INMIGRACIÓN.

Por un decreto expedido el 19 de abril de 1907 por el Presidente MOREIRA PENNA, se aprueba el reglamento firmado por el Ministro de Industria, Ferrocarriles y Obras Públicas, que tiene por objeto aumentar la población de la República brasileña.

Este reglamento prescribe que el Gobierno central coopere con los gobiernos de los Estados, con las compañías de ferrocarriles y de navegación, y con otras compañías ó corporaciones, así como con los particulares, con tal que se presten las debidas garantías, á tomar las medidas conducentes para atraer los inmigrantes al país.

Se considerarán como inmigrantes todos los extranjeros menores de 60 años de edad que no sufran enfermedades contagiosas, que no se ocupen en negocios ilícitos, y que no sean criminales, pícaros, mendigos, vagabundos, lunáticos ó inválidos, que lleguen á los puertos brasileños como pasajeros de proa á costa de la Unión Federal, los Estados ó particulares, así como los que hayan pagado su pasaje y deseen gozar de los mismos privilegios que otros recién llegados. Los extranjeros mayores de 60 años de edad ó que estén incapacitados para el trabajo, sólo se dejerán desembarcar cuando vengan acompañados de sus familias ó cuando vengan con el propósito de unirse á ellas, con tal que en cada familia haya por lo menos un miembro que pueda trabajar que sustituya al inválido, y dos ó más que compensen al miembro anciano de la familia.

Á los inmigrantes que se establezcan por su cuenta en cualquiera parte del país y que se consagren á cualquier rama de la agricultura, industria, ó comercio, ó á cualquier oficio ó profesión útil, se les concederá absoluta libertad de acción para que emprendan en cualquier negocio, con tal que éste no ponga en peligro la seguridad, salud ó moral públicas. También se les concederá absoluta libertad de culto, y, por último se les otorgarán los derechos civiles de que gozan los brasileños con arreglo á la constitución y á las leyes.

Se garantiza la ayuda del Gobierno para alojar y auxiliar á los colonos, y se han tomado medidas especiales para formar las colonias denominadas de núcleos.

REGLAMENTO PARA LA IMPORTACIÓN DE ANIMALES DE CRÍA.

El 18 de abril de 1907 se publicó el reglamento que ha expedido el Gobierno brasileño relativo á la importación de animales para los fines de la cría, el cual prescribe que en este asunto el Gobierno preste la ayuda que el presupuesto le permita.

Á los agricultores y criadores de ganado vacuno que importen animales sanos para los fines de la cría, se les reembolsará el costo consiguiente al transporte de aquéllos del país de donde procedan, en conformidad con una tarifa formada de antemano por el Gobierno. Las prerrogativas de este reglamento se hacen extensivas á los caballos, al ganado vacuno, á los cerdos, ovejas, cabras, perros de pastores, aves, etc.

El árbol genealógico de los animales se ha de llevar en un registro en el Ministerio de Industria, Ferrocarriles y Obras Públicas, y tan luego como se haya establecido la finca de crianza autorizada por el Gobierno, y la policía de sanidad que ha de inspeccionar los animales domésticos se haya equipado debidamente, se publicará una lista de puertos de los cuales se importarán animales de cría, se anotarán las enfermedades que se consideran infecciosas, y se prescribirán las medidas de precaución necesarias.

El transporte de dichos animales se hará á costa del Gobierno únicamente cuando dichos animales se hayan comprado directamente ó por conducto de sindicatos ó corporaciones argícolas ó por sus representantes legales, con el fin de mejorar la raza del distrito, ó cuando se importan para exhibiciones agrícolas y pastorales que perciben ayuda de los Gobiernos federal, del Estado ó municipal.

Á los animales de cría procedentes de regiones donde predominan enfermedades epizoóticas, no se les concederá transporte libre, y los que estén atacados de enfermedades infecciosas serán matados en seguida que lleguen.

COLOMBIA.

COMPAÑÍAS EXTRANJERAS EN LA REPÚBLICA.

El 19 de enero de 1906, el Presidente Reyes expidió el siguiente decreto legislativo número 2:

"Artículo 1º. Las sociedades ó compañías domiciliadas fuera del país, que tengan ó establezcan empresas de carácter permanente en el territorio de la República, protocolizarán, dentro de los seis meses subsiguientes á la iniciación de sus negocios, el documento de su fundación y de sus estatutos, en la notaría de la circumscripción en donde esté el asiento principal de sus negocios ó industrias. Las

anónimas protocolizarán, además, en la misma notaría, la prueba de la autorización del Estado, en el caso de que sea necesaria dicha autorización para su existencia legal.

"Párrafo. El término será de un año si tales compañías tuvieren ya negocios establecidos en el país.

"ART. 2°. Dichas sociedades deberán tener en Colombia, en el lugar donde esté el asiento principal del tráfico de su explotación, un representante con facultades de mandatario y con igual personaría que la del gerente, para las controversias judiciales que ocurran y para los negocios establecidos en el país.

"Párrafo. Los poderes de los representantes de estas compañías serán protocolizadas en la misma notaría de que trata el artículo 1°.

"ART. 3°. Los documentos de que hablan los artículos anteriores, para que produzcan efecto en Colombia, deberán extenderse con las formalidades exigidas en el lugar en donde se otorguen; y deberán además venir autenticados por el empleado diplomático ó consular de Colombia residente en dicho lugar, y á falta de tales empleados, por el cónsul ó Ministro de una nación amiga.

"ART. 4°. Además del extracto de las escrituras y estatutos de las sociedades anónimas, que debe registrarse conforme á la ley 42 de 1898, se registrará también en el respectivo juzgado de circuito ó circuitos, donde esté el asiento principal del tráfico de su explotación, el extracto de los poderes de los representantes de las compañías extranjeras, certificado por el notario ante el cual se hayan protocolizado.

"Párrafo. Los extractos, después de registrados en el juzgado, se publicarán tres veces por lo menos en el periódico oficial del respectivo Departamento.

"ART. 5°. Corresponde al Poder Ejecutivo declarar cumplidos por parte de las compañías extranjeras los requisitos de que trata este decreto.

"ART. 6°. Son nulos los actos que se ejecuten ó contratos que se celebren sin la observancia de las formalidades prescritas en este decreto.

"ART. 7°. Los libros enunciados en los tres primeros incisos del artículo 27 del Código de Comercio serán rubricados, en los lugares donde haya cámaras de comercio, en cada una de sus hojas, por el secretario de dicha cámara, y en la primera de ellas se pondrá una nota fechada y firmada por el presidente y el secretario de la misma, que indique el número total de las hojas y la persona á quien pertenecen los libros.

"ART. 8°. Los jueces de circuito ó de distrito en lo civil y sus respectivos secretarios gozarán del derecho, por mitad, de medio centavo oro por cada hoja que rubriquen de los libros de los comerciantes.

"Párrafo. En las cámaras de comercio el derecho de medio centavo corresponde al secretario.

"ART. 9°. La rubricación de los libros de comercio hecha por los secretarios de las cámaras, antes de la vigencia del presente decreto, se considerará válida para todos los efectos legales.

"ART. 10. El presente decreto principiará á regir treinta días después de la fecha de su publicación en el 'Diario Oficial.'"

El 10 de julio de 1906, el Presidente REYES expidió el siguiente decreto legislativo, número 37:

"ARTÍCULO 1°. Las corporaciones y sociedades extranjeras que tengan negocios permanentes en la República constituirán y mantendrán en ella una agente ó apoderado en el lugar en que hayan establecido su oficina principal, para representarlas ante los tribunales nacionales y las autoridades administrativas y de policía en los asuntos y demandas que contra ellas se promuevan.

"Párrafo. Estos agentes ó apoderados representarán á dichas sociedades cuando sean demandadas y en toda clase de diligencias judiciales ó administrativas, y en consecuencia serán válidas las notificaciones que se les hagan, lo mismo que las actuaciones que se entiendan con ellos.

"ART. 2°. En caso de que tal agente ó apoderado no exista, el procedimiento se seguirá con el representante que maneje los negocios ordinarios de la sociedad.

"ART. 3°. Cuando por cualquiera causa faltaren los representantes anteriores, se adoptará la tramitación que para los demandados ausentes señalan los artículos 25 y 27 de la ley 105 de 1890, sin perjuicio de lo estipulado á este respecto en los tratados públicos. En el caso de este último artículo el edicto se publicará en el periódico del Departamento, si lo hubiere, y en el 'Diario Oficial' de la nación.

"ART. 4°. Los extractos de que trata el párrafo del artículo 4° del decreto legislativo número 2, de 19 de enero del presente año, se publicarán en el periódico oficial del respectivo Departamento, si lo hubiere, y en el 'Diario Oficial.'

"ART. 5°. Este decreto comenzará á regir desde su publicación en el 'Diario Oficial.'"

LA PRODUCCIÓN DE TAGUA EN CARTAGENA, 1906.

Según una estadística publicada por los Señores LOUIS DELIUS Y COMPAÑÍA, de Hamburgo, con fecha 22 de abril de 1907, la producción de tagua, ó marfil vegetal, en Cartagena durante el año de 1906 fué de 1,875,000 kilos, en comparación con 1,992,500 kilos producidos en 1905.

TRATADO SOBRE LÍMITES CON EL BRASIL.

El "Diario Oficial" de Colombia de fecha 25 de mayo de 1907, contiene el texto de una ley de la Asamblea Nacional, aprobada el 17 de mayo de 1907 y firmada por el Presidente REYES el mismo día, por la cual se ratifica el tratado celebrado con el Brasil el 24 de abril de 1907; por este tratado se fijan definitivamente los límites entre una parte de la frontera entre Colombia y el Brasil, y se estipula la libre navegación del Amazonas y otros ríos colombiano-brasileños.

MONOPOLIO DE LA EXPORTACIÓN Y VENTA DE VARIOS METALES.

Por ley de la Asamblea Nacional de Colombia, aprobada el 14 de mayo de 1907, y publicada en el "Diario Oficial" del 20 del mismo mes, el Gobierno queda autorizado para establecer la exportación exclusiva y la venta en el exterior de los metales llamados platino, paladio, iridio, rodio, osmio, y rutenio, y de todos los minerales radioactivos. El Gobierno podrá explotar las minas y yacimientos en que se hallen dichos metales y que no estén trabajándose actualmente, y se entenderá con los que beneficien esos metales á fin de hacer y reglamentar de la manera más conveniente la explotación de ellos en pró del Tesoro y sin menoscabo de derechos adquiridos.

PAGO DE DERECHOS DE EXPORTACIÓN SOBRE METALES PRECIOSOS.

Con el fin de dar facilidades á los exportadores de metales preciosos, el Presidente de la República de Colombia, en decreto de fecha 15 de abril de 1907, y publicado en el "Diario Oficial" del 24 de abril de 1907, ha dispuesto que el pago de los derechos de exportación sobre metales preciosos pueda hacerse también en las administraciones departamentales de las Rentas Reorganizadas. Los certificados que sobre el pago de tales derechos expidan los administradores de dichas rentas serán retenidos como comprobantes por los administradores de aduanas.

TRATADO DE LÍMITES CON EL PERÚ.

El 24 de abril de 1907 la Asamblea Nacional Constituyente aprobó el tratado de límites con el Perú, que fué firmado en Bogotá el 12 de septiembre de 1905, por los plenipotenciarios de Colombia y el Perú.

Según las estipulaciones del tratado, la cuestión de líneas divisorias entre los dos países se somete al arbitraje de Su Santidad el Papa, ó algún dignatario designado por el Papa.

El tratado se sujeta expresamente al tratado del 1° de agosto de 1887, entre el Perú y el Ecuador, del cual conoce en la actualidad Su Magestad el Rey de España, y que surtirá efecto en caso de que el fallo arbitral del Rey de España—como sucedió con el tratado

entre el Perú y el Ecuador—decida que el territorio reclamado por Colombia pertenece al Perú.

En el tratado entre Colombia y el Perú, el Gobierno de Colombia hace constar que á su debido tiempo declarará que las estipulaciones del tratado no afectan el tratado análogo celebrado el 5 de noviembre de 1904 entre Colombia y el Ecuador, el cual comenzará á regir cuando se pronuncie el fallo arbitral sobre el precitado tratado de límites entre el Perú y el Ecuador.

COSTA RICA.

ESTADÍSTICA COMERCIAL Y FINANCIERA DE 1906-7.

En el número de la Gaceta Oficial correspondiente al 9 de junio de 1907, se publica el informe anual del Ministro de Hacienda y Comercio, correspondiente al año económico de 1906–7, y que fué sometido á la consideración del Congreso el 28 de mayo de 1907. Cumple advertir que el año económico en Costa Rica comienza el 1° de abril y termina el 31 de marzo del siguiente año. Dicho informe contiene una estadística comercial y financiera muy completa correspondiente al año á que se refiere, y de él se toman los siguientes datos:

EXPORTACIONES.

Del 1° de octubre de 1905 al 30 de diciembre de 1906, las exportaciones de café ascendieron á 13,774,258 de kilogramos, de los cuales 13,035,780 pasaron por Puerto Limón y 738,478 por Puntarenas. Un poco más de un 76 por ciento se enviaron á Londres; un 11 por ciento á Alemania; un 9 por ciento á los Estados Unidos; cerca de un 3 por ciento á Francia, y se enviaron pequeñas cantidades á otras naciones.

En 1906 hubo una disminución de 4,273,281 de kilogramos en las exportaciones, contra las que se hicieron en 1905. El promedio de precio neto fué $11.21 por cada 46 kilogramos, habiéndose avaluado en $3,356,876 las exportaciones de este producto.

Las exportaciones de bananos se aumentan diariamente. En 1906 se exportaron 8,872,729 de racimos, que se avaluaron en $4,436,364, representando cada racimo un valor de 50 centavos oro americano.

Las exportaciones de cacao también aumentaron anualmente. En 1904 se exportaron 119,918 kilogramos; en 1905 se exportaron 148,-918 kilogramos, en tanto que 1906 se exportaron 176,243 kilogramos. La siguiente tabla muestra las exportaciones que se hicieron, por países, en 1906:

	Kilogramos.		Kilogramos.
Los Estados Unidos	63 068	Hispano-América	22, 551
Inglaterra	55, 566	Alemania	2, 734
Francia	30, 916	España	1, 408

En 1906 las exportaciones de maderas aumentaron en comparación con las de 1905. La siguiente es una lista de las clases de madera que se exportaron en 1906, así como de su valor calculado:

Cedro, 446,940 pies cúbicos	$134,082
Caoba, 27,942 pies cúbicos	8,383
Cocobolo, 232,758 kilogramos	2,094
Palo de mora, 2,263,800 de kilogramos	20,374
Total	164,933

En 1906 las exportaciones de cueros ascendieron á 286,415 kilogramos, en comparación con 313,682 kilogramos en 1905. Hace poco tiempo que el Gobierno aprobó la organización de una compañía anónima, con un capital de 50,000 colones, para comprar y vender cueros tanto en la República como en el extranjero. Dicha compañía está autorizada para curtir toda clase de cueros, así como para fabricar calzado y artículos de talabartería. Dicha compañía ya ha instalado su maquinaria y comenzado sus trabajos.

En 1906 las exportaciones de pieles de venado ascendieron á 24,021 kilogramos.

El total de exportaciones en 1906 fué como sigue:

Café	$3,356,876	Plata en barras	239,861
Bananos	4,436,364	Carey	7,975
Cacao	70,497	Concha perla	1,013
Maderas	164,933	Otros artículos	43,389
Cueros	100,336		
Caucho	78,057	Valor total de las exportaciones	8,797,227
Oro en barras	297,926		

que al tipo de cambio legal equivalen á 18,914,028.05 de colones.

En este total no se ha incluído el valor de las monedas acuñadas.

IMPORTACIONES.

El informe anual comprobado de la Oficina Nacional de Estadística, muestra que el valor total de las importaciones en 1906 ascendió á $7,511,955. Si de esta cantidad se deducen $624,613, valor de la moneda acuñada que se importó, resultan $6,887,342, valor neto de las importaciones, los cuales, al tipo legal de cambio equivalen á 14,807,785 de colones, que representan el comercio general de mercancías, así como las importaciones de ganado y el movimiento de equipaje.

Al comparar las cifras de 1905 con las de 1906, se advierte un gran aumento en las importaciones. En 1905 el valor total de las importaciones, sin incluir la moneda acuñada, ascendió á $4,737,896, que al tipo de cambio legal equivalen á 10,186,476 de colones, que en comparación con 14,807,785 de colones, valor de las importaciones que se hicieron en 1906, arrojan un aumento de 4,621,309 de colones á favor de este último año.

El siguiente cuadro indica la proporción en que las diferentes naciones han contribuído á suministrar los efectos que necesitó la plaza de Costa Rica en 1906, en comparación con 1905:

	1905.	1906.	Aumento.	Merma.
	Proporción.	*Proporción.*	*Proporción.*	*Proporción.*
Estados Unidos	46.85	48.49	1.64	
Gran Bretaña	19.73	21.71	1.98	
Alemania	12.90	11.20		1.70
Francia	5.24	4.99		.25
España	2.58	2.66	.08	
Italia	3.24	2.32		.92
Bélgica	.47	.74	.27	
Hispano-América	5.51	4.95		.56
Otras naciones	3.45	2.94		.51

GANADO VACUNO.

Según los datos estadísticos, en 1904 se consumieron 41,919 cabezas de ganado vacuno, y se importaron 14,639 cabezas; en 1905 se consumieron en el país 40,303 cabezas y se importaron 10,543, y en 1906 se consumieron 39,505 cabezas y se importaron 11,439 cabezas, sin contar las de cría. Los datos de los tres años citados demuestran que el consumo disminuye gradualmente y que la importación no decrece de año en año.

En resumen, en 1906 Costa Rica importó un 28.93 por ciento del ganado que consumió.

PRODUCTOS DEL PAÍS.

En 1906 el valor de las importaciones de arroz fué casi igual al de las que se hicieron en 1905; es decir, este último año el valor de las importaciones ascendió á $111,036, en tanto que en 1906 ascendió á $109,661.

La importación de maíz ha sido mucho menor. En 1905 se importaron 368,478 kilogramos, y en 1906 se importaron solamente 113,694 kilogramos.

En 1906 la importación de frijoles también fué menor; es decir, se importaron 204,057 kilogramos, contra 363,782 en 1905. Tanto respecto del maíz como de los frijoles, el Gobierno cree que no deben pagar ningún impuesto de introducción.

La importación de azúcar ha aumentado, por cuanto en 1905 se importaron 5,870 kilogramos, y en 1906 36,479 kilogramos. En cambio, se ha importado menos cantidad de sal; es decir, en 1904, se importaron 806,592 kilogramos, y en 1905 dicha importación descendió á 549,754 kilogramos y, por último, en 1906 se redujo á 404,506 kilogramos.

Hubo una notable disminución en la importación de manteca entre 1905 y 1906, por cuanto, en el primero de estos años la importación ascendió á 483,203 kilogramos, en tanto que en 1906 sólo llegó á 122,480 kilogramos.

COMPARACIÓN.

El valor total de las exportaciones que se hicieron en 1906, sin incluir la moneda acuñada, ascendió á 18,914,028 de colones, y el de las importaciones ascendió á 14,807,785 de colones, quedando así 4,106,243 de colones á favor del país.

La siguiente tabla muestra los ingresos de aduanas en el año económico de 1905–6, en comparación con las de 1906–7:

	1905–6.	1906–7.
	Colones.	*Colones.*
Aduana principal	2,399,921.27	2,535,681.43
Limón	1,176,989.64	1,392,968.45
Puntarenas	398,374.83	418,327.61
Total	3,975,285.74	4,346,977.49

Los ingresos en 1906–7 fueron como sigue:

	Colones.		Colones.
Aduanas	4,346,977.49	Registro civil	575.00
Licores	1,747,798.56	Imprenta Nacional	12,005.25
Tabaco	158,115.65	Hacienda Las Mercedes	1,833.85
Papel sellado	63,364.51	Multas	1,102.80
Timbre	47,013.20	Saldo empréstito para Ferrocarril al Pacífico	703,664.28
Censos por baldíos	28,409.79	Eventuales	43,358.32
Patentes de sanidad	2,985.00	Total	7,654,874.20
Ferrocarril al Pacífico	228,012.54		
Correos y telégrafos	237,635.64		
Registro público	31,522.32		

Al comparar el presupuesto de 1906–7 que ascendió á 7,332,164.28 de colones, con los ingresos verdaderos, que ascendieron á 7,654,874.20 de colones, resulta un aumento de 222,709.92 colones en los ingresos verdaderos, respecto de la cantidad del presupuesto.

El 31 de marzo de 1906, ó sea á fines del año económico, el Departamento de Hacienda calculó que la moneda que había en circulación en la República en la expresada fecha, ascendía á 8,090,559 de colones.

ESTÍMULO DE LA INMIGRACIÓN BLANCA.

La "Gaceta Oficial" del de 10 julio de 1907 publica el texto de la ley del Congreso Constitucional del 8 de julio de 1907, que autoriza al Presidente para gastar, durante ocho años, 40,000 colones anualmente para estimular la inmigración, de la cual cantidad la mitad se ha de consagrar al pago del pasaje de trabajadores agrícolas y de sus familias.

Los inmigrantes tendrán que ser agricultores blancos, y es preferible que el castellano sea su idioma nativo.

CUBA.

DERECHOS ARANCELARIOS SOBRE GANADO VACUNO.

El Gobernador Provisional de Cuba el 20 de junio de 1907 expidió el siguiente decreto, número 746:

"Á propuesta del Secretario Interino de Hacienda, por el presente resuelvo:

"SECCIÓN 1. Que el artículo 1° de la ley de 15 de septiembre de 1902 se entienda redactado como sigue:

"'ARTÍCULO 1. Para el cobro de derechos arancelarios sobre ganado vacuno, caballar y lanar que se introduzca en esta Isla por cualquiera de los puertos habilitados al comercio de importación, y los demás que el Ejecutivo crea conveniente habilitar, regirá la siguiente tarifa:

"'Entrarán libres de derechos arancelarios:

"'1. El ganado lanar, hembra.

"'2. El ganado vacuno que no llegue á seis años y se importe para su reproducción, y pertenezca á las razas de Shorthorn (Durham), Hereford, Aberdeen-Angus, Red-Polled, Galloway, Devon, Brown-Swiss, Holstein-Friesian, Jersey, Guernesey, Ayreshire, Zebu, Mysore, Brahmin; y el ganado vacuno importado para su reproducción de Puerto Rico ó la República Argentina, y que no llegue á la referida edad, siempre que el importador acredite debidamente su origen.'

"SEC. 2. Que el artículo 2° de dicha ley quede redactado como sigue:

"'ART. 2. Para el cobro de dichos derechos arancelarios, regirá la siguiente tarifa, exceptuando, en cada caso, las clases que se mencionan en los párrafos marcados con los números dos, tres y cuatro del artículo 1, que se admiten libres de derechos:

"'1. Los añojos adeudarán, cada uno, un peso.

"'2. El ganado gordo de Florida, entendiéndose por gordo el que exceda en su peso de 500 libras (226 kilogramos), adeudará por cabeza cinco pesos.

"'3. El ganado gordo de Honduras, entendiéndose por gordo el que exceda en su peso de 600 libras (272 kilogramos), adeudará por cabeza seis pesos.

"'4. El ganado gordo de México, entendiéndose por gordo el que exceda en su peso de 700 libras (317 kilogramos), adeudará por cabeza siete pesos.

"'5. El ganado gordo de Venezuela y Colombia, ó de otro país de los no mencionados en el presente Decreto, entendiéndose por gordo el que exceda en su pesos de 800 libras (362 kilogramos), adeudará por cabeza ocho pesos.

8351—Bull. 2—07——8

"'6. La res flaca, ó sea la que no alcance los expresados pesos, según su procedencia adeudará, cada una, dos pesos.

"'Entendiéndose, no obstante, que las cantidades que se expresan quedan sujetas á las modificaciones de que haya sido objeto dicho artículo en virtud de leyes ó tratados, desde el 15 de septiembre de 1902.'

"SEC. 3. Queda derogado el artículo 4 de la expresada ley.

"SEC. 4. Queda igualmente derogada la sección 8 del reglamento de 23 de octubre de 1902, referente á la matanza de vacas y terneras, debiendo correrse la numeración de los demás artículos de dicho reglamento.

"SEC. 5. La sección 18 del referido reglamento, en la partida 184, quedará redactada como siguiente:

"'SECCIÓN 17.

* * * * * * *

"'Partida 184.

"'A. Ganado vacuno de menos de seis años, importado para la reproducción y perteneciente á las razas de Shorthorn (Durham), Hereford, Aberdeen-Angus, Red-Polled, Galloway, Devon, Brown-Swiss, Holstein-Friesian, Jersey, Guernesey, Ayreshire, Zebu, Mysore, Brahmin; y el ganado vacuno que no llegue á dicha edad y se importe para su reproducción de Puerto Rico ó la República Argentina, siempre que el importador acredite debidamente su origen, libre de derechos.

"'B. Los añojos, exceptuando los que se mencionan en la letra A, un peso cada uno.

"'C. El ganado de Florida, exceptuando el mencionado en la letra A, y que exceda en peso de 500 libras, cinco pesos por cabeza.

" 'D. El ganado de Honduras, exceptuando el que se menciona en la letra A, y que exceda en peso de 600 libras, seis pesos por cabeza.

" 'E. El ganado de México, exceptuando el que se menciona en la letra A, y que exceda en peso de 700 libras, siete pesos por cabeza.

" 'F. El ganado de Venezuela y Colombia, ó de otros países de los no mencionados, exceptuando el ganado á que se refiere la letra A, cuando pese más de 800 libras, ocho pesos por cabeza.

" 'G. Las reses flacas que no estén comprendidas en las letras A y B, y que no alcancen los expresados pesos, según procedencia, dos pesos por cabeza.'

"SEC. 6. Este decreto comenzará á regir desde el primero de agosto de 1907, inclusive."

NOTA.—La sección 8 del reglamento de octubre 23 de 1902, que se repite en la sección 4 del decreto que antecede, es como sigue:

"En ningún caso se permitirá la matanza de reses hembras excepto las declaradas inútiles para la reproducción, entendiéndose por tales

las que pasen de diez años, certificando esta circunstancia, bajo juramento, un profesor veterinario ó un ganadero práctico, donde no existiere veterinario."

RENTAS ADUANERAS DE LA HABANA, PRIMER SEMESTRE DE 1907.

La aduana de la Habana percibió durante el primer trimestre de 1907 una renta total de $9,831,697.88, en comparación con $9,668,008.69 recaudados en igual período de 1906, ó sea un aumento en 1907 de $163,689.19.

IMPORTACIONES DE CAFÉ EN 1906.

Según estadísticas publicadas por el Departamento de Comercio y Trabajo de los Estados Unidos, la República de Cuba importó durante el año de 1906 las siguientes cantidades de café: Puerto Rico, 11,739,124 libras, avaluadas en $1,376,175; Estados Unidos, 7,240,102 libras, avaluadas en $678,337; Brasil, 2,657,747 libras, con un valor de $239,022, y Venezuela, 5,695,121 libras, por valor de $496,580.

RIQUEZA TERRITORIAL DE LA REPÚBLICA.

Según estadísticas oficiales recientes, actualmente la riqueza territorial de Cuba la componen 111,840 fincas urbanas y 52,301 fincas rústicas, cuyo valor en venta se calcula en $342,758,133.21, con una renta anual de $32,469,043.99, en la forma siguiente:

Pinar del Río, 5,608 fincas urbanas y 6,158 rústicas, valoradas en $23,037,454.28, que producen una renta de $2,360,560.89 al año.

Habana, 38,352 fincas urbanas y 10,632 rústicas, avaluadas en $144,893,708.10, con una renta anual de $13,906,802.27.

Matanzas, 18,682 fincas urbanas y 25,623 rústicas, cuyo valor es de $42,359,306.66, con una renta anual de $3,865,340.21.

Santa Clara, 25,442 fincas urbanas y 14,075 rústicas, con un valor de $69,087,051.76, y una renta de $5,068,157.32 al año.

Camaguey, 6,761 fincas urbanas y 4,268 rústicas, con un valor de $18,115,814.65, y una renta anual de $814,112.64.

Oriente, 16,995 fincas urbanas y 11,145 rústicas, avaluadas en $45,264,797.73, y una renta anual de $6,454,070.66.

La ciudad de la Habana tiene unas 22,000 casos, cuyo valor se calcula en $109,000,000, y la renta total anual en $11,500,000.

RATIFICACIÓN DE LA CONVENCIÓN POSTAL DE ROMA.

El 31 de mayo de 1907, el Gobernador Provisional de Cuba ratificó la convención principal, el protocolo final y el reglamento para su ejecución, referentes á la Unión Postal Universal, y firmados en Roma el 26 de mayo de 1906.

CHILE.

MENSAJE DEL PRESIDENTE MONTT.

En la apertura de las sesiones ordinarias del Congreso Nacional de Chile, que tuvo lugar el 1° de junio de 1907, el Presidente MONTT presentó su mensaje, en el que da cuenta á las cámaras legislativas de la administración gubernamental de la República durante el año de 1906. En este mensaje se patentiza el estado de prosperidad de que goza la nación.

Hablando de las relaciones internacionales, el Presidente dice: "Convencido de que la cordialidad de relaciones con todos los Estados, robustecida por la vinculación de intereses económicos, es uno de los mejores medios de asegurar la prosperidad interior y el prestigio exterior de la República, será constante anhelo de mi Gobierno cimentar sobre esa base su política internacional."

Háse restablecido la representación diplomática de Chile y del Perú. Se han subscrito convenios con el Gobierno de Bolivia, que han puesto término satisfactorio á las gestiones á que dió lugar la complejidad de ciertos acuerdos que se incorporaron al tratado de paz de 1904. Desde que se resolvió la controversia limítrofe con la República Argentina, las relaciones entre las dos naciones han venido afianzándose de día en día, y en febrero de 1907 se firmaron con ese Gobierno dos convenciones; por la primera se fomenta el canje de publicaciones oficiales y literarias, y por la segunda se reprime severamente la falsificación de moneda legal y de títulos de crédito de cualquiera de los dos países en el territorio del otro; ambos Gobiernos estudian asimismo los mejores medios de dar oportunas facilidades á sus intercambios comerciales.

La República concurrió á la Tercera Conferencia Pan-Americana celebrada en Rio Janeiro, y, aceptando la invitación del Gobierno Holandés, ha nombrado los emisarios que la han de representar en la Segunda Conferencia Internacional de la Paz que se celebra en la Haya. El Presidente MONTT hace especial mención de la visita del Secretario ROOT á Chile.

Con referencia al terremoto del 16 de agosto de 1906, cuyos desastrosos efectos siente aún el país, dice el mensaje: "El Gobierno atendió en la medida de lo posible al alivio de las desgracias personales, siendo ayudado eficazmente en esta tarea por el concurso de las naciones amigas y de las colonias extranjeras, que rivalizaron en celo y sacrificios á nuestros compatriotas." El Congreso Chileno, para socorrer á los perjudicados y para proveer remedios generales á los daños causados por el terremoto, votó la cantidad de 10,200,000 pesos, y las naciones extranjeras contribuyeron al socorro de los

perjudicados con la suma de 2,741,000 pesos. Con fecha 13 de diciembre de 1906 se promulgó la ley de reconstrucción de Valparaíso.

El servicio de correos se desarrolló en armonía con las necesidades del país. El 31 de diciembre de 1906 funcionaban 863 oficinas, habiéndose creado 9 durante el año. Las entradas de este ramo alcanzaron á 2,648,845 pesos y los gastos á 2,168,529 pesos, dejando un saldo á favor de 480,316 pesos. La correspondencia movilizada en 1906 fué de 77,087,665 piezas, superior en 12,970,497 al año de 1905. Igualmente, la correspondencia cambiada con el extranjero ha tomado un gran desarrollo, siendo este movimiento de 13,533,850, piezas superior en 1,318,942 á la movilizada en el año anterior. Se ha establecido el servicio de giros postales con la Gran Bretaña y el de encomiendas con el Japón.

Las líneas telegráficas abarcan en la actualidad una extensión de 14,000 kilómetros de vía con 27,000 kilómetros de hilo. Las comunicaciones telegráficas aumentaron durante 1906 de una manera extraordinaria; su total fué de 2,033,466, con un valor de 1,439,062 pesos, superior en 432,294 pesos á 1905. El número de oficinas telegráficas que funcionaron durante el año fué de 329.

Las obras públicas recibieron un grande empuje durante 1906. El Gobierno contribuyó con £15,000 para la prosecución de los trabajos de agua potable y de desagües en Punta Arenas, Territorio de Magallanes. Se tiene en estudio la construcción de una línea telegráfica que una dicho territorio con el centro del país, y se ha subvencionado una compañía de navegación para establecer comunicación rápida y normal con Punta Arenas. Durante el año se han concedido 24 autorizaciones para instalaciones de fuerza, luz, y calefacción eléctricas en diversas ciudades de la República.

La colonización adquirió un desenvolvimiento satisfactorio, habiéndose organizado una oficina especial para mensura de tierras y radicación de indígenas y colonos. Á pesar de la escasez de propaganda en el extranjero, la inmigración aumentó de una manera notable en 1906. En efecto, los inmigrantes que en 1905 no alcanzaron sino á 293, en 1906 subieron á 1,221, y en los cinco primeros meses de 1907 esa inmigración ha superado la cifra de 4,000 extranjeros.

El servicio consular ha sido completado en su personal, habiéndose invertido en él durante el año 208,242.94 pesos, en tanto que sus entradas rindieron 457,428.88 pesos.

La instrucción pública fué objeto de especial atención por parte del Gobierno, y ha mejorado notablemente.

Los ingresos fiscales en el año de que se trata ascendieron á 161,089,725 pesos, cantidad que, agregada á 2,445,666 pesos, sobrante que arrojó el ejercicio económico de 1905, y á 20,000,000 de pesos de la emisión fiscal autorizada por ley de 23 de mayo de 1906, da

un total de 183,535,392 de pesos. El total de gastos alcanzó la cifra de 169,951,601 pesos, quedando por consiguiente un saldo disponible para el presente año de 13,583,790 de pesos. Las rentas públicas en 1907, tomando por base los ingresos del primer trimestre, se calculan en 177,000,000 de pesos, y con esta suma y el saldo de 1906 se hará frente á los gastos ordinarios y los autorizados por leyes especiales, quedando para 1908 un sobrante de 6,000,000 de pesos. Los gastos para 1908 se presuponen en 188,000,000 de pesos, y las rentas se calculan en la misma cantidad; en el presupuesto de 1908 se destinan 25,000,000 de pesos para obras públicas, y 57,000,000 para la construcción y mejora de ferrocarriles.

El movimiento del comercio exterior de Chile en 1906 ascendió á 525,554,513 pesos, arrojando un aumento de 51,856,000 pesos sobre el año anterior. De este total corresponden á exportaciones 289,513,522 pesos, y á importaciones 236,040,991 pesos; exceden, pues, aquellas á estas en 53,472,531 pesos. En 1905 el excedente de la exportación sobre la importación fué de 79,903,000 pesos. El aumento de la importación en 1906 sobre el año anterior fué de más de 39,000,000 de pesos, mientras el valor de la exportación sólo aumentó en 12,713,000 pesos.

El aumento de la renta de aduanas de la República alcanzó proporciones inesperadas en el año de que trata el mensaje. Los derechos recaudados en 1906 llegaron á 103,965,318 pesos, suma que supera en 12,643,757 pesos á la percibida en el año anterior. Ese total se descompone de la manera siguiente: Derechos de exportación sobre salitre y yodo, 60,164,050 pesos; derechos de importación, 41,540,403 pesos; y varios derechos, 2,260,865 pesos.

Los fondos de conversión acumulados hasta el 31 de mayo de 1907 ascienden á 77,282,257 pesos, ó sean £5,785,339.

Funcionan en la República ocho cajas de ahorro las cuales tenían depósitos el 31 de diciembre de 1906 por la cantidad de 14,799,728 pesos.

La marina mercante chilena tuvo en 1906 un aumento de 34 buques con un tonelaje de más de 30,000 toneladas. Actualmente tiene 85 vapores y 90 veleros, con más de 110,000 toneladas de registro.

Durante el año en cuestión se han terminado 151 kilómetros de vías férreas en las secciones de Pitrufquen á Antilhue, Temuco á Neuva Imperial y Tunel del Árbol. En la actualidad se prosigue la construcción de 958 kilómetros, que importan más de 50,000,000 de pesos, comprendidos en el Ferrocarril de Arica al Alto de La Paz, la construcción del cual es objeto de especial atención por parte del Gobierno para dar cumplimiento á los tratados con Bolivia.

EL PROYECTO DE PRESUPUESTOS PARA 1908.

El proyecto de presupuestos para 1908 fué presentado al Congreso Chileno por el Ejecutivo el día 17 de junio de 1907; los gastos se presuponen en la cantidad de 223,464,416 pesos, moneda corriente, que se distribuyen entre los diferentes ramos del Gobierno en la siguiente forma:

	Pesos.
Interior	38, 564, 890. 00
Relaciones Exteriores, Culto y Colonización	3, 341, 506. 19
Justicia	6, 866, 775. 00
Instrucción Pública	17, 356, 521. 21
Hacienda	43, 748, 690. 82
Guerra	18, 240, 072. 97
Marina	17, 566, 709. 90
Industria	77, 779, 250. 41
Total	223, 464, 416. 50

OBRAS PÚBLICAS.

De este total, se destinan 58,492,000 pesos para la construcción de importantes obras públicas, cantidad que se distribuye en la manera siguiente:

	Pesos.
Construcción y mejora de ferrocarriles	16, 500, 000
Ferrocarril de Arica al Alto de La Paz	16, 000, 000
Reconstrucción de Valparaíso	8, 000, 000
Alcantarillado de Santiago	5, 000, 000
Obras hidráulicas en los puertos de Talcahuano, Valparaíso, Constitución, Valdivia, y otros puertos y ciudades	3, 524, 000
Obras de agua potable y sancamiento	3, 000, 000
Edificios para escuelas	1, 276, 000
Palacio de Gobierno y otros edificios gubernamentales	1, 015, 000
Construcción de puentes	1, 000, 000
Palacio de Justicia y cárceles	907, 000
Templos y cuarteles	835, 000
Escuelas agrícolas, mineras, y profesionales	450, 000
Otras obras públicas	985, 000
Total	58, 492, 000

INGRESOS.

Las cantidades calculadas para las diferentes fuentes de ingreso son las siguientes:

	Pesos.
Derecho de exportación sobre el salitre	65, 300, 000
Derecho de exportación sobre el yodo	700, 000
Derechos de importación	48, 000, 000
Resguardos de cordillera	1, 000, 000
Movilización de bultos	2, 000. 000
Faros y balizas	650, 000
Correos y telégrafos	3, 000, 000

	Pesos.
Intereses de bonos	1, 550, 000
Papel sellado y estampillas	1, 000, 000
Alcoholes	2, 000, 000
Deudores de terrenos	1, 000, 000
Venta de bienes	500, 000
Otras entradas de tesorerías	2, 500, 000
Ferrocarriles	36, 000, 000
Premio del oro sobre 76,000,000 de pesos (13¼)	22, 800, 000
Total	188, 000, 000

Sumando este total de ingresos ordinarios con la cantidad de 32,000,000 de pesos que se tomarán de los empréstitos contratados recientemente, y agregados 4,000,000 de pesos, cantidad en que se calcula el exceso de ingresos sobre gastos para el ejercicio de 1907, se forma un total general de recursos que asciende á 224,000,000 de pesos, el cual deja un superávit de 535,583 pesos.

RENTAS ADUANERAS EN LOS CINCO PRIMEROS MESES DE 1907.

Durante los cinco primeros meses de 1907 las aduanas de la República de Chile recaudaron una renta total de 44,659,881.35 pesos; en el mismo período de 1906 se percibió un total de 39,055,389.11 pesos. En consecuencia, el aumento observado en los primeros cinco meses de 1907 fué de 5,604,492.24 pesos.

ACTA ACLARATORIA DEL TRATADO DE PAZ CON BOLIVIA DE 1904.

El 6 de mayo de 1907 el Presidente de la República de Chile promulgó como ley un acta aclaratoria del Tratado de Paz y Amistad celebrado entre Chile y Bolivia el 20 de octubre de 1904, acta en que queda establecido:

1°. Que Bolivia reconoce el dominio absoluto y perpetuo de Chile en los territorios entre los paralelos 23 y 24 latitud sur entre mar y cordillera hasta el límite argentino;

2°. Que el Gobierno de Chile conserva amplia libertad para estudiar, calificar y liquidar los créditos enumerados en el Artículo V, como también que fuera de estas obligaciones el Gobierno de Chile no toma á su cargo ningún otro crédito del Gobierno de Bolivia, cualquiera que fuera su naturaleza y procedencia, debiendo este último proporcionar al de Chile todos los antecedentes de que dispusiere relacionados con dichos créditos, y

3°. Que la rebaja mínima del 10 por ciento acordada á los productos nacionales y manufacturados de Chile á que se refiere el protocolo suscrito en La Paz el 20 de octubre de 1904 sólo durará obligatoriamente el tiempo que dure la contra-garantía que de Chile en conformidad al Artículo III de aquél tratado.

IMPORTACIONES DEL PERÚ EN EL PRIMER TRIMESTRE DE 1907.

Durante el primer trimestre de 1907 las importaciones precedentes de Callao, Perú, que se recibieron en Chile, tuvieron un peso total de 6,377,067 kilogramos, valorados en $135,149.50. Los artículos principales fueron, por orden de su valor: Petróleo crudo, $47,542; café, $26,775, y azúcar, $26,095.50.

EL ESTADO DE LOS BANCOS EN 1906.

El "Diario Oficial" de Chile, en uno de sus números del mes de mayo de 1907, publica el balance de los 27 bancos de la República, efectuado el 31 de diciembre de 1906, según el cual, el capital, fondos acumulados, depósitos, y otras cuentas de dichas instituciones de crédito alcanzaban en la mencionada fecha un total de 765,071,105.66 pesos, siendo el encaje de las mismas en el susodicho día de 3,863,042.88 pesos en metálico, y de 34,439,066 pesos en billetes.

REPÚBLICA DOMINICANA.

EXTRACTO DE LA LEY DE ADUANAS Y PUERTOS.

Las aduanas de la República son las oficinas establecidas por el Estado para recaudar los impuestos que las leyes establecen sobre las mercancías que se introducen en el país y los productos que de él se exportan.

Las operaciones comerciales sujetas al régimen de las aduanas, se clasifican del modo siguiente:

1°. Importación, que consiste en introducir mercancías extranjeras para el consumo de la República.

2°. Exportación, que consiste en extraer productos de la República, con destino á países extranjeros.

3°. Tránsito, que consiste en el pase de las mercancías extranjeras, que se introduzcan en la República, con destino á otra nación, ó para puertos habilitados de la misma República.

4°. Cabotaje, que consiste en el tráfico que se hace por mar entre los puertos de la República en buques nacionales.

5°. Depósito, que es la introducción de mercancías extranjeras, en los almacenes de las aduanas, para ser importadas ó reexportadas en el término y en los casos que la ley expresamente determine.

Son puertos habilitados para la importación y exportación: Santo Domingo, San Pedro de Macorís, Tortuguero de Azúa, Santa Bárbara de Samaná, Puerto Plata, San Fernando de Montecristi y Villa Sánchez.

Habrá una aduana en cada uno de los puertos habilitados.

Cuando se le permita á buques extranjeros, previos requisitos de ley, tomar carga en puertos no habilitados de la República, excepción hecha del puerto de Barahona, no podrán ser despachados para el extranjero sino en el puerto habilitado donde se obtuvo el permiso.

IMPORTACIÓN Y EXPORTACIÓN.

Pueden ser importados á la República Dominicana y exportados de ella todos los productos de la naturaleza, del arte y de la industria, salvo las excepciones siguientes:

Los aparatos para fabricar moneda que no vengan por cuenta de la nación, la moneda de plata gastada, según decreto de 5 de abril de 1884, la moneda falsa, las láminas y estampas obcenas, los elementos de guerra que no vengan por cuenta de la nación, así como los revólvers y sus cápsulas, y los demás artículos que señala como prohibidos el arancel.

Queda prohibida en absoluta la exportación de ganado vacuno.

FORMALIDADES QUE DEBEN LLENAR LOS CAPITANES.

Toda embarcación de cubierta ó sin ella, cualquiera que sea su nacionalidad, clase y porte, que salga de puertos extranjeros para puertos habilitados de la República, con carga ó en lastre, debe venir provista de su patente de navegación, y despachada por el Cónsul Dominicano, con los documentos prescritos en esta sección.

Todo capitán ó sobrecargo de buque que reciba carga en puertos extranjeros con destino á puertos de la República habilitados para el comercio exterior, deberá presentar al Cónsul Dominicano, ó á quien le represente, un sobordo firmado por cuadruplicado que contenga los datos que se expresan á continuación:

1°. Clase y nombre del buque, su tonelaje, bandera, matrícula y tripulantes, nombre del capitán, el del consignatario del buque y puertos de donde proceda.

2°. Nombre del puerto ó puertos á que se destinen las mercancías.

3°. El número de bultos, el peso bruto de ellos, y el número y la marca correspondiente á cada bulto de los que conduzca.

FORMALIDADES QUE DEBEN LLENAR LOS EMBARCADORES.

Todo mercadería que se embarque en el extranjero para los puertos habilitados de la República deberá ser despachada con los documentos exigidos en esta sección.

Los embarcadores de mercaderías en puertos extranjeros que vengan destinadas á los de la República, deben entregar por cuadruplicado, en idioma castellano, al cónsul, ó á la persona que le sustituya, una factura firmada, expresando en ella:

1°. El nombre del remitente y del dueño de la mercancía; el de la persona ó consignatario á quien se remite; el lugar en que se embarcan

y el puerto á que se destinan; la clase, nacionalidad y nombre del buque y de su capitán;

2°. La marca, número y peso bruto de cada bulto;

3°. Peso neto, medida y calidad del contenido de cada bulto, con designación de la cantidad de piezas ó envases de cada clase que él contenga;

4°. El valor verdadero de las mercancías en general, conforme á la cotización del mercado en el momento de la presentación de las facturas, y.

5°. Que en las facturas no se incluyen efectos que comprendan más de un introductor.

FORMALIDADES QUE DEBEN LLENAR LOS CÓNSULES.

Se prohibe á los cónsules despachar buques, cualquiera que sea su clase, nacionalidad y porte, para puertos de la República que no están habilitados para el comercio extranjero.

Los cónsules están obligados á manifestar á todas las personas que lo deseen, las leyes de aduanas de la República, los modelos de facturas, conocimientos, sobordos, etc., y á darles las explicaciones que sean necesarias y conducentes, para que puedan hacer en debida forma tales documentos.

Los cónsules no certificarán las facturas y conocimientos que se les presenten:

1°. Cuando no estén escritos con tinta negra y con letra bien legible;

2°. Cuando no contengan todos los datos exigidos por el artículo 18 de esta ley;

3°. Cuando no les presenten los cuatro ejemplares correspondientes;

4°. Cuando tengan enmiendas, borrones ó raspados, ó estén interlineados sin la correspondiente "Nota Buena," hecha al final y antes de la fecha y firma, y

5°. Cuando falten los conocimientos de embarque.

ENTRADA DE BUQUES.

Para que un buque puede entrar en los puertos de la República, deberá antes ser visitado por la Comisión de la Junta de Sanidad, la cual decidirá, con arreglo á las disposiciones vigentes del ramo, si puede ser ó no admitido.

Si el buque fuere admitido y es mercante, se exigirá al capitán ó sobrecargo en el acto de la visita: 1° el pliego consular que le haya sido entregado en el puerto ó puertos de su procedencia; 2° el sobordo ó sobordos certificados; 3° las listas de los efectos para repuestos del buque y los víveres del rancho, de conformidad con lo que establece el artículo 13 y todo lo que comprenda los efectos de uso del capitán y de los tripulantes; 4° la lista de pasajeros y sus equipajes, y 5° la patente de sanidad expedida ó certificada por el cónsul.

DESCARGA DE LOS BUQUES.

Las aduanas formarán, por el sobordo, dos índices alfabéticos de los bultos destinados á ellas, por la primera letra de las que formen la marca de cada uno, expresando sus números correspondientes, y clasificándolos por cajas, sacos, fardos, huacales, etc., según la clase á que pertenezcan. Uno de los dos índices será entregado al celador encargado de tomar nota de la descarga del buque, y el otro se entregará al oficial de aduana que reciba la carga en los almacenes destinados á depositarla.

RIQUEZA FORESTAL.

El Señor M. L. MURRAY, residente en San Juan, Puerto Rico, que hace tres años se ocupa en los negocios de madera en la República Dominicana, le anuncia á la Oficina Internacional de las Repúblicas Americanas, que en las altas planicies de la cordillera central de la República hay más de 3,000,000 de acres de pino amarillo de hoja larga de primera clase que rinden de 12,000 á 15,000 pies por acre. Entre los pinares y el océano hay una faja de madera de construcción, tales como caoba, guayacán, doradillo, nogal, bayahondo, grigi, quiebrahacha, nisparillo, sabino y cedro español. Hay como 6,000,000 de acres de esta clase de madera.

Los terrenos bajos, donde crecen las maderas de construcción, son muy fértiles, y después que se desmontan pueden convertirse en fincas sumamente productivas, si se dedican al cultivo de la caña de azúcar, cacao, tabaco, café, naranjas, piñas, plantas textiles, etc. En la actualidad estos terrenos pueden comprarse desde 50 centavos hasta $5 en oro por acre. La misma clase de terrenos ya cultivados en Puerto Rico, se venden desde $25 hasta $500 por acre.

IRRIGACIÓN DEL DISTRITO DE MONTE-CRISTI.

La "Gaceta Oficial" del 27 de marzo de 1907 publica el texto de la siguiente ley del Congreso Nacional, relativa á la irrigación del Distrito de Monte-Cristi, aprobada el 18 de marzo del 1907 y firmada por el Presidente CÁCERES el 23 del mismo mes:

"Se resuelve:

"ARTÍCULO 1. Votar, con cargo al Tesoro Público y por el término de dos años, la suma de $75,000 anuales, que serán destinados á los gastos que ocasione la irrigación del Distrito de Monte-Cristi, por el sistema de sumersión, conforme á los planos levantados al efecto y depositados en el ministerio de Fomento y Obras Públicas.

"La suma arriba expresada será consignada en la ley de Gastos Públicos que anualmente vote el Congreso Nacional en el capítulo de Fomento y Obras Públicas.

"ART. 2. La obra mencionada queda á cargo del Poder Ejecutivo, quien tomará las medidas que estén á su alcance y practicará todas las diligencias necesarias tendentes á llevarlo á feliz término, como á la mayor brevedad, la realización de tan importante obra."

ECUADOR.

IMMIGRACIÓN Y COLONIZACIÓN DEL ORIENTE.

En decreto de fecha 7 de febrero de 1907 y publicado en el "Registro Oficial" del 19 del mismo mes, la Asamblea Nacional de la República del Ecuador ratificó el contrato celebrado entre el Gobierno y los Señores O. ALEXANDER y SIMÓN GOTTLIEB, sobre inmigración y colonización del Oriente. Los concesionarios se comprometen á traer al Ecuador 5,000 familias de la raza blanca, con preferencia holandesas y alemanas, todas de agricultores y aptas para este objeto. Las principales condiciones impuestas á los concesionarios son las siguientes: Suministrar á los inmigrantes cuanto les sea necesario para vivir, por espacio de un año; proporcionar á cada familia una casa, semillas, herramientas, y un par de animales de tiro; construir, en la zona en que se establezca la inmigración, centros de población, en los cuales habrá templos, escuelas, boticas, médicos, bodegas y almacenes; construir un ferrocarril de vía permanente, y garantizar el cumplimiento del contrato con un depósito de £10,000.

El Gobierno, por su parte, se obliga: Á entregar á los concesionarios 500,000 de hectáreas de terreno baldío en el Oriente; á autorizar á la compañía que venda hasta 50 hectáreas de terreno á cada familia; permitir, por espacio de diez años, la importación libre de derechos de los equipajes y demás artículos de los inmigrantes, así como también las máquinas y materiales para el ferrocarril, y eximir de contribuciones directas á los colonos por el período de diez años.

Dentro del término de diez años, contados desde la fecha del contrato, deberán estar radicadas en el Ecuador las 5,000 familias inmigrantes de que habla el contrato.

Los concesionarios organizarán una compañía que se denominará The Ecuatorian Immigration Land Company.

LA PRODUCCIÓN DE TAGUA EN 1906.

Según una estadística publicada por los Señores LOUIS DELIS Y COMPAÑÍA, de Hamburgo, con fecha 22 de abril de 1907, la producción de tagua ó marfil vegetal en el Ecuador durante el año de 1906 fué de 11,715,000 de kilogramos, en comparación con 9,914,250 de kilogramos producidos en el año anterior.

ESTADOS UNIDOS.

COMERCIO CON LA AMÉRICA LATINA EN EL AÑO ECONÓMICO DE 1906-7.[a]

En el informe comercial expedido por la Oficina de Estadística de los Estados Unidos y que comprende las relaciones comerciales entre los Estados en el año económico que terminó el 30 de julio de 1907, el valor del comercio entre los Estados Unidos y la América Latina se calcula aproximadamente en $600,000,000, es decir, $350,000,000 de importaciones y $255,000,000 de exportaciones, contra $230,000,000 de importaciones y $155,000,000 de exportaciones en la década anterior. En este cálculo se incluyen los $80,000,000, que representa el comercio con Puerto Rico, á fin de presentar datos comparativos uniformes, por cuanto en aquella época Puerto Rico no estaba comprendido en el Gobierno de los Estados Unidos

Pasando por alto á Puerto Rico, las Guayamas y las Antillas, excepto Santo Domingo y Haití, al hacer el cálculo del comercio con la América Latina, el resultado es muy satisfactorio, por cuanto el comercio durante el año de 1907 muestra un valor total de más de $560,000,000, es decir, $227,304,976 de exportaciones, y $332,633,460 de importaciones, contra $498,738,804, ó sean $292,287,170 de importaciones, y $206,457,634 de exportaciones en el año anterior, lo cual indica un gran aumento respecto de 1897, época en que se incluyeron otros países en el cálculo.

En cuanto á la América del Sur, exclusivamente, las importaciones hechas de los Estados Unidos y las exportaciones á dicho país, representan un valor de más de $238,000,000, contra un valor de $212,000,000 en 1906, al paso que el comercio de la América Central, de $36,021,148, ascendió á $41,916,042; México, que representaba un comercio de $109,147,455, ascendió á $123,481,514; Cuba, cuyo comercio representaba $132,743,509, ascendió á $146,746,864; el comercio con la República Dominicana, que representaba $5,104,589, ascendió á $5,880,716, y el comercio con Haití, que representaba $4,493,317, descendió á $4,190,782.

El aumento en las exportaciones á la América del Sur resulta especialmente notable en el Brasil, por cuanto se advierte un adelanto de más de $4,000,000 de un aumento total de más de $20,000,000, y los artículos ya fabricados representaban las principales exportaciones. Estos productos representan un 60 por ciento de las exportaciones á Cuba, como un 70 por ciento de las exportaciones á México, y como un 85 por ciento de las exportaciones á la América Central y del Sur.

[a] El valor del comercio latinoamericano, según se publicó en el BOLETÍN MENSUAL correspondiente al mes de julio de 1907, se refiere al año común de 1906.

Bajo la denominación de importaciones, el Brasil una vez más representa una gran proporción del adelanto; es decir, se advierte un aumento de $17,000,000, mayormente en el café y la goma, tratándose de un aumento total de más de $40,000,000. De las importaciones hechas de Cuba, el aumento de $12,500,000 lo representa principalmente el azúcar, y las importaciones hechas de los países restantes se limitan principalmente á substancias alimenticias y materias primas para fábricas.

Dícese que las importaciones y exportaciones, por países, en los dos años comparados, son como sigue:

Países.	Importaciones.		Exportaciones.	
	1906.	1907.	1906.	1907.
Países Centroamericanos:				
Costa Rica	$4,622,426	$4,965,034	$2,338,138	$2,470,986
Guatemala	3,396,317	3,872,538	2,908,655	2,848,864
Honduras	1,724,865	2,296,556	1,632,251	1,833,056
Nicaragua	1,478,408	1,028,166	1,870,852	1,923,111

La estadística comercial demuestra que en 1906–7 las importaciones que se hicieron de la América Latina excedieron en un 132 por ciento á las de la última década, en tanto que en dichos datos comerciales en las importaciones de todos los demás países, sólo se indica un aumento de un 78 por ciento. En 1907 las exportaciones á la América Latina representan un 212 por ciento más que en 1896, en tanto que la proporción del aumento en las exportaciones á otros países no es más que un 68 por ciento mayor.

Este aumento en el comercio ha ocurrido con la República Argentina, el Brasil y Chile, en la América del Sur, la América Central (considerada en conjunto) y Cuba.

Las importaciones que se hicieron de la República Argentina de $10,750,000 en 1897 en 1907 ascendieron aproximadamente á $17,000,000, ó sea un aumento como de un 60 por ciento, al paso que las exportaciones á dicha República de $6,333,000 en 1897, en 1907 ascendieron á más de $32,000,000, ó sea un aumento de más de 400 por ciento.

Las importaciones hechas del Brasil de $69,000,000, diez años ha, en 1907, ascendieron á $98,000,000, aproximadamente, ó sea un aumento como de un 50 por ciento, al paso que las exportaciones á dicha República de $12,500,000 ascendieron á más de $18,000,000, ó sea un aumento de poco más de un 44 por ciento.

Las importaciones que en 1897 se hicieron de Chile de $3,750,000 en 1907 ascendieron á más de $18,000,000, en tanto que las exportaciones que se hicieron á dicho país de $2,500,000 ascendieron á más de $10,000,000.

Las importaciones que se hicieron de México hace diez años, de $19,000,000 en 1907, ascendieron á más de $57,000,000, ó sea un aumento como de un 200 por ciento, y el valor de las exportaciones que se hicieron á dicha República de $23,500,000 ascendió á más de $66,000,000, ó sea un aumento de un 175 por ciento.

Las importaciones que se hicieron de Cuba en 1897 de $18,500,000 ascendieron á más de $97,000,000, ó sea un aumento como de un 400 por ciento, y las exportaciones que se hicieron de los Estados Unidos á dicho país de $8,250,000 en el año de referencia ascendieron á más de $49,000,000, ó sea un aumento de cerca de un 500 por ciento.

Las importaciones que en 1897 se hicieron de la América Central, considerada ésta en conjunto, de $8,500,000 en 1907 ascendieron á más de $15,000,000, ó sea un aumento de un 80 por ciento, y las exportaciones que se hicieron á dichos países de $8,000,000 ascendieron á más de $26,000,000. El hecho de incluír á Panamá en los países Centroamericanos, más bien que como una parte de Colombia, explica la causa de una gran parte de este aumento, que representa como un 225 por ciento.

El comercio con México, el Brasil y Cuba establece nuevos precedentes en 1907, y por más que las importaciones que se hicieron de la Argentina muestran una leve disminución en comparación con las que se hicieron en 1906 son mayores que las cifras anunciadas correspondientes al 1905.

El aumento en las importaciones hechas de los países latinoamericanos lo representan principalmente unos cuantos artículos, en tanto que el aumento en las exportaciones se distribuye entre un gran número de artículos, mayormente artículos fabricados. De las importaciones hechas de México, los productos más importantes son el henequén, cobre en lingotes, cueros y pieles. El henequén muestra un aumento de $10,000,000 en una década; el cobre en lingotes y barras muestra un aumento de más de $13,000,000; el mineral de cobre cerca de $4,000,000, y los cueros y pieles más de $3,000,000. De las importaciones que se hicieron del Brasil, el café muestra un aumento de $7,000,000 en diez años, en tanto que la goma muestra

un aumento de más de $33,000,000. En las importaciones que se hicieron de Cuba, el azúcar muestra un aumento de $42,000,000; el tabaco en rama muestra un aumento de más de $10,000,000, y los tabacos ó puros muestran un aumento de $2,000,000 en la década transcurrida de 1897 á 1907.

En la página 434 aparece la última relación del comercio entre los Estados Unidos y la América Latina, tomada de la compilación hecha por la Oficina de Estadística del Departamento de Comercio y Trabajo de los Estados Unidos. Estos datos se refieren al valor del comercio arriba mencionado. La estadística corresponde al mes de junio de 1907, comparada con la del mes correspondiente del año anterior, y también comprende los datos referentes á los doce meses que terminaron en abril de 1907, comparados con igual período de 1906. Debe explicarse que las estadísticas de las importaciones y exportaciones de las diversas aduanas referentes á un mes cualquiera no se reciben en el Departamento de Comercio y Trabajo hasta el 20 del mes siguiente, necesitándose algún tiempo para su compilación é impresión; de suerte que los datos estadísticos correspondientes al mes de junio, por ejemplo, no se publican hasta agosto.

COMERCIO EXTRANJERO EN EL AÑO ECONÓMICO DE 1906-7.

El valor del comercio extranjero de los Estados Unidos en el año económico de 1906–7 ascendió á un total de $3,315,114,122. El rasgo más notable de este comercio es el gran aumento que se advierte en las importaciones. Este ramo del comercio, cuyo valor asciende á $1,434,421,425, muestra un aumento de más de $200,000,000 respecto de 1906, y representa más del doble del valor total de dicho comercio en 1898 ó 1899. El valor de las exportaciones, que ascendió á $1,880,692,697, muestra un aumento de $137,000,000 respecto del año anterior, y un aumento de un 53 por ciento respecto del año de 1899.

Los continentes que suministraron y recibieron estas importaciones y exportaciones fueron los siguientes:

	Importaciones.		Exportaciones.	
	1906.	1907.	1906.	1907.
Europa	$833,292,184	$747,291,255	$1,200,166,036	$1,298,293,999
América del Norte	235,353,322	263,576,349	308,382,972	349,840,641
América del Sur	140,422,876	160,165,537	75,159,781	82,157,174
Asia	180,095,671	212,475,427	105,451,610	92,703,664

Artículos para volverse á usar en las fábricas	226,210,513	260,613,878
Artículos listos para el consumo	459,812,656	479,700,679
Artículos diversos	6,791,584	7,330,930
Total de exportaciones de mercancías domésticas	1,717,953,382	1,854,553,956
Total de las mercancías extranjeras reexportadas	25,911,118	26,138,741
Total de exportaciones	1,743,864,500	1,880,692,697

LAS COMPAÑÍAS DE SEGUROS EN LA ZONA DEL CANAL.

Una orden expedida por el Secretario de Guerra de los Estados Unidos con la autorización del Presidente, con fecha 12 de marzo de 1907, y declarada vigente desde el 1° de julio de 1907, previene que á ninguna compañía de seguros de vida, incendios, accidentes, industrias ó de indemnización, se le permitirá efectuar transacciones dentro de la zona del Canal hasta que haya cumplido los siguientes requisitos:

1°. La compañía presentará al colector de rentas:

(*a*) Una copia certificada del articulado de su incorporación;

(*b*) Un certificado del comisionado de compañías de seguros del

Estado de su incorporación, en el cual se demostrará que está autorizada para hacer negocios en el Estado donde fué incorporada;

(*c*) Una resolución de su junta directiva en la cual se designe un agente dentro de la zona del Canal á quien pueda notificársele cualquier proceso legal;

(*d*) Una copia certificada de su último informe anual presentado al comisionado de las compañías de seguros del Estado ó país en el cual haya sido incorporada, y proporcionar, asimismo, de tiempo en tiempo, copias de los informes adicionales que haga al comisionado del Estado donde fué incorporada.

(*e*) Una relación jurada que exprese el capital social que haya aprontado, su sobrante, la cantidad de seguros pendiente y el número de créditos no liquidados ó reconocidos que haya pendientes contra ella.

2°. La compañía depositará en poder del colector de rentas $10,000 en efectivo, ó en bonos ó seguridades aceptables, con los cuales pueda pagarse cualquier mandamiento de pago que se falle contra ella con arreglo á las cláusulas de cualquiera póliza que expida.

3°. Al cumplir con todos estos requisitos y efectuar el pago de un derecho anual de $50, el colector de rentas expedirá á dicha compañía un certificado autorizándola para hacer negocios dentro de la zona del Canal. Sin embargo, dicho certificado podrá ser declarado nulo por orden de las autoridades civiles principales de la zona del Canal; pero si llegase á declararse nulo sin que la compañía de seguros haya incurrido en falta alguna, se devolverá á la compañía de seguros una parte proporcional del derecho de licencia que haya pagado.

4°. Como una condición para poder continuar haciendo negocios dentro de la zona del Canal, cada compañía presentará al colector de rentas del 1° de enero al 1° de marzo de cada año, una relación jurada expresando los negocios que haya hecho dentro de la zona del Canal durante el año común anterior, y el 1° de marzo ó antes de dicha fecha, pagará al colector de rentas, en vez de otras contribuciones (con excepción de las contribuciones sobre bienes raíces y el impuesto anual prescrito por el artículo 3), una matrícula que equivalga á un 1½ por ciento de sus ingresos derivados de premios durante el año común anterior.

5°. El agente de cualquiera compañía que no esté matriculada y que haga negocios dentro de la zona del Canal, incurrirá en una multa que no excederá de $25 por la primera ofensa ni será mayor de $100 por la segunda.

MÉXICO.

COMERCIO EXTERIOR EN EL MES DE ABRIL DE 1907.

La Secretaría de Hacienda de México acaba de publicar los datos relativos al comercio exterior de la República en el mes de abril de 1907 y en los diez primeros meses de 1906–7, comparados con los correspondientes á los de igual período de 1905–6.

Mercancías extranjeras, con un valor de $189,136,067.56 moneda mexicana, fueron importadas, las cuales comparadas con $174,133,573.38 importadas durante el igual período del año fiscal precedente muestran un aumento de $15,002,494.18 en favor del año fiscal 1906–7.

Las exportaciones durante los diez meses del año fiscal de 1906–7 fueron $206,816,240.70 moneda mexicana, una diferencia en contra del corriente año fiscal de $12,658,508.12 moneda mexicana.

El siguiente cuadro muestra el comercio de importación en detalle:

IMPORTACIÓN.

BASE DE LOS IMPUESTOS DE TIMBRE Y ADUANAS EN JULIO Y AGOSTO DE 1907.

La circular mensual publicada por el Departamento de Hacienda de México anuncia que el precio legal por kilogramo de plata pura durante el mes de julio de 1907 será $43.72, y durante agosto, $43.96, con arreglo á los cálculos prescritos en el decreto de 25 de marzo de 1905. Este precio servirá de base para el pago de impuestos de timbre y los derechos de aduanas en toda la República cuando se use la moneda de plata mexicana.

EQUIVALENCIAS EN PLATA DEL PESO MEXICANO.

El Presidente de la República Mexicana ha dispuesto que durante el segundo semestre de 1907, y sólo en trabajos de estadística, se haga uso de la tabla de equivalencias que consta en seguida, para convertir en pesos mexicanos las monedas que se rigen por el patrón plata:

País.	Monedas.	Valor del peso mexicano en las respectivas monedas.
Bolivia	Boliviano	0.99
Guatemala	Peso	.99
Salvador	Id.	.99
Honduras	Id.	.99
Nicaragua	Id.	.99
Persia	Kran	5.38
China	Tael	.5088

TÍTULOS DE MINAS EXPEDIDOS EN 1907.

Los últimos informes oficiales publicados por el Gobierno Mexicano muestran que en el primer semestre del año económico de 1906–7 se expidieron 2,000 títulos de minas, que representan un área de 30,438 hectáreas, ó sean como 75,213 acres.

En el semestre anterior se expidieron 1,801 títulos de minas, que representaban una extensión de 32,459 hectáreas, ó sean 80,207 acres. Así, pues, se ve que en el año común de 1906 se expidieron 3,801 títulos de minas, que comprendían 155,420 acres superficiales de terreno.

RENTAS ADUANERAS DURANTE EL AÑO DE 1906–7.

Según los últimos datos oficiales, las aduanas de la República Mexicana recaudaron durante el ejercicio económico de 1906–7 las cantidades que se expresan en el siguiente cuadro:

	Pesos.
Derechos de importación	52,282,673.14
Derechos de exportación	1,061,393.98
Derechos de puerto	1,143,586.70
Total	54,487,653.82

Comparando este total con el de 47,748,515.81 pesos que sumaron las rentas recaudadas en el ejercicio anterior, resulta un aumento á favor de 1906–7 de 6,739,138.01 pesos.

CONSTITUCIÓN DE LA COMPAÑÍA FERROCARRILES NACIONALES DE MÉXICO.

El 6 de julio de 1907 el Presidente DÍAZ firmó el siguiente decreto, que fué publicado en el "Diario Oficial" de igual fecha:

"PORFIRIO DÍAZ, Presidente Constitucional de los Estados Unidos Mexicanos, á sus habitantes, sabed:

"Que en uso de las facultades concedidas al Ejecutivo de la Unión por la ley de 26 de diciembre de 1906, he tenido á bien expedir el siguiente decreto sobre constitución de la Compañía 'Ferrocarriles Nacionales de México.'

"ARTÍCULO 1°. Se constituirá una sociedad mexicana por acciones y de responsabilidad limitada entre el Gobierno Mexicano, por una parte, y por otra siete ó más accionistas de la Compañía del Ferrocarril Nacional de México y de la Compañía Limitada del Ferrocarril Central Mexicano, que convengan en cambiar sus acciones por las de la nueva sociedad. Esta se denominará: 'Ferrocarriles Nacionales de México,' y tendrá su domicilio en la capital de la República.

"ART. 2°. La compañía tendrá por objeto incorporar las propiedades de las compañías de los Ferrocarriles Nacional de México y Central Mexicano, con facultad de adquirir, construír y explotar cua-

lesquiera otras líneas de ferrocarril dentro del territorio nacional, y de ejecutar toda clase de actos, operaciones ó contratos conexos con el objeto de la ley de 26 de diciembre de 1906, gozando, en consecuencia, para realizar los fines de su institución, de las siguientes facultades y autorizaciones:

"I. Adquirir, poseer y explotar, en todo ó en parte y por cualquier título legal, las concesiones, derechos y propiedades de las Compañías de los Ferrocarriles Nacional de México y Central Mexicano y de cualquiera otra Compañía ó empresa que posea ó explote líneas férreas ó de transportes por tierra ó por agua, ó cualquier servicio anexo á dichas líneas;

"II. Adquirir y poseer por cualquier título legal acciones preferentes, ordinarias, comunes ó diferidas, bonos ú obligaciones y, en general, títulos de cualquiera clase de las Compañías de los Ferrocarriles Nacional de México y Central Mexicano, ó de las otras Compañías ó empresas á que alude la fracción anterior y cuyas propiedades estén ubicadas en todo ó en parte dentro del territorio nacional; con facultad de ejercer todos los derechos inherentes á esas acciones, bonos ú obligaciones y títulos;

"III. Encargarse de todo género de transportes por tierra ó por agua, con las industrias ó servicios anexos ó conexos que estime convenientes ó lucrativos; y al efecto, adquirir y poseer bienes muebles é inmuebles de toda especie, construir líneas férreas dentro del territorio nacional y ejecutar obras de todo género;

"IV. Promover el establecimiento ó desarrollo de compañías ó empresas que tengan por objeto alguno ó algunos de los que expresa la fracción anterior, la producción ó comercio de materias ó efectos propios para el consumo de la compañía, ó el desarrollo de sus propiedades de cualquier género; pudiendo adquirir y poseer acciones, bonos ú obligaciones y títulos en dichas compañías ó empresas, y tomar participación en ellas en cualquiera forma, con facultad de ejercer todos los derechos inherentes á esas acciones, bonos ú obligaciones y títulos;

"V. Crear, con los requisitos que fijen los estatutos y sin necesidad de que estén previamente subscriptas, sus propias acciones, y conservarlas en su poder mientras no se acuerde que se emitan, se den en garantía ó se traspasen;

"VI. Ejecutar todos los actos y celebrar todos los contratos del orden civil y mercantil que fueren propios para realizar los fines de la sociedad, incluso prestar garantías y, en general, hacer cuanto fuere conexo con los objetos que expresan las anteriores fracciones, con plena capacidad jurídica para todo lo que esté permitido por la ley á las sociedades de su clase, ó esté autorizado por este decreto ó por los demás que expidiere el Ejecutivo Federal, en uso de las facultades otorgadas por la ley de 26 de diciembre de 1906.

"ART. 3°. En capital inicial de la compañía será de cuatrocientos sesenta millones de pesos, y estará representado en la cantidad de sesenta millones de pesos, por acciones de primera preferencia, en la de doscientos cincuenta millones de pesos, por acciones de segunda preferencia, y en la de ciento cincuenta millones de pesos, por acciones comunes. Todas estas acciones, al ser emitidas y sea cual fuere el concepto por el cual se emitan, tendrán el carácter de íntegramente liberadas.

"El capital inicial podrá aumentarse ó disminuirse en los términos de este decreto y de los estatutos; pero mientras el Gobierno mexicano conserve la mayoría de las acciones de la compañía, ningún aumento ó reducción del capital podrá llevarse á efecto cuando dé por resultado que el Gobierno deje de tener dicha mayoría, á no ser con el consentimiento del Ejecutivo Federal, previamente autorizado por el Congreso de la Unión.

"ART. 4°. Las acciones de primera preferencia conferirán á sus tenedores el derecho de percibir en cada año, de las utilidades líquidas y antes de que se pague dividendo alguno por el mismo año á las acciones de cualquiera otra clase, dividendos hasta completar un cuatro por ciento sobre su valor nominal; en el concepto de que el deficiente que en el expresado cuatro por ciento pueda resultar en un año, no será exigible de las utilidades líquidas de años posteriores.

"En caso de liquidación de la compañía, los tenedores de las acciones de primera preferencia tendrán derecho al reembolso de éstas á la par, antes de que se haga reparto alguno á los tenedores de cualquiera otra clase de acciones.

"No podrán aumentarse los sesenta millones de pesos que en el capital de la compañía representen las acciones de primera preferencia, ni crearse hipotecas ú otros gravámenes fuera de los que se autorizan por los artículos nueve, diez y once de este decreto, sobre cualquiera de las propiedades sujetas á las hipotecas que ellos mencionan, á no ser que en asamblea general, debidamente convocada, así lo acuerde la mayoría de las acciones de la compañía que estén en circulación y lo aprueben, votando por separado, los tenedores de la mayoría de las acciones de primera preferencia, también en circulación.

"Dichas acciones de primera preferencia no podrán disminuirse sino por cancelación de las que la compañía posea ó compre en el mercado; pero la compañía podrá redimir á la par y en efectivo la totalidad de las que estuvieren en circulación.

"ART. 5°. Las acciones de segunda preferencia conferirán á sus tenedores el derecho de percibir en cada año de las utilidades líquidas, dividendos hasta completar un cinco por ciento sobre su valor nominal, después de cubierto ó separado el dividendo de cuatro por ciento de las acciones de primera preferencia y antes de que se haga reparto

alguno por el mismo año á las acciones comunes; en el concepto de que el deficiente que en el expresado cinco por ciento pueda resultar en un año, no será exigible de las utilidades líquidas de años posteriores. Después del pago del expresado cinco por ciento, todo sobrante de utilidades líquidas repartibles en un año, se distribuirá entre los tenedores de acciones de segunda preferencia y los de acciones comunes que formen parte del capital inicial de la compañía, en proporción al número de acciones que posean y sin distinción entre éstas por razón de clase.

"En caso de liquidación de la compañía, las acciones de segunda preferencia tendrán derecho á su reembolso á la par después de reembolsadas, también á la par, las de primera preferencia, y antes de que se haga reparto alguno á los tenedores de acciones comunes.

"El capital representado por las acciones de segunda preferencia podrá aumentarse ó disminuírse si en asamblea general de accionistas debidamente convocada, así lo acordare la mayoría de las acciones de la compañía que estén en circulación y lo aprobaren, votando por separado, los tenedores de la mayoría de las acciones de segunda preferencia que estén presentes y voten en la asamblea. Cualquiera disminución, á menos que se efectúe por cancelación de acciones que la compañía posea ó compre en el mercado, se llevará á cabo mediante reparto en efectivo á prorrata entre los accionistas, y la correspondiente reducción á la par en el número ó en el monto de las acciones.

"Art. 6º. Las acciones comunes que formen parte del capital inicial de la compañía conferirán á sus tenedores el derecho de participar en cada año en las utilidades líquidas repartibles, después de pagados por el mismo año á las acciones de primera y de segunda preferencia los dividendos de cuatro y de cinco por ciento que respectivamente les corresponden. El remanente de dichas utilidades líquidas repartibles se distribuirá entre los tenedores de acciones de segunda preferencia y los de las expresadas acciones comunes que formen parte del capital inicial de la compañía, en proporción al número de acciones que cada uno posea y sin distinción entre éstas por razón de clase.

"En caso de liquidación de la compañía, los tenedores de acciones comunes tendrán derecho á recibir, proporcionalmente á sus representaciones, todo el haber líquido que resulte después de que las acciones de primera y de segunda preferencia hayan sido reembolsadas á la par.

"El capital representado por las acciones comunes podrá aumentarse ó disminuírse si, en asamblea general de accionistas debidamente convocada, así lo acordare la mayoría de las acciones de la compañía que estén en circulación y lo aprobaren, votando por

separado, los tenedores de la mayoría de las acciones comunes que estén presentes y voten en la asamblea.

"Las acciones comunes en que se aumente el capital inicial de la compañía no darán derecho á participar en los dividendos que ésta distribuya, pero conferirán á sus tenedores los demás derechos que corresponden á las acciones de la misma clase que formen parte de dicho capital inicial.

"La disminución de las acciones comunes sólo podrá llevarse á cabo por medio de la reducción, sin pago alguno por parte de la compañía, del número ó del importe de dichas acciones comunes, teniendo la compañía la facultad de hacer la expresada reducción ya en las acciones comunes que no tengan derecho á participar en dividendos, sin reducir las que formen parte del capital inicial de la compañía, ó ya en las de ambas clases, á su elección.

"ART. 7°. Todas las acciones de la compañía conferirán igual derecho de voto en las asambleas generales de accionistas, salvo lo establecido en los artículos cuarto, quinto y sexto de este decreto y lo que en los estatutos se determine sobre elección de la junta directiva, con objeto de dar á los tenedores de acciones de primera y de segunda preferencia el derecho de elegir por separado uno y cuatro directores, respectivamente. Los impuestos de toda clase establecidos ó que se establezcan en la República, ya sea por la Federación ó por algún Estado ó municipalidad, sobre los dividendos ó el reembolso de las acciones, y que conforme á la ley hubieren de ser pagados directamente por la compañía ó deducidos por ella de las sumas así repartibles, serán cubiertos por la misma compañía con cargo á sus gastos generales, recibiendo los tenedores de acciones las cantidades que entre ellos deban distribuírse por los indicados conceptos, sin deducción alguna.

"ART. 8°. Las acciones que constituyan el capital inicial de la compañía se destinarán preferentemente á la adquisición de las propiedades de las Compañías de los Ferrocarriles Nacional de México y Central Mexicano y de las acciones y títulos que tienen en circulación dichas compañías, y á ser aplicadas al Gobierno, según se expresa en la fracción segunda del artículo diez y ocho de este decreto.

"Las acciones que se destinen á los fines indicados, así como las restantes del capital inicial, se emitirán según lo acuerde la junta directiva; pudiendo ésta determinar el tipo de emisión y el precio en efectivo ó valores ú otra compensación que deba recibir la compañía.

"ART. 9°. Para realizar los fines de su institución, la compañía podrá crear y emitir dos clases de obligaciones que en este decreto se denominan respectivamente "Bonos de hipoteca preferente" y "Bonos de hipoteca general," así como garantizarlas con la prenda ó hipoteca de todas ó de una parte de las concesiones, pro-

piedades y demás bienes que la compañía posea entonces ó adquiera posteriormente. Las garantías así constituídas para ambas clases de obligaciones, surtirán, en los términos que se estipulen en los instrumentos respectivos, sus efectos hipotecarios sobre las líneas de ferrocarril y propiedades inmuebles que abarquen, á medida que la compañía las vaya adquiriendo, y la deuda representada por los bonos de hipoteca preferente tendrá prelación respecto de la que representen los de hipoteca general.

"En los instrumentos públicos y contratos en que la compañía constituya dichas garantías podrán consignarse los pactos, estipularse los procedimientos para hacerlos efectivos, y llenarse los requisitos que sean necesarios ó usuales en los mercados extranjeros donde convenga cotizar dichas obligaciones.

"Dichos instrumentos públicos y contratos, una vez protocolizados, se inscribirán en el Registro Público de la Ciudad de México, previa declaración de la Secretaría de Hacienda de que se han celebrado conforme á los preceptos y autorizaciones especiales de este decreto, y surtirán todos sus efectos legales, así como los bonos que conforme á ellos se emitan, aun cuando en unos ú otros no se hubieren llenado algunos de los requisitos exigidos por la ley de ferrocarriles de 22 de abril de 1899 ó cualquiera otra de observancia general.

"ART. 10. Los bonos de hipoteca preferente devengarán intereses á razón de cuatro y medio por ciento al año, y se estipulará que el reembolso del capital que representen comenzará en 1917, por medio de un fondo de amortización que al efecto se creará y que deberá asegurar el completo pago de todos los bonos con sus intereses á más tardar en el año de 1957; sin perjuicio del derecho que se reserve la compañía para extinguir la deuda por otros medios antes del mencionado plazo.

"El monto total de los bonos de esta clase no excederá de cuatrocientos sesenta y dos millones de pesos; pero la compañía podrá estipular que su reembolso se haga con una prima que no exceda de cinco por ciento de su valor nominal.

"ART. 11. Los bonos de hipoteca general devengarán intereses á razón de cuatro por ciento al año, y se estipulará que el reembolso del capital que representen comenzará en el año de 1937, por medio de un fondo de amortización que se creará al efecto y que deberá asegurar el completo pago de todos los bonos con sus intereses, á más tardar en el año de 1977; sin perjuicio del derecho que la compañía se reserve para extinguir la deuda por otros medios antes del mencionado plazo.

"El monto total de estos bonos no excederá de trescientos setenta y dos millones de pesos y la compañía no podrá estipular que su reembolso se haga con prima alguna sobre su valor nominal.

"Además de las garantías que á favor de estos bonos constituya la

compañía, conforme al precedente artículo noveno, el Gobierno de los Estados Unidos Mexicanos garantizará incondicionalmente su pago en principal é intereses, inclusas las exhibiciones para el fondo de amortización, y esta garantía se hará constar en cada bono.

"ART. 12. Si por virtud de la garantía de que habla el artículo once que precede, el Gobierno llegare á hacer algún desembolso, será considerado como acreedor de la compañía por las sumas que hubiere pagado y con derecho á que éstas le sean reembolsadas con los réditos correspondientes á razón de cuatro por ciento al año. Salvo el caso de liquidación, dicho reempolso se hará sólo con las utilidades líquidas repartibles, antes de que pueda pagarse dividendo alguno á cualquiera clase de acciones, excepto los que se garanticen en la escritura constitutiva de la compañía.

"El Gobierno no tendrá derecho para hacer efectivo el pago de su crédito por medio de secuestro, intervención, liquidación ú otro procedimiento judicial; pero en cuanto á prelación respecto de otros créditos, ocupará el primer lugar después de los hipotecarios, á menos que ceda esta preferencia en favor de otro ú otros acreedores.

"ART. 13. La emisión de bonos hipotecarios de ambas clases se hará á medida que lo exijan las circunstancias y en las cantidades que la compañía estime necesarias para realizar los fines de su institución.

"En todo caso en que deba procederse á la emisión de bonos, será indispensable la aprobación de la Secretaría de Hacienda; excepto cuando la emisión se verifique para cumplir obligaciones que la compañía haya contraído en convenios en que dicha secretaría hubiere intervenido.

"ART. 14. Además de las dos clases de bonos á que se refieren los artículos que preceden, la compañía podrá crear y emitir otras obligaciones, garantizadas ó no con la hipoteca de sus propiedades; pero en lo que se relacione con los bienes afectos á las dos clases de bonos mencionados, dichas obligaciones ocuparán, en cuanto á prelación, un lugar posterior á éstos.

"ART. 15. La compañía será regida en la Ciudad de México por una junta directiva que se compondrá de veintiún directores, de los cuales nueve, cuando más, podrán residir en el extranjero y constituir en la ciudad de Nueva York, de los Estados Unidos de América, una junta local que podrá celebrar sus sesiones por separado.

"La junta directiva tendrá plenas facultades para dirigir y administrar los negocios de la compañía en los términos que fijen los estatutos. No será necesario que los directores sean accionistas, ni que depositen acciones para garantizar su gestión; dichos directores sólo serán responsables por dolo y por fraude en el ejercicio de su encargo, y tal responsabilidad sólo podrá serles exigida por resolución de la asamblea general de accionistas y por la persona autorizada por ésta con ese fin, sin que ningún accionista individualmente tenga

derecho de dirigir acción ó reclamación alguna contra ellos por razón de sus actos oficiales.

"Con objeto de facilitar la organización financiera de la compañía, podrá pactarse en la escritura constitutiva que la primera junta directiva se componga de siete directores, cuando menos aumentándose posteriormente á veintiuno, en los términos y forma que se estipulen.

"ART. 16. Las utilidades líquidas de la compañía que resulten del balance anual aprobado por la asamblea general de accionistas, se distribuirán entre éstos en el orden y con arreglo á lo prevenido en los artículos cuarto, quinto y sexto de este decreto y á las reglas que se establezcan en los estatutos, previa deducción del cinco por ciento de su monto, que se destinará á formar un fondo de reserva, hasta alcanzar la suma de cinco millones de pesos; siendo de entonces en adelante voluntaria la separación del indicado cinco por ciento, según lo acuerde la asamblea general.

"El fondo de reserva se destinará á los fines que la misma asamblea determine, incluso el de seguir haciendo entre los accionistas los repartos que fueren necesarios para no reducir el tipo de los dividendos que se hubieren distribuído con anterioridad.

"En todo caso en que el mencionado fondo se reduzca á menos de cinco millones de pesos, la separación del cinco por ciento de las utilidades líquidas volverá á ser obligatoria, hasta alcanzar de nuevo esa suma.

"ART. 17. La duración de la compañía será de noventa y nueve años, contados desde la fecha de este decreto; salvos los casos de prórroga ó de disolución anticipada que se prevean en la escritura constitutiva ó en los estatutos.

"ART. 18. La compañía se constituirá en la Ciudad de México por medio del otorgamiento de la correspondiente escritura pública, en la cual el Ejecutivo Federal será representado por el Secretario de Hacienda y Crédito Público.

"Dicha escritura, á la que no será necesario agregar comprobación que expresa el artículo 175 del Código de Comercio vigente, contendrá:

"I. La declaración de constituírse la compañía de conformidad y con sujeción á lo prevenido en la ley de 26 de diciembre de 1906 y en este decreto;

"II. La aplicación al Gobierno de una parte de las acciones y títulos de la compañía, en compensación de sus aportaciones, de la garantía que presta conforme al Artículo 11, y de su apoyo y cooperación para organizar la compañía. La indicada aplicación asegurará al Gobierno la representación por derecho propio de un número de acciones bastante para formar mayoría de votos en las asambleas generales;

"III. La designación de la primera junta directiva, sus facultades

especiales, el tiempo de su duración y la manera en que ha de renovarse;

"IV. El nombramiento de los primeros comisarios;

"V. Los estatutos de la compañía, en los cuales podrán establecerse reglas especiales sobre la forma, el traspaso y el registro de las acciones, y sobre la manera de reponer los títulos extraviados ó destruídos;

"VI. Los demás pactos y estipulaciones que las partes consideren convenientes.

"Con el otorgamiento de la expresada escritura pública la compañía quedará legalmente organizada con plena capacidad jurídica, y entrará en el goce de las franquicias y derechos que le correspondan conforme á este decreto, á la escritura constitutiva y á los estatutos.

"ART. 19. La compañía, en su régimen interior y en sus derechos y obligaciones con relación á tercero, quedará sujeta:

"I. Á las reglas y preceptos contenidos en el presente decreto y en los demás que llegare á expedir el Ejecutivo Federal en uso de las facultades que le otorga la ley de 26 de diciembre de 1906;

"II. Á las disposiciones y reglas que se establezcan en la escritura constitutiva y en los estatutos, de acuerdo con los decretos mencionados.

"En los puntos no comprendidos en dichos decretos, escritura y estatutos, la compañía se regirá por las leyes generales de la República.

"ART. 20. Los estatutos de la compañía se publicarán en el 'Diario Oficial' de los Estados Unidos Mexicanos. Igual requisito se observará respecto de las modificaciones que acordare hacer en ellos la asamblea general de accionistas; pero estas modificaciones no tendrán valor legal sino después de haber sido aprobadas por la Secretaría de Hacienda.

"ART. 21. El valor representado por las acciones y títulos de la compañía podrá expresarse en dólares, libras esterlinas ú otra moneda extranjera, ó en pesos mexicanos de oro del peso y ley establecidos por la ley monetaria actualmente vigente, si en beneficio de la compañía se creyere oportuno observar sobre el particular las reglas y costumbres de los mercados en que dichos títulos y acciones hayan de cotizarse.

"Igualmente, los dividendos, réditos y amortizaciones de las acciones y títulos de la compañía, podrán ser pagaderos, á elección de sus tenedores, en México ó en alguna ó algunas ciudades del extranjero, al tipo de cambio fijo que en dichas acciones ó títulos se establezca.

"ART. 22. La escritura pública de constitución de la compañía, las de compraventa, aportación ó cualesquiera otras que se otorguen en la República para consumar la incorporación de las propieda-

des de las Compañías de los Ferrocarriles Nacional de México y Central Mexicano ó de las de otras empresas ó compañías de transporte, las que se otorguen para llevar á cabo la emisión de bonos que este decreto autoriza, así como las de protocolización de esas mismas escrituras cuando se otorguen en el extranjero, sólo causarán el impuesto del timbre que corresponda á las hojas del protocolo en que se consignen. Los testimonios de las escrituras mencionadas y los contratos de cualquiera naturaleza que se relacionen con los fines antes expresados, causarán la cuota de cincuenta centavos por hoja. En cuanto á los títulos de las acciones, bonos ú otros valores de la misma compañía que se emitan en México, ó que, emitidos en el extranjero, lleguen á circular en la República, sólo causarán el impuesto del timbre á razón de medio centavo por título, provisional ó definitivo, cualquiera que sea el valor nominal que representen.

"Por tanto, mando se imprima, publique, circule y se le dé el debido cumplimiento.

"Dado en el Palacio del Poder Ejecutivo de la Unión, en México, á 6 de julio de 1907."

LA LEY DE 26 DE DICIEMBRE DE 1906.

El Congreso de los Estados Unidos Mexicanos ha tenido á bien decretar lo que sigue:

"ARTÍCULO 1°. Se autoriza al Ejecutivo Federal para constituir, por medio de uno ó más decretos, una compañía ó sociedad mexicana, por acciones, de responsabilidad limitada y con domicilio en la Capital de la República, que tendrá por objeto incorporar las propiedades de las Compañías de los Ferrocarriles Nacional de México y Central Mexicano, con facultad de adquirir, construir y explotar cualesquiera otras líneas de ferrocarril, dentro del territorio nacional, y de ejecutar toda clase de actos, operaciones ó contratos conexos con el objeto de la presente autorización.

"En el decreto ó decretos que se expidan, el Ejecutivo Federal fijará las bases constitutivas que á su juicio sean más adecuadas, y los requisitos especiales, tanto de esencia cuanto de forma, que hayan de llenarse para que la sociedad tenga capacidad jurídica y pueda realizar los fines de su institución.

"ART. 2°. Se faculta igualmente al Ejecutivo Federal para celebrar los convenios ó arreglos que estime conducentes, con el fin de llevar á cabo la incorporación que expresa el artículo anterior, sujetándose á las prescripciones que siguen:

"I. El Gobierno Federal representará por derecho propio, en la compañía ó sociedad que se constituya, un número de acciones bastante para formar mayoría de votos en las asambleas generales.

"II. La compensación mediante la cual se obtenga el número de acciones que proporcione la mayoría de votos á que se refiere la frac-

ción anterior, no deberá consistir en desembolso alguno de dinero con cargo al Erario Federal, ni en emisión de títulos de deuda pública; pero el Ejecutivo queda autorizado para cambiar por acciones de la nueva compañía las del Ferrocarril Nacional de México que pertenecen á la Nación; y también para otorgar la garantía subsidiaria del Gobierno Federal á favor de una de las categorías de bonos hipotecarios que emita la nueva compañía ó sociedad, siempre que los bonos garantizados no devenguen un interés superior al cuatro por ciento anual.

"III. La emisión de los bonos que garantice el Gobierno se limitará á lo que sea necesario para convertir sólo una parte de los títulos que tengan en circulación las compañías cuyas propiedades han de incorporarse, y para proveer á la nueva sociedad de los fondos que requieran los gastos de la incorporación, la construcción ó compra de nuevas líneas férreas ó de títulos de empresas ó compañías de transporte; y por último, el perfeccionamiento y equipo de dichas líneas y de las ya existentes.

"IV. Las acciones ó títulos que aseguren al Gobierno Federal la mayoría de votos á que se refiere la fracción primera, no podrán ser enajenados ni en manera alguna gravados, sin expresa autorización del Congreso de la Unión.

"V. En los convenios ó arreglos que celebre el Ejecutivo Federal en uso de la presente autorización, no se modificarán en manera alguna las concesiones de las compañías, cuyas propiedades se incorporen ó adquieran.

"ART. 3°. El Ejecutivo Federal dará cuenta al Congreso, en tiempo oportuno, del uso que hiciere de las autorizaciones que por esta ley se le conceden."

CONVENCIÓN PARA CREAR UNA COMISIÓN DE DERECHO INTERNACIONAL.

El "Diario Oficial" del 25 de junio de 1907, publica el decreto del Presidente DÍAZ del 10 de junio, proclamando la convención para crear una Comisión de Derecho Internacional, que fué firmada en Río de Janeiro el 23 de agosto de 1906 por los delegados de las diecinueve Repúblicas Americanas que estuvieron representadas en la Tercera Conferencia Internacional Americana, la cual convención fué aprobada por el Senado de los Estados Unidos Mexicanos y ratificada por el Presidente DÍAZ el 21 de abril de 1907.

EXENCIÓN DE DERECHOS DE IMPORTACIÓN Y DE PUERTO SOBRE MERCANCÍAS EXTRANJERAS.

Un decreto del Ejecutivo del 1° de junio de 1907, prescribe que las mercancías extranjeras que el Presidente haya designado ó designe en lo futuro y que se introduzcan por las aduanas del Territorio de

Quintana Roo para consumo en aquella región de la República, quedarán exentas de derechos de importación y de puerto desde el 1° de julio de 1907 hasta el 1° de julio de 1908.

CONVENCIÓN POSTAL CON EL SALVADOR.

El "Boletín Postal" de la Dirección General de Correos de México, en su número correspondiente al mes de mayo de 1907, publica el texto de la convención celebrada entre el Gobierno de la República y el de El Salvador para establecer el cambio de bultos postales, sin valor declarado. Esta convención fué firmada en la ciudad de México el 12 de octubre de 1906, y promulgada por el Presidente Díaz el 17 de mayo de 1907.

IMPUESTO DEL TIMBRE SOBRE MONEDAS DE ORO.

Con arreglo á un decreto del Gobierno Mexicano expedido el 27 de abril de 1907, el impuesto interno del timbre de la República se ha de cobrar sobre todas las monedas de oro mexicanas, excepto las de la emisión actual, cuando sean presentadas en las oficinas de ensaye de la República para efectuar la liquidación, ó en las aduanas, para la exportación.

Por el artículo 5° de la ley del 25 de marzo de 1905 las monedas de oro y de plata de la presente emisión quedaron exentas de los efectos del impuesto del timbre. En la actualidad se ha revocado esta exención respecto de todas las monedas de oro mexicanas de las emisiones anteriores á la presente, por razón de que dichas monedas en lo sucesivo pueden considerarse únicamente como reliquias y no como moneda corriente.

Se prescinderá de los derechos de ensaye pagaderos sobre planchas ó barras de oro, al ser presentadas en las oficinas de ensaye ó aduanas con el fin de determinar el grado de pureza del metal, con arreglo al cual se impone el derecho del timbre, puesto que el grado de pureza aparece estampado en todas las monedas de oro acuñadas en las casas de moneda de la República, aceptándose esta garantía como suficiente para los fines de la fijación del impuesto del timbre, á menos que los interesados prefieran que las monedas que presenten para su liquidación sean tratadas como barras de oro ordinarias.

NICARAGUA.

MODIFICACIÓN ARANCELARIA.

La "Gaceta Oficial" de Nicaragua, de fecha 18 de junio de 1907, contiene el siguiente decreto del Presidente Zelaya, promulgado el 8 del mismo mes:

"Considerando: Que las condiciones peculiares en que se hallan las poblaciones del litoral atlántico hacen que el recargo de 100 por

ciento para las mercaderías á que se refiere el decreto de 7 de enero del presente año resulte gravoso para los habitantos de aquella región, tratándose, como se trata, de artículos de primera necesidad en su mayor parte, cuya conducción del interior se hace más difícil que la importación del exterior, decreta:

"Único. Desde la publicación del presente quedará sin efecto, para las aduanas del litoral atlántico, el decreto de 6 de enero este año."

PANAMÁ.

LEY RELATIVA Á LA MONEDA DE NÍQUEL.

Con fecha 25 de abril de 1907 el Presidente Amador Guerrero expidió el siguinete decreto:

"La Asamblea Nacional de Panamá, decreta:

"Artículo 1°. El peso y diámetro de la moneda de níquel del valor nominal de dos y medio centésimos de balboa serán los mismos de la moneda de níquel de los Estados Unidos de América, del valor nominal de cinco centavos de dollar; la aleación será setenta y cinco por ciento de cobre y veinticinco por ciento de níquel, y tendrá el siguiente sello:

"Por el anverso, en el centro, el escudo de armas de la República. En el contorno, en la parte superior, hacia el borde de la moneda, la frase: 'República de Panamá,' y en la inferior, en números arábigos, el año de la acuñación.

"Por el reverso, en el centro, en caracteres grandes, los números '2½;' en el contorno, en la parte superior, el valor de la moneda en letras: 'Dos y medio centésimos de balboa,' y en la parte inferior siete estrellitas.

"Artículo 2°. La moneda nominal de medio centésimo de balboa tendrá la misma aleación expresada en el artículo anterior, un diámetro de dieciseis milímetros y llevará el siguiente sello:

"Por el anverso el busto de Vasco Núñez de Balboa, con la frase 'República de Panamá' en el contorno; y debajo, en números arábigos, el año de la acuñación.

"Por el reverso, en el centro, el valor en letras: 'Medio centésimo de balboa.' "

COMUNICACIÓN SEMANAL POR VAPORES ENTRE BOCAS DEL TORO Y PUERTO LIMÓN.

La "Gaceta Oficial" de la República de Panamá, en su edición de febrero 17 de 1907, publica un contrato celebrado entre el Gobierno de Panamá y E. Uhlmann Sucesores, para establecer comunicación semanal por vapores entre Bocas del Toro y Puerto Limón. Con

arreglo á este contrato, la precitada razón social se compromete, por un período de un año, á contar desde febrero 14 de 1907, á establecer comunicación semanal por vapores entre Bocas del Toro y Puerto Limón, y á llevar la correspondencia del primero al segundo puerto.

TRATADO DE EXTRADICIÓN CON LA GRAN BRETAÑA.

La "Gaceta Oficial" de Panamá, en su número del 18 de abril de 1907, publicó el texto del tratado de extradición firmado por los representantes de la República y la Gran Bretaña el 25 de agosto de 1906, y promulgado por el Presidente AMADOR GUERRERO el 17 de abril de 1907.

SALVADOR.

LEY DE PRESUPUESTOS PARA 1907-8.

El "Diario Oficial" de El Salvador, de fecha 7 de junio de 1907, publica el texto de la ley de presupuestos de entradas y gastos durante el año económico de 1907–8, aprobada por la Asamblea Nacional el 15 de mayo de 1907.

Las rentas están calculadas en 8,734,150 pesos, distribuídas en la siguiente forma:

	Pesos.
Derechos de importación	4,765,900
Derechos de exportación	786,000
Renta de licores	2,350,000
Renta de papel sellado y timbres	250,000
Rentas é ingresos diversos	582,250
Total	8,734,150

El total del presupuesto de gastos es de 10,610,846 pesos, que distribuye del modo siguiente entre los distintos departamentos:

	Pesos.
Asamblea Nacional	41,830.00
Presidencia de la República	41,340.00
Gobernación	1,419,552.00
Fomento	774,848.00
Instrucción Pública	889,749.00
Relaciones Exteriores	157,210.00
Justicia	519,216.00
Beneficiencia	504,996.00
Hacienda	571,429.75
Crédito Público	3,165,005.37
Guerra y Marina	2,525,670.00
Total	10,610,846.12

Comparados los ingresos con los egresos, arrojan los presupuestos un déficit de $1,876,696.12.

URUGUAY.

COMERCIO EXTRANJERO EN EL PRIMER SEMESTRE DE 1906.

El Señor Don Luís Melián Lafinur, Ministro del Uruguay en Wáshington, le ha proporcionado al Boletín Mensual algunos datos estadísticos muy interesantes, tomados de un folleto que acaba de publicar la Dirección General de Aduanas de la República, relativo al comercio extranjero del país en el primer semestre de 1906. Según estos datos estadísticos, el valor total del comercio extranjero del Uruguay, durante el período de referencia, ascendió á $37,230,981; es decir, $17,052,581 valor de las importaciones, y $20,178,400 valor de las exportaciones. Las siguientes tablas muestran de una manera detallada las importaciones y exportaciones por países:

IMPORTACIONES.

De—	Primer semestre de 1906.	De—	Primer semestre de 1906.
Alemania	$2,749,239	Francia	$2,087,957
República Argentina	1,502,115	Holanda	133,178
Bélgica	907,490	Inglaterra	4,627,629
Brasil	858,774	Italia	1,451,262
Cuba	84,522	Paraguay	52,573
Chile	48,122	Portugal	18,164
España	868,617		
Estados Unidos	1,662,939	Total	17,052,581

EXPORTACIONES.

Á—	Primer semestre de 1906.	Á—	Primer semestre de 1906.
Alemania	$3,077,368	Islas Malvinas	$3,673
República Argentina	2,864,761	Islas Canarias	270
Bélgica	3,116,529	Italia	512,264
Brasil	1,847,837	Paraguay	4,762
Cuba	706,469	Portugal	50,142
Chile	309,034	Rusia	60,148
España	321,681	Provisiones para buques	136,009
Estados Unidos	841,419		
Francia	5,052,985	Total	20,178,400
Inglaterra	1,273,049		

Las importaciones y exportaciones á las cuales se ha hecho referencia, se clasifican y avalúan respectivamente como sigue:

IMPORTACIONES.

Animales vivos, $458,882; substancias alimenticias, $3,340,637; tabaco y sus productos, $300,525; bebidas, $944,183; materias textiles y sus productos, $4,450,784; aceites no comestibles, $331,098; substancias y productos químicos y farmacéuticos, $498,933; colores y tintes, $123,672; maderas, otras substancias leñosas y sus productos, $966,583; papel y sus artefactos, $317,444; cuero y

sus productos, $113,932; hierro y sus productos, $1,765,154; otros metales y sus artefactos, $235,177; minerales, tierras, cristalería y productos cerámicos, $1,333,749; artículos y artefactos diversos, $885,074; otros artículos, $986,754, ó sea un total de $17,052,581.

EXPORTACIONES.

Productos de la ganadería, $19,212,069; productos agrícolas, $376,144; productos de las minas, $368,078; productos de la caza y de la pesca, $69,822; otros productos y artículos, $16,278; provisiones de boca por el puerto de Montevideo, $136,009, ó sea un total de $20,178,400.

COMERCIO CON LA GRAN BRETAÑA EN 1906.

El Cónsul General uruguayo en la Gran Bretaña, en su informe correspondiente al año de 1906, dice que el valor del comercio entre el Uruguay y la Gran Bretaña en el año de referencia ascendió á £3,296,456, en comparación con £2,917,900 en 1905, es decir, un aumento de £378,556, ó sea un 13 por ciento, en este último período. El valor de las exportaciones inglesas al Uruguay ascendió á £2,721,893, y el de las importaciones que hizo Inglaterra ascendio á £574,563. El valor de los embarques de Inglaterra al Uruguay, en comparación con el de los que se hicieron en 1905, muestran un aumento de £623,361, ó sea un 29.7 por ciento, en tanto que hubo una disminución de £307,844 en el valor de las mercancías que se recibieron procedentes del Uruguay.

Las exportaciones de carnes en varias formas constituyen la mayor parte de los embarques que se hicieron á la Gran Bretaña, y en 1906 se avaluaron en £235,297, contra £184,795 en el año anterior. Las cifras relativas á la carne de res y de carnero congelada muestran un valor de £97,457 y £80,200, en los dos años, respectivamente. Estos datos muestran el puesto prominente que el Uruguay ocupa como competidor con la República Argentina, como abastecedor de carne fresca á los mercados europeos. Se embarcaron lenguas y carnes conservadas de varias clases por valor de £96,285 y £41,555, mostrando la primera cantidad un aumento de £20,688, y la segunda un aumento de £19,602, respecto del año anterior.

La lana de oveja constituye otro producto importante en la lista de exportación, habiéndose embarcado á la Gran Bretaña 6,052 pacas, avaluadas en £181,560, en tanto que el caucho ocupa un tercer puesto en la lista de productos de exportación, habiéndose embarcado 332 toneladas que representaban un valor de £120,578. Las exportaciones de lana experimentaron una merma en comparación con las que se hicieron en 1905, época en que se embarcaron 6,534 pacas, avaluadas en £196,020.

En 1906 el valor total de los cueros que se exportaron ascendió á £19,901, mostrándose así un notable aumento respecto del año

anterior, en que todos los cueros que se recibieron en la Gran Bretaña procedentes del Uruguay fueron avaluados sólo en £1,304.

Dícese que el valor de las importaciones de la harina uruguaya ascendió á £5,335, pero aún no ha sido posible conseguir datos relativos á las importaciones de trigo y de maíz durante todo el año, puesto que en muchos casos los embarques se efectúan por conducto de otros países, demorándose así la estadística exacta acerca de las importaciones.

En 1906 las exportaciones de mercancías de la Gran Bretaña al Uruguay muestran un notable aumento en toda clase de artículos, excepción hecha de los tejidos, cuyo valor representó una baja de £94,224. En 1906 el valor de dichas exportaciones se calculó en £889,164, en comparación con £983,388 en 1905. La disminución se limitó principalmente á los géneros de algodón.

El carbón de piedra y el coque de un valor de £236,583, ascendió a £439,773, en tanto que el valor de las exportaciones de maquinaria de £73,808 subió á £278,313, ó sea un aumento de £204,504, ó más de un 277 por ciento. La maquinaria agrícola constituye la mayor parte de esta clase de embarques.

RENTAS ADUANERAS, ABRIL DE 1907.

Según datos publicados recientemente por la Dirección General de Aduanas del Uruguay, el producto de las rentas recaudadas durante el mes de abril de 1907 fué de $1,246,316.75, en comparación con $1,286,636.76 de igual mes de 1906. Durante los diez primeros meses del año económico de 1906–7, las aduanas de la República percibieron una renta total de $11,004,440.45, comparada con la de $10,989,289.51 producida en el mismo período del anterior ejercicio.

VENEZUELA.

COMERCIO CON NUEVA YORK.

El Cónsul General de Venezuela en Nueva York anuncia que las mercancías exportadas del puerto de Nueva York con destino á los puertos venezolanos de La Guaira, Puerto Cabello, Maracaibo, Cumaná, Guanta, Carúpano, Pampatar, Caño Colorado, La Vela de Coro y Ciudad Bolívar, del mes de octubre de 1906 á mayo de 1907, inclusive, consistieron de 24,545,586 de kilogramos, avaluados en 11,945,832 de bolívares, contra 24,140,197 de kilogramos, avaluados en 10,448,803 de bolívares, durante el mismo período de 1905–6. En la siguiente tabla se muestran, por meses, las cantidades y el

valor de estas mercancías durante los períodos á los cuales se ha hecho referencia:

Meses.	De octubre de 1905 á mayo de 1906, inclusive.		De octubre de 1906 á mayo de 1907, inclusive.	
	Kilogramos.	Bolívares.	Kilogramos.	Bolívares.
Octubre	2,626,695	1,320,064	4,267,107	1,468,345
Noviembre	2,519,748	1,426,772	2,468,736	1,307,770
Diciembre	3,184,565	1,518,790	4,179,421	1,614,455
Enero	2,491,324	1,239,327	2,330,020	1,310,600
Febrero	2,552,293	998,610	2,921,774	1,845,597
Marzo	4,729,487	1,729,909	3,101,644	1,912,070
Abril	3,056,773	1,623,991	2,371,160	1,119,870
Mayo	2,979,312	1,591,340	2,905,724	1,367,125
Total	24,140,197	10,448,803	24,545,586	11,945,832

PRIMA POR EL CULTIVO DEL ARROZ.

Con fecha 15 de mayo de 1907 el Presidente Constitucional del Estado de Zulia decretó la cantidad de 4,000 bolívares asignada por la Asamblea Ligislativa como prima para estimular el cultivo del arroz en dicho estado. La expresada cantidad se ha de distribuir de la manera siguiente:

Prima.	Cantidad.	Prima.	Cantidad.
	Bolívares.		*Bolívares.*
1ª	2,000	4ª	400
2ª	800	5ª	800
3ª	500		

HON. WILLIAMS C. FOX, UNITED STATES MINISTER TO ECUADOR, FORMER DIRECTOR OF THE INTERNATIONAL BUREAU OF AMERICAN REPUBLICS.

BOLETIM MENSAL

DA

REPARTIÇÃO INTERNACIONAL DAS REPUBLICAS AMERICANAS,

União Internacional das Republicas Americanas.

VOL. XXV. AGOSTO DE 1907. No. 2.

Chamamos a attenção especial dos leitores do BOLETIM e daquelles que têem interesse pela Repartição Internacional das Republicas Americanas para a descripção, publicada neste numero, do novo edificio, assim como tambem para as photographias das plantas dos architectos. Para a construcção deste proprio, o Sr. ANDREW CARNEGIE offereceu $750,000. Si bem que as apparencias externas dêem uma ideia perfeita do aspecto que terá esta imponente estructura, quando completa, algumas mudanças serão ainda feitas, porem, não de importancia capital. Os planos do primeiro andar e do segundo, assim como a secção longitudinal, soffreram algumas modificações, depois dos originaes terem sido photographados, mas estas alterações foram feitas para dar-lhe uma feição mais digna e util. Estes desenhos foram adquiridos por meio de uma concorrencia entre os principaes architectos dos Estados Unidos e receberam o voto unanime de uma commissão julgadora, composta de trez juizes escolhidos de entre os mais distinctos architectos peritos no paiz, os quaes agiram de accordo com o presidente do conselho director e o director da Repartição. Estão muito chegados ás condições descriptas no programma official da architectura, publicado na edição de abril. Os architectos trabalham agora, assiduamente, no preparo dos pormenores sobre as quaes os empreiteiros farão as suas offertas para a construcção. Esperamos que o terreno esteja preparado em septembro e que a pedra inaugural seja assentada em fins de outubro ou principios de novembro. O interesse animador pela Secretaria e seus trabalhos, por todo o mundo, mostra-se evidente no numero de pedidos que jornaes e magazines têem enviado a esta repartição, não so dos Estados Unidos e da America Latina, como da Europa e até do Japão, com o fim de obterem photographias das plantas dos architectos para reproduzil-as em suas paginas.

O PROGRESSO DO COMMERCIO PAN-AMERICANO.

Não poderia haver prova mais evidente do desejo, que se desenvolve por toda a parte, de informações acerca da America Latina que os pedidos, vindos de todos os lugares do mundo, solicitando remessa de numeros do BOLETIM da edição de julho de 1907, que contem uma revista resumida do commercio das vinte republicas ao sul dos Estados Unidos. Ainda que nos tivessemos provido com alguns milheiros de copias com o fim de satisfazer a esta procura do BOLETIM, a publicação estará em breve esgotada. Será, portanto, suggestivo que aquelles que estiverem anciosos para conseguir esta revista, peçam-na logo a esta Repartição. Publicamol-a completa em inglez e espanhol e, ligeiramente resumida, em portuguez e francez. Como, examinando-a, poderia apparecer á primeira vista contradicções consideraveis nas cifras registradas, quando comparadas com outras que vêm publicadas neste numero, deve ser lembrado que a revista de julho representa o anno kalendario de 1906, emquanto que a publicação resumida neste mez se refere ao commercio entre as Republicas Latino-Americanas e os Estados Unidos durante o anno de fisco, desde 1º de julho de 1906 até 30 de julho de 1907. Os dados que sahem nesta edição são baseados em um excellente boletim, publicado em 9 de agosto, pelo Sr. O. P. AUSTIN, chefe da Repartição de Estatistica do Departamento de Commercio e Trabalho dos Estados Unidos. As sommas que elle relata convenceriam ao maior sceptico de que os Estados Unidos têem um campo extraordinario para a expansão de seu commercio externo nas Republicas Latino-Americanas. Provam ao mesmo tempo que todos os paizes da America Central e do Sul têem grandes opportunidades para o desenvolvimento de seu commercio externo nos Estados Unidos. Nenhum grupo de paizes em qualquer outra parte do mundo gosa actualmente de maior prosperidade e progresso mais real que aquelles do hemispherio occidental, situação que justifica sem contestação a importancia do trabalho que está sendo feito por esta Repartição.

A PROXIMA VISITA DO SECRETARIO ROOT AO MEXICO.

A visita ao Mexico nos fins de septembro, pelo Exmo. Sr. ELIHU ROOT, secretario de estado dos Estados Unidos e Presidente do conselho director da Repartição, attendendo assim ao convite do presidente DIAZ, será um complemento importante e logico de sua viagem á America do Sul em 1906. Os preparativos que estão sendo feitos pelo governo do Mexico e pelo povo para tornar notavel a sua estadia entre elles, mostra que ha grande interesse neste acontecimento, aliaz de significação internacional. Será outro passo na politica ampla iniciada pela presente administração do governo dos Estados Unidos para estreitar os laços de sympathia com os governos e povos

das outras nações americanas. Não obstante estar o Mexico, geographicamente, mais perto dos Estados Unidos que qualquer outra nação latina-americana, o povo, em geral, dos Estados Unidos ainda não voltou as suas vistas directamente para o desenvolvimento extraordinario daquella Republica, assim como para o seu progresso geral ao lado do desenvolvimento politico, economico, educador e social. Da mesma maneira como a viagem do Secretario Root á America do Sul attrahiu as vistas da America do Norte para aquella parte do mundo e presenciou as suas possibilidades importantissimas, assim tambem haverá agora um interesse geral correspondente para o Mexico e America Central.

PROGRAMMA ELABORADO DE CONSTRUCÇÃO DE ESTRADAS DE FERRO NA AMERICA LATINA.

A julgar-se pelas indicações baseadas nos relatorios que a Repartição recebe constantemente de todas as partes da America Latina, haverá um periodo extraordinario de construcção de vias ferreas dentro de muito poucos annos. Raro é aquelle paiz, que do Mexico á Republica Argentina, não esteja tratando de estender as suas linhas ferreas em grandes proporções. É muito provavel que o curso dos trilhos seja dobrado durante os dez annos vindouros. Serão ligados ou construidos tantos ramos na rêde da projectada Estrada de Ferro intercontinental ou pan-americana, que o ideal desta linha tornar-se-á uma realidade antes do tempo esperado pelos seus promotores. Ainda que se pareça difficil traçar um projecto, com perfeição, pelo qual se possa construir uma linha directa e na qual os trens possam correr francamente de New York ao Rio de Janeiro, Buenos Aires e Santiago, os planos presentes e em perspectiva encurtarão as distancias de tal forma, que não estará muito longe o tempo em que todas ellas estarão reunidas. Não é prophecia erronea o dizer que defensores distinctissimos da estrada intercontinental, como o ex-senador Henry G. Davis e Andrew Carnegie vivam ainda tempo sufficiente para vel-a completa. Talvez o programma mais ambicioso de construcção no futuro pertença ao Brazil, com a Bolivia em segundo lugar. Uma nota de interesse é que este novo emprehendimento será feito em grande escala com capitaes levantados nos Estados Unidos e Canada. Até então quazi que todo o dinheiro empregado nas estradas de ferro na America do Sul vinha de Inglaterra e Europa.

RESULTADOS E CONDIÇÕES DO TRABALHO PRATICO DA REPARTIÇÃO.

A importancia pratica do trabalho que está sendo feito diariamente pela Repartição pode ser apreciado fazendo-se um exame de sua volumosa correspondencia. O numero de fabricantes, exportadores, nego-

ciantes, assim como tambem escriptores, publicistas e viajantes, que se dirigem a esta repartição á busca de informações, tem augmentado em proporções tão rapidas que o pessoal actual da Repartição, sobrecarregado, como está, com trabalho extraordinario, ve-se muito embaraçado para satisfazer a todos os pedidos de pormenores uteis e de character especial. Estas questões não se limitam absolutamente só aos Estados Unidos, têem chegado de todos os paizes latino-americanos e tambem da Europa, Canada, Japão, Australia e até da India e China. Como a Repartição é uma instituição particularmente internacional e está se esforçando para auxiliar a prosperidade de cada republica latino-americana, assim como a dos Estados Unidos, ella faz todo o possivel para satisfazer a todas as questões com imparcialidade, equidade e exactidão. Deverá ser lembrado, entretanto, que a sua esphera de acção é limitada e que não é, em sentido algum, uma instituição particular que possa assumir responsabilidades individuaes sobre pessoas, companhias, planos ou projectos. Regozijamo-nos em dar informações e adiantar os passos desde que estes sejam rasoaveis e compativeis com as responsabilidades da Repartição para com os governos que a mantêm, porem, não poderiamos ir alem das nossas forças a não ser que fossemos autorizados pelo conselho director, que é composto de representantes diplomaticos das republicas americanas Se insistimos neste ponto, é porque parece difficil a alguns correspondentes da Repartição comprehender porque não podemos dar-lhes cooperação ou auxilios especiaes em seus planos.

O PRECEDENTE DIRECTOR FOX, ACTUAL MINISTRO DOS ESTADOS UNIDOS JUNTO AO EQUADOR.

A Repartição Internacional se regosija em ver o excellente trabalho que o seu precedente Director, o Exmo. Senhor WILLIAM C. FOX, actual Ministro dos Estados Unidos junto ao Equador, está fazendo neste paiz. Acaba de ser justamente designado arbitro em favor dos Estados Unidos para sanar as duvidas que se têm levantado entre o Governo do Equador e a Companhia de Estrada de Ferro de Quito e Guayaquil. A proposito, deveremos dizer que esta via ferrea acaba de galgar Latacunga, importante cidade no principal planalto do Equador, e, muito brevemente, estará concluida ao chegar a Quito.

EDUCADORES NORTE-AMERICANOS NA AMERICA DO SUL.

A julgar-se pelas noticias publicadas pelos principaes jornaes latino-americanos, estamos informados do progresso que têm sido feito, no curso de suas viagens, pelas differentes partes da America do Sul, os professores L. S. ROWE, da Universidade de Pennsylvania, WILLIAM R.

SHEPHERD, da Universidade de Columbia, e TODD, astronomo do Collegio Amherst. Todos elles têm sido bem recebidos em todos lugares onde têm viajado e têm produzido muito boas impressões. O Senhor LEE MCCLUNG, o popular thesoureiro da Universidade de Yale, chegou recentemente á Argentina e Chile e muitos outros publicistas e viajantes americanos distinctos pretendem conhecer melhor a America Latina, afim de se habilitarem para depois fazer conferencias acerca desta parte do mundo, em suas respectivas instituições.

OPINIÃO DE UM ENGENHEIRO AMERICANO DE NOMEADA.

Ha pouco a Repartição foi visitada pelo Senhor E. L. CORTHELL, engenheiro distincto que se acha envolvido na construcção de portos importantes e outras obras hydraulicas na America do Sul. Acha-se enthusiasmado com o futuro daquella parte do mundo e prophetisa-lhe um progresso que rivalizará com o que tem sido feito na America do Norte, Europa e Asia.

ESTADO DO COMMERCIO E DAS FINANÇAS DA REPUBLICA ARGENTINA.

A estatistica trimensal regular de commercio argentino mostra que durante o primeiro trimestre do anno de 1907 houve um augmento notado na importação de $3,281,509 sobre o primeiro trimestre de 1906 e que a exportação cresceu em $10,803,113. Se esta proporção se conservar durante todo o anno, resultará um novo convenio no balanço commercial da Republica, mais de accordo com a prosperidade economica do que a que se nota pelas estatisticas de 1906, quando a importação diminuio e a exportação augmentou.

O orçamento argentino, recentemente approvado pelo Congresso, e comprehendendo as receitas e despezas para 1908, tem em fim cortar os gastos excessivos do Governo, politica que tem regularizado a administração financeira do paiz nos poucos annos passados. É digno de menção, tambem, que o serviço da divida publica tem á sua disposição o maior costeamento da applicação do ouro e as obras publicas formam a principal somma nas despezas nacionaes correntes.

O COMMERCIO DE TRIGO E EMISSÃO DE WARRANTS SOBRE O CAFÉ NO BRASIL.

As concessões feitas ás tarifas de importação do trigo dos Estados Unidos pelo Governo brasileiro contribuem para augmentar o interesse aos dados comparativas, publicados nesta edição, em relação ao trigo estrangeiro naquelle paiz. Está provado que o producto argentino leva grandes vantagens, pois, cresceu de 37,235 toneladas

em 1902 para 122,282 toneladas em 1906, ao passo que dos Estados Unidos cahiu de 48,840 toneladas para 24,526 toneladas em identico periodo.

A emissão de warrants sobre os cafés depositados nos armazens geraes em Santos marca um desenvolvimento no commercio deste genero e é um resultado da operação da valorização do café. A Associação Commercial do Rio de Janeiro e uma companhia com grande fundo de capitaes, com séde em São Paulo, trabalham com grande enthusiasmo nesta empreza, que acredita-se será muito util àquelles centros commerciaes.

VERBAS ORÇADAS PARA AS OBRAS PUBLICAS NO CHILE.

Foi determinada pelo Governo Chileno em seu orçamento para 1908 a importancia de $30,000,000, approximadamente, para ser applicada nas obras publicas por toda Republica. Planeja-se a construcção de uma grande estrada de ferro, fazendo parte dos projectos, tambem, a reconstrucção de Valparaiso, uma grande rede de esgotos para Santiago, melhoramento dos portos e diversos trabalhos hydraulicos em differentes cidades, construcção de uma ponte, edificação de predios para escolas e um novo palacio para o governo. O augmento das receitas aduaneiras relatadas no anno corrente e o estado satisfactorio dos bancos publicos são garantias efficazes para os fundos requeridos para estas construcções.

COMPANHIAS E ASSOCIAÇÕES ESTRANGEIRAS NA COLOMBIA.

As leis applicadas ás companhias e associações estrangeiras que fazem transacções commerciaes na Republica da Colombia requerem que os titulos e regulamentos das mesmas sejam archivados nos officios do tabellião da municipalidade onde esteja estabelecida a empresa, devendo isto ser feito dentro de seis mezes a contar de sua inauguração. Este prazo é prolongado para um anno àquellas companhias que ja tenham feito transacções commerciaes no paiz. Exige-se, alem disso, que a empresa mantenha em sua séde um agente com a funcção especial de representar a corporação perante as autoridades nacionaes. É proposito do Presidente Reyes attrahir empresas de grandes fundos de capitaes para aquella Republica e garante e promete protecção e auxilio da parte do governo na medida de suas forças.

PROPAGANDA DE IMMIGRAÇÃO EM COSTA RICA.

Nota-se o proposito do governo de Costa Rica em se esforçar para augmentar o povoamento do solo na recente lei promulgada, pela qual fica o presidente autorizado a applicar, annualmente, durante o

periodo de oito annos, a verba de $20,000 para animar a immigração. Offerecem-se, gratuitamente, passagens para aquelle paiz a todo o agricultor branco fallando de preferencia o espanhol, alem de sua lingua natal. A fertilidade do solo e sua adaptação para o cultivo de diversos productos de valor nos differentes mercados do mundo, vêm amplamente descriptas no relatorio annual do ministro das finanças e commercio, cujas transcripções ja foram publicadas neste Boletim.

OS NEGOCIOS DE PROPRIEDADES E DE CRIAÇÃO EM CUBA.

As propriedades em Cuba foram avaliadas em $342,758,133, dando uma renda annual de $32,469,043. De 1º de agosto em diante entrará em vigor em Cuba uma importante lei com o fim de desenvolver a criação, de raça, por toda a ilha. Vaccas e carneiras de raça de 6 annos de idade terão entrada franca no paiz. O gado alli tem sido provido durante os annos recentes por grandes carregamentos recebidos de Venezuela, Mexico e de outros fornecedores visinhos e está destinado a se desenvolver com a organização de fazendas de criação e a competente industria.

IMMIGRAÇÃO E COLONIZAÇÃO NO EQUADOR.

Constituem uma prova de progresso do Equador as concessões feitas ás companhias de colonização dando-lhes o governo privilegios especiaes. Foi firmado um contracto recentemente para a installação de 5,000 familias brancas, sendo preferidas hollandezas ou allemãs, dentro de dez annos, em terras do governo, cobrindo a area de 500,000 hectares. A concessão estabelece a obrigação de se construirem egrejas, escolas, lojas e residencias; alem disto requer a construcção de uma estrada de ferro e depositar um fundo de reserva com o governo do Equador para o cumprimento do contracto.

POSSE DE ESTRADAS DE FERRO PELO GOVERNO NO MEXICO.

Nenhuma medida legislativa adoptada no Mexico durante os annos recentes tem tido importancia tão capital como a que se refere ao decreto de 6 de julho de 1907, no qual o Presidente Díaz approvou a formação de uma companhia, com restricções limitadas, entre o governo mexicano e sete ou mais accionistas das Companhias de Estrada de Ferro Nacional e Central. Nas transacções da companhia consolidada ficou garantido, incondicionalmente, pelo governo mexicano, o pagamento de diversos titulos. Este tomará parte tambem com os outros accionistas em todos dividendos provenientes dos trabalhos das linhas.

Em vista do interesse enorme que ha pelas condições commerciaes da Republica de São Domingos, as leis, regulamentando os direitos no porto deste paiz, merecem attenção especial, motivo que levou-nos a fazer um extracto das referidas leis e publical-o nesta edicção. Em Nicaragua, verificou-se, ser muito pesada a imposição da sobretaxa sobre classes determinadas de mercadorias e, portanto, fizeram uma reducção immediata. A circulação de novas moedas de nickel no Panama facilitarão immensamente as transacções commerciaes naquella republica e o estabelecimento de communicações semanaes, entre Bocas del Toro e Puerto Limon, ampliarão os seus recursos commerciaes externos. A lei orçamentaria de São Salvador, publicada agora, para 1907-8, capacita o governo com os elementos necessarios para fazer face ás suas despesas dentro daquelle periodo e a ratificação de numerosas convenções internacionaes, referidas neste BOLETIM, attestam a boa vontade da Republica em se manter em contacto com as outras nações para os seus beneficios mutuos. São publicados dados de valor, referentes ao commercio externo do Uruguay durante o primeiro semestre de 1906 (as ultimas estatisticas officiaes) e os das transacções commerciaes da Venezuela com o porto de New York, extrahidos do relatorio de seu representante consular, abrangem até os fins de maio de 1907.

ARTIGOS PUBLICADOS EM MAGAZINES CONCERNENTES À AMERICA LATINA.

Constitue uma nota digna de menção e muito significativa o facto de diversas revistas, tanto populares como scientificas, occuparem as suas columnas com assumptos de interesse e em relação á America Latina. Entre as edições de agosto das magazines dos Estados Unidos, que trazem taes trabalhos deverão ser citadas as seguintes: "The Review of Reviews" (Revista das Revistas), *Um trabalho sobre e construcção de estrada de ferro da America do Sul*, por LEWIS R. FREEMAN; a "National Geographic Magazine" (Magazine Geographica Nacional) publica o seu artigo de fundo com o titulo, *Mexico, o thesouro do mundo*, por NELSON H. DARTON; o "Outlook" descreve, *A vida academica e collegial no Brazil e Republica Argentina*, por SYLVESTER BAXTER; no "World's Work" (Trabalho do Mundo) EUGENE P. LYLE publica um artigo intitulado, *O Mexico em maré enchente*, e alem disso edições especiaes de supplementos de jornaes se occupam em discutir as condições praticas da vida e progresso da America Latina.

O NOVO EDIFICIO DA REPARTIÇÃO INTERNACIONAL DAS REPUBLICAS AMERICANAS.

Reproduziremos neste numero, pela primeira vez, as plantas dos architectos referentes ao novo edificio da Repartição Internacional das Republicas Americanas. Consistem de cinco illustrações, a saber: Uma vista da fachada e lados, uma outra dos fundos e das partes lateraes, sua secção longitudinal, o plano do primeiro andar, e, finalmente, uma exposição identica do segundo. Estas plantas e projectos terão de soffrer algumas alterações importantes, porem os clichés, que publicamos, darão uma boa idea da disposição da nova construcção. Dos cento e trinta architectos que se alistaram na concorrencia, mais de 70 apresentaram os seus projectos, e, conforme o voto unanime da commissão julgadora, composta do Exmo. Senhor ELIHU ROOT, Secretario de Estado, do Senhor JOHN BARRETT, Director da Repartição, e de trez dos mais distinctos architectos do paiz, a saber, os Senhores CHARLES F. MCKIM, HENRY HORNBOSTEL e AUSTIN W. LORD, de New York, escolhidos por votação entre os competidores, foram classificados em primeiro lugar os Senhors ALBERT KELSEY e PAUL P. CRET, socios architectos, de Philadelphia.

Ainda que muitos dos outros projectos fossem feitos com mais esmero e mesmo que alguns dentre elles possuissem qualidades iguaes no ponto de vista architectural, acarretariam maiores despezas. Os projectos escolhidos foram classificados em primeiro lugar, sem a menor difficuldade, de entre aquelles que podiam, realmente, serem adoptados nos limites da verba á disposição da Repartição. Dever-se-á lembrar que o Senhor ANDREW CARNEGIE, por intermedio do Secretario de Estado dos Estados Unidos, o Exmo. Senhor ELIHU ROOT, fez o donativo generoso de $750,000 para a construcção do edificio. Alem desta quantia foram reservados pelos Estados Unidos e as outras Republicas Americanas $250,000 para serem empregados no mesmo fim. A importancia contribuida pelos Governos foi applicada na compra de um bonito terreno e nas obras preliminares. Da importancia total dada pelo Senhor CARNEGIE, $600,000 serão empregados na construcção do edificio, propiamente dito, e $150,000 serão reservados para a mobilia e decorações.

Os architectos estão trabalhando com afinco no preparo dos detalhes que servirão de bases aos empreiteiros, e espera-se que um contracto para a construcção será firmado em 1° de Outubro de 1907. A collocação da pedra inaugural terá lugar em principios de Novembro e será um acontecimento de grande importancia internacional. Se tudo correr bem, o edificio ficará completo em um anno e meio. Portanto, não estará longe a data em que toda a Republica do Hemispherio

Occidental realizará o facto de ter um proprio nos Estados Unidos. Visto a Repartição Internacional ser mantida por todas as vinte e uma nações americanas, este novo Templo de Commercio e Cordialidade será, restrictamente, a séde de uma instituição internacional, pertencendo tanto aos menores como aos maiores Governos e povos americanos.

Será situado em um dos pontos mais salientes da cidade de Washington. Costumam chamar a quadra que vae occupar de Parque Van Ness e estava destinada a ser o local de Universidade de George Washington, porem, esta mudou os seus planos e vendeu a propriedada á Repartição Internacional. O terreno cobre uma area de cerca de 20.230 metros quadrados, e é cercado pelas ruas Dezesete a leste e B ao sul, a Avenida Virginia ao sudoeste, a Dezoito ao oeste e C ao norte. O edificio dará a frente ao leste ou á grande extensão dos terrenos do Governo em frente á Casa Branca, que é a residencia do Presidente dos Estados Unidos. No lado do sul dará a vista para o Parque Potomac e o rio do mesmo nome, emquanto que do lado do sudoeste volará para o "Speedway" e, por sobre o Potomac, para a monte Virginia. O terreno amplo em redor do edificio adaptar-se-á a um bom jardim e dará uma vista de muito effeito.

As dimensões da estructura serão, mais ou menos, 160 pór 160 pés, ou cerca de 50 por 50 metros. O aspecto exterior apresentar-se-á especial com a tentativa que se fez em dar-lhe, de uma maneira artistica moderna, traços tirados das architecturas espanhola e portugueza, que embellezam tantas cidades bonitas da America Latina. Dará uma idea do estylo de construcção que caracteriza os principaes edificios das Republicas Latino Americanas e, alem disso, possue o cunho classico e monumental para harmonizar com o plano geral do embellezamento da cidade de Washington, plano esse feito, alguns annos passados, por DANIEL BURNHAM e CHARLES F. MCKIM, dois dos mais celebres architectos dos Estados Unidos. O esplendido monumento de Washington está situado em um lugar muito pouco distante do nosso edificio. Ao norte está justamente o novo predio da Sociedade das Irmãs da Revolução Americana. A duas quadras, apenas, ao norte, encontra-se o predio magestoso da Galleria Artistica de Corcoran. O palacio do Estado, Guerra e Marinha, a Casa Branca e o Thesouro não estão muito distantes. No lado opposto dos terrenos do palacio presidencial será construido, provavelmente, dentro de poucos annos, o novo edificio do Departamento de Estado. Ve-se, portanto, que seria difficil se escolher um local mais appropriado.

Irá ter ao edificio um passeio largo e esplendido e trez portas monumentaes de typo espanhol darão entrada ao mesmo.

Em cada lado da entrada principal ver-se-ão duas figuras de heroinas, em marmore, symbolizando a America do Sul e do Norte. Escadia

espaçosa e de marmore irá ter ás portas de bronze, que abrir-se-ão para um vestibulo bem decorado e sumptuoso, com, mais ou menos, 30 pés de largura. Este, por sua vez, communicará com uma dependencia que será um dos principaes caracteristicos latino-americanos do edificio, isto é, um salão enorme, com uns 2,500 pés quadrados, tendo ao centro um chafariz e será decorado com ornamentos caracterizando a flora dos paizes latino-americanos. Este salão será coberto de vidro, formando um telhado movel, de forma que se possa conservar aberto durante o verão e fechado no inverno. Em cada lado desta dependencia, separados porem, estão duas escadas que irão ter ao andar superior. Dois corredores compridos se estendem ao lado do primeiro andar, o da esquerda communica com os escriptorios do pessoal da Repartição e o da direita conterá os armarios com os livros da Bibliotheca de Colombo, assim como tambem os escriptorios do bibliothecario e seus auxiliares. Deste corredor estender-se-á um foyer com cerca de 22 pés de largura, que vae communicar a uma grande sala de leitura com cerca de 100 pés de extensão por 60 de largura. Esta dependencia será parcialmente subdividida em compartimentos para exposições, livros de referencia, periodicos, mappas, etc. Tanto a direita como a esquerda, estarão os toucadores para cavalheiros e senhoras que serão usados em occasiões em que recepções ou funcções geraes se relizarem no salão de gala no segundo andar.

Não obstante se construir elevadores, o principal ingresso para o segundo andar será por meio das escadas acima descriptas. Estas terminarão em um foyer espaçoso que, de um lado fará frente para o salão e do outro lado communicará com uma bella sala de assembléa, que poderá ser designada por "Salão dos Embaixadores Americanos." Occupará um espaço de 101 pés de comprido por 65 de largo e dar-se-lhe-á um estylo deslumbrante e bello, no proposito de adaptal-o para as conferencias internacionaes, visitantes illustres em Washington, funcções diplomaticas, bailes e outras reuniões da mesma categoria. A esquerda do "Salão dos Embaixadores Americanos" estará a sala para o Conselho Director da Repartição, onde os representantes diplomaticos das Republicas Americanas, sob a presidencia do Secretario de Estado dos Estados Unidos, reunir-se-ão regularmente para tratar dos trabalhos a cargo da Repartição. A direita estarão trez quartos espaçosos para as commissões. Tantos as salas da meza administrativa como as das commissões communicarão de tal forma com o salão principal, que todos se poderão fundir em uma so dependencia, e tornar-se-a amais estensa e elegante sala de assemblea neste genero, não so na Capital como nos Estados Unidos. Os fundos do salão darão para um terraço e jardim, onde se pode ir por meio das grandes escadas. Pretende-se ornamentar convenientemente o "Salão dos Embaixadores Americanos" por artistas americanos de maneira a tornal-o typico da historia e pro-

gresso pan-americanos. As pinturas nas paredes serão em referencia á historia do hemispherio occidental, emquanto que estatuas e retratos de estadistas eminentes pan-americanos completarão o seu encanto.

O espaço que resta no segundo andar será dividido em salas espaçosas, que ficarão ao sul, para o Director da Repartição, com o seu secretario particular e estenographos, e para o secretario, com os seus amanuenses. Ao norte será reservado o segundo compartimento para a armação da Bibliotheca e um outro aposento largo, adaptado para as commissões. Haverá tambem um buffet completo que estará a disposição do Salão de Assemblea ou dos Salões de Commissões para os banquetes.

No porão haverá dependencias vastas para machinas, carvão, archivo de documentos e livros, almoxarifado e aposentos para os bedeis e outros empregados. As salas para o pessoal da Repartição, tanto do primeiro como do segundo andar, serão providas com abobadas e outras medidas de utilidade, julgadas de vantagens em auxiliar e facilitar o serviço, que visa o progresso do commercio e cordialidade pan-americanas. O predio será, em todo o sentido, rigorosamente construido a prova de fogo. Empregar-se-á madeira somente em mobilia e decorações, que serão provavelmente talhadas em diversas madeiras rarissimas e de valor extraordinario, productos das differentes republicas sul-americanas. Os enfeites externos serão todos esculpidos em marmore. A fachada principal do edificio será construida de concreto e acabado com estuque latino-americano e a cornija e os enfeites internos com terra cota de diversas côres. O ponto onde os visitantes receberão um impressão mais palpitante do interior de edificio será justamente o salão, que forma o coração do predio, cercado por escadaria deslumbrante, arcadas e corredores nos quaes se abrem alem de todos os escriptorios, a Bibliotheca de Colombo e o Salão de Assembléa. No canto entre o vestibulo e o salão de entrada ha uma vista magnifica, de onde se poderá ver atravez da bibliotheca e do terraço vasto, o jardim atraz, emquanto que em cima está o foyer elegante e o Salão dos Embaixadores, pomposo, e em cima ve-se o tecto inclinado de sua abobada.

Os architectos se compenetraram tão bem dos fins do novo edificio da Repartição Internacional das Republicas Americanas que, este, abrindo uma excepção aos demais edificios publicos em geral, será dedicado a exprimir e perpetuar o "entente cordiale" entre todas as nações americanas. Vae ser uma instituição propriamente de negocio, porem, adaptar-se-á a diversões de character proprio e nobre por sociedades distinctas. Em occasiões de festas o edificio todo, communicando com uma sala de entrada espaçosa e de effeito agradavel, tornar-se-á um logar apropriadissimo para as reuniões de embaixadores e delegados estrangeiros ás conferencias internacionaes. O estylo peculiar de architectura, salas de um effeito magnifico, excellente livraria

sobre America, com seus elementos faceis para fornecer toda e qualquer especie de informação concernente a assumptos commerciaes, economicos, intellectuaes, historicos, scientificos e sociaes das nações americanas, tudo isto contribuirá para attrahir diariamente um grande numero de visitantes a Washington.

REPUBLICA ARGENTINA.

O COMMERCIO ESTRANGEIRO DURANTE O PRIMEIRO TRIMESTRE DE 1907.

Dados fornecidos pela Repartição Nacional de Estatistica, trazendo-nos ao conhecimento do commercio estrangeiro da Republica Argentina, durante o primeiro trimestre de 1907, fixam os valores de importação em $96,956,217. Comparando estes numeros com os do periodo correspondente de 1906, nota-se um accrescimo na importação de $3,281,509 e na exportação, de $10,803,113.

Os valores adquiridos e fornecidos pelos principaes paizes participantes neste commercio foram os seguintes:

Paizes.	Importação.	Exportação.
Africa	$1,060	$603,253
Allemanha	8,205,565	13,638,950
Belgica	2,719,671	8,381,247
Bolivia	27,742	200,425
Brazil	1,433,899	2,587,785
Cuba	101,049	38,623
Chile	73,108	455,731
Espanha	1,412,883	376,516
Estados Unidos	7,976,602	3,919,765
França	5,193,532	16,336,193
Italia	3,704,609	1,102,347
Hollanda	399,730	926,135
Paraguay	210,777	43,746
Reino Unido	19,497,070	10,422,425
Uruguay	624,075	1,416,796
Diversos	3,059,513	467,858
Ordens		36,128,422

Comparando esses valores commerciaes com aquelles relatados para o primeiro trimestre de 1906, notam-se os seguintes resultados em relação ao destino e procedencia: a importação da Allemanha foi augmentada em $442,866 e a exportação para alli em $82,137; a importação da Belgica augmentou $450,172 e a exportação, $819,321; a importação brazileira cresceu em $503,327 e a exportação em $112,777; a importação da Espanha avançou para mais em $68,364, porem, a exportação para alli diminuiu em $440,986; nota-se um accrescimo de $484,702 na importação dos Estados Unidos, porem os carregamentos para aquella paiz diminuiram em $206,727; a importação da França abaixou em $390,527, ao passo que a exportação para alli cresceu em $3,732,337; os productos italianos importados desceram em $633,874 e os exportados em $1,035,916; a importação do

Reino Unido augmentou em $2,810,726, emquanto que a exportação para alli diminuiu em $901,188, e em frente ao termo geral "ordens" nota-se um augmento na exportação, avultando a $10,803,118.

A verba de importação, mostrando o maior augmento, está sob o titulo de "machinas de tracção," $9,709,755, que representam as importações de 1907, comparados com $6,185,004 no primeiro trimestre de 1906. Estão incluidos nesta classe 107 locomotivas contra 41 em 1906; bondes, 91 comparados com 20; wagons, 1,104 contra 489, entretanto, os automoveveis avultam apenas em 123, sendo 51 menos que o numero registado para os trez primeiros mezes de 1906.

As outras importações, com a respectivo subida ou descida no valor, foram as seguintes:

Artigos.	1907.	
Vinhos, bebidas espiritosas, licores	$2,084,362	− $442,368
Artigos de seda	726,398	+ 83,029
Artigos de lã	2,905,187	− 339,437
Artigas de algodão	5,961,324	− 668,443
Outros tecidos	1,203,495	+ 90,298
Madeiras e obras manufacturadas	1,018,275	+ 9,470
Papel e obras manufacturadas	1,039,612	+ 70,629
Ferro e aço, e obras manufacturadas	5,723,684	− 85,583
Outros metaes e obras manufacturadas	1,330,191	− 337,542
Instrumentos e utencilios agricolas	3,013,721	−1,675,757
Machinas electricas	673,761	+ 251,719

O AUGMENTO DA POPULAÇÃO EM 1906.

Conforme as estatisticas publicadas pelo *Boletín Demográfico Argentino*, publicação do ministerio do interior da Republica Argentina, o augmento da população durante 1906, quer em referencia á immigração, quer quanto ao excesso dos nascimentos sobre os fallecimentos, foi o seguinte:

	Habitantes.
Este	235,283
Centro	25,993
Oeste	17,525
Norte	9,439
Territorios	8,334
Total	296,574

Deste total 202,164 são attribuidos á immigração e 94,410 a nascimentos naturaes.

A população da Republica em 31 de dezembro 1905 era de 5,678,197, que, com o accrescimo registrado para o anno 1906, sobe a 5,974,771 almas, ou, em numero redondos, 6,000,000 em 31 de dezembro de 1906.

BRAZIL.

O COMMERCIO ESTRANGEIRO NO PRIMEIRO TRIMESTRE DE 1907.

O commercio estrangeiro do Brazil durante o primeiro trimestre de 1907 mostra que a importação foi avaliada em $45,000,000, comparada com $30,000,000 em identico periodo do anno precedente e, que a exportação foi calculada em $75,000,000, contra $60,000,000 relatados no primeiro trimestre de 1906.

CHILE.

IMPORTAÇÃO DO PERU NO PRIMEIRO TRIMESTRE DE 1907.

Durante o primeiro trimestre de 1907 foram importados pelo Chile provenientes de Callão, Peru, 6,377,067 kilos de artigos, avaliados em $135,149.50. Os productos principaes foram, seguindo-se a ordem de seus valores: Oleo mineral cru, $47,542; café, $26,775, e assucar, $26,095.50.

COLOMBIA.

RATIFICAÇÃO DO TRATADO DE LIMITES COM O BRAZIL.

O *Diario Oficial* da Colombia, em sua edição de 25 de março, publicou a lei da Assemblea Nacional, passada em 17 de maio de 1907 e sanccionada pelo Presidente REYES, no mesmo dia, ratificando um tratado assignado com o Brazil em 29 de abril de 1907. De accordo com os termos deste tratado os limites de uma parte da fronteira entre a Colombia e o Brazil estão definitivamente estabelecidos, assim como fica estipulada a navegação livre do Amazonas e dos outros rios brazilio-colombianos.

COSTA RICA.

DIREITOS DE IMPORTAÇÃO SOBRE O ROLÃO DE TRIGO.

Um decreto do Governo de Costa Rica, datado de 23 de abril, fixa o direito de importação sobre o rolão de trigo ("acemite") á razão de 1½ centavos por kilo em, vez de 6 centavos, taxa applicavel á farinha de trigo, segundo o No. 84 das tarifas de alfandega da Republica.

CUBA.

RENDAS ADUANEIRAS DE HAVANA NO PRIMEIRO SEMESTRE DE 1906.

A alfandega de Havana, em Cuba, arrecadou, durante o primeiro semestre de 1907, a renda total de $9,831,697.88, contra $9,668,008.69, em identico periodo em 1906, havendo um accrescimo, portanto, de $163,689.19.

IMPORTAÇÃO DE CAFÉ EM 1907.

Conforme as estatisticas publicadas pelo departamento de commercio e trabalho dos Estados Unidos, a Republica de Cuba importou, durante o anno de 1906, as seguintes quantidades de café: Porto Rico, 11,739,124 libras, no valor de $1,376,175; Estados Unidos, 7,240,102 libras, no valor de $678,337; Brazil, 2,657,747 libras, no valor de $239,022; Venezuela, 5,625,121 libras, no valor de $496,580.

ESTADOS UNIDOS.

COMMERCIO COM A AMERICA LATINA NO ANNO DE 1906 A 1907.[a]

De conformidade com o relatorio de commercio publicado pela repartição de estatistica dos Estados Unidos comprehendendo as relações commerciaes do anno do fisco, findo em 30 de Junho de 1907, o movimento commercial entre os Estados Unidos e a America Latina é representado approximadamente pela importancia de $600,000,000, isto é, a importação $350,000,000 e a exportação $255,000,000, contra $234,000,000 em dez annos passados, isto é, a importação $155,000,000 e a exportação $80,000,000. Neste calculo está incluido o commercio com o Porto Rico, no intuito de formar uma base comparativa uniforme. Este paiz naquelle tempo não estava sugeito ao Governo dos Estados Unidos.

Eliminando-se Porto Rico, as Guianas e as Indias Occidentaes, excepto Haiti e São Domingos, da apreciação do commercio com a America Latina, o resultado mostra uma saida animadora, chegando o volume do commercio a fazer o total de mais de $560,000,000 em 1907 (exportação $227,304,976 e importação $332,633,460), contra $498,738,804 (importação $292,287,170 e exportação $206,451,634) no anno anterior, e indicando um progresso immenso sobre 1897, quando outros paizes não estavam incluidos no calculo.

So para a America do Sul, a importação dos Estados Unidos e a exportação para este paiz reunem o total superior a $238,000,000, contra $212,000,000 em 1906. O commercio da America Central progrediu de $36,021,148 para $41,916,042; o Mexico, de $109,147,455

[a] As importancias do movimento commercial assim como as publicadas no BOLETIM MENSAL de Julho de 1907, são em referencia ao anno kalendario de 1906.

para $123,481,514; Cuba, de $132,743,509 para $146,746,964. O commercio de São Domingos mostra um augmento menor, de $5,104,589 para $5,880,714, e o de Haiti apresenta uma ligeira differença para menos, de $4,493,317 para $4,190,782.

O augmento na exportação sobresahe-se principalmente em relação ao Brazil, dando uma differença para mais de $4,000,000, differença essa incluida no saldo geral, que vem a ser superior a $20,000,000. Os artigos manufacturados constituem o principal elemento nos despachos e formam 60 por cento da exportação para Cuba, cerca de 70 por cento da que vae para o Mexico e de cerca de 85 por cento da que segue para a America Central e do Sul.

Sob o titulo de importação, o Brazil mais uma vez se salienta com o augmento de $17,000,000, fora de um total de mais de $40,000,000 e especialmente applicados ao café e á borracha. Na importação proveniente de Cuba ha um accrescimo de $12,500,000 que se refere particularmente ao assucar, e na dos outros paizes restantes os artigos importados são limitados principalmente a generos alimenticios e materia prima.

Especificando-se os paizes e comparando-se os dois annos, a importação e a exportação são relatadas da seguinte forma:

Paizes.	Importação.		Exportação.	
	1906.	1907.	1906.	1907.
Da America Central:				
Costa Rica	$4,622,426	$4,965,034	$2,338,188	$2,470,986
Guatemala	3,386,317	3,872,538	2,908,655	2,848,864
Honduras	1,724,865	2,296,556	1,632,251	1,833,056
Nicaragua	1,478,408	1,028,166	1,870,852	1,923,111
Panama	1,065,887	1,752,314	12,400,289	16,150,953
São Salvador	1,131,734	1,171,298	1,401,278	1,603,166
Total dos paizes da America Central	13,409,637	15,085,906	22,611,511	26,830,136
Mexico	50,965,177	57,233,416	58,182,278	66,248,098
Cuba	84,979,821	97,441,690	47,763,688	49,305,274
Haiti	1,185,477	1,274,678	3,307,840	2,916,104
São Domingos	3,086,338	3,370,899	2,018,251	2,509,817
Da America do Sul:				
Republica Argentina	18,379,063	16,715,325	32,673,359	32,163,336
Bolivia			146,798	941,287
Brazil	80,416,524	97,881,158	14,530,471	18,697,547
Chile	16,945,476	18,287,029	8,667,227	10,195,657
Colombia	7,084,487	6,308,680	3,491,420	3,084,718
Ecuador	2,632,206	3,059,573	2,009,861	1,726,289
Paraguay	750	3,819	51,917	173,560
Peru	2,454,943	4,958,202	4,833,307	6,075,739
Uruguay	2,711,570	3,160,891	2,905,573	3,412,785
Venezuela	8,034,701	7,852,214	3,253,133	3,024,629
Total da America do Sul	138,659,720	158,226,891	72,568,066	79,495,547

As estatisticas commerciaes mostram que as importações da America Latina em 1906–7 foram 132 por cento maior que aquellas de dez annos passados, ao passo que de todos os outros paizes apresenta-se apenas um augmento de 78 por cento nos algarismos do movimento commercial. As exportações para a America Latina em 1907 foram 212 por cento maior que em 1897, sendo a porcentagem de augmento de exportação apenas 68 por cento maior.

Os principaes paizes com os quaes este progresso no commercio se desenvolve são a Republica Argentina, Brazil e Chile, isto na America do Sul, alem da America Central, collectivamente, e Cuba.

As importações da Republica Argentina cresceram de $10,750,000 em 1897 para approximadamente $17,000,000 em 1907, percebendo-se um augmento de cerca de 60 por cento. A exportação para alli avançou de $6,333,000 em 1897 para mais de $32,000,000 em 1907, manifestando-se um resultado de mais de 400 por cento.

Proveniente do Brazil, a importação augmentou de $69,000,000, ha dez annos passados, para $98,000,000, mais ou menos, em 1907, resultando um augmento de cerca de 50 por cento. A exportação para alli cresceu de $12,500,000 para mais de $18,000,000, dando um saldo um pouco acima de 44 por cento.

Proveniente do Chile, a importação cresceu de $3,750,000 em 1897 para mais de $18,000,000 em 1907, e a exportação para aquelle paiz progrediu de $2,500,000 para mais de $10,000,000.

Proveniente do Mexico, a importação se desenvolveu de $19,000,000, ha dez annos passados, para mais de $57,000,000 em 1907, mostrando um saldo de 200 por cento, e a exportação para alli cresceu de $23,500,000 para mais de $66,000,000, um augmento, portanto, de 175 por cento.

Os artigos importados de Cuba passaram de $18,000,000 em 1897 para mais de $97,000,000, com um augmento de cerca de 400 por cento, e a exportação dos Estados Unidos para aquelle paiz cresceu de $8,250,000 para mais de $49,000,000, com um accrescimo de cerca de 500 por cento.

Da America Central, collectivamente, a importação cresceu de $8,500,000 em 1897 para mais de $15,000,000 em 1907, dando um saldo de 80 por cento e a exportação para alli de $8,000,000 passou para mais de $26,000,000. A inclusão do Panama entre os paizes da America Central em vez de ajuntal-o à Colombia explica o excesso neste saldo, um augmento de cerca de 225 por cento.

O commercio com o Mexico, Brazil e Cuba estabelece novos annaes em 1907, ainda que a importação argentina tenha decrescido ligeiramente, como ve-se comparando com 1906, ella é maior que aquella de accordo com as receitas do anno de 1905.

O augmento nas importações provenientes dos paizes da America Latina applica-se principalmente a um pequeno numero de artigos por atacado, ao passo que o incremento nas exportações está distribuido entre um grande numero de productos, principalmente manufacturas. Os generos mais importantes provenientes do Mexico são sisal, cobre em barra, couros e pelles. O sisal apresenta um accrescimo de $10,000,000 em dez annos, o cobre em barras mais de $13,000,000, minerio de cobre approximadamente $4,000,000, e couros e pelles mais de $3,000,000. Provenientes do Brasil, o café

mostra um augmento de $7,000,000 em dez annos, e a borracha da india mais de $33,000,000. Provenientes de Cuba, o assucar apresenta um accrescimo de importação de $42,000,000, fumo em folha mais de $10,000,000, e os charutos $2,000,000 nos dez annos entre 1897 a 1907.

IMPORTAÇÕES E EXPORTAÇÕES.

O quadro apresentado na pagina 434 é extrahido dos dados compilados pelo chefe da repartição de estatistica do repartamento do commercio e trabalho, mostrando o movimento commercial entre os Estados Unidos e os paizes latino americanos. A relação corresponde ao mez de junho de 1907 com uma identica comparativa para o mez correspondente do anno anterior, assim como para os doze mezes findos em junho de 1907, comparados com o periodo correspondente do anno precedente. Deve-se explicar que os algarismos das diversas alfandegas, mostrando as importações e exportações de um só mez, são recebidos no departamento do thesouro até quasi o dia 20 do mez seguinte, e perde-se algum tempo necessariamente em sua compilação e impressão. Por conseguinte, as estatisticas para o mez de junho, por exemplo, não são publicadas até os primeiros dias de agasto.

COMMERCIO EXTERNO DO ANNO DE 1906-7.

O commercio externo dos Estados Unidos durante o anno de 1906–7, representado pela cifra de $3,315,114,122, caracteriza-se principalmente no augmento consideravel de importações. Esta parte do commercio, que monta à importancia de $1,434,421,425, apresenta um accrescimo de mais de $200,000,000 sobre 1906 e vem a ser mais que o dobro do total de 1898 ou 1899. As exportações, que se elevaram a cifra de $1,880,692,697, mostram um augmento de $137,000,000 sobre o anno precedente e uma vantagem de 53 por cento sobre o anno de 1899.

As grandes parcellas que forneceram e receberam estas importações e exportações são as seguintes:

	Importação.		Exportação.	
	1906.	1907.	1906.	1907.
Europa	$633,292,184	$747,291,255	$1,200,166,036	$1,298,203,999
America do Norte	235,353,322	263,576,349	308,382,972	349,840,641
America do Sul	140,422,876	160,165,537	75,159,781	82,157,174
Asia	180,095,671	212,475,427	105,451,610	92,703,064
Oceania	24,769,658	29,785,393	35,141,751	41,186,193
Africa	12,628,735	21,127,464	19,562,350	16,511,026

SEGUROS DE NEGOCIOS E FOGO NA ZONA DO CANAL.

Uma ordem executiva emittida pelo secretario da guerra dos Estados Unidos com a autorização do Presidente, datada de 12 de março de 1907, effectiva em 1º de julho de 1907 e depois desta data,

estabelece que nenhuma companhia de seguros de vida, contra fogo, accidentes, industrial, ou de indemnização será permittida fazer transacções dentro da zona do Canal, até que haja completado com as seguintes exigencias:

1. A companhia deverá archivar com o collector de rendas:

(a) Uma copia certificada de seus artigos de incorporação;

(b) Um certificado do commissario de seguros da sede de sua incorporação, demonstrando que está autorizada a fazer negocios na jurisdicção da casa matriz;

(c) Uma resolução de sua directoria designando um agente, dentro da zona do Canal, sobre o qual um processo legal possa ser executado;

(d) Uma copia certificada dos seus ultimos dados annuaes ao commissario de seguros do estado ou paiz no qual foi incorporada. D'ahi em diante apresentará copias de relatorios addicionaes semelhantes, assim como fará ao commissario da casa matriz;

(e) Uma declaração, com juramento, mostrando a importancia de seus fundos de capitaes pagos, fundos de reserva, a quantia de seguros a receber, e o numero de causas incertas ou incontestaveis pendentes contra ella.

2. A companhia depositará com o collector de rendas $10,000 em dinheiro ou garantias correntes, que tenham valor sufficiente para satisfazer toda a sentença dada contra ella por qualquer agente policial de seguros que a tiver executado;

3. Compromettendo-se a estas condições e ao pagamento da verba annual de $50, o collector de rendas dará a tal companhia um certificado autorizando-a a fazer transacções na zona do Canal. Tal certificado, entretanto, pode ser annullado de accordo com a direcção das principaes autoridades civis da zona do Canal; porem, si fôr annullada, sem culpa por parte da companhia de seguros, far-se-a á mesma um desconto, proporcional, da verba de licença;

4. Cada companhia como condição para continuar a fazer negocios dentro da zona do Canal, archivará com o collector de rendas, entre primeiro de janeiro a primeiro de março, de cada anno, uma declaração, com juramento, mostrando o negocio que tem feito dentro da zona do Canal, durante o anno anterior, e pagará em primeiro de março, ou depois, ao collector de rendas, em lugar das outras taxas (excepto bens de raizes e a verba annual referida no artigo 3) uma taxa de licença equivalente a um ou meio por cento dos seus recebimentos de premios do anno precedente;

5. O agente de qualquer companhia de seguros sem licença fazendo transacções dentro da zona do Canal, estará sujeito a uma multa não excedente de $25 pela primeira violação e não superior a $100 pela segunda.

MEXICO.

IMPOSTO DE SELLO SOBRE AS MOEDAS DE OURO.

Conforme um decreto do governo mexicano, publicado aos 26 de abril de 1907, o imposto do sello interno da Republica será arrecadado de todas as moedas mexicanas de ouro, excepto daquellas de circulação corrente, quando apresentadas ás repartições de analyses da Republica para liquidação ou á alfandega para exportação.

De accordo com o artigo V da lei de 25 de março de 1905, as moedas de ouro e prata de emissão corrente foram especialmente isentas dos trabalhos do imposto do sello. Esta isenção foi excluida de todas as moedas de ouro mexicanas em circulação anterior áquellas actualmente em vigor, baseadas no facto de que taes moedas poderão dahi em diante serem, apenas, consideradas como signaes e não como moeda corrente.

As taxas de ensaio, applicaveis ás placas ou barras de ouro, quando appresentadas ás repartições de analyses ou alfandegas, no intuito de se verificar o gráo de pureza do metal, de accordo com o qual a importancia do imposto do sello é taxada, serão dispensadas, visto o typo de pureza vir estampado nas moedas de ouro, fornecidas pelas casas de moeda da Republica. Esta garantia será sufficientemente acceita para os fins de taxação do imposto de sello, a não ser que as pessôas interessadas preferissem que as moedas, assim apresentadas por ellas, para liquidação, fossem consideradas como barras ordinarias de ouro.

PRATA CORRESPONDENTE AO PESO MEXICANO.

O presidente da Republica do Mexico estabeleceu, para o segundo semestre de 1907 e para uso exclusivo em calculos estatisticos, a seguinte tabella de equivalentes entre o *peso* mexicano e as moedas dos paizes onde o typo prata prevalece:

Paizes.	Moeda.	Valor do peso mexicano pelas moedas respectivas.
Bolivia	Boliviano	0.99
Guatemala	Peso	.99
Salvador	Id.	.99
Honduras	Id.	.99
Nicaragua	Id.	.99
Persia	Kran	5.38
China	Tael	0.5688

URUGUAY.

COMMERCIO COM A INGLATERRA EM 1906.

O relatorio do consul geral do Uruguay na Inglaterra, referente ao anno de 1906, dá para o movimento commercial entre os dois paizes, durante aquelle periodo, o total de £3,296,456, contra £2,917,900 em

1905, havendo, portanto, um augmento de £378,556; isto é, 13 por cento sobre aquelle periodo. A exportação ingleza para o Uruguay monta em £2,721,893, e a importação pela Inglaterra em £574,563. Os embarques inglezes para o Uruguay, confrontados com os de 1905, apresentam um accrescimo de £623,361; isto é, 29.7 por cento, ao passo que de outro lado os recebimentos de mercadorias do Uruguay abaixaram em £307,844.

A exportação de carnes em diversas formas comprehende a maioria dos embarques para a Inglaterra e, em 1906, foi estimada em £235,297, contra £184,795 no anno precedente. Para as carnes de vacca e de carneiro são applicadas, respectivamente, as sommas de £97,457 e £80,200. Estes dados mostram a posição progressiva que o Uruguay vae conseguindo na concorrencia com a Republica Argentina no abastecimento de carne verde para os mercados europeos. Linguas e carnes preservadas de diversas qualidades foram embarcadas no valor de £96,285 e de £41,555, apresentando o primeiro um augmento de £20,688 e o ultimo £19,602 sobre o anno anterior.

A lã de carneiro occupa o proximo lugar na relação dos valores de exportação, tendo sido despachados para a Inglaterra 6,052 fardos na importancia de £181,560, e no terceiro lugar da referida lista vem a exportação do caoutchouc com 332 toneladas, na importancia de £120,578. A exportação da lã soffreu uma baixa, comparando-se com 1905, anno em que os dados completos foram de 6,534 fardos, no valor de £196,020.

O total da exportação de couros em 1906 foi de £10,901, mostrando um augmento incontestavel sobre o anno precedente, quando os recebimentos inglezes de procedencias urugayanas perfizeram apenas o total de £1,304.

A importação de farinha de trigo do Uruguay foi relatada como importando em £5,335, porem os algarismos applicaveis ao trigo e ao milho importados ainda não abrangem todo o anno, pois em muitos casos o embarque é feito por via de outros paizes, resultando desta forma demora na classificação fiel de importação.

As exportações de mercadorias de Inglaterra para o Uruguay apresentam um accrescimo patente em todas as quantias do anno de 1906, com a excepção de tecidos, cuja differença, para menos, foi de £94,224, pois a somma relatada foi de £889,164, contra £983,388 em 1905. A differença foi restringida principalmente aos tecidos de algodão.

Os carregamentos de carvão de pedra e coke augmentaram de £236,583 para £439,773 e as machinas exportadas elevaram-se de £73,808 para £278,313, mostrando uma differença de £204,504, ou mais de 277 por cento. Machinas agricolas formam a maioria desta classe de embarques.

DR. ELMER L. CORTHELL, CIVIL ENGINEER.

BULLETIN MENSUEL

DU

BUREAU INTERNATIONAL DES RÉPUBLIQUES AMÉRICAINES,

Union Internationale des Républiques Américaines.

VOL. XXV. AOÛT 1907. No. 2.

On attire d'une manière toute particulière l'attention des lecteurs du BULLETIN et celle de tous ceux qui s'intéressent au Bureau International des Républiques Américaines sur ce numéro où l'on fait la description du nouveau bâtiment, pour l'érection duquel M. ANDREW CARNEGIE a donné $750,000 et où l'on publie les photographies des dessins de l'architecte. Les vues extérieures donnent une idée exacte de ce que sera ce bel édifice après sa construction; mais on pourra y apporter quelques changements qui ne seront que d'une importance secondaire. Les plans du rez-de-chaussée et du premier étage, ainsi que ceux de la section longitudinale, ont été un peu modifiés depuis la prise de ces photographies sur le dessin original; mais ces changements n'ont fait que de l'embellir et de contribuer à son utilité. Ces plans ont été choisis à l'unanimité par un jury composé de trois des plus éminents architectes du pays, agissant de concert avec le Président du Conseil d'Administration et avec le Directeur du Bureau. Ces plans sont ceux qui se rapprochent le plus des conditions posées dans le programme officiel publié dans le BULLETIN du mois d'avril. Les architectes sont maintenant très occupés à préparer le cahier des charges que les entrepreneurs pourront consulter avant de faire leurs soumissions lors de la mise en adjudication des travaux de construction. On espère commencer à la fin de septembre les travaux de terrassement pour établir les fondations afin que la pose de la première pierre puisse se faire à la fin du mois d'octobre ou au commencement du mois de novembre.

Les demandes de photographies des dessins des architectes que le Bureau reçoit de la part de journaux et de revues, non seulement des Etats-Unis et de l'Amérique Latine, mais encore de l'Europe et même du Japon, pour les reproduire dans leurs pages est une preuve évidente de l'intérêt toujours croissant qui se manifeste dans le monde entier à l'égard du Bureau et de son travail.

EXTENSION DU COMMERCE PAN-AMÉRICAIN.

Les demandes qu'on reçoit de toutes les parties du monde pour se procurer des exemplaires du BULLETIN MENSUEL du mois de juillet 1907, qui contient une revue détaillée du commerce et de l'industrie des vingt Républiques situées au sud des Etats-Unis, est la meilleure preuve du désir toujours croissant qu'on a d'obtenir des renseignements sur l'Amérique Latine. Bien que pour faire face à ces demandes on ait imprimé plusieurs milliers d'exemplaires en plus du nombre ordinaire, l'édition sera bientôt épuisée. On conseille donc à ceux qui désirent vivement se procurer un exemplaire de cette revue de s'adresser sans retard au Bureau. Ce rapport dans son entier est publié en anglais et en espagnol, de plus il y a des résumés succincts en portugais et en français. Comme à première vue on pourrait croire qu'il y a beaucoup d'inexactitudes entre les chiffres qu'on y trouve et ceux qu'on donne dans ce numéro, il faut se rappeler que la revue de juillet représente l'année 1906 tout entière, tandis que l'exposé succinct de ce mois n'a trait qu'au commerce entre l'Amérique Latine et les Etats-Unis pour l'année fiscale, commençant le 1er juillet 1906 et finissant le 30 juin 1907. L'exposé publié dans ce numéro est basé sur un excellent bulletin du 9 août préparé par l'hon. O. P. AUSTIN, chef distingué du Bureau des Statistiques au Département du Commerce et du Travail des Etats-Unis. En voyant les totaux qu'il donne, les plus sceptiques pourront se convaincre du champ merveilleux qu'offrent les Républiques latino-américaines à l'expansion du commerce extérieur des Etats-Unis. En même temps, ces chiffres montrent que tous les pays de l'Amérique du Centre et du Sud trouveront aux Etats-Unis de grands débouchés pour étendre leur commerce extérieur. Il n'y a pas de pays dans le monde entier qui jouissent d'une plus grande prospérité matérielle et qui fassent plus de progrès que ceux de l'hémisphère occidental. Cette situation suffit, sans le moindre doute, à justifier de la valeur et de l'importance du travail fait par ce Bureau.

VISITE DE M. ROOT AU MEXIQUE.

Monsieur ROOT, Secrétaire d'Etat des Etats-Unis et Président du Conseil d'Administration du Bureau, qui a fait un voyage officiel dans l'Amérique du Sud en 1906, en complétera les heureux effets en se rendant au Mexique vers la fin de septembre pour répondre à l'aimable invitation que lui a faite Monsieur DIAZ, Président de la République. Les grands préparatifs que font le Gouvernement et les habitants pour rendre agréable le séjour de M. ROOT parmi eux, montrent l'intérêt qu'ils prennent dans cet événement international et aussi l'importance qu'ils y attachent. Ce sera un nouveau pas dans la politique à larges vues dans laquelle la présente administration du Gouvernement des

Etats-Unis est entrée afin d'effectuer un rapprochement plus grand entre les Gouvernements et les peuples des autres pays de l'Amérique. Bien qu'au point de vue géographique le Mexique soit plus près des Etats-Unis que les autres pays de l'Amérique Latine en général, les habitants des Etats-Unis ne se sont pas encore parfaitement rendu compte de sa remarquable expansion matérielle et de sa marche en avant au point de vue politique, économique et social. L'attention de l'Amérique du Nord qui s'était tournée vers l'Amérique du Sud par suite du voyage de M. ROOT qui en avait mis au jour les puissantes ressources jusqu'alors peu connues, se portera maintenant sur le Mexique et l'Amérique du Centre.

PROJETS IMPORTANTS POUR LA CONSTRUCTION DE CHEMINS DE FER DANS L'AMÉRIQUE LATINE.

Le Bureau reçoit constamment de toutes les parties de l'Amérique Latine des rapports qui montrent que dans un avenir prochain il y aura une grande activité dans la construction de chemins de fer. Du Mexique à la République Argentine, c'est à peine si l'on peut trouver un pays qui ne fasse pas de projets pour étendre son réseau de chemins de fer d'une manière considérable, et il est possible que d'ici dix ans il y en ait deux fois plus. Il y a tant de solutions de continuité dans la chaîne du chemin de fer intercontinental ou pan-américain en projet qui seront comblées, qu'on peut déjà prédire la réalisation de ce rêve à une date plus proche qu'on ne l'avait espéré. Bien qu'il semble difficile de trouver le moyen de construire une ligne de chemins de fer continue où les trains puissent aller de New York à Rio de Janeiro, Buenos Ayres et Santiago, les plans de construction présents et futurs diminueront tellement les espaces qui séparent les tronçons que le temps n'est pas très éloigné où ils seront tous unis, et l'on peut prédire avec raison que des hommes aussi distingués que M. HENRY DAVIS, ancien sénateur, et M. ANDREW CARNEGIE, qui s'intéressent tant au grand projet intercontinental, pourront voir son achèvement. C'est probablement le Brésil qui a en vue le projet de construction le plus important dans un avenir prochain; la Bolivie vient ensuite. Il est très intéressant de noter que ce sont les Etats-Unis et le Canada qui fournissent presque tout le capital nécessaire à cette entreprise. Jusqu'ici c'est l'Angleterre et le continent européen qui ont fourni les capitaux nécessaires pour la construction des chemins de fer de l'Amérique du Sud.

PREUVES ÉVIDENTES ET CONDITIONS DU GRAND TRAVAIL DU BUREAU.

On peut se rendre compte du grand travail que fait journellement le personnel du Bureau par la correspondance de cette Institution. C'est à peine si en travaillant en dehors des heures du Bureau, les

employés peuvent arriver à répondre en temps voulu au grand nombre de manufacturiers, exportateurs, négociants, écrivains, savants et voyageurs qui de plus en plus demandent des renseignements divers. Ces demandes ne viennent pas seulement des Etats-Unis, mais encore de tous les pays de l'Amérique Latine, de différentes parties de l'Europe, du Canada, du Japon, de l'Australie et même de l'Inde et de la Chine. Comme le Bureau est une Institution essentiellement internationale, travaillant dans l'intérêt de la prospérité de toutes les Républiques Latino-Américaines, aussi bien que des Etats-Unis, il fait tout son possible pour répondre à toutes les questions d'une manière exacte, précise et impartiale. On doit se rappeler, cependant, qu'il lui faut rester dans certaines limites, car il n'est aucunement une institution particulière pouvant recommander certaines personnes, compagnies, entreprises ou projets. Il se fait toujours un plaisir de donner tous les renseignements en son pouvoir et de faire les démarches qui sont compatibles avec les responsabilités qui lui incombent envers chacun des Gouvernements qui le maintiennent, mais il ne peut pas aller plus loin sans l'autorisation de son Conseil d'Administration composé de représentants diplomatiques des Républiques Américaines. On appuie sur ce point parce que certains correspondants du Bureau semblent ne pas comprendre pourquoi cette Institution ne peut pas leur aider d'une manière plus efficace dans leurs projets.

M. FOX, ANCIEN DIRECTEUR DU BUREAU INTERNATIONAL DES RÉPUBLIQUES AMÉRICAINES, MAINTENANT MINISTRE DES ETATS-UNIS DANS L'ÉQUATEUR.

Le Bureau International est heureux de constater le bon travail fait dans l'Equateur par l'Honorable WILLIAM C. FOX, son ancien Directeur qui maintenant est ministre des Etats-Unis dans ce pays. Les Etats-Unis viennent de nommer M. Fox comme arbitre pour régler le différend qui s'est élevé entre le Gouvernement de l'Equateur et la Compagnie des chemins de fer de Quito et de Guayaquil. On peut dire en passant que cette ligne qui doit être achevée prochainement va maintenant jusqu'à Latacunga, ville importante située sur le plateau principal de l'Equateur.

PROFESSEURS DE L'AMÉRIQUE DU NORD VISITANT L'AMÉRIQUE DU SUD.

Les nombreuses coupures que l'on reçoit des principaux journaux sud-américains font voir le sprogrès que font M. L. S. ROWE, professeur à l'Université de Pennsylvanie, M. W. R. SHEPHERD et M. TODD, professeur d'astronomie au Collège d'Amherst, dans leur voyage dans l'Amérique du Sud. Ces messieurs ont été reçus cor-

dialement partout où ils sont passés et ils y ont produit une bonne impression. M. LEE MCLUNG, trésorier de l'Université de Yale, s'est rendu dernièrement dans la République Argentine et au Chili où plusieurs autres personnes des Etats-Unis, savants et voyageurs distingués, comptent se rendre dans le but de mieux connaître l'Amérique Latine afin d'être en mesure de faire des conférences sur cette partie du monde dans leurs institutions respectives.

OPINION D'UN INGÉNIEUR DISTINGUÉ DES ÉTATS-UNIS.

M. E. L. CORTHELL, l'éminent ingénieur qui dirige en ce moment la construction de ports et canaux très importants dans l'Amérique du Sud, vient de faire visite au Bureau, et il parle avec le plus grand enthousiasme de cette partie du monde et prédit un progrès matériel pouvant rivaliser avec celui qui s'est fait dans l'Amérique du Nord, l'Europe et l'Asie.

SITUATION COMMERCIALE ET FINANCIÈRE DE LA RÉPUBLIQUE ARGENTINE.

Le rapport trimestriel du commerce de la République Argentine montre que pour le premier trimestre de l'année 1907 il y a eu une augmentation de $3,281,509 dans les importations, et une augmentation de $10,803,113 dans les exportations pour la même période de l'année 1906. Si l'augmentation continue pendant toute l'année sur le même taux, la Balance commerciale de la République Argentine sera rétablie et par conséquent plus en rapport avec la prospérité du pays, qu'elle ne l'était pendant l'année 1906 suivant les statistiques établies montrant alors une diminution dans les exportations et une augmentation dans les importations. Le budget de la République Argentine tel qu'il a été établi dans les prévisions des recettes et dépenses pour l'année 1908, vient d'être approuvé par le Congrès. Une des choses à remarquer dans ce budget est la diminution dans les dépenses du Gouvernement d'après la marche que l'administration financière du pays a suivie depuis quelques années. Il est aussi à remarquer que le service de la dette publique exige le déboursement de la plus grande partie de l'allocation en or et que les travaux publics forment l'article principal des dépenses en monnaie nationale.

COMMERCE DES FARINES AU BRÉSIL ET WARRANTS DE CAFÉ.

Les concessions faites dans les tarifs par le Gouvernement Brésilien sur la farine importée des Etats-Unis ajoutent un certain intérêt aux données comparatives publiées dans ce numéro au sujet des quantités de farine étrangère importée dans le pays. On voit que les farines de la République Argentine sont en tête de la liste accusant un chiffre de 122,282 tonnes en 1906, contre 37,235 en 1902.

Quant aux importations de farine des Etats-Unis, elles ont diminué, accusant un chiffre de 24,526 tonnes en 1906, contre 46,840 en 1902.

L'émission de warrants faite sur les cafés en magasin à Santos est le résultat de la mise en vigueur du projet de *valorisation*. L'Association Commerciale de Rio-de-Janeiro et une compagnie qui a son siège social à São-Paulo, en même temps qu'un capital énorme à sa disposition, s'occupent de cette entreprise avec beaucoup d'intérêt, et on pense que cette dernière fera beaucoup de bien aux transactions de ces deux centres commerciaux.

SOMMES VOTÉES POUR LES TRAVAUX PUBLICS AU CHILI.

Dans son budget pour l'année 1906, le Gouvernement Chilien a voté la somme d'environ $30,000,000 pour faire face aux dépenses occasionnées par les travaux publics qu'il va entreprendre. On a projeté la construction de chemins de fer sur une grande échelle; on va aussi reconstruire la ville de Valparaiso et établir un système d'égouts très étendu pour Santiago; on va faire des améliorations et des travaux hydrauliques dans plusieurs villes, construire des ponts, des maisons d'école et des bâtiments à l'usage du Gouvernement. L'augmentation dans les recettes douanières que l'on a constatée pour l'année courante et le bilan des banques sont autant de garanties pour encourager la mise à la disposition des fonds nécessaires pour ces entreprises.

COMPAGNIES ET SOCIÉTÉS ÉTRANGÈRES EN COLOMBIE.

Dans les règlements établis au sujet des compagnies ou sociétés étrangères établies d'une manière permanente pour entreprendre des affaires dans la République de Colombie, il est dit que les actes d'association de ces compagnies et les lois qui les régissent devront être enregistrés chez le notaire de l'endroit où se trouve l'entreprise, dans les six mois qui précéderont le commencement de cette dernière. Le délai sera prolongé à un an pour les compagnies établies dans le pays avant ces règlements. De plus il est dit que la compagnie devra avoir un agent à son siège social pour la représenter devant les autorités nationales. M. Reyes, Président de la République, désire attirer des capitaux dans le pays, et il leur assure l'aide et la protection du Gouvernement dans toute l'acception du mot.

PROPAGANDE FAITE POUR ATTIRER L'IMMIGRATION DAN LA RÉPUBLIQUE DE COSTA-RICA.

L'intention qu'a le Gouvernement de Costa-Rica de chercher à augmenter la population du pays se fait voir par une loi récente autorisant le Président à consacrer annuellement pendant huit ans

la somme de $20,000 pour l'encouragement de l'immigration. On offre le passage gratuit de leur pays jusqu'à Costa-Rica à tous les agriculteurs de race blanche et de préférence à ceux qui sont de langue espagnole. Dans le rapport annuel du Ministre des Finances et du Commerce, dont on trouvera quelques extraits dans ce Bulletin, on parle beaucoup de la fertilité du sol qui le rend propre à différentes cultures dont les produits sont recherchés sur les marchés du monde entier.

CUBA—PROPRIÉTÉ FONCIÈRE ET COMMERCE DU BÉTAIL SUR PIED.

La propriété foncière dans l'Île de Cuba est évaluée à la somme de $324,758,133, rapportant un revenu annuel de $32,469,043. Depuis le 1er août on a mis en vigueur une loi très importante dans le but d'augmenter le nombre des bestiaux sur pied dans l'île et d'en améliorer la race. Les brebis et les vaches de certaines races au-dessous de six ans sont admises en franchise de droit. Ces dernières années on a augmenté le bétail du pays par l'importation d'animaux du Vénézuéla, du Mexique et d'autres pays voisins et on compte maintement encourager par tous les moyens possibles la création de grands établissements pour l'élevage et les industries qui s'y rattachent.

IMMIGRATION ET COLONISATION DANS L'ÉQUATEUR.

Il y a une reprise sensible dans l'activité déployée dans la République de l'Équateur par suite des grandes concessions qu'on accorde aux compagnies de colonisation qui jouissent de privilèges spéciaux accordés par le Gouvernement. D'après un arrangement spécial qui a été fait dernièrement, une de ces compagnies s'est engagée à faire venir dans le pays 5,000 familles de race blanche, hollandaises ou allemandes de préférence, et de les faire s'établir sur des terres publiques ayant une étendue de 50,000 hectares et cela dans l'espace de dix ans. La concession entraîne avec elle l'obligation de construire des églises, des écoles, des magasins, des maisons d'habitation, un chemin de fer permanent et aussi celle de verser un cautionnement dans les caisses du Gouvernement de l'Équateur afin d'assurer la complète exécution de ses engagements.

MEXIQUE—PARTICIPATION DU GOUVERNEMENT DANS LA PROPRIÉTÉ DES CHEMINS DE FER.

La mesure législative la plus importante qui ait été prise au Mexique depuis quelques années est celle, qui par un décret en date du 6 juillet 1907, autorise M. Díaz, Président de la République, à

approuver la formation d'une société anonyme en commandite par actions, disposant d'un certain capital, entre le Gouvernement Mexicain et sept ou davantage, s'il est besoin, des actionnaires des compagnies de chemin de fer de la Nation et du Centre. Dans les opérations de la compagnie ainsi consolidée le payement de certaines obligations est entièrement garanti par le Gouvernement Mexicain qui, avec les autres actionnaires, sera à part égale dans tous les dividendes provenant de l'exploitation des lignes.

AUTRES SUJETS TRAITÉS DANS LE BULLETIN.

Par suite du grand intérêt qui s'est manifesté dans la situation commerciale de la République Dominicaine, on a résumé dans ce numéro les règlements établissant dans cette République les droits de port qui sont actuellement de la plus grande importance. Les récents décrets de colonisation de la soi-disant "région orientale" montrent les progrès faits par l'Equateur. Au Nicaragua, la surtaxe imposée sur certaines classes de marchandises spécifiées ayant été trouvée trop onéreuse, on l'a en conséquence temporairement déférée. L'émission nouvelle de monnaie de nickel au Panama facilitera de beaucoup les transactions commericales dans cette République et l'établissement de communications hebdomadaires entre Bocas del Toro et Puerto Limón étendra les débouchés commerciaux à l'étranger. Les prévisions de la loi budgétaire de San Salvador pour l'année 1907–8 suffisent amplement pour faire face aux besoins du Gouvernement pendant la période en question et la ratification des nombreuses conventions internationales publiées dans ce BULLETIN montrent le grand désir manifesté par cette République d'être constamment en rapports suivis avec d'autres pays pour leur avantage réciproque. On publie sur le commerce extérieur de l'Uruguay pendant le premier semestre de l'année 1906 des données intéressantes qui sont les dernières statistiques authentiques. De plus on y donne les transactions commerciales entre le Venezuela et le port de New-York jusqu'à la fin du mois de mai 1907, transactions basées sur les rapports de son agent consulaire.

NOUVEAU BÂTIMENT POUR LE BUREAU INTERNATIONAL DES RÉPUBLIQUES AMÉRICAINES.

On reproduit pour la première fois dans ce numéro les dessins des architectes pour le nouveau bâtiment du Bureau International des Républiques Américaines. Ces dessins se composent de cinq photographies: une perspective des vues de face et de côté; une per-

spective des vues de derrière et de côté; la section longitudinale; le plan du premier étage, et le plan du deuxième étage. Il y aura un certain nombre de changements importants dans ces plans et dessins, mais les gravures que l'on reproduit donneront une idée assez exacte de ce que sera la nouvelle construction.

Sur 130 architectes qui se sont fait inscrire pour prendre part au concours, plus de 70 ont soumis leurs dessins, et le jury composé de l'honorable M. ELIHU ROOT, Secrétaire d'Etat, de M. JOHN BARRETT, Directeur du Bureau, ainsi que de MM. CHARLES F. MCKIM, HENRY HORNBOSTEL et AUSTIN W. LORD de New-York, trois des principaux architectes du pays, choisis par un vote des concurrents, s'est décidé à l'unanimité en faveur de MM. ALBERT KELSEY et PAUL P. CRET, architectes associés de Philadelphie.

Bien que beaucoup d'autres dessins fussent plus soignés et plus compliqués, et que quelques-uns d'entre eux pussent avoir un mérite égal au point de vue de l'architecture, ils auraient nécessité de trop grandes dépenses; ceux donc auxquels on a accordé la palme se trouvaient de beaucoup supérieurs aux autres dessins que l'on pouvait exécuter avec les fonds mis à la disposition du Bureau. On doit se rappeler que c'est M. ANDREW CARNEGIE, qui, par l'entremise de M. ELIHU ROOT, Secrétaire d'Etat des Etats-Unis, a donné $750,000 pour le bâtiment; cette somme étant complètement distincte des $250,000 votés par les Etats-Unis et les autres Républiques Américaines pour le même but. Cette dernière somme a servi à l'acquisition d'un emplacement magnifique et aussi aux travaux préliminaires. Sur le montant total donné par M. CARNEGIE, on consacrera $600,000 à la construction du bâtiment proprement dit et les $150,000 restant seront destinés à son ameublement et à sa décoration intérieure.

Les architectes sont maintenant très occupés à préparer le cahier des charges pour les entrepreneurs et on pense que l'adjudication pourra avoir lieu vers le premier octobre. La pose de la première pierre aura lieu au commencement du mois de novembre, et on en fera un événement international. Si rien ne vient interrompre la marche des travaux, le bâtiment sera fini en un an et demi, et toutes les Républiques de l'Hémisphère Occidental sauront que, d'ici peu, elles auront un foyer ou demeure dans les Etats-Unis. Comme le Bureau International est soutenu par chacune des vingt et une républiques qui forment l'Union, ce nouveau Temple dédié au commerce et à la courtoisie sera exclusivement le local d'une institution appartenant à la plus petite comme à la plus grande de ces nations américaines.

Le bâtiment sera situé sur un des plus beaux emplacements de la ville de Washington. L'espace qu'il occupera, connu sous le nom de Parc Van Ness, avait été acheté il y a quelques années par l'Univer-

sité de George Washington, dans le but d'y construire un nouveau groupe de bâtiments pour son usage; mais, dernièrement, cette institution a changé d'idée et elle a vendu la propriété au Bureau International. Cette dernière a une étendue de cinq acres environ, soit deux hectares; elle est bornée à l'est par la dix-septième rue, au sud par la rue B, au sud-ouest par l'avenue de Virginie, à l'ouest par la dix-huitième rue, et au nord par la rue C. La façade du bâtiment sera à l'est, donnant sur de grands terrains en face de la Maison Blanche, résidence du Président des Etats-Unis. Le côté sud donnera sur le Parc du Potomac et sur le fleuve du même nom, le côté sud-ouest aura vue sur la belle promenade connue sous le nom de "Speedway" et aussi sur les collines de la Virginie, au delà du Potomac. Par suite de la place dont on pourra disposer, on dessinera de magnifiques jardins anglais qui produiront un effet merveilleux.

Les dimensions du bâtiment seront d'environ 160 pieds de long sur 160 de large, ou d'environ 50 mètres de long sur 50 de large. L'extérieur se fera remarquer par un essai dans le groupement, d'après les idées modernes, des meilleurs éléments de cette architecture espagnole et portugaise qui ornent les belles villes de l'Amérique Latine; cependant, il se renfermera dans les lignes classiques, et l'aspect qu'il produira sera en accord avec le plan général d'embellissement de la ville de Washington qui a été preparé il y a quelques années par MM. DANIEL BURNHAM et CHARLES F. MCKIM, deux des architectes les plus en vue dans les Etats-Unis.

À peu de distance de là se trouve le magnifique monument élevé à la mémoire de Washington. Tout à fait au nord on voit le nouveau bâtiment des Filles de la Révolution Américaine. Deux rues plus loin, dans la même direction, se voit le pompeux édifice consacré à la peinture et à la sculpture, connu sous le nom de "Corcoran Art Gallery." Dans le voisinage, il y a encore le bâtiment dans lequel se trouvent: le Ministère des Affaires Etrangères, le Ministère de la Guerre et le Ministère de la Marine; ensuite la Maison Blanche et enfin le Ministère des Finances. Du côté opposé des terrains avoisinant la Maison Blanche, on construira probablement, d'ici quelques années, le nouveau bâtiment du Ministère des Affaires Etrangères. On voit donc qu'il eût été difficile de choisir un emplacement mieux situé.

Un large et magnifique passage pour les voitures donnera accès au bâtiment dans lequel on entrera par trois portes monumentales, genre grille espagnole. De chaque côté de l'entrée principale il y aura deux colossales statues de femme en marbre, l'une représentant l'Amérique du Nord et l'autre l'Amérique du Sud. De grandes marches de marbre conduiront aux grilles de bronze qui ouvriront sur un imposant vestibule à haut plafond d'environ 25 pieds de large,

A son tour ce dernier ouvrira sur une cour intérieure ou "patio," occupant une superficie d'environ 2,500 pieds carrés, au centre de laquelle sera une fontaine ornée des plantes les plus connues de la flore des pays de l'Amérique du Sud. Au-dessus de cette cour intérieure il y aura un toit roulant vitré qui sera ouvert en été et fermé en hiver. De chaque côté de la cour intérieure, et complétement à part, il y aura de grands escaliers conduisant à l'étage supérieur. Deux corridors longeront les deux côtés du premier étage, celui de gauche conduisant aux bureaux du personnel de l'Administration et celui de droite à la salle contenant les rayons et étagères qui serviront à la Bibliothèque de Christophe Colomb et aux bureaux du bibliothécaire et de ses employés. Immédiatement après la cour intérieure, il y aura un foyer de 22 pieds de large environ, qui, à son tour, ouvrira sur une grande salle de lecture de près de 100 pieds de long sur 60 de large. Cette dernière sera partiellement subdivisée en sections pour y exposer des choses curieuses, y placer des livres de renseignements généraux, des revues, des cartes, etc. En entrant dans le bâtiment, à gauche, il y aura un vestiaire pour les hommes, et à droite il y en aura un pour les femmes; mais, on ne s'en servira que quand on donnera des réceptions ou que d'autres événements de ce genre auront lieu dans la Grande Salle de Réunion située au second étage.

Quoiqu'il y ait des ascenceurs, le principal moyen d'arriver au second étage sera de monter les escaliers déjà décrits qui se termineront en un large foyer, d'un côté donnant sur la cour intérieure et de l'autre ouvrant sur la Salle des Ambassadeurs Américains. Cette salle occupera un espace de 101 pieds de long sur 65 de large; l'intérieur en sera tellement bien fini et le genre de décoration si sévère, qu'on pourra s'en servir pour des conférences internationales, pour des réceptions en l'honneur de personnes distinguées qui visiteront la ville de Washington, pour des réunions diplomatiques, des bals et autres réunions de même genre. A gauche de la Salle des Ambassadeurs Américains, il y aura une salle spéciale pour le Conseil de Direction du Bureau où les représentants diplomatiques des Républiques Américaines se réuniront régulièrement, sous la présidence du Secrétaire d'Etat, afin d'y discuter sur le travail du Bureau. A droite, il y aura trois grandes salles de comités, ces dernières ainsi que celle du Conseil de Direction communiqueront avec la salle principale, de manière à pouvoir n'en faire qu'une au besoin, et qu'ainsi transformée, elle soit la plus grande et la plus belle salle de réunion de son genre, non seulement dans la capitale de la nation, mais encore dans tous les Etats-Unis. Par derrière, la Salle des Ambassadeurs Américains donnera sur une terrasse et sur un jardin auquel on accédera par de grands escaliers extérieurs. On a l'intention de faire décorer cette salle d'une manière convenable par les meilleurs artistes

américains, afin qu'elle représente aussi exactement que possible l'histoire et le progrès de tous les pays de l'Union Internationale. Les peintures murales retraceront l'histoire de l'hémisphère occidental, et les statues et portraits d'hommes d'état éminents des pays de cette Union ajouteront grandement à sa beauté.

D'après la disposition des pièces, le reste du deuxième étage sera consacré, du côté sud, à des salles spacieuses pour le Directeur du Bureau, son secrétaire particulier et les sténographes; il y aura aussi d'antres salles du même genre pour le Secrétaire du Bureau et ses employés. Du côté nord sera la deuxième salle avec rayons et étagères pour la Bibliothèque de Christophe Colomb. Il y aura aussi un espace réservé pour les besoins du service que pourra nécessiter la présence temporaire d'un restaurateur de manière à ne rien négliger pour que l'on puisse se servir de la Salle de Réunion ou des salles de comités pour des banquets.

Dans le sous-sol, il y aura un espace grandement suffisant pour le calorifère, le combustible et le dépôt d'archives et de livres, des salles pour les arrivages, d'autres où on les classera pour les porter à leurs places respectives; il y aura aussi des salles avec tout ce qui est nécessaire pour les portiers et les garçons de bureau. Au premier étage et au deuxième, les bureaux destinés au personnel de l'Administration seront munis de placards de sûreté et de toutes autres inventions récentes pouvant contribuer à faciliter l'expédition des affaires dont le seul but est le développement du commerce dans tous les pays formant l'Union Internationale et le resserrement des liens d'amitié qui les unissent. Le bâtiment sera incombustible sous tous les rapports. On n'emploiera du bois que pour les meubles et la décoration intérieure. On verra probablement dans cette dernière, des échantillons des bois les plus rares et les plus beaux des pays de l'Amérique du Sud. Les bordures de l'extérieur seront en marbre. La partie principale du bâtiment sera construite en concret revêtu d'une couche de stuc tel qu'on le fait dans l'Amérique Latine; les corniches et les bordures de l'intérieur seront en terra-cotta polychrome. La cour intérieure, appelée aussi "patio," qui formera la partie centrale du bâtiment, entourée de grands escaliers, d'arcades et de corridors sur lesquels ouvriront tous les bureaux, la Bibliothèque de Christophe Colomb et la Salle de Réunion à l'étage au-dessus, sera l'endroit où les visiteurs pourront se faire l'impression la plus profonde de ce que sera l'intérieur. De l'endroit où le vestibule se rencontre avec le patio, on aura une vue imposante en regardant à travers le bâtiment, par dessus la terrasse en dehors, et plus loin sur le jardin; si l'on regarde en haut, on verra le magnifique foyer, la grande Salle des Ambassadeurs et au-dessus encore, le toit incliné de son dôme couvert en tuiles.

Les architectes se sont tellement bien inspirés du but de ce nouveau bâtiment à l'usage du Bureau International des Républiques Américaines, que, contrairement à la plupart des autres monuments publics, il sera destiné à faire connaître et à perpétuer l'entente cordiale parmi toutes les nations américaines. Avant tout, ce sera un bâtiment d'affaires; mais il sera disposé de manière à recevoir les sociétés savantes avec le plus grand ordre et la plus grande urbanité. Lors des grandes cérémonies, l'édifice tout entier, ouvrant sur une grande cour intérieure qui inspirera le plus vif enthousiasme, sera une place vraiment faite pour abriter les délibérations des ambassadeurs et délégués étrangers qui seront appelés à faire partie des conférences internationales. D'un autre côté, son architecture originale, ses magnifiques salles, son excellente collection d'ouvrages ayant trait à l'Amérique en général, les facilités qu'il offrira pour les travaux de recherches de toutes sortes au point de vue commercial, économique, intellectuel, historique et scientifique enfin les traits caractéristiques sociaux des nations américaines, ne manqueront pas d'attirer journellement la plus grande partie des étrangers qui visiteront la ville de Washington.

RÉPUBLIQUE ARGENTINE.

COMMERCE EXTÉRIEUR PENDANT LE PREMIER TRIMESTRE DE L'ANNÉE 1907.

D'après les chiffres publiés par le Bureau National des Statistiques, montrant le commerce extérieur de la République Argentine pendant les trois premiers mois de l'année 1907, les importations accusent une valeur de $54,660,885 et les exportations se chiffrent à $96,956,217. En comparant ces résultats avec ceux de la même période de l'année 1906, on constate une augmentation de $3,281,509 dans les importations et de $10,803,113 dans les exportations.

Voici les importations et exportations des principaux pays qui ont figuré dans ce commerce:

Pays.	Importations.	Exportations.
Afrique	$1,060	$603,253
Allemagne	8,205,565	13,638,960
Belgique	2,719,671	8,381,247
Bolivie	27,742	200,425
Brésil	1,453,899	2,587,785
Cuba	101,049	38,623
Chili	73,108	455,731
Espagne	1,412,883	376,516
Etats-Unis	7,976,602	3,919,765
France	5,193,532	16,336,193
Italie	3,704,609	1,102,347
Hollande	389,730	926,135
Paraguay	210,777	43,746
Angleterre	19,497,070	10,422,425
Uruguay	624,075	1,416,796
Pays divers	3,059,513	467,858
"Commandes"		36,128,422

En comparant le total de la valeur commerciale du 1er trimestre des années 1906 et 1907, on obtient les résultats suivants au sujet des pays d'origine et de destination:

Pays.	Importations.	Exportations.
Allemagne	+ $422,866	+ $82,137
Belgique	+ 450,172	+ 819,321
Brésil	+ 503,327	+ 112,777
Espagne	+ 68,364	— 440,986
Etats Unis	+ 484,702	— 206,727
France	— 390,527	+3,732,337
Italie	— 633,874	—1,035,916
Angleterre	+ 2,810,726	— 901,188
"Commandes"	+10,803,118	

L'article qui montre l'augmentation la plus considérable est classé sous l'entête "Machines servant à la traction." Ces importations en 1907 se sont élevées à $9,709,755, contre $6,185,004 en 1906. Dans cette catégorie on comprend en 1907: 107 locomotives, contre 41 en 1906; 91 tramways, contre 20 en 1906; 1,104 voitures, contre 489 en 1906. Quant aux automobiles, le chiffre ne s'est élevé qu'à 123, ce qui montre une diminution de 51 sur l'année 1906.

Voici d'autres articles d'importation avec leur augmentation et leur diminution respectives:

Articles.	1907.	
Vins, spiritueux, liqueurs	$2,084,362	— $442,368
Soieries	726,398	+ 83,029
Lainages	2,905,187	— 330,437
Tissus de coton	5,961,324	— 668,443
Autres textiles	1,203,495	+ 90,298
Bois et articles de bois	1,018,275	+ 9,470
Papier et articles en papier	1,039,612	+ 70,629
Fer et acier et objets en fer et acier	5,723,684	— 85,583
Autres métaux et objets en métal	1,330,191	— 337,342
Machines et outils agricoles	3,013,721	—1,675,257
Machines électriques	673,761	+ 251,719

BRÉSIL.

COMMERCE EXTÉRIEUR, PREMIER TRIMESTRE DE L'ANNÉE 1907.

Le commerce extérieur du Brésil pour le premier trimestre de l'année 1907 fait ressortir une valeur de $45,000,000 pour les importations, contre $30,000,000 pour la même période de l'année précédente, et une valeur de $75,000,000 pour les exportations, contre $60,000,000 pour les trois premiers mois de l'année 1906.

COMMERCE EXTÉRIEUR PENDANT LES QUATRE PREMIERS MOIS DE L'ANNÉE 1907.

Les chiffres du commerce extérieur du Brésil pendant les quatre premiers mois de l'année 1907 montrent une valeur de £12,515,836 ($62,000,000) pour les importations et de £20,877,091 ($104,000,000)

pour les exportations, ce qui fait ressortir une balance de £8,361,255 ($42,000,000) en faveur du pays. Pour la même période de l'année 1906, les exportations sont évaluées à £16,159,176 ($80,000,000) et les importations à £9,524,909 ($47,000,000), la balance commerciale en faveur du Brésil s'élevant à £6,634,267 ($33,000,000).

Une comparaison des valeurs commerciales pour les deux périodes fait ressortir une augmentation de 31.4 pour cent dans les importations et de 29.2 pour cent dans les exportations.

On constate une augmentation dans tous les articles d'exportation à l'exception du sucre, dont la récolte n'a pas été satisfaisante. Le caoutchouc et le café constituent, comme à l'ordinaire, la plus grande partie des exportations.

EXPÉDITIONS DE CAFÉ EN 1906-7.

Les expéditions de café venant du Brésil pendant l'année commençant en juillet 1906 accusent un total de 19,654,000 sacs.

Cette récolte extraordinaire d'environ 20,000,000 de sacs augmente les quantités de café disponible du monde entier d'environ 7,000,000 de sacs, chiffre qui n'a jamais été atteint dans aucune autre année.

NOUVEAUX RÈGLEMENTS POUR L'IMMIGRATION.

Un décret exécutif promulgué le 19 avril 1907 par Monsieur Moreira Penna, Président de la République, approuve les nouveaux règlements pour l'immigration signés par le Ministre de l'Industrie, des Chemins de Fer et des Travaux Publics, ayant pour but de peupler le sol brésilien.

Ces règlements ont pour base essentielle la coopération du Gouvernement Fédéral, celle des gouvernements des différents Etats de l'Union, celle des compagnies de chemins de fer, de navigation fluviale et autres et enfin celle des simples particuliers, pourvu qu'on ait observé toutes les garanties nécessaires dans les mesures prises pour attirer les immigrants dans le pays.

Seront considérés comme immigrants tous les étrangers âgés de moins de 60 ans n'étant pas atteints de maladies contagieuses, n'exerçant pas de professions illicites, n'étant ni criminels, ni repris de justice, ni mendiants, ni vagabonds, ni aliénés, ni invalides, arrivant dans les ports brésiliens en troisième classe, aux frais de l'Union, des Etats ou de particuliers, ainsi que ceux qui ont payé eux-mêmes les frais de leur voyage et désirent jouir des mêmes avantages que les autres nouvellement arrivés.

Les personnes âgées de plus de 60 ans ou incapables de travailler ne seront admises que si elles sont accompagnées de leurs familles ou encore si elles viennent pour les rejoindre, pourvu qu'il y ait dans la famille au moins un membre bien portant qui puisse subvenir

aux besoins de l'invalide, et un ou deux membres bien portants pour soutenir le vieillard.

On accordera aux immigrants qui s'établiront dans n'importe quelle partie du pays et s'adonneront à l'agriculture, au commerce, à l'industrie ou à tout métier ou profession utile, la plus complète liberté d'action, pourvu que dans l'exercice de leur métier ou profession il n'y ait rien qui puisse nuire à la sécurité et à la santé de la population ou porter atteinte à la morale. Ils jouiront aussi de la liberté de conscience et enfin des mêmes droits civils que la Constitution et les lois donnent aux Brésiliens eux-mêmes.

Le Gouvernement s'engage à aider les colons dans leur installation, et il a pris des dispositions spéciales pour l'organisation de colonies formées des mêmes éléments qui seront comme le noyau de groupements plus importants dans l'avenir.

DROITS D'IMPORTATION ADDITIONNELS PERÇUS DANS CERTAINS PORTS.

Un supplément récent au tarif brésilien fait connaître que pendant l'année fiscale actuelle il sera perçu un droit d'importation de 2 pour cent en sus sur les marchandises importées par les douanes de Para, de Pernambuco et de Bahia, à l'exception des céréales qui sont déjà soumises à la surtaxe de 2 pour cent or.

POPULATION DE RIO DE JANEIRO.

D'après le "Boletim Hebdomadario de Estadistica Demografo-sanitario," la population de Rio de Janeiro au 20 septembre 1906 était de 628,041 habitants, dont 361,544 hommes et 266,497 femmes. La population du reste du District Fédéral était de 183,265, ce qui fait un total de 811,265 pour le District entier.

RÈGLEMENTS SUR L'IMPORTATION D'ANIMAUX DE REPRODUCTION.

Les règlements établis par le Gouvernement Brésilien au sujet de l'importation d'animaux pour la reproduction ont été publiés le 18 avril 1907. Le Gouvernement y fait aussi connaître quelle subvention ses ressources budgétaires lui permettront d'accorder à ceux qui se lanceront dans cette entreprise.

Conformément au tarif préparé par le Gouvernement, les agriculteurs et éleveurs de bestiaux qui importeront des animaux sains pour la reproduction, seront remboursés des frais de transport depuis le pays d'origine jusqu'à destination. Les chevaux, les bestiaux, les porcs, les moutons, les chèvres, les chiens de berger et la volaille seront appelés à jouir des avantages apportés par ces règlements. On devra inscrire le "pedigree" des animaux sur un registre tenu à cet effet par le Ministère de l'Industrie, des Chemins de Fer et des Travaux Publics, et dès qu'on aura monté la ferme autorisée par le Gouvernement pour

l'élevage et la reproduction et établi la police sanitaire pour l'inspection des animaux venant du pays, on publiera une liste des ports par lesquels on pourra importer des animaux reproducteurs. Lors du débarquement on inscrira avec soin les maladies considérées comme contagieuses et on prendra les mesures préventives nécessaires.

Le transport ne sera fait aux frais du Gouvernement que lorsque les animaux auront été achetés pour l'amélioration du bétail dans le district, soit directement, soit par l'intermédiaire de syndicats et de sociétés agricoles ou par leurs représentants légaux, ou encore lorsqu'on les aura importés pour les expositions agricoles subventionnées par le Gouvernement Fédéral, par celui des états ou par les municipalités. Les animaux venant d'endroits contaminés par les maladies épizootiques ne seront pas transportés gratuitement et les animaux atteints des maladies infectieuses, seront abattus aussitôt après leur arrivée.

CHILI.

MESSAGE PRÉSIDENTIEL.

Le 2 juin, à l'ouverture des Chambres, le Président MONTT a lu un message, dans lequel il a déclaré qu'il espère que le rétablissement des relations diplomatiques entre le Chili et le Pérou réglera la question des affaires territoriales et affermera la solidarité des deux pays.

Les Gouvernements du Chili et de la République Argentine étudient les moyens de faciliter les échanges commerciaux. Le Chili sera représenté à la conférence de La Haye. Le Gouvernement établera sa politique internationale sur les bases de la solidarité. Il faut renouveler la sincère gratitude du Gouvernement et du peuple chilien pour toutes les nations qui ont donné, après la catastrophe du mois d'août, de généreuses marques de sympathie. Les travaux de reconstruction de Valparaiso avancent aussi rapidement que possible. On apportera une attention toute particulière à la construction d'habitations ouvrières. Le Gouvernement est prêt à adhérer aux décisions de l'Union Télégraphique Internationale. La colonisation et l'émigration se développent d'une façon satisfaisante.

Les recettes de 1906 se sont élevées à 183,535,392 piastres, et les dépenses à 169,951,601 piastres. On a calculé que les recettes pour 1907 se monteront à 177,000,000 de piastres et qu'elles suffiront aux dépenses. Les recettes pour 1908 sont calculées à 188,000,000 de piastres, et les dépenses à la même somme.

Quant au commerce international pour 1906, les exportations s'élèvent à 289,513,522.18 piastres or, et les importations à 236,040,901 piastres. La valeur des importations en machinerie utile à l'industrie a dépassé 40,000,000 de piastres. Les exportations de cuivre

figurent pour 28,870,000 piastres et celles du borax pour 4,000,000 de piastres.

L'industrie du bétail augmente considérablement. Les exportations de laines dépassent 10,000,000 de piastres.

Les recettes des douanes pour 1906 se montent à 103,965,318.18 piastres or. Pour les quatre premiers mois de 1907 elles s'élèvent à 36,005,038 piastres. On améliorera le port de Valparaiso et les autres ports de la République là où il y a des difficultés d'embarquement et de débarquement des marchandises.

Le fonds de conversion se monte à 77,282,257.18 piastres or.

On augmentera le nombre des vaisseaux de guerre.

L'année dernière on a terminé 151 kilomètres de voies ferrées et actuellement il y en a 958 kilomètres en voie de construction.

On présentera un projet de loi pour faciliter la construction des chemins de fer et pour libérer de l'impôt international le matériel qui sera introduit dans le pays.

ETATS-UNIS.[a]

COMMERCE AVEC L'AMÉRIQUE LATINE POUR L'ANNÉE FISCALE 1906-7.

Le Bureau des Statistiques vient de publier un rapport sur le commerce fait entre les Etats-Unis et l'Amérique Latine pendant l'année fiscale finissant le 30 juin 1907. D'après ce rapport le commerce entre les pays dont il est question s'est élevé à $600,000,000 environ (importations $350,000,000 et exportations $255,000,000), contre $230,000,000 (importations $155,000,000 et exportations $80,000,000) chiffre atteint il y a dix ans. On comprend dans ces données le commerce avec Porto-Rico, afin de pouvoir établir l'uniformité dans les états comparatifs, Porto-Rico n'étant pas compris dans le Gouvernement des Etats-Unis à cette époque.

En éliminant le commerce de Porto-Rico, des Guyanes et des Indes Occidentales, à l'exception de Saint-Domingue et d'Haïti, avec l'Amérique Latine les chiffres restant donnent aussi un résultat satisfaisant, le commerce total pour l'année 1907 s'élevant à plus de $560,000,000 (exportations $227,304,976 et importations $332,633,460), contre $498,738,804 (importations $292,287,170 et exportations $206,451,634) pour l'année précédente, ce qui fait ressortir une augmentation considérable sur l'année 1897, époque à laquelle les autres pays étaient compris dans le total général.

Pour l'Amérique du Sud seule les importations et exportations se chiffrent à plus de $238,000,000, contre $212,000,000 en 1906; celles

[a] Les chiffres donnant la valeur du commerce fait avec l'Amérique Latine publiés dans le BULLETIN MENSUEL du mois de juillet 1907 se rapportent à l'année 1906 en entier, c'est-à-dire du 1er janvier au 31 décembre.

de l'Amérique Centrale se sont élevées de $36,021,148 à $41,916,042; celles du Mexique, de $109,147,455 à $123,481,514; celles de Cuba, de $132,743,509 à $146,746,964; celles de la République Dominicaine accusant une légère augmentation de $5,104,589 à $5,880,716. Enfin, celles d'Haïti ont été de $4,493,317 en 1906 et de $4,190,782 en 1907, accusant ainsi une légère diminution.

Les exportations dans l'Amérique du Sud se font remarquer surtout au Brésil, qui, sur une augmentation totale de plus de $20,000,000 y figure pour plus de $4,000,000, la plus grande partie des expéditions se composant d'objets manufacturés. Ces derniers constituent 60 pour cent des exportations à destination de Cuba, environ 70 pour cent de celles à destination du Mexique, et environ 85 pour cent de celles à destination de l'Amérique du Centre et du Sud.

Comme on le voit dans la colonne des importations, le Brésil contribue encore pour une large part dans l'augmentation. Sur une augmentation totale de plus de $40,000,000, ce pays y figure pour $17,000,000, spécialement en café et caoutchouc. L'augmentation de $12,500,000 dans la valeur des produits importés de Cuba porte principalement sur le sucre, et les importations venant des autres pays se composent principalement de produits alimentaires et de matières premières pour les manufacturiers.

Voici, par pays, les importations et exportations pour les deux années en question:

Pays.	Importations.		Exportations.	
	1906.	1907.	1906.	1907.
Pays de l'Amérique Centrale:				
Costa Rica	$4,622,426	$4,965,034	$2,338,188	$2,470,986
Guatémala	3,386,317	3,872,558	2,908,655	2,848,864
Honduras	1,724,865	2,296,556	1,632,251	1,833,056
Nicaragua	1,478,408	1,028,166	1,870,852	1,923,111
Panama	1,065,887	1,752,314	12,460,289	16,150,953
San Salvador	1,131,734	1,171,298	1,401,276	1,603,166
Total pour l'Amérique Centrale	13,409,637	15,085,906	22,611,511	26,830,136
Mexique	50,965,177	57,233,416	58,182,278	66,248,098
Cuba	84,979,821	97,441,660	47,763,688	49,305,274
Haïti	1,185,477	1,274,678	3,307,840	2,916,104
Saint Domingue	3,086,338	3,370,809	2,018,251	2,509,817
Amérique du Sud:				
République Argentine	18,379,063	16,715,325	32,673,369	32,163,336
Bolivie			146,798	941,287
Brésil	80,416,524	97,881,158	14,530,471	18,697,547
Chili	16,945,476	18,287,029	8,667,227	10,195,657
Colombie	7,084,487	6,308,680	3,491,420	3,084,718
Equateur	2,632,206	3,059,573	2,009,861	1,726,289
Paraguay	750	3,819	51,917	173,560
Pérou	2,454,943	4,958,202	4,833,207	6,075,739
Uruguay	2,711,570	3,160,891	2,905,573	3,412,785
Venezuela	8,034,701	7,852,214	3,258,133	3,024,629
Total pour l'Amérique du Sud	138,659,720	158,226,891	72,568,036	79,495,547

Les statistiques des Etats-Unis font voir que les importations provenant de l'Amérique Latine en 1906–7 ont dépassé de 132 pour cent celles d'il y a dix ans, tandis que les importations provenant de

tous autres pays n'accusent qu'une augmentation de 76 pour cent. Les exportations des Etats-Unis à destination de l'Amérique Latine en 1907, ont dépassé de 212 pour cent celles de 1897, tandis que les exportations de même origine à destination d'autres pays en 1907 n'ont dépassé que de 68 pour cent celles de 1897.

Cette augmentation du commerce a eu lieu principalement avec la République Argentine, le Brésil, le Chili, l'Amérique du Centre et Cuba.

Les importations provenant de la République Argentine se sont élevées de $10,750,000 en 1897 à environ $17,000,000 en 1907, soit une plus-value d'environ 60 pour cent; d'un autre côté les exportations des Etats-Unis dans la République Argentine ont augmenté d'une manière phénoménale. En 1897 elles étaient de $6,330,000 et en 1907 elles se sont élevées à plus de $32,000,000, soit une plus-value de plus de 400 pour cent.

Il y a dix ans les importations provenant du Brésil étaient de $69,000,000, aujourd'hui elles sont de $98,000,000 environ pour l'année 1907, montrant ainsi une augmentation d'environ 50 pour cent. D'un autre côté les exportations des Etats-Unis au Brésil se sont élevées de $12,500,000 à plus de $18,000,000, soit une augmentation d'un peu plus de 44 pour cent.

Les importations provenant du Chili se sont élevées de $3,750,000 en 1897 à plus de $18,000,000 en 1907, et les exportations des Etats-Unis destinées à ce pays se sont élevées de $2,500,000 à plus de $10,000,000.

Il y a dix ans les importations du Mexique étaient de $19,000,000, aujourd'hui elles sont de plus de $57,000,000, soit une plus-value d'environ 200 pour cent, et les exportations des Etats-Unis au Mexique qui étaient de $23,500,000 sont de plus de $66,000,000, soit une augmentation de 175 pour cent.

Les importations provenant de Cuba qui étaient de $18,500,000 en 1897 sont aujourd'hui de plus de $97,000,000, soit une augmentation d'environ 400 pour cent, et les exportations des Etats-Unis à destination de Cuba qui étaient de $8,250,000 en 1897 sont de plus de $49,000,000 en 1907, soit une plus-value d'environ 500 pour cent.

Les importations provenant de l'Amérique du Centre prise en entier, se sont élevées de $8,500,000 en 1897 à plus de $15,000,000 en 1907, soit une augmentation de 80 pour cent, et les exportations des Etats-Unis à destination de l'Amérique du Centre se sont élevées de $8,250,000 à plus de $26,000,000, soit une augmentation d'environ 225 pour cent, due en grande partie à ce qu'on a compris la République de Panama dans l'Amérique du Centre au lieu de la comprendre dans la Colombie.

Le commerce avec le Mexique, le Brésil et Cuba s'est élevé en 1907 à des chiffres qui n'avaient pas encore été atteints, et bien que les impor-

tations de la République Argentine aient légèrement diminué en les comparant à celles de l'année 1906, elles sont supérieures à celles de l'année 1905.

L'augmentation dans les importations venant de l'Amérique Latine porte principalement sur quelques articles de première importance, tandis que l'augmentation dans les exportations des Etats-Unis dans l'Amérique Latine est répartie sur un grand nombre d'articles, principalement des articles fabriqués. Le sisal (chanvre), le cuivre en saumons, les cuirs et les peaux constituent les principaux articles importés du Mexique; le sisal accusant une augmentation de $10,000,000 en dix ans; le cuivre en saumons et en lingots ayant augmenté de plus de $13,000,000; le minerai de cuivre, d'environ $4,000,000 et les cuirs et peaux de plus de $3,000,000. Dans les importations du Brésil, le café accuse en dix ans une augmentation de plus de $7,000,000 et le caoutchouc en accuse une de plus de $33,000,000. De 1897 en 1907, c'est-à-dire dans les dix dernières années, voici quelle a été l'augmentation dans la valeur des importations de Cuba:

Sucre, $42,000,000; tabac en feuilles, plus de $10,000,000; cigares, $2,000,000.

IMPORTATIONS ET EXPORTATIONS.

On trouvera à la page 434 le dernier rapport du commerce entre les Etats-Unis et l'Amérique Latine, extrait de la compilation faite par le Bureau des Statistiques du Ministère du Commerce et du Travail. Le rapport a trait au mois de juin 1907 et donne un tableau comparatif de ce mois avec le mois correspondant de l'année 1906. Il donne aussi un tableau des douze mois finissant au mois de juin 1907, en les comparant avec la même période de l'année précédente. On sait que les chiffres des différents bureaux de douane montrant les importations et les exportations pour un mois quelconque ne sont reçus au Ministère des Finances que le 20 du mois suivant, et qu'il faut un certain temps pour les compiler et les faire imprimer, de sorte que les résultats pour le mois de juin ne peuvent être publiés avant le mois d'août.

COMMERCE EXTÉRIEUR POUR L'ANNÉE FISCALE 1906–7.

Le commerce extérieur des Etats-Unis pendant l'année fiscale 1906–7, s'élevant à $3,315,114,122, fait ressortir une augmentation extraordinaire dans les importations. Ces dernières qui atteignent le chiffre de $1,434,421,425 accusent une plus-value de plus de $200,000,000 sur l'année 1906, soit plus du double du total pour les années 1898 et 1899. Les exportations qui s'élèvent à $1,880,692,697 font ressortir une augmentation de 53 pour cent sur l'année 1899.

Ces importations et exportations sont réparties de la manière suivante dans les cinq parties du monde:

	Importations—		Exportations—	
	1906.	1907.	1906.	1907.
Europe	$633,202,184	$747,291,255	$1,200,166,036	$1,298,293,999
Amérique du Nord	235,353,322	263,576,349	308,382,972	349,840,641
Amérique du Sud	140,422,876	160,165,537	75,159,781	82,157,174
Asie	180,095,671	212,475,427	105,451,610	92,703,664
Océanie	24,709,658	29,785,393	35,141,751	41,186,193
Afrique	12,628,735	21,127,464	19,562,350	16,511,026

MEXIQUE.

TITRES MINIERS EN 1907.

Le rapport officiel publié dernièrement par le Gouvernement mexicain montre que pendant les six premiers mois de l'année fiscale 1906–7, on a délivré 2,000 titres miniers embrassant une superficie de 30,438 hectares, soit environ 75,213 acres.

Dans les six mois précédents on en a délivré 1,801, embrassant une superficie de 32,459 hectares, soit 80,207 acres, de sorte que le total des titres de propriété délivrés pendant l'année 1906 s'élève au chiffre de 3,801 embrassant une superficie de 1,155,420 acres de terrain.

RECETTES DOUANIÈRES PENDANT L'ANNÉE FISCALE 1906-7.

Les statistiques publiées dernièrement par le Ministère des Finances du Mexique montrent que les recettes douanières pour l'année fiscale 1906–7 ont donné les résultats suivants:

	Piastres.
Droits d'importation	52,282,673.14
Droits d'exportation	1,061,393.98
Droits de port	1,143,586.70
Total	54,487,653.82

En comparant ce total avec celui de l'année fiscale précédente, qui s'est élevé à 47,748,515.81 piastres, il ressort une augmentation de 6,739,138.01 piastres en faveur de l'année 1906–7.

CONVENTION FAITE AVEC LE SAN SALVADOR POUR L'ÉCHANGE DE COLIS POSTAUX.

Le "Boletín Postal" du Bureau général des Postes de la république mexicaine publie dans son numéro du mois de mai 1907, le texte de la convention signée avec le San Salvador pour l'échange de colis postaux. Cette convention a été signée dans la ville de Mexico le 13 octobre 1906 et promulguée le 17 mai 1907 par le Président Díaz.

LA PIASTRE MEXICAINE ET SES ÉQUIVALENTS EN ARGENT.

Le Président de la République Mexicaine a établi, pour le second semestre de l'année 1907, le tableau suivant des équivalents de la piastre mexicaine en monnaie d'argent des pays à l'étalon d'argent et seulement pour l'usage exclusif des statistiques à établir.

Pays.	Nom des pièces.	Valeur de la piastre mexicaine dans les différents pays.
Bolivie	Bolivien	0.99
Guatémala	Piastre	.99
San Salvador	id.	.99
Honduras	id.	.99
Nicaragua	id.	.99
Perse	Kran	5.38
Chine	Tael	.5688

LE TRAFIC INTERNATIONAL DE L'ISTHME DE TEHUANTEPEC.

Dans la première semaine de juin 30,000 tonnes de sucre venant des îles Hawaï ont traversé l'isthme de Tehuantepec pour être embarquées à Puerto Mexico, à destination de Philadelphie.

Ce sucre est apporté par les vapeurs *Mexican*, *Nebraskan* et *Arizonian*, de la ligne "American Hawaï." Vu le développement du service, cette ligne ajoutera bientôt un nouveau bâtiment, l'*Isthmian*, à sa flotte. Ce navire jaugera 10,000 tonnes; sa vitesse sera de 17 nœuds, et il sera aménagé de façon à pouvoir transporter 500 passagers de cabine.

SAN SALVADOR.

LOI BUDGÉTAIRE POUR L'ANNÉE 1907–8.

Le "Diario Oficial" de San Salvador publie dans son numéro du 7 juin 1907, le texte de la loi budgétaire de 1907–8, approuvée le 15 mai 1907 par l'Assemblée nationale. Les recettes sont estimées à $8,734,150 et les dépenses à $10,610,846.12, ce qui fait ressortir un déficit de $1,876,696.12.
